Section 1. By permanent maintenance-of-way employés is meant men employed in the Track, Bridge and Building Department, signalmen (not telegraphers), pumpmen and pump repairers on such parts of the line as are open for traffic, and who have been in the maintenance-of-way service continuously for nine months or more or who have had nine months' cumulative service during the two years immediately preceding, these will hereafter be referred to as employés. Labourers in extra gangs, unless those practically engaged all the year round, will not be ranked as permanent employés.

Section 2. Ten hours shall constitute a day's work excepting for track and bridge watchmen, signalmen (except when employed as telegraph operators) pumpmen and pump repairers. When required to work in excess of these hours, time will be allowed for such excess at the rate of time and one-half. Time and a half will be allowed for Sundays, Christmas and New Year's Day. Employés called for or kept on duty after having been relieved at six p.m., on regular working days shall receive a minimum of four hours, and shall not be required to suspend work in schedule working hours to equalize overtime.

(*a*) Twelve hours will constitute a day's work for bridge and track watchmen, signalmen, pumpmen and pump repairers. When required to work more than twelve hours straight time will be allowed.

(*b*) In emergencies employés will not be required to work more than twenty-four hours continuously without a rest of eight hours.

(*c*) Employés detained or travelling on orders of the Company after regular working hours will be allowed straight time.

(*d*) Foremen will be allowed straight time for wet days, provided they remain on duty.

(*e*) In computing time one hour will be allowed for thirty to sixty minutes. For less than thirty minutes no allowance will be made.

(*f*) When the Company's interests do not suffer thereby shopmen will be allowed at their request to quit work at noon (12K) on Saturdays during the summer months. On being required to work after these hours overtime will not begin until six p.m. or 18K.

(*g*) Employés transferred by the Company to the Construction Department will not lose their seniority standing as employés.

Section 3. Employés will be promoted hereafter on their respective Superintendent's Division in order of seniority, provided they are qualified. Senior employés shall be advised of vacancies or of any new appointments(except official positions) that may occur in the Department in which they are employed, and their applications, if presented within ten days will be considered. Employés may be transferred from one division to another for extra gang work, or on the opening of new lines, or when the necessary qualified men for maintenance-of-way work are not obtainable on the Division.

(*a*) Employés refusing promotion become junior to employés accepting such promotion.

(*b*) An employé transferred to another Department at his own request or transferred from the Bridge and Building Department to the Road Master's Department or *vice versa* will lose his seniority standing.

(*c*) Employés leaving the service of the Company when their services are required in event of re-employment will rank as new men.

(*d*) A list of all employés will be prepared for each Superintendent's Division and such list will show the seniority standing of each employé. The lists will be revised from time to time to agree with length of service and promotions made and a copy will be furnished to representative of employés. They will be open for correction on proper representation by the employé to the head of his Department.

(*e*) In the event of reduction in the number of men employed those longest in the service shall have preference of employment.

(*f*) The position of track and bridge watchmen and signalmen at crossings (not interlocked) is not one subject to the general rules of promotion, being intended to take care of men in any Department who become unfitted for other service.

Section 4. No employé shall be suspended (except for investigation) or discharged until his case has been investigated and he has been proven guilty of the offence charged, the decision in such case to be arrived at within ten days from date of suspension. If an employé be found blameless he will be re-instated and paid at schedule wages for time lost, and will be reimbursed reasonable expenses if away from home in such case. If detained more than ten days at Company's instance, awaiting decision, he will be paid schedule wages for all time lost in excess of ten days regardless of decision reached. An employé may have the assistance of another employé during the investigation should he so desire.

A written statement setting forth the result of investigation and the reasons therefor will, if requested, be furnished by the Company to the employé or employés affected.

(*a*) Should an employé at any time consider himself unjustly treated for any cause whatsoever he shall be entitled to a fair and impartial investigation within thirty days from date of complaint by him to his superior officer in writing, and a decision shall be given him in writing within ten days thereafter.

(*b*) Appeals from decisions must be made in writing by the employé through his Road Master or Bridge and Building

Master within fifteen days after being advised of such decision, and should an appeal be sustained the employé shall be re-established and he shall be recompensed at the regular rate of pay for all time lost.

Section 5. Leave of absence and free transportation will be granted to members of duly appointed Committees for the adjustment of matters in dispute between the Company and employés so far as is consistent with good service within ten days after request in writing has been made on the proper officer.

Section 6. Employés taken off their regular sections to work temporarily will be compensated for board and lodging expenses they necessarily incur.

(*a*) Bridge and building employés taken from their place of residence or boarding outfits will be compensated for the expenses they incur, such expenses not to exceed 75 cents per day on eastern lines and $1 per day on western lines.

(*b*) Foreman taken from their gangs for any reason for one day or more will be relieved of the duties of foremen during their absence and the relieving foreman will be paid the rate of foreman during the absence of the regular foreman.

(*c*) A regular section foreman having his gang increased to over twenty men for fourteen days, or over, shall receive extra gang foreman's rates.

Section 7. Employés required to attend to and light semaphore and switch lamps before or after their regular hours will receive schedule rate of sectionmen's pay. Where lamps are located at more than half a mile from the station they will be attended to in regular working hours. Employés required to walk track to attend lamps on Sundays, shall receive wages at the rate of time and one-quarter. In terminal and large yards where the lampman's duties require him on duty all day they will receive time and one-quarter on Sundays, Christmas and New Year's Day.

(*a*) Employés shall be paid straight time while attending to fires in tanks or pump houses after their regular hours.

Section 8. Employés called out for emergency work outside of their regular working limits requiring their absence beyond their regular working hours will be supplied with boarding cars or given an opportunity to procure meals when desirable and practicable. No employé will be required to work more than seven hours without food and shall receive time and one-half upon being called to work on emergency or wreck work.

Section 9. The Company will keep section houses in good repair, the cost of repairs other than ordinary wear and tear will be charged to occupants.

(*a*) Section houses shall be for the use of section foremen and their families and regular men and when necessary for telegraph operators. Their surroundings must be kept clean by occupants.

(*b*) At city points where there are no section houses the section foreman shall receive $7 additional per month, and at all other points where there are no section houses the Company shall pay $4 additional per month.

(*c*) Where water is transported for the use of section gangs good water and suitable sunken tanks with pumps will be provided.

Section 10. Employés will be granted leave of absence and passes or reduced rates in accordance with the current general regulations of the Company.

(*a*) Opportunity and free transportation will be given to employés for getting to their places of residence at week ends when the Company's interests do not suffer thereby.

(*b*) Employés will be granted free transportation and leave of absence four times each year to attend their meetings. Such free transportation will not extend beyond their Superintendent's Division and the leave of absence will not exceed two days, and then only consistent with good service and provided the Company is not put to additional expense.

(*c*) Employés laid off through reduction when re-engaged within one year will be granted free transportation to place of work over General Superintendent's Division on which he was formerly employed.

Section 11. Bridge and building gangs shall be composed of:

(1) Foreman;

(2) Carpenters, who shall be skilled

mechanics in house and bench work, and have a proper kit of carpenter's tools.

(3) Bridge men, who shall be rough carpenters, expert saw, axe and hammer men and have a general experience in bridge work.

(4) Bridge labourers, who shall be strong, handy men and who shall perform such work as may be assigned to them.

RATES OF PAY.

Atlantic Division.

Section foremen:	Per day.
At West St. John, Bay Shore, McAdam and Brownville Jct. Yards	2.95
At Fairville Yards	2.85
At Fredericton (Section F.1) Woodstock, St. Stephen and Aroostook Yards	2.70
At all other points	2.55
Assistant foremen in yards	2.55
Sectionmen:	
At West St. John, Bay Shore, Fairville and McAdam yards	1.90
At all other points in Maine	1.90
At all other points	1.80
Foremen extra gangs	$2.65 to 3.80
(Foremen in charge of steel, ballast and other large or important gangs to receive maximum rate)	
Assistant foremen extra gangs, a minimum rate of	2.50
General foremen (per month and expenses)	85.00

Above rules and rates of pay will not be changed unless on sixty (60) days' notice, given between the first day of May and the first day of November of any year.

(Sgd.) D. McGibbon,
Chairman.
W. T. J. Lee,
For employés.

LETTER AMENDING REPORT OF BOARD.

To the Honorable
W. L. Mackenzie King, C.M.G.,
Minister of Labour,
Ottawa.

In the matter of a dispute between the Canadian Pacific Railway Company and its permanent maintenance-of-way employés.

The undersigned members, a majority of the Board of Conciliation appointed under the Act in this matter, have the honour to submit the following report to you:

Through an error of the stenographer in presenting to you the report, the figures after the word, "Carpenters" in the Ontario Division rates of pay read "$2.25. This should read $2.75.

In the Pacific Division, on page eight thereof, below the words "Assistant Foreman, extra gangs" should read the following, "Snow plow or flanger foreman when called on for duty, per hour, and expenses 45 cents."

All of which is respectfully submitted. Dated this 7th day of March, 1911.

(Sgd.) D. McGibbon,
Chairman.
W. T. J. Lee,
For the employés.

(The amendments set forth above have been incorporated in the text of the report as printed.)

Text of Minority Report.

Hon. W. L. Mackenzie King, C.M.G.,
Minister of Labour,
Ottawa.

In the matter of dispute between the Canadian Pacific Railway Company and its permanent maintenance-of-way employés.

I have carefully examined a copy of the report made to you in this case bearing the signatures of my two colleagues on the Conciliation Board, and regret that I find myself unable to agree with their recommendations regarding the rules, the carrying out of which in many instances would be impracticable and hazardous, as any

person familiar with railway operation must at once admit.

I also emphatically disagree with the exorbitant increases in the rates of pay recommended, and against the injustice of which I formally protested at a meeting of the Board held on February 1. A copy of my objections were forwarded to Judge McGibbon, at Brampton, on February 2, enclosed with the following letter:—

"February 2, 1911.

"Dear Judge McGibbon,—

"I enclose herewith as promised, a copy of my views (read yesterday) regarding the demands of the Canadian Pacific Railway maintenance-of-way men for increased pay.

"With more than forty years experience in railway service, commencing as a water-boy on construction, and performing every kind of track maintenance work for about ten years until appointed roadmaster, and thereafter continuously for more than thrty years in charge of all grades of employés in this branch of the service, I feel that I may fairly lay claim to a reasonable understanding of their various duties, responsibilities and general conditions, and therefore the merits of their demands in this case.

"With this life-long and intimate association you will, I am sure, believe that I have an enduring sympathy for and the deepest interest in any proper movement towards the uplifting and general welfare of the large army of faithful, honest and industrious men engaged in this class of work, but the indisputable evidence including statements of wages paid by other railways for similar service, leaves no room for conclusions other than those submitted herewith.

"My views have been rather hastily thrown together, owing to pressure of other work, therefore, please consider them as purely tentative, and I may wish later to revise them somewhat.

"Trusting, however, that the data may be of some assistance to you, I am,

"Sincerely yours,

(*Signed*) F. H. McGuigan."

The following is a copy of the enclosure referred to in the above letter:—

"The most important question at issue in this dispute is the demand for increased wages, as set forth in the petition filed with the Honourable the Minister of Labour by the representatives of maintenance-of-way employés.

"The three reasons given in support of this demand are:—

"*First*—Increased responsibilities;

"*Second*—Increased cost of living;

"*Third*—Ability to pay.

"The representatives of the men at the several hearings made strenuous efforts to justify these contentions.

"The first reason, 'Increased responsibilities,' was denied by the Company's officials, who contended that the plea was unfounded, and absurd, in support of which they enumerated extensive substantial improvements which had been made on their lines in recent years. These included reduction of grades, reduction of curvature, improved drainage, strengthening embankments and the roadway generally, also by largely increasing the number of cross ties per mile, relaying heavier and stronger rails, and thoroughly ballasting their tracks, and by replacing wooden bridges, trestles and culverts with permanent steel structures and masonry. These facts were pressed home so forcibly by General Manager Leonard, at the Montreal hearings, that Mr. Low, President of the Maintenance-of-Way Organization, frankly admitted that responsibilities of the maintenance-of-way men on the Canadian Pacific Railway had not increased, but had actually been lessened.

"As to the second reason, 'Increased cost of living,' the Company contended that the advances which had been made in the rates of pay were greater than the percentage of increase in the cost of living, which seems borne out by the figures submitted.

"It was further contended by the Company that a majority of their maintenance of-way men were but slightly affected by the increased cost of living, as fifty to sixty per cent. of the men employed in this Department, especially on the lines west of Sudbury, live or board in the boarding camps, boarding cars, and boarding houses provided by the Com-

pany, and that with few exceptions these men are still paying exactly the same rates as paid five years ago, namely, $4 per week on some districts, and $4.25 per week on others, and that the only increases made had been at about half a dozen boarding places, where the rates had been raised only 25 cents per week, or equal to $13 a year. Against this is an increase in wages of approximately 30 cents per day, or about $93 a year.

"As to the third reason, viz., 'Ability to pay.' Before considering this feature of the dispute, it is important to first determine whether or not any increase in wages is actually warranted. For guidance in reaching a conclusion on this point we ascertained the rates paid by numerous other large railways, for similar service.

"In addition to other data, the following comprehensive table compiled by Mr. J. L. Payne, Comptroller of Railways and Canals for the Dominion of Canada, shows the number of officers and employés of each class, and their average rates of pay on the railways of Canada, as compared with those of the United States, comparison being on a basis of 100 mile units:—

	United States		Canada	
	No. per 100 miles	Aver. Daily Pay	No. per 100 miles	Aver. Daily Pay.
General officers	2	$12.67	2	$10.72
Other officers	3	6.40	3	4.73
General office clerks	30	2.31	28	1.94
Station agents	15	2.08	12	2.16

Switch tenders, crossing tenders and watchmen	19	1.73	7	1.57
Operators	17	2.30	12	2.20
Floating equipment	4	2.31	1	2.19
All others	90	1.98	71	1.95

"The foregoing tables clearly show that in nearly every grade of railway employment the average wage rates in the United States are much higher than in Canada. The notable exceptions are the *higher wages paid to maintenance-of-way employés by the Canadian roads*, as follows:—

	Average Rates U.S. Railways	Average Rates Canadian Railways.
Section foremen	$1.96	$2.18
Other trackmen	1.38	1.58
Carpenters	2.43	2.52

"The above comparison shows that the average rates paid section foremen by the Canadian roads is 22 cents, other trackmen 20 cents, and carpenters 9 cents per day higher than paid in the United States.

"If the wages paid by the Canadian Pacific Railway Company be compared with the wages paid by its principal competitors among the great railways in the United States in contiguous territory west of Port Arthur, namely, the Northern Pacific Railway Company, the Great Northern Railway Company and the Chicago, Milwaukee & St. Paul Railway Company, it will be seen that these lines pay their sectionmen (track labourers) only $1.35 and $1.45 per day, as against $1.70 and 1.75 paid by the Canadian Pacific Railway Company, making the latter rates 30 to 35 cents a day more than paid by any of the roads mentioned, the same ratio of difference in rates existing throughout all branches of the maintenance-of-way service, and showing the Canadian Pacific Railway Company wages to be more than twenty-five per cent. higher than paid by the above-named railways for similar service.

"Notwithstanding this substantial difference of a twenty-five per cent. higher rate in their favour, the men in their petition are demanding further increases ranging from 30 *cents to* 95 *cents per day*, which, if granted, would give an average of about 65 cents per day, or nearly fifty per cent. more than is paid for similar service by competing lines in the Western States. The wages paid maintenance-of-way employés by the Canadian Pacific Railway Company, on lines east of Port Arthur, are also higher in the same relative proportion than paid by competing lines.

"For these reasons this Board cannot justify any recommendation, or even a

suggestion to grant the increases asked for by this large body of men, when it is so clearly shown that they are already receiving an average of about twenty-five per cent. more than the wages paid for the same class of service on competing lines. Such action would be a grave injustice, not only to the Canadian Pacific Railway Company, but to all other railways, and to all other employers of labour throughout the Dominion, as it would establish a most pernicious principle, and a far-reaching precedent affecting the whole industrial world.

"This great railway, extending as it does from the Atlantic to the Pacific Ocean, passing through and serving all of the great cities and industrial centres, and being one of the most potent factors in the commercial, the industrial and the agricultural life of the Dominion, has necessarily become a dominating force in regulating the wage-scale of the whole country. Therefore, any decision, recommendation or suggestion, favouring increased compensation to employés, on the principle of 'ability to pay,' would be illogical, unwise and dangerous, as it would be an incentive to labour of every class to make unreasonable demands upon their employers, on similar grounds, and would inevitably lead to disputes and conflicts, which would prove disastrous to both employers and employés, and seriously retard and interrupt the development of Canada."

During the meetings of the Board, numerous schedules were presented showing the rates paid by other railways for similar work, and I pressed repeatedly for reasons justifying such recommendations as my colleagues seemed disposed to make, but was never able to obtain any, other than that the men demanded the schedule presented, and it was intimated that if not granted they would strike.

I am therefore unable to determine upon what ground my colleagues justify the increases recommended, as they are unsupported by evidence, reason or justice, and are unparalleled in the history of wage adjustment for this class of service, the law of supply and demand, and the rates paid for similar service, by competing lines, being entirely ignored. It seems reasonable, however, to assume that the following circumstances have influenced their action.

The maintenance-of-way employés some months ago made demands simultaneously for increased pay and radical changes in rules on the three principal railways in Western Canada, namely, the Canadian Pacific, Canadian Northern, and Grand Trunk Pacific, and on the Canadian Pacific Railway in Eastern Canada, with the result that Conciliation Boards were appointed for all three lines, these three Boards were composed of the same men, with the exception that Mr. J. W. Dawsey was appointed to represent the Grand Trunk Pacific Railway Company. A decision in the case of the latter line was arrived at by my colleagues some weeks ago.

The rules and increases in pay recommended by my colleagues for the entire Canadian Pacific Railway System are approximately the same (although in many instances higher) as recommended by them for the Grand Trunk Pacific. Their recommendation, in the case of the Canadian Pacific Railway Company, therefore, became an absolute necessity in order to justify their conclusions in the case of the Grand Trunk Pacific Railway Company, which in my opinion are unjust and unreasonable, have no foundation other than sentiment, and are so totally adverse to the principle of conciliation that I cannot too strongly emphasize the gross injustice which, in my opinion, has been done that Company.

The recommendations of my colleagues regarding the rules, contain many inaccuracies and contradictions, are impossible of execution, and inconsistent, in that in much of the territory where work and conditions are exactly the same the rates vary, although they have been the same for many years past, and embrace many employés not under the maintenance-of-way department, and who are covered by agreements with other organizations. They also establish conditions differing entirely from those of employés in other branches of the service working with them and which, if extended, would involve many millions of dollars per annum in increased wages.

In some instances the award is higher on Eastern than on Western lines, although the rates of pay for labour and service of every kind have always been lower in the East, and my colleagues have admitted in their report that expenses in the East are 75 as against 100 in the West.

In some cases, where my colleagues and myself had agreed, they have even departed from such agreement.

In cities where section foremen have received extra wages on account of the Company not supplying houses free, or for small charge, it is recommended that these men receive an additional $7 per month, although the wage is fixed higher and has always been higher, to cover this very condition—in other words a double allowance is recommended.

While the evidence submitted does not in my opinion warrant a general increase in the existing rates, these employés are now receiving higher wages, and working under admittedly more favourable conditions than similar employés on other railways, but notwithstanding those admitted facts, I would, for the sole purpose of continuing the pleasant relations existing between the Company and their maintenance-of-way employés, recommend that the Company grant an increase of 15 cents per day to foremen, and 10 cents per day to labourers and others, to become effective on March 1, 1911. As no claim was made by the men, nor was the subject of the date the schedule should become effective even discussed at any meeting of the Board, there is no reason the recommendation should be retroactive, and it would be an injustice to make it so, inasmuch as during the winter months the men are paid for ten hours' work, while their actual service, on account of day-light hours, does not exceed eight hours per day.

I enclose herewith schedule of rates based on this recommendation, together with the rules governing the service, which I recommend.

(*Signed*) F. H. McGUIGAN,
For the Company.

TORONTO, March 4, 1911.

Rules and Rates Governing the Maintenance-of-way Employees of the Canadian Pacific Railway Lines in Canada.

Section 1. By permanent Maintenance-of-way employés is meant employés who take their orders from the Roadmasters and Bridge and Building Masters on such parts of the line as are open for traffic, and who have been in the Maintenance-of-way service continuously for one year or more, or who have had one year cumulative service during the three years immediately preceding, will hereinafter be referred to as "employés." Labourers in extra gangs, unless those practically engaged all the year around, will not be ranked as "permanent employés."

Section 2. Ten hours shall constitute a day's work, excepting for Track and Bridge Watchmen, Signal Repair men, Pumpmen and Pump Repairers. When required to work in excess of these hours, time will be allowed for such excess, at the rate of time and a half. Time and one-half will be allowed on Sundays and Christmas Day. If called out after 7. p.m. a minimum of three hours straight time will be allowed.

(*a*) The hours of track and bridge watchmen, signal repair men, pumpmen and pump repairers, will be regulated by the Company. Twelve hours in each twenty-four hours, either continuous or intermittent, will constitute a day, but they shall receive at least eight hours' continuous rest in each twenty-four hours.

(*b*) In emergencies, employés will not be required to work more than twenty-four hours continuously without a rest of eight hours.

(*c*) Section foremen and sectionmen, travelling on orders of the Company to and from work, after regular hours outside of their regular sections, will be allowed straight time. Members of bridge and building gangs travelling on their regular sections on orders of the Company, to and from work, after regular hours, will be allowed straight time, except when provided with boarding and sleeping cars to carry them to and

from work. Members of regular bridge and building gangs, travelling in boarding cars on Sundays, between 7 a.m. and 6 p.m. will be allowed straight time.

(*d*) Foremen will be allowed straight time for wet days, provided they remain on duty.

(*e*) In computing time one hour will be allowed for thirty to sixty minutes. For less than thirty minutes no allowance will be made.

(*f*) When the Company's interests do not suffer thereby, shopmen will be allowed, at their request, to quit work on Saturdays during the summer months at 12 o'clock noon. If required to work after that hour overtime will not begin until 6 p.m. or 18K.

(*g*) Employés transferred by the Company to the construction department will not lose their seniority standing as employés.

Section 3. Employés will be promoted hereafter on their respective superintendent's division in order of seniority, provided they are qualified. Senior employés shall be advised of vacancies or new appointments in their Department except official positions, and their applications if presented within ten days will be considered. Employés may be transferred from one division to another for extra gang work or on the opening of new lines or when the necessary qualified men for maintenance-of-way work are not obtainable on the division.

(*a*) Employés refusing promotion become junior to employés accepting such promotion.

(*b*) An employé transferred to another Department at his own request or transferred from the Bridge and building department to the roadmaster's department, or vice versa, will lose his seniority standing.

(*c*) Employés leaving the service of the Company when their services are required, in event of re-employment will rank as new men.

(*d*) A list of all employés will be prepared for each Superintendent's division and such lists will show the seniority standing of each employé. The lists will be revised from time to time to agree with length of service and promotions made, and copy will be furnished representative of employés. They will be open for correction on proper representation by the employé to the head of his department.

(*e*) In the event of reduction in the number of men employed, those longest in the service shall have preference of employment.

(*f*) The position of track and bridge watchmen is not one subject to the general rules for promotion, being intended to take care of men in any department who become unfitted for other service.

Section 4. Any employés suspended or dismissed or who consider they have been unjustly treated will, on request in writing, receive full and impartial hearings and will be advised of decisions reached within fifteen days of such hearing. Should investigation show suspension, dismissal or treatment was unjust, time will be allowed and employé reinstated. Appeals from decisions must be made in writing by the employé through his roadmaster or bridge and building master within fifteen days after advised of such decision.

Section 5. Leave of absence and free transportation will be granted to members of duly appointed committees for the adjustment of matters in dispute between the Company and employés, as far as is consistent with good service, within ten days after request in writing has been made on the proper officer.

Section 6. Employés taken off their regular sections to work temporarily on snow or tie trains or other work will be compensated for the boarding and lodging expenses they necessarily incur.

(*a*) Bridge and building employés, except pumpmen taken from their places of residence or boarding outfits overnight will be compensated for the extra expense they necessarily incur, such expense not to exceed fifty cents per day on eastern lines and 75 cents on western lines.

(*b*) Foremen ordered away from their gangs for one day or more will be relieved of the duties of foremen during their absence.

Section 7. Employés required to attend to and light semaphore or switch

lamps before or after their regular hours, will receive therefor four dollars per month for six or less lamps, and fifty cents per month per lamp for those in excess of six. When semaphore lamps are included, fifty cents per lamp per month additional will be allowed. Where lamps are located at a distance from employés' residence, they will be attended to in regular working hours.

Section 8. Employés called out for work outside of their regular working limits, requiring their absence beyond regular working hours will be supplied with boarding cars or given an opportunity to procure meals when desirable and practicable; no employé will be required to work more than seven hours without food.

Section 9. The Company will keep section houses in good repair; the cost of repairs other than ordinary wear and tear will be charged to occupants.

(*a*) Section houses shall be for the use of foremen and their families, and when necessary for telegraph operators, and members and regular men of their permanent gangs. Their surroundings must be kept clean by occupants.

Section 10. Employés will be granted leave of absence and passes or reduced rates in accordance with the current general regulations of the Company.

(*a*) Opportunity and free transportation will be given to employés for getting to their place of residence at week ends, when the Company's interests do not suffer thereby.

(*b*) Employés will be granted leave of absence and free transportation four times each year. Such free transportation will not extend beyond their superintendent's division, and the leave of absence will not exceed two days, and then only when consistent with good service, and provided the Company is not put to additional expense.

(*c*) Employés laid off through reduction when re-engaged within one year will be granted free transportation to place of work over general division on which formerly employed.

Section 11. Bridge and buliding gangs shall be composed of:—

1st. Foreman.

2nd. Carpenters, who shall be skilled mechanics in house and bench work and have a proper kit of carpenters' tools.

3rd. Bridgemen, who shall be rough carpenters, expert saw, axe and hammer men, and have a general experience in bridge work.

4th. Bridge labourers, who shall be strong, handy men, and who shall perform such work as may be assigned to them.

RATES OF PAY.

Atlantic Division.

Section foreman:	
At West St. John, Bay Shore, McAdam and Brownville Jct. Yards	$2.70
At Fairville Yard	2.60
At Woodstock and St. Stephen Yards	2.45
At all other points in Canada	2.30
Assistant section foremen in yards	2.30
Sectionmen:	
At West St. John, Bay Shore, Fairville and McAdam Yards	1.75
At all other points in Canada	1.65
Foremen extra gangs	2.45 to 3.45
(Foremen in charge of steel, ballast and other large or important extra gangs to receive maximum rate.)	
Assistant foremen extra gangs, a minimum of	2.30
Section foremen in charge of snow plows while in operation	3.20
Bridge and building men:	
Foremen	$2.95 to 3.10
Carpenters	2.50
Bridgemen	$2.05 to 2.50
Foremen painters	2.85
Painters	$2.05 to 2.30
Pump repairers, per mo	70.00
Pumpmen (1 pump) per month	48.50
Pumpmen (2 pumps) "	58.50
For each additional pump	5.00

Eastern Division.

Section foremen:

At Montreal (Place Viger, Glen Yard and Windsor Station), Hochelaga, Angus, Mile End and Outremont Yards	2.75
At Ottawa (Union Station and Sussex St.) and N.Y. & O. Jct. Yards	2.70
At Megantic, Farnham (Section 106), Carleton Jct. and Smith's Falls Yards	2.65
At Sherbrooke, Richford, Newport, Quebec, Hull, Brockville and Prescott Yards	2.60
At Highlands, St. Johns, Montreal Jct., St. Luc Jct., Western Jct., Three Rivers, St. Therese, Arnprior, Pembroke and Renfrew Yards	2.45
At all other points	2.30
Assistant section foremen in yards	2.30

Sectionmen:

At Megantic, Sherbrooke, Richford, Newport, Farnham (Sec. 106), Quebec, Montreal, (Place Viger, Glen Yard and Windsor Station) Hochelaga, Angus, Mile End, Outremont, St. Luc Jct., Montreal Jct., Western Jct.,) Ottawa (Union Station and Sussex St.), N.Y. &. O. Jct. Hull, Carleton Jct., Smith's Falls, Brockville and Prescott Yards	1.75

Sectionmen:

At all other points in Canada	1.65

Foreman extra gangs: $2.45 to 3.45
(Foremen in charge of steel, ballast and other large or important extra gangs to receive maximum rate.)

Assistant foremen extra gangs, a minimum of	2.30
Section foremen in charge of snow plows while in operation	3.20

Bridge and building men:

Foremen	$2.95 to 3.10
Carpenters	2.50
Bridge and building men	$2.05 to 2.50
Foremen painters	2.85
Painters	$2.05 to 2.30
Signal repairmen, present rate and 10 cents per day.	

Pumpmen: per month.

Pump repairers	$75.00 to 80.00
Pumpmen (1 pump)	48.50
Pumpmen (2 pumps)	58.50
For each additional pump	5.00

Ontario Division.

Section foremen:

At Toronto, Parkdale, Toronto Jct. and North Toronto Yards	$2.75
At London East Yard	2.70
At Windsor, Havelock, Hamilton, Chatham, Owen Sound, Peterborough, Woodstock, London West and Don (Sec. D2) Yards	2.60
At Leaside Jct., Perth, Orangeville, Galt, Sharbot Lake and Tweed Yards	2.45
At all other points	2.30
Assistant section foremen in yards	2.30

Sectionmen

At Toronto, Parkdale, Toronto Jct., North Toronto, Leaside Jct., Don (Sec. D2), London East, Windsor, Havelock, Hamilton, Chatham, Owen Sound, Peterborough, Woodstock and London West Yards	1.75
At all other points	1.65

Foremen extra gangs: $2.45 to $3.45
(Foremen in charge of steel, ballast and other large or important extra gangs to receive maximum rate.)

Assistant foremen extra gangs, a minimum of	2.30
Section foremen in charge of snow plows while in operation	3.20

Bridge and building men:

Foremen	$2.95 to $3.10
Carpenters	2.50
Bridgemen	$2.05 to 2.50
Foremen painters	2.85
Painters	$2.05 to 2.30
Blacksmiths	2.55

Signal repairmen, present rate and 10 cents per day.

Pumpmen:	per month.
Pump repairers	$75.00 to $80.00
Pumpmen (1 pump) per month	48.50
Pumpmen (2 pumps) "	58.50
For each additional pump	5.00

LAKE SUPERIOR DIVISION.

Section foremen:	Per day.
At Chalk River, North Bay, Sudbury, Webbwood and Sault Ste. Marie Yards	2.70
At Cartier, Chapleau, White River and Schreiber Yards	2.75
At other points east of Cartier	2.35
At other points west of Cartier	2.50
Sectionmen:	
East of Cartier	1.70
Cartier and West	1.80
Foremen extra gangs	$2.60 to 3.60
(Foremen in charge of steel, ballast and other large or important extra gangs to receive maximum rate.)	
Assistant foremen extra gangs:	
East of Cartier a minimum of	2.35
West of Cartier a minimum of	2.50
Section foremen in charge of snow plows while in operation	3.35
Bridge and building men:	
Foremen	$3.01 to 3.35
Carpenters:	
East of Cartier	2.60
West of Cartier	2.70
Bridgemen:	
East of Cartier	$2.10 to 2.60
West of Cartier	$2.20 to 2.70
Foremen painters:	
East of Cartier	3.10
West of Cartier	3.35
Painters:	
East of Cartier	2 25
West of Cartier	2.50

Pumpmen:	Per month.
Pump repairers	$80.00 to $85.00
East of Cartier (1 pump)	53.50
Cartier and West (1 pump)	58.50
(For each extra pump add $5.00.)	

CENTRAL DIVISION.

Section foremen:—	
At Winnipeg, Fort William, Moose Jaw and Brandon Yards	3.05
At Port Arthur, West Fort, Ignace, Kenora, Portage la Prairie, Souris, Lariviere, Estevan, Regina, Broadview Yards	2.85
At all other points	2.70
Assistant section foremen in yards	2.70
Sectionmen:	
At Fort William, Winnipeg, Moose Jaw and Brandon Yards	1.85
At all other points	1.80
Foremen extra gangs	$2.70 to 3.70
Foremen in charge of steel, ballast and other large or important extra gangs to receive maximum rates.)	
Assistant foremen of extra gangs a mimimum of	2.70
Section foremen in charge of snow plows while in operation	3.45
Bridge and building men:	
Foremen	$3.45 to 3.70
Carpenters	3.00 to 3.15
Bridgemen	2.35 to 3.00
Blacksmiths, railway shop rates.	
Foremen painters	3.45
Painters	2.85
Pumpmen:	
Pump repairers, per mo.	$81.00 to 91.00
(and 75 cents per day for expenses when away from headquarters.)	
Pumpmen single pumps	54.50
Pumpmen (2 pumps)	59.50
For each additional pump	5.00

WESTERN DIVISION.

Section foremen:	Per day
At Calgary	3.05
At Swift Current, Medicine Hat, Macleod, Cranbrook Yards	2.85
From Crow's Nest to Kootenay Landing	2.80
All other points	2.70
Assistant Section foremen in yards	2.70
Sectionmen:	
Crow's Nest to Kootenay Landing and Calgary Yard	1.85

At all other points..... 1.80
Foremen extra gangs from2.70 to 3.85
(Foremen in charge of steel, ballast and other large or important extra gangs to receive maximum rates.)
Assistant foremen extra gangs a minimum of 2.70
Section foremen in charge of snow plows while in operation..... 3.45

Bridge and building men: Per day.
Foremen .....$3.45 to 3.70
Carpenters ..... 3.00 to 3.15
Bridgemen ..... 2.35 to 3.00
Blacksmiths, railway shop rates.
Foremen painters..... 3.45
Painters..... 2.85

Pumpmen:
Pump repairers, from $81.00 to $91.00 per month.
(and 75 cents per day for expenses when away from headquarters.)
Pumpmen single pumps, per m.54.50
Pumpmen (2 pumps) per month59.50
For each additional pump..... 5.00

Pacific Division.

Section foremen: Per day
At Vancouver Yard..... 3.05
At Vancouver (Section 1) New Westminster, North Bend, Kamloops, Revelstoke, Field, Rogers Pass, Laggan, Nelson, Smelter Junction, Rossland, Eholt and Phoenix Yards.. 2.85
At other points Kootenay Brchs. 2.80
At all other points..... 2.70
Assistant section foremen in yards .....$2.70 to 2.80

Sectionmen:
At Vancouver Yard..... 1.85
At all other points on Kootenay Branches..... 1.85
At all other points..... 1.80
Foremen extra gangs ..$2.95 to 3.95
(Foremen in charge of steel, ballast and other large or important extra gangs to receive maximum rates.)
Assistant foremen extra gangs.. $2.70 to 2.80
Section foremen in charge of snow plows while in operation..... 3.45
Labourers, extra gangs (permanent)..... 1.95
Track watchmen, per month.... $57.00 to 60.00

Bridge and building men: Per day
Foremen .....$3.45 to 3.70
Carpenters .....$3.00 to 3.15
Bridgemen ..... 2.60 to 3.00
Rivetters ..... 3.10 to 3.35
Foremen painters..... 3.45
Painters..... 2.85
Bridge watchmen, per month ...57.00
Foremen mason gangs, per day.. 3.95
Stone cutters..... 3.35
Masons..... 3.35
Blacksmiths, railway shop rates.
Mason labourers, present rate and10cts.

Pumpmen:
Pump repairers, an increase of $3.00 per month over present rate.
Pumpmen, 1 pump, an increase of$3.00 per month over present rate.
Pumpmen 2 pumps, an increase of $3.00 per month over present rate.
For each additional pump, per mo. 5.00

The above rules and rates will not be changed unless on thirty (30) days' notice being given.

I have not given any rates on lines outside of the Dominion of Canada, as I understand to be the limits of the Board's jurisdiction.

(Sgd.) F. H. McGuigan.

II. REPORT OF BOARD IN DISPUTE BETWEEN THE CANADIAN NORTHERN RAILWAY COMPANY AND ITS MAINTENANCE-OF-WAY EMPLOYES.

THE Minister of Labour received, on March 2, the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute between the Canadian Northern Railway Company and its maintenance-of-way employés. A minority report was also

received in this matter, on March 10, from the member appointed on the recommendation of the Company.

In the application for the establishment of this Board it was stated that the dispute in question related to a demand on the part of the employés concerned for an increase in the wage rates and a revision of the existing schedule of rules. The number of employés affected by this dispute was given as 1,800.

The Board which was appointed to investigate the dispute was composed as follows: Messrs. F. H. McGuigan, of Toronto, Ont., and W. T. J. Lee, of Toronto, Ont., members appointed on the recommendation of the Company and of the employés concerned, respectively; and His Honour Judge D. McGibbon, of Brampton, Ont., Chairman, appointed on the joint recommendation of the foregoing members of the Board. Sittings were held at Winnipeg and Toronto from October 4, 1910, to February 11, 1911.

The report was signed by the Chairman and Mr. W. T. J. Lee representing the employés concerned. A schedule of rules and rates of pay was submitted, which they believed would be fair as between the contending parties. This schedule was to take effect from December 1, 1910, and was not to be changed unless upon sixty days' notice by either party, to be given between May 1 and November 1 in any year. Mention was made in this report of the kindness and consideration which had been shown the members of the Board by the representatives of the Company and of the men.

The minority report bore the signature of Mr. F. H. McGuigan, the member appointed on the recommendation of the Company. A schedule of rules recommended by Mr. McGuigan was also attached, as well as a statement of objections to the rules recommended in the majority report. As regards the question of increased wages, Mr. McGuigan, in his report, state s "In view of the fact that the Canadian Northern rates for maintenance-of-way service are practically twenty-five per cent. higher than paid by other lines in contiguous territory, except the Grand Trunk Pacific Railway and the Canadian Pacific Railway Companies, which are paying practically the same rates and were also served simultaneously by their maintenance-of-way employés with demands for largely increased rates of pay, and taking into consideration that a large percentage of the Canadian Northern Railway Company mileage has been but recently constructed, much of it through a new, sparsely settled and comparatively undeveloped country, with very meagre earnings per mile of line, I cannot recommend any increases in the rates of pay."

The Department was informed, on March 4, of the acceptance of the majority report by the employés concerned. On March 25, a communication was received from the Canadian Northern Railway Company in which the later declined to accept the majority report; the Department was later informed that the Company would, however, be governed by the minority report.

Report of Board.

The text of the findings of the Board of Conciliation and Investigation in this matter is as follows:—

To—

THE HON. W. L. MACKENZIE KING, C.M.G
Minister of Labour,
OTTAWA.

In the matter of a dispute between the Canadian Northern Railway Company and its permanent maintenance-of-way employés.

The undersigned members, a majority of the members of the Board appointed under the Act in this matter, have the honour to report as follows:—

The Board met at Winnipeg on the 4th day of October, 1910, and adjourned to meet at Toronto on the 15th day of November, 1910.

The Board met at Toronto on the 18th, 19th, 22nd, 23rd, 24th, 26th, 28th and 30th days of November, and the 2nd and 28th days of December, 1910, and the

6th, 7th and 9th days of January, and on the 10th and 11th days of February, 1911.

All the members of the Board have been able to agree on Clauses B. D. and G. of Section 2, Section 3, 3A., 3B., 3D., 3E., 3F., Section 5, Section 6, 6B., Section 10, 10A., 10 B., Section 11, Section 12A., of the Schedule of Conditions governing the service of the employés, but upon the other clauses of the said conditions Mr. F. H. McGuigan, representing the employers, was unable to agree with the other members, nor was he able to agree with the majority upon the rates of pay of the employés.

In the opinion of the undersigned members of the Board the conditions and rates of pay hereafter written should govern the employés of the Canadian Northern Railway, the undersigned members feeling that the said conditions and rates of pay would be fair between the employer and employés and if accepted by both parties would be in their interests.

When additional positions of a like class are created compensation will be fixed in conformity with that of similar positions as shown by this Schedule which will become and be effective as of the first day of December, 1910, and will not be changed unless on sixty days' notice by either party given between the first day of May and the first day of November in any year.

These rules will not take away any privileges that are now in effect with the employés.

The undersigned desire to thank Mr. Hanna, Mr. Cameron, Mr. McLeod and Mr. Warren, representatives of the Company, and Messrs. Lowe, Irwin, Fljozdal, Dorey and Barker, representing the employés, for their courtesy, kindness and consideration to the members of the Board during the sittings, and trust that both parties may upon consideration see fit to accept this report.

All of which is respectfully submitted. Dated at Toronto this 27th day of February, 1911.

(Sgd.) D. McGibbon,
Chairman.

(Sgd.) W. T. J. Lee,
For the employés.

Schedule of Rules and Rates Governing the Service of Maintenance-of-way Employes on the Canadian Northern Railway.

Effective December 1st, 1910.

Section 1. By permanent maintenance-of-way employés is meant men employed in the Track, Bridge and Building Department, Signalmen (not telegraphers) pumpmen and pump repairers on such parts of the line as are open for traffic, and who have been in the maintenance-of-way service continuously for nine months or more, or who have had nine months cumulative service during the two years immediately preceding, these will hereafter be referred to as employés. Labourers in extra gangs, unless practically engaged all the year round, will not be ranked as permanent employés.

Section 2. Ten hours shall constitute a day's work excepting for track and bridge watchmen, signalmen (except when employed as telegraph operators) pumpmen and pump repairers. When required to work in excess of these hours time will be allowed for such excess at the rate of time and one-half. Time and a half will be allowed for Sundays, Christmas and New Year's Day. Employés called for or kept on duty after having been relieved at six p.m., on regular working days shall receive a minimum of four hours and shall not be required to suspend work in schedule working hours to equalize overtime.

(*a*) Twelve hours will constitute a day's work for bridge and track watchmen, signalmen, pumpmen and pump repairers. When required to work more than twelve hours, straight time will be allowed.

(*b*) In emergencies employés will not be required to work more than twenty-four hours continuously without a rest of eight hours.

(*c*) Foremen will be allowed straight time for wet days, provided they remain on duty.

(*d*) When the Company's interests do not suffer thereby employés will be allowed at their request to quit work at noon (12K) on Saturdays during the summer months. On being required to

work after these hours overtime will not begin until six p.m. or 18K.

(*e*) Employés transferred by the Company to the Construction Department wil not lose their seniority standing as employés.

Section 3. Employés will be promoted hereafter on their respective Superintendent's Division in order of seniority provided they are qualified. All employés shall be advised of vacancies or of any new appointments that may occur in the Department in which they are employed, and their application if presented within ten days will be considered. Employés may be transferred from one division to another for extra gang work, or on the opening of new lines, or when the necessary qualified men for maintenance-of-way work are not obtainable on the division.

(*a*) Employés refusing promotion become junior to employés accepting such promotion.

(*b*) An employé who is transferred to another Department at his own request or is transferred from the Bridge and Building Department to the Road Master's Department or vice versa will lose his seniority standing, but no employé must be transferred without his consent.

(*c*) In filling positions of Road Master or Bridge and Building Master preference shall be given employés with proper qualifications (Superintendent to be the judge). The men may be taken from any point on the System according to seniority.

(*d*) Employés leaving the service of the Company when their services are required in the event of re-employment will rank as new men.

(*e*) A list of all employés will be prepared for each Superintendent's Division and such lists will show the seniority standing of each employé. The lists will be revised from time to time to agree with length of service and promotions made and a copy will be furnished representative of employés. They will be open for correction on proper representation by the employé to the head of his Department.

(*f*) In the event of reduction in the number of men employed they shall be reduced according to classification and seniority.

(*g*) Track and bridge watchmen and signalmen at crossings not interlocked are not subject to the general rules of promotion, being intended to take care of men in any Department who become unfitted for other service.

Section 4. No employé shall be suspended (except for investigation) or discharged until his case has been investigated and he has been proven guilty of the offence charged, the decision in such case to be arrived at within ten days from date of suspension. If an employé be found blameless, he will be re-instated and paid at schedule wages for time lost, and will be re-imbursed reasonable expenses, if away from home in such case. If detained more than ten days at Company's instance, awaiting decision, he will be paid schedule wages for all time lost in excess of ten days regardless of decision reached. An employé may have the assistance of another employé during the investigation should he so desire.

A written statement setting forth the result of investigation and the reasons therefor will, if requested, be furnished by the Company to the employé or employés affected.

(*a*) Should an employé at any time consider himself unjustly treated for any cause whatsoever he shall be entitled to a fair and impartial investigation within thirty days from date of complaint by him to his superior officer in writing, and a decision shall be given him in writing within ten days thereafter.

(*b*) Appeals from decisions must be made in writing by the employé through his Road Master or Bridge and Building Master within fifteen days after being advised of such decision, and should an appeal be sustained the employé shall be re-established and he shall be recompensed at the regular rate of pay for all time lost.

Section 5. Leave of absence and free transportation will be granted to employés members of duly appointed Committees for the adjustment of matters in dispute between the Company and employés so far as is consistent with good service within ten days after re-

quest in writing has been made on the proper officer.

Section 6. Employés taken off their regular sections temporarily to work will be compensated for the boarding and lodging expenses they incur.

(*a*) Bridge and Building employés taken from their places of residence or boarding outfits will be compensated for the expenses they incur, such expenses not to exceed $1.00 per day.

(*b*) Section foremen and sectionmen travelling on orders of the Company to and from work after regular working hours will be allowed straight time. Members of bridge and building gangs travelling on orders of the Company to and from work after their regular hours will be allowed straight time except when provided with boarding and sleeping cars to carry them to and from their work. Members of regular bridge and building gangs travelling in boarding cars at the request of the Company on Sundays between 7 K and 18 K will be allowed straight time.

(*c*) Boarding or sleeping cars provided for regular bridge gangs shall be comfortably fitted up, well heated, lighted and properly ventilated and equipped with good safe trucks and suitable springs.

(*d*) Foremen taken from their gangs for any reason for one or more days will be relieved of the duties of foremen during their absence and the relieving foreman will be paid the rate of foreman he relieves during the absence of the regular foreman.

(*e*) A regular section foreman having his gang increased to over twenty men for fourteen days or over shall receive extra gang foreman's rates.

Section 7. Employés required to attend to and light semaphore and switch lamps before or after their regular hours will receive schedule rate of sectionmen's pay. Where lamps are located at more than half a mile from the station they will be attended to in regular working hours. Employés required to walk track to attend to lamps on Sundays shall receive wages at the rate of time and one-quarter. In terminals and large yards where the lampman's duties require him on duty all day they will receive time and one-quarter on Sundays, Christmas and New Year's Day.

Section 8. Employés called out for emergency work outside of their regular working limits requiring their absence beyond their regular working hours will be supplied with boarding cars or given an opportunity to procure meals when desirable and practicable. No employé will be required to work more than seven hours without food and shall receive time and one-half upon being called to work on emergency or wreck work.

Section 9. The Company will keep section houses in good repair, the cost of repairs other than ordinary wear and tear will be charged to occupants.

(*a*) Section houses shall be for the use of section foremen and their families and regular men and when necessary for telegraph operators. Their surroundings must be kept clean by occupants.

(*b*) At points where there are no section houses the section foreman shall receive Five Dollars additional per month.

(*c*) Where water is transported for the use of section gangs good water will be provided. Where water is not supplied by the Company it will be procured on the Company's time.

Section 10. Employés will be granted leave of absence and transportation four times each year to attend their meetings, such free transportation will not extend beyond their Superintendent's Division and the leave of absence will not exceed two days and then only when consistent with good service and provided the Company is not put to additional expense.

(*a*) Permanent employés will be granted once per year free transportation to any point on the System in favour of themselves and members of their families dependent upon them for support.

(*b*) A member of the household of permanent employés will be furnished with free transportation once a month to and from points where reasonable prices prevail for the purpose of purchasing supplies. Such transportation shall only be used by a member of employé's family.

(*c*) Free transportation will be granted to nurses, when their services are required by employés in isolated districts,

from points where they are obtainable, on presentation of a certificate from attending physician.

(*d*) Employés laid off through reduction when re-engaged within one year will be granted free transportation to place of work over General Superintendent's Division on which he was formerly employed.

Section 11. Employés leaving the service of the Company from any cause whatever will be furnished with service letter if requested.

Section 12. Bridge and Building gangs shall be composed of:

(1) Foreman.

(2) Carpenters, who shall be skilled mechanics in house and bench work, and have a proper kit of carpenter's tools.

(3) Bridgemen, who shall be rough carpenters, expert saw, axe and hammer men and have a general experience in bridge work.

(4) Bridge labourers, who shall be strong, handy men and who shall perform such work as may be assigned to them.

(*a*) The rates of pay of Bridge and Building employés will be increased 15 cents per day each year until the maximum rate is reached and after five years continuous service they will receive the maximum rate for their class of service.

RATES OF PAY.

Trackmen:	Per day.
Section foremen at Port Arthur Winnipeg, Brandon, St. Boniface and Edmonton	$ 3.20
Section foremen at Atikokan, Rainy River, Portage la Prairie, Dauphin, Kamsack, Humbolt, North Battleford, Vermillion, Emerson, Belmont, Swan River, Prince Albert, Saskatoon, Neepawa, Morris, Fort Frances, Morinville, Kipling and Baudett	3.00
At all other points	2.90
Sectionmen or permanent labourers in all first and second class yards	2.05
At all other points	2.00
Assistant foremen in yards	2.90
Foremen of extra gangs, $2.85 to	3.85
First assistant foreman on extra gang	2.90
Second assistant foreman on extra gang	2.80
Snow plow foreman or men working in snow plow or flanger when called for duty, 45 cents per hour, and expenses.	
Section foremen or men working in snow plow or flanger when called for duty, 37 cents per hour, and expenses.	

	Per month.
Signalmen at level crossings	$53.50
Signalmen at interlocking crossings 13 levers or under	57.00
Signalmen at interlocking crossings 13 levers and under 24	62.00
Signalmen at interlocking crossings 24 levers or over	77.00
Signal repairmen or maintainers	65.00

Bridge and building men:	Per day.
Yard foremen and shop foremen	4.15
Road foremen	4.00
Carpenters $3.25 to	3.50
Bridgemen $2.50 to	3.25
Bridge and building labourers	2.15

	Per month
Bridge watchmen	60.00
Blacksmiths and pipe fitters. Railway shop rates.	

	Per day.
Pile driving and steam shovel engineers	$4.50
Foremen painters	4.00
Painters $2.90 to	3.25

	Per month.
Pump repairers, (expenses while away from headquarters, not to exceed $1.00 per day West of Winnipeg and 75 cents per day East of Winnipeg.)	93.00
Pumpmen (1 pump)	56.50
Pumpmen (2 pumps)	62.50
Pumpmen (3 pumps)	72.50

Single pump where two men are employed	61.50
Pumpmen with single pump and doing coal hoisting	61.50
	Per day.
Coalmen in charge of coaling points	2.15
Coal labourers	2.00

(Sgd.) D. McGibbon,
Chairman.
W. T. J. Lee,
For employés.

Minority Report.

The text of the minority report of Mr. F. H. McGuigan is as follows:—

Hon. W.L. Mackenzie King, C.M.G.,
Minister of Labour,
Ottawa.

In the matter of dispute between the Canadian Northern Railway Company and its permanent maintenance-of-way employés.

I have carefully examined a copy of the Report made to you in this case, bearing the signatures of my colleagues on the Conciliation Board, and regret that (as in the case of the Canadian Pacific Railway Company) I find myself unable to agree with them, owing to their recommendations regarding the rules being in many instances unreasonable and impracticable, and also on account of the exorbitant increases in the rates of pay recommended, against the injustice of which I insistently protested during the meetings of the Board.

In view of the fact that the demand for increased pay and the radical changes in the rules were made simultaneously by the maintenance-of-way employés on the Canadian Northern and Canadian Pacific Railways, it seems impossible to consider them apart. I have therefore, embodied in this report much of the material used in my report in the Canadian Pacific Railway Company cases.

The most important question at issue in this dispute is the demand for increased wages, as set forth in the petition filed with the Honourable the Minister of Labour by the representatives of maintenance-of-way employés.

The three reasons given in support of this demand are:—

First—Increased responsibilities.
Second—Increased cost of living.
Third—Ability to pay.

First.—"Increased responsibilities." To the citizen of ordinary intelligence who has given attention to the great improvements made in the physical conditions of Canadian Railways in the past ten years, it must be quite apparent that there can be no foundation for the claim of increased responsibilities, as the physical condition of the Canadian Northern Railway has, in common with the other great Canadian Railways, been vastly improved during the past five years, large sums of money having been expended in making such improvements.

Second.—"Increased cost of living." The Company contended that the advances made in the rates of pay have more than offset any increase in the cost of living. This seems to have been borne out by a careful study of the figures submitted. It was also contended by the Company that a large number of their maintenance-of-way men were but slightly affected by the increased cost of living, as fifty to seventy-five per cent (varying with the season) of all men employed in maintenance-of-way work live, or board, in the boarding camps, boarding cars and boarding houses, provided by the Company, and that there has been no change in the rates charged for board during the past five years, while there has been an increase in wages of about 30 cents a day.

Third.—"Ability to pay." Before considering this feature of the dispute it is important to first determine whether or not any increase in wages is actually warranted. For guidance in reaching a conclusion on this point we ascertained the rates paid by numerous other large railways for similar service.

In addition to the other data, the following comprehensive table, compiled by Mr. J. L. Payne, Comptroller of Railways and Canals, for the Dominion of Canada, shows the number of officers and employés of each class, and their average rates of pay on the railways of Canada, as compared with those of the United States,

comparison being on a basis of 100 mile units:—

	United States		Canada	
	No. per100 miles	Aver. daily pay.	No. per100 miles.	Aver. daily pay.
General officers	2	$12.67	2	$10.72
Other officers	3	6.40	3	4.73
General office clerks	30	2.31	28	1.94
Station agents	15	2.08	12	2.16
Other station men	58	1.82	51	1.65
Engine men	24	4.44	18	4.12
Firemen	26	2.67	20	2.53
Conductors	18	3.81	13	3.30
Other trainmen	49	2.56	32	2.12
Machinists	20	2.98	12	2.98
Carpenters	26	2.43	17	2.52
Other shopmen	83	2.13	62	2.19
Section foremen	18	1.96	18	2.18
Other trackmen	136	1.38	122	1.58
Switch tenders, crossing tenders and watchmen	19	1.73	7	1.57
Operators	17	2.30	12	2.20
Floating equipment	4	2.31	1	2.19
All others	90	1.98	71	1.95

The foregoing tables clearly show that in nearly every grade of railway employment the average wage rates in the United States are much higher than in Canada. The notable exceptions are the *higher wages paid to maintenance-of-way employés by the Canadian railways*, as follows:—

	Average rates U. S. Railways.	Average rates Canadian Railways
Section foremen	$1.96	$2.18
Other trackmen	1.38	1.58
Carpenters	2.43	2.52

The above comparison shows that the average rates paid section foremen by the Canadian railways is 22 cents, other trackmen, 20 cents, and carpenters, 9 cents per day higher than paid in the United States.

If the wages paid by the Canadian Northern Railway Company be compared with the wages paid by its principal competitors among the great railways in the United States in contiguous territory, namely, the Northern Pacific, the Great Northern and the Chicago, Milwaukee & St. Paul, it will be seen that these lines pay their sectionmen (track labourers) only $1.35 and $1.45 per day, as against $1.70 and $1.75 paid by the Canadian Northern Railway Company making the latter rates 30 to 35 cents a day more than paid by any of the railways mentioned, the same ratio of difference in rates existing throughout all branches of the maintenance-of-way service, and showing the Canadian Northern Railway Company's wages to be more than twenty-five per cent. higher than paid by the above-named railways for similar service.

Notwithstanding this substantial difference of a twenty-five per cent. higher rate in their favour, the men in their petition are demanding further increases, ranging from 25 *cents to* $1.80 *per day*, which, if granted, would give an average amounting to about fifty per cent. more than is paid for similar service by competing lines in the Western States.

For these reasons this Board cannot justify any recommendation, or even a suggestion to grant the increases asked for, when it is so clearly shown that they are already receiving an average of about twenty-five per cent. more than the wages paid for the same class of service on competing lines. Such action would be a grave injustice, not only to the Canadian Northern Railway Company, but to all other railways, and to all other employers of labour throughout the Dominion, as it would establish a most pernicious principle, and a far-reaching precedent affecting the whole industrial world.

Regarding "Ability to pay," any decision, recommendation or suggestion, favouring increased compensation to employés on this principle would be illogical, unwise and dangerous, as it would be an incentive to labour of every class to make unreasonable demands upon their employers, on similar grounds, and would inevitably lead to disputes and conflicts, which must prove disastrous to both employers and employés, and seriously retard and interrupt the development of Canada.

During the meetings of the Board, numerous schedules were presented showing the rates paid by other railways for similar work, and I pressed repeatedly for reasons justifying such recommendations as my colleagues seemed disposed to make, but was never able to obtain any, other than that the men demanded the schedule presented, and it was intimated that if not granted they would strike.

I am, therefore, unable to determine upon what ground my colleagues justify

the increases recommended, as they are unsupported by evidence, reason or justice, and are unparallelled in the history of wage adjustment for this class of service, the law of supply and demand, and the rates paid for similar service by competing lines being entirely ignored. They can have no foundation, other than sentiment, and are totally at variance with the principle of conciliation and, therefore a gross injustice to the Company.

The recommendations regarding the rules contain many inaccuracies and contradictions, and are impossible of execution. (I enclose copy of the Company's objections filed with the Board by the Company's officials during the sittings).

In view of the fact that the Canadian Northern Railway rates for maintenance-of-way service are practically twenty-five per cent. higher than paid by other lines in contiguous territory, except the Grand Trunk Pacific and the Canadian Pacific Railways, which are paying practically the same rates and were also served simultaneously by their maintenance-of-way employés with demands for largely increased rates of pay, and taking into consideration that a large percentage of the Canadian Northern Railway mileage has been but recently constructed, much of it through a new, sparsely settled and comparatively undeveloped country, with very meagre earnings per mile of line, I cannot recommend any increases in the rates of pay.

I enclose herewith the schedule of rules with recommendation for their adoption.

(*Signed*) F. H. McGuigan.

Member of Conciliation Board
For the Company.

Section 1. By permanent maintenance-of-way employés is meant men employed in the track, bridge and building department, pumpmen and pump repairers, on such parts of the line that are open for traffic, and who have been in the maintenance-of-way service continuously for one year or more, or who have had one year's cumulative service during the three years immediately preceding, and the same will hereafter be referred to as employés. Labourers in extra gangs, unless practically engaged the year round, will not be ranked as permanent employés.

Section 2. Ten hours shall constitute a day's work. When required to work in excess of ten hours, time and a half will be allowed for such excess, and for work done on Sundays and Christmas day.

Clause (*a*). The hours of track and bridge watchmen will be twelve in each twenty-four. Twelve hours either continuously, or intermittently, will constitute a day, but they shall receive at least eight hours' continuous rest in each twenty-four.

Clause (*b*). At regular pumping stations where the amount of work is such that it is necessary for pumpmen to work continuously for twelve hours in order to keep the supply up, overtime, if worked, will be paid *pro rata* up to 24K and between 24k and 7K at the rate of time and a half.

Clause (*c*). In cases of emergency employés will not be required to work more than twenty-four hours continuously without a rest of eight hours.

Clause (*d*). Section foremen and sectionmen travelling on orders of the Company to and from work after regular working hours will be allowed straight time. Members of bridge and building gangs travelling on orders of the Company to and from work after their regular working hours will be allowed straight time, except when provided with sleeping and boarding cars to carry them to and from their work. Members of regular bridge and building gangs travelling in boarding cars at the request of the Company on Sundays, between 7K and 18K will be allowed straight time.

Clause (*e*). Foremen will be allowed straight time for wet days, provided they remain on duty.

Section 3. Employés will be promoted hereafter on their respective superintendent's division in order of seniority, provided they are qualified. All employés shall be advised of vacancies or any new appointments that may occur in the department in which they are employed, and their application, if presented within ten days, will be considered. Employés may be transferred from one division to another for extra gang work, or on the open-

ing of new lines, or when the necessary qualified men for maintenance-of-way work are not obtainable on the division.

Clause (*a*). In filling positions of roadmaster or bridge and building master, preference shall be given employés with proper qualifications (superintendent to be judge). Men may be taken from any point on the system in order of seniority.

Clause (*b*). Employés refusing promotion become junior to employés accepting such promotion.

Clause (*c*). An employé who is transferred to another department at his own request, or is transferred from the bridge and building department to the roadmaster's department, or vice versa, will lose his seniority standing.

Clause (*d*). Employés transferred by the Company to the construction department will not lose their seniority as employés.

Clause (*e*). A list of all employés will be prepared for each superintendent's division, and such lists will show the seniority standing of each employé. The lists will be revised from time to time to agree with length of service and promotions made, and a copy will be furnished representatives of employés. They will be open for correction on proper representation by the employé to the head of his department.

Clause (*f*). In the event of reduction in the number of men employed they shall be reduced according to classification and seniority.

Clause (*g*). Track, bridge and crossings watchmen are not subject to the general rules of promotion, being intended in these positions to take care of men in any department who become unfitted for other service.

Section 4. Any employé suspended or dismissed, or who considers that he has been unjustly treated shall, upon application in writing, receive full and impartial hearing, and will be advised of decisions reached within fifteen days after the time of their suspension or dismissal. Should the investigation show that the suspension or dismissal was unjust, time will be allowed and employés reinstated. Appeals from decision must be made in writing by the employé, through his roadmaster or bridge and building master, within fifteen days after being advised of such decision.

Section 5. Leave of absence and free transportation will be granted to employés members of duly appointed committees for the adjustment of matters in dispute between the company and employés, so far as is consistent with good service, within 10 days after request in writing has been made to the proper officer.

Section 6. Employés taken off their regular sections temporarily to work will be compensated for the boarding or lodging they necessarily incur.

Clause (*a*). Bridge and building employés taken away from their places of residence, or boarding outfits, will be compensated for the extra expenses they necessarily incur, such expenses not to exceed 50 cents per day.

Clause (*b*). Boarding and sleeping cars provided for regular bridge gangs shall be comfortably fitted up, well heated, lighted and properly ventilated and equipped with good safe trucks and suitable springs.

Section 7. Employés required to attend to and light semaphore or switch lamps before or after regular working hours will receive therefor $4 per month for six or less lamps and 50 cents per lamp per month for those in excess of six. When lamps are located beyond the yard limits they will be attended to during the regular working hours.

Section 8. Employés called out for emergency work outside of their regular working limits requiring their absence beyond regular working hours will be supplied with boarding cars or given an opportunity to procure meals when desirable and practicable. No employé will be required to work more than seven hours without food.

Section 9. The Company will keep all section houses in good repair, the cost of repairs other than ordinary wear and tear to be charged to occupants.

Clause (*a*). Where water is transported for the use of section gangs good water will be provided.

Section 10. Employés will be granted leave of absence and transportation four times a year. Such free transportation

will not extend beyond their Superintendent's division and the leave of absence will not exceed two days, and then only when consistent with good service and provided the Company is not put to any additional expense.

Clause (*a*). Permanent employés will be granted once per year free transportation to any point on the system in favour of themselves and members of their families dependent upon them for support.

Clause (*b*). A member of the household of permanent employés will be furnished with free transportation once a month to and from points where reasonable prices prevail for the purpose of purchasing supplies, such transportation may be used by any member of the family only.

Section 11. Employés leaving the service of the Company when their services are required, in the event of re-instatement, will rank as new men.

Clause (*a*). Employés leaving the service of the Company from any cause whatever will be furnished with service letter on request in writing.

Section 12. Bridge and building gangs shall be composed of:

(1) Foreman.

(2) Carpenters, who shall be skilled mechanics in house and bench work, and have a proper kit of carpenters' tools.

(3) Bridgemen, who shall be rough carpenters, expert saw, axe and hammer men, and have a general experience in bridge work.

Clause (*a*). The rates of pay of bridge and building employés will be increased 15 cents per day each year until the maximum rate is reached and after five years continuous service they will receive the maximum rate for their class of service.

Toronto, Nov. 29, 1910.

To the Conciliation Board,
Toronto, Ont.

The Canadian Northern Railway Company submits the following objections to certain matters which will be mentioned more fully in this statement.

4

Section 1. This section is objected to for the reason that at the present time men must be in the service of this Company one year before they can be eligible to participate in the benefits of the schedule as a whole. Clause No. 1 of the present schedule has been in force ever since the first schedule was made with this Company's maintenance-of-way employés, and until the presentation of the schedule now being dealt with it has always been considered by both the men and this Company that such an arrangement, as at present, was decidedly in the best interests of all concerned. This Company therefore objects most strenuously to any change being made from the present clause, believing as we do that if less time is allowed for men to qualify that it will undoubtedly impair the efficiency of the service.

Section 2. This section is objectionable for the reason that a nine-hour day on Saturday is to be paid for on a basis of ten hours: time and one-half to be allowed on Sundays, Christmas and New Year's Day instead of on Sundays and Christmas Day as at present, and that if called out after hours on regular working days, Sundays, Christmas and New Year's Days a minimum of five hours straight time be allowed instead of actual time at the rate of time and one-half for excess time worked on working days, Sundays and Christmas Day.

The schedule as now presented is without doubt based on a certain rate per hour and this Company is decidedly of the opinion that it is unreasonable to ask, or even to expect that it, or any other Company, should pay for services not performed. In the discussion that took place concerning that portion of the clause particular stress was laid by the Committee on the fact that there would not be any loss to this Company, for the reason that the men would do as much work on Saturdays in nine hours as they would do were they on duty ten hours. Such a statement is looked upon as being an admission that at the present time this Company is not getting a full measure of labour from our men. Of course it is admitted that it is possible that the

Committee did not intend to convey that meaning.

With regard to the question of time and one-half on Sundays, Christmas and New Year's Days. The schedule that we are now working under provides that time and one-half be allowed on Sundays and Christmas Day. Owing to the closeness of dates on which Christmas and New Year's Days fall this Company considers that it would be a hardship to grant the men their request, but in view of the fact that it is no doubt a matter of sentiment with a majority of the men as to which day they particularly wish to recognize, this Company is willing that it shall be optional with the men as to which day they desire to observe; that is, if they notify the proper authority that they desire to keep Christmas Day, and for some reason it should be necessary for them to work on that day they will be allowed the increased rate and will in return work New Year's Day at the ordinary rate, or vice-versa.

With regard to request for increase from three to five hours for minimum time allowance for a call for service under certain circumstances. This Company cannot see any just reason for granting that request, nor as a matter of fact has any reason been advanced by the Committee. It is considered that the present arrangement is very liberal, and outside of shopmen this Company has never been asked for even a minimum of three hours. Furthermore it must be borne in mind that shopmen are not provided with houses at a very low rental, nor cars to live in where houses are not provided. Shopmen, as a general rule, live a much greater distance from the works and when called out in cases of emergency have a proportionately greater distance to travel. There is another important matter in connection with shopmen which should be taken into account, and should also be considered in dealing with Section No. 1, *viz.*, that shopmen have to serve an apprenticeship of from five to seven years to enable them to qualify for maximum pay whereas maintenance-of-way department employés, except carpenters, in some cases serve only a year before receiving the full rate.

Section No. 2, *Clause* (*a*). Request is made that twelve hours shall constitute a day's work for bridge watchmen, signalmen, pumpmen and pump repairers (the Committee agreeing to strike out switch tenders) and when required to work more than twelve hours, time and one-half to be allowed. At the present time the arrangement is that the hours of such men will be twelve hours in each twenty-four, and twelve hours either continuously or intermittently will constitute a day, and that they shall receive at least eight hours continuous rest in each twenty-four. Further, at regular pumping stations where the amount of work is such that it is necessary for pumpmen to work continuously for twelve hours in order that the proper supply of water may be kept up overtime will be paid *pro rata* up to 24K and time and one-half between 24K and 7K. The duties of bridge and track watchmen are not onerous, as it is only necessary for inspections to be made at certain intervals. It will be seen that the actual amount of work performed by an employé in such a position would, if computed on a straight twelve hours basis, give him at least sixty per cent. of idle time. Pumpmen are also worked under similar conditions.

In connection with pump repairers, this Company would state that these men practically arrange their own work. They are assigned to certain districts and make such repairs as are necessary. It would be an extremely hard matter to even attempt to figure what overtime they should work, but as a matter of fact it can safely be stated that the actual amount of work rendered by that class of employé to this Company during the year would show that no overtime at all was worked.

Section No. 2, *Clause* (*b*). The above mentioned Clause was agreed to.

Section No. 2, *Clause* (*c*). The above mentioned Clause was struck out by mutual consent.

Section No. 2, *Clause* (*d*). The above mentioned Clause was agreed to.

Section No. 2, *Clause* (*e*). This Company is unable to agree to the request made by the men in this connection, for

the reason that the section foreman must be held responsible for his section.

Section No. 2, *Clause* (*f*). This Company cannot agree to the rule as written, but is willing to have it amended to cover only shopmen working for Bridge and Building Department.

Section No. 2, *Clause* (*g*). The above mentioned Clause was agreed to.

Section No. 3 *and Clauses* (*a*), (*b*), (*c*) *of Section No.* 3. The above-mentioned Section and Clauses were agreed to.

Section No. 3, *Clause* (*d*). This Clause refers to the promotion of employés to the office of roadmaster or bridge and building master. The discussion in connection with the same resulted in Mr. Lowe, President of the International Brotherhood of Maintenance-of-way employés, stating that it was not the desire of his organization to in any way question the rights of this Company to place in such positions any person they desired. At that time, on behalf of this Company, a case was cited in which Mr. Fljozdal, General Chairman of the Maintenance-of-way organization on the Canadian Northern Railway, protested to this Company's General Superintendent regarding the appointment of Roadmaster H. A. Mackenzie. It will therefore be seen that notwithstanding what Mr. Lowe stated, that it was the understanding of Mr. Fljozdal that seniority should prevail, and that he had jurisdiction over the matter. It is not reasonable to suppose that this Company could allow any person to dictate the appointment of officials, and in view of the fact that according to Mr. Lowe's own statement no good can be accomplished in embodying this clause, we therefore request its elimination.

Section No. 3, *Clauses* (*e*) *and* (*d*). The above mentioned Section and Clauses were agreed to.

Section No. 3, *Clause* (*g*). This Committee agreed to the elimination of the words "switch tenders," and also to that portion of the Clause which reads, "maintenance-of-way men to have preference." This Company also objects to including in this Clause, signalmen, no matter whether working at an interlocking plant or not. As stated, it has been decided that all signalmen will, on or before the first of January next, be transferred to the Transportation department, where they properly belong, and will not thereafter be within the jurisdiction of the maintenance-of-way department.

Section 4. This Company agrees to the present Clause being incorporated in the new schedule, with a reduction in time from fifteen to ten days. In discussing this clause the Committee agreed to cut out the following: "and the Company shall bear the cost of such investigation or an appeal that is sustained." Also that portion reading: "The conditions in regard to witnesses, appeals and compensation shall prevail in this investigation, as above outlined."

Section No. 5. This Company agreed to Clause being amended so as to read: "Leave of absence and free transportation will be granted to employés members of duly appointed committees," etc.

Section No. 6. The above mentioned Clause was agreed to.

Section No. 6, *Clause* (*a*). In this Clause an increase in expense allowance is being asked from 50 cents to $1 per day. This Company cannot agree to an increase on this account. It is the practice of this Company to board and lodge all the bridge and building gangs, in road service, at a general rate of $4 per week, without regard to location.

Section No. 6, *Clause* (*aa*). The above mentioned Clause was agreed to by making the following change: "Employés travelling on orders, &c.," instead of "Section foremen and sectionmen travelling on orders, &c."

Section No. 6, *Clause* (*b*). The above mentioned Clause, as proposed, was not accepted, but a new Clause was afterwards drafted, which was accepted, and which was filed with the Chairman, but copy of same was not retained by this Company.

Section No. 6, *Clause* (*bb*). Clause as presented was not agreed to, but following was: "Any way-employé relieving a regular foreman by competent authority will be paid rate of foreman relieved during his absence. (Competent authority means roadmaster or bridge and building master)."

Section No. 6, *Clause* (*c*). It was agreed to eliminate the above mentioned.

Section No. 6, *Clause* (*cc*). During the discussion of this Clause, it will be remembered that there was a difference of opinion between the members of the Committee as to just what meaning this Clause was intended to convey. As a general rule this Company does not work a gang of twenty men or more with a section foreman, unless it be a section foreman at a terminal or other important point, and this would generally occur during the winter time when necessary to get as many men together as possible in order to clear up the snow, or perhaps in the case of a wreck. The men have already asked for higher wages for certain yards, and this Company cannot see any justice in the request contained in this Clause, by again asking for extra compensation on account of the number of men who might be put in their charge temporarily, and under emergency circumstances. This Clause cannot therefore be agreed to.

Section No. 6, *Clause* (*d*). If a section foreman having a gang of twenty men or more is not competent to keep a record of the time of sectionmen he should not accept the position. The effort required is cetainly not burdensome.

Section No. 7. With regard to the new features contained in this Clause: This Company cannot agree to change from the article now in force which covers this work.

Section No. 8. This Company understood that an arrangement had been reached with regard to Section No. 8, with the exception of the last portion of it, which reads: "and receive double time upon being called to work on wreck work." Provision has already been made for men working overtime to be paid at the rate of time and one-half, and there certainly cannot be any reason why a man working at a wreck should receive more compensation than a man working at any other kind of work.

Section No. 9. Section houses are the property of this Company and there is no compulsion for a man to live in one of them if he does not so desire. It cannot therefore be seen why there should be any change made from the present schedule. So far as building pumping houses near pumping stations for pumpmen is concerned, this Company cannot consider such an arrangement.

Section 9, *Clause* (*a*). This Company is unable to concede anything more than what is now contained in the present schedule.

Section No. 9, *Clause* (*b*). This Company cannot accede to the request of the men in this connection as it is most unreasonable.

Section No. 10, *and Clauses* (*a*), (*b*), (*c*), (*d*) *and* (*e*). The above mentioned are all in reference to granting of free transportation under certain conditions. Transportation is the only thing that a railway company has to sell in order to obtain its revenue, and although a large portion of the requests made have been incorporated in previous schedules, still this Company contends that it is not within the power of anyone to give away its earnings, and therefore this Company requests that this Section and Clauses be eliminated. However, there is no intention whatever of dealing with the maintenance-of-way employés in the matter of transportation different from any other class of employé, but do not consider that this Company should be compelled by an agreement to grant certain transportation. There is no reason why the maintenance-of-way men should not be dealt with in this matter the same as all other classes of employés, viz., under the general rules of this Company governing transportation which are issued from time to time.

*Section No.*11. The above mentioned was agreed to.

Section No. 12. This Company cannot agree to have anything incorporated in the maintenance-of-way schedule which would make it compulsory to grant two weeks' leave of absence with full pay each year to men working twelve hours per day, or rated by the month. There is only one class of employés to whom holidays are granted, and they are the telegraphers. Such holidays are not granted to these men, however, unless they have been in the service for at least four years. There are certain conditions in the telegraphers' schedule which offset the holi-

day allowance, viz., telegraphers are only paid for overtime *pro rata* on the basis of their specified rate, that means, that should it be necessary to work a telegrapher three or four hours overtime he would not be paid for such time worked at a higher rate per hour than he receives per hour during his regular hours, and that also is the basis for pay he receives for Sunday work. In the case of the maintenance-of-way employés, however, it is altogether different. In addition, it should be borne in mind that the maintenance-of-way men working on a monthly or twelve hour per day basis, as a general rule, are men that have been injured in some branch of the service, or whose health prevents them from following their usual vocation, and for whom such employment has been provided in order that they may be able to live. This Company trusts, therefore, that the Board will understand that such men should not be classed as men performing arduous duties.

Section No. 13. The Committee agreed to strike out the following:

4. Blacksmiths and helpers.
8. Pipe fitters and tinsmiths.
9. Pile driving and steam shovel and hoist engineers.
10. Foremen and cranemen.

This Company is willing to agree to the Clause provided also that No. 7, which covers Interlocking Signalmen, is struck out.

Section No. 13, *Clause* (*a*). The following clause was submitted and accepted by all concerned: "For service where a minimum and maximum rate is shown men will be started at the minimum rate and increased after each year's service 15 cents per day until maximum rate is reached, and after five years' continuous service, will receive maximum rate for class of service performed.

Section No. 13, *Clause* (*b*). The above mentioned has been struck out by mutual consent.

To sum up the position of this Company generally. Whilst there has been a gradual but persistent increase in the cost of all materials required in the maintenance and operation of the Railway for years past the same period has also been an active one in demands for reduction in freight and passenger rates. These demands have had its effect on the revenue of the Company as is evidenced from the Annual Reports of the Company for the past four years submitted herewith. The basis of freight earnings is the rate received per ton mile, and below is submitted a memorandum showing the rates received by this Company for freight hauled per ton mile from 1907 to 1910 inclusive, from which it will be seen that comparing 1910 with 1907 there has been an absolute reduction in earnings on freight hauled per ton mile of ·139 cents or equivalent to a loss of 15·92 per cent.:

1907	·873c
1908	·729c
1909	·736c
1910	·734c

There has also been a substantial reduction in revenue received per passenger per mile carried, the figures from 1907 to 1910 inclusive being as follows:

1907	2·835c
1908	2·381c
1909	2·344c
1910	2·184c

Showing that comparing 1910 with 1907 there has been an actual reduction in earnings per passenger per mile of ·681c or equivalent to a loss of twenty-four per cent.

In order to keep pace with the demand of its employés for increased wages this Company has been compelled to spend large sums of money for heavier motive power and larger capacity cars, which made it necessary in turn to spend large sums on maintenance-of-way and the reconstruction of bridges and trestles to enable it to haul heavier and longer trains and thus offset in some degree the large increase in Operating Charges. This Company's Annual Statement already referred to shows they have been barely able to do so.

For years past the Canadian Northern Railway has carried on an active construction organization. Its owners have unlimited faith in the country, and in its development many miles of road have been constructed which cannot reach a profitable stage for some time to come. In the meantime the capital has been

secured and the interest on the investment has to be paid although the earnings from such lines may not be sufficient to do so. In addition to that this Company is confronted with demands for reduction of tariffs, both freight and passenger, and on the other hand equally persistent demands for increased wages from all classes of employés, so that in endeavouring to meet both conditions in a reasonable way the Company has not been able to do more than make net earnings enough to pay its fixed charges. Inasmuch further as the territory tributary to this Company is to a large extent competitive with other Companies, any surplus revenue has to be expended to meet conditions arising from this cause. The Common Stockholders have not yet received any dividends and the prospects are because of this growing necessity cannot expect to receive any return on their stock in the immediate future.

Arguments have been advanced that in certain cities and towns labour has been paid a higher rate per day than this Company has paid. Objection is not taken to that comparison as a careful analysis of the matter will show that in cities like Winnipeg where it has been stated labour has been paid during certain periods of the summer months $2.00 per day that such rate of pay was only in force for about five months of a year, and that the same labour is available, and can be secured by any Railway Company for the balance of the time in each year at a rate not exceeding $1.50 per day, whereas this Company pays $1.75 per day the year round in accordance with the schedule under review.

It should also be borne in mind that this Company gives to its employés free transportation under certain conditions and in respect to its section foremen who live in Company's dwellings they have the advantage of a very low rental in addition to which they not only receive free transportation for themselves and families but the Company's Roadmasters in the past have also given the section foremen and sectionmen (who are married) the privilege of using old ties removed from the track for fuel, in consequence of which we venture to say that only in exceptional cases has it been necessary for any of the Company's Road Department employés to purchase fuel.

It should also be pointed out that on account of the rapid expansion of the Canadian Northern, employés for several years past have received promotion much more rapidly than they could reasonably expect with Companies of older standing, which has been the means of substantially increasing the wages of such employés effected.

This Company submits herewith a statement of wages paid, showing also by way of comparison the wages of the Great Northern and the Northern Pacific Railways, from which it will be seen that the rates paid by this Company at the present time are in excess of either the Great Northern or the Northern Pacific, although all the Companies in question are operating in territory where the conditions are practically similar.

This Company is also of the opinion that the most accurate and perhaps most simple way of dealing with the matter of wages is to deal with it on the basis of a rate per hour; in fact to adopt the same rule as far as practicable in respect to its maintenance-of-way schedule now under discussion as obtains in the payment of wages to labour generally.

For these and other reasons advanced this Company cannot agree to any increase in wages.

III. REPORT OF BOARD IN DISPUTE BETWEEN THE NORTH ATLANTIC COLLIERIES COMPANY, LIMITED, OF PORT MORIEN, N.S., AND ITS EMPLOYEES.

THE Minister of Labour received, on March 24, the report of the Board of Conciliation and Investigation established to inquire into certain matters in dispute between the North Atlantic Collieries Company, of Port Morien, N.S., and its employés.

It was stated in the application that

the number of employés affected in this dispute was 110 directly, and 150 indirectly; also that the dispute related to a proposed reduction of wages by the Company.

A Board was established by the Minister, on February 16. The report of the Board was signed by the three members, namely: Mr. Duncan G. MacDonald, of Sydney Mines, N.S., member appointed on behalf of the Company; Mr. Alexander McKinnon, of Glace Bay, N.S., member appointed on behalf of the employés concerned; and Professor Robert Magill, of Halifax, N.S., Chairman, appointed by the Minister, in the absence of any joint recommendation from the foregoing.

In its report the Board says: "The Manager stated that for three years the Company has been in a difficult position. No dividends were paid with stock, common or preferred, interest with bonds was paid out of capital, and the Company failed to make even operating expenses. When the Board met the Company had gone into liquidation. The Eastern Trust Company, as Trustees for the bondholders, had taken charge and had dispensed with the services of the men except a few required to keep the mine unwatered." The Board was of opinion that the only purpose which it could serve was to discuss the situation with the representatives of the men, and the Manager and to report the same to the Department.

In its report the Board further says: "The issue was in general the rate of wages to be paid to the cutters, but it varied in the two sections of the mine. The Company proposed to enforce what it called the 'usual winter rate,' in the old section to be paid during the winter months, and it proposed a permanent schedule of rates for the new section, and in both sections the proposed rates were reductions as compared with the rates paid in the old section when the dispute began."

The report deals in part with an alleged violation on the Company's part of section 57 of the Act, in respect of which "it appears to the Board that the Company did in the words of section 57 of the Act 'alter the conditions of employment with respect to wages'. The 'Union did not agree to this, having applied for a Board, but individual miners did, according to the Manager.

"The representatives of the Union claim that the Company violated section 57 of the Act. It appears to the Board that as a Board had been applied for on the whole dispute, no such change should have been put into force by the Company until the Department had granted or refused the application, and until the Board, if granted, had finished its work."

The Board also finds that there is no doubt of the gravity of the Company's financial condition, but observes that the responsibility for this condition would require a more thorough and more formal investigation than this Board has so far attempted.

Report of Board.

The text of the report of the Board of Conciliation and Investigation in this matter is as follows:—

To the Honourable,
The Minister of Labour,

In the matter of the Industrial Disputes Investigation Act and in the matter of the dispute between the North Atlantic Collieries Company and its employés.

The Financial Position of the Company.—The Manager stated that for three years the Company had been in a difficult position. No dividends were paid with stock, common or preferred, interest with bonds was paid out of capital, and the Company failed to make even operating expenses. When the Board met, the Company had gone into liquidation. The Eastern Trust Company, as Trustees for the bondholders, had taken charge and had dispensed with the services of the men, except a few required to keep the mine unwatered.

Work of the Board.—Since the Industrial Disputes Investigation Act became law no Board of Conciliation has met

under such circumstances as obtain in this case. For the present, there are neither employés nor employers. The parties to the dispute have ceased to be, so far as the relation of employer and employé is concerned. The main purpose of Boards of Conciliation is to conciliate two parties, but in this case there are no parties to be conciliated. The members of the Board, the representatives of the men, and the Manager of the Company, agreed that it would be useless to attempt to draw up a schedule of rates of wages for the future. The only function left to the Board was to discuss the situation with the representatives of the men, and the Manager, and to report the circumstances to the Department.

The Strength of the Union.—The only labour organization at Port Morien is that of the United Mine Workers. A year ago the local union included in its membership a majority of the employés of the Company. During the summer months the membership decreased. Exoneration from payment of dues was granted, and the membership increased again during the present winter. When the dispute began the membership included most of the employés. The Manager of the Company based his estimate of the numerical strength of the Union on statements made to him about the number of those who had paid their dues. Because of the exoneration, however, the total membership was much larger than his estimate, and so far as numbers was concerned, the Union could fairly claim to include a majority of the employés of the Company.

The Two Sections of the Mine.—Till last summer the North Atlantic Collieries Company mined its own area, and this area is the old section. The distance from the shaft to this area is from 1 mile upwards, and it imposes a considerable cost of haulage upon the Company, and on the average two hours a day walking upon the men in going to and returning from the working places. Further in this area it was difficult to use mechanical cutters, the percentages of stone and slack were high, and the whole lay-out of the mine, and the plant according to the Manager, were such as to make operations expensive.

Between the shaft and this area lay an area owned but not mined by the Dominion Coal Company. The North Atlantic Collieries Company leased this area last summer, paying the Dominion Coal Company a royalty of 10 cents per ton. (This was in addition to the Provincial royalty.) This area is the new section of the mine.

If the North Atlantic Collieries Company was mining at a loss it seems strange that they should undertake to mine another area in which they would have to pay an additional royalty of 10 cents per ton. They believed, however, that the conditions in the new area would be more favourable, that the distance underground would be reduced, that the haulage would cost less, that machine-cutting would be facilitated, that the percentage of slack would be reduced, that the whole lay-out of the work would be better, and that the time spent by the men in going to and from their working places would be reduced fifty per cent. Development was accordingly proceeded with in the new section, and continued more or less till the beginning of the present year.

The Issues Under Dispute.—The issue was in general the rate of wages to be paid to the cutters, but it varied in the two sections of the mine. The Company proposed to enforce what it called the "usual winter rate" in the old section, to be paid during the winter months, and it proposed a permanent schedule of rates for the new section, and in both sections the proposed rates were reductions as compared with the rates paid in the old section when the dispute began.

The Winter Rate Question.—Three and a half years ago the Company offered an advance in the cutters' rates of about 9 cents per ton in order to secure men. In the winter of 1908–9 they asked the men to agree to a reduction for the months of January, February, March and April, and the men agreed, on the condition that the higher rate should be re-established in the spring.

Further, there had been previous to that winter, two bonuses paid, one of $1

per fortnight for full time worked, and one of 25 cents per ton for all coal cut over three tons per day.

In the spring, these bonuses were not restored, but the higher rate was restored.

Last winter the Company did not ask for this reduction. This winter the Company notified the men that this temporary reduction would be enforced. They did so because of their financial difficulties and because climatic conditions impose special difficulties during those months. Storms and snow affect the mining and the shipping, and often makes banking necessary, and banking involves extra handling, increases the percentage of slack, and thus tends on the one hand to increase the cost of production, and on the other to decrease the price obtained for the coal.

When the reduction was proposed this winter the men objected. Their reasons were that they had consented to it two years ago only in order to assist the Company, that the banking of say twenty-five per cent. of the coal, even if it were necessary, would not involve much extra cost, that the increased cost of living made it impossible for them to accept any reduction, and that they had heard of the financial troubles of the Company too often to believe in them any longer.

It appeared that the lower rates in the old section would have affected about seventy-six miners for sixteen weeks. The average absenteeism among the men is a little over one day per week per man. Taking these figures as a basis for calculation, the men affected would have earned during those sixteen weeks $10.40 each less than under the higher rate, and that the Company would have saved on the wages $780. This amount would not have saved the Company. And on the other hand the men affected could have had during the sixteen weeks sixteen days on which they could either rest or work. Did they choose to work five of these days, they could earn the $10.40.

Of the three representatives chosen by the men to put their case before the Board, two were employés of the Company, and these gave it as their opinion that had the men realized the gravity of the situation, they would, had they been asked, have met the Company in an endeavour to adjust this matter. So far as this issue is concerned, the Board believes that had the men realized how matters actually stood, there would have been little difficulty in reaching a settlement.

The Proposed Permanent Rates for the New Section.—The Company expected to do better in the new section than in the old. They expected, for example, to make greater use of mechanical cutters, to secure a larger output, to reduce the percentage of slack, and to lessen the cost of shipping. Further, they expected that the men would be able under the new conditions to cut more coal, so that a reduction in the rate of wages would not involve a reduction in the total amount of wages earned per man. These expectations had still to be tested. The operations in the new area have been so far chiefly development work, and they do not afford much ground for testing whether these expectations were justifiable or not. The men believed that the reduced rate would mean a reduced total amount of wages, and they refused to agree to any such permanent reduction.

This was the graver issue of the two. A Board of Conciliation was applied for. Some men then went to work in the old section at the reduced winter rate. The representatives of the Union claim that these accepted the situation under protest and to avoid penalties under the Act. The machine cutters had already gone to work in the new section, at a compromised rate, but this was prior to the application for a Board. Any hand cutters that went to work in the new section at the reduced rate did so, according to the representatives of the Union, under protest. The Manager denies that there was any protest. There was delay in the appointment of the Board, and then the crash came. The Company owes the men about $9,000 in wages. Liens have been registered, and the Eastern Trust Company has intimated that it will pay.

In regard to the proposed rates for the

new sections the vital question for the men was whether, working the same number of hours and at the same pace as formerly, they could earn the same total amount of wages. They believed that they could not, and therefore they objected to the reduction of the rates. The Company believed that they could, and this belief, along with their general financial condition, led the Company to attempt to enforce the reduction.

As stated, the operations in the new section up till the time the dispute began were in the nature of development work; and they afforded no positive proof one way or the other. The proposed reduction was based on an expectation which might or might not be verified in the event. In the new section the Company had to pay an additional royalty of 10 cents per ton, though in the old section, where they did not have this extra royalty, they had failed to make operating expenses. So far as the Board could see the men might well fear that the reduced rate of wages might mean a reduced total of earnings, and they were justified in asking for a Board.

The application for a Board was decided upon on January 11, 1911, and it was duly forwarded. On January 25 the Company informed the Department that the winter rate had been accepted by the men for the old section, that a reduced rate had been accepted also for the new section, and that only a few men were idle.

It appears to the Board that the Company did in the words of Section 57 of the Act "alter the conditions of employment with respect to wages". The Union did not agree to this, having applied for a Board, but individual miners did, according to the Manager.

The representatives of the Union claim that the Company violated Section 57 of the Act. It appears to the Board that as a Board had been applied for on the whole dispute, no such change should have been put into force by the Company, until the Department had granted or refused the application, and until the Board, if granted, had finished its work.

Conclusion.—The Company submitted its books to the inspection of the Board, and there is no doubt about the reality and the gravity of the financial condition. The responsibility for this condition would require a more thorough and a more formal investigation than the Board has so far attempted. It seems to the Board, however, that the responsibility does not lie either upon the men or the present management. The present dispute about the winter rate in the old section and the permanent rates in the new section is not the cause of the financial crisis. This dispute might have been settled by a Board of Conciliation had it met in time, but the crisis would not have been averted thereby. It has been suggested to the Board that an investigation should be conducted with the object of:—

1. Fixing definitely the responsibility for the crisis.

2. Determining accurately how the proposed reduction would affect the total earnings of the men.

The present Board, however, believes that it is their duty to submit the matter to the Department, at the present juncture, and to leave the question of the necessity or advisability of such further investigation to the Department.

Dated this twentieth day of March, at Sydney.

" ALEXANDER MACKINNON.

THE COMBINES INVESTIGATION ACT.—INVESTIGATION OF ALLEGED COMBINE IN SHOEMAKING MACHINERY.

IN the March number of the *Labour Gazette* reference has been made to an order under the Combines Investigation Act which was granted on February 25 by the Honourable Mr. Justice L. J. Cannon, of the Superior Court, Quebec, for the establishment of a Board of Investigation to inquire into the existence of an alleged combine on the part of the United Shoe Machinery Company

of Canada, in respect of the manufacture and sale of shoemaking machinery.[1]

On receipt of the above order in the Department, communications were at once addressed to Mr. A. Falconer, K.C., of Montreal, on behalf of the applicants, and to Mr. Frank W. Knowlton, of Montreal, Manager of the United Shoe Machinery Company of Canada, on behalf of the persons named in the Judge's order as being concerned in the alleged combine, stating that the Minister of Labour was proceeding forthwith to establish a Board in this matter as directed, and calling upon each of the parties concerned to furnish him with the name of a person qualified and ready to act as a member of the Board. Mr. Joseph C. Walsh, Journalist, of Montreal, and Mr. William J. White, K.C., of Montreal, were appointed by the Minister as members of the Board, on the recommendation respectively of the applicants and of the persons named in the Judge's order as being concerned in the alleged combine. The Board was completed on March 16, by the appointment of the Honourable Mr. Justice Charles Laurendeau, of the Superior Court, Montreal, as third member and Chairman, this appointment being made on the joint recommendation of the other two members of the Board.

On March 1, the Minister received from Messrs. McGibbon, Casgrain & Mitchell, of Montreal, Solicitors for the United Shoe Machinery Company of Canada, a certified copy of an inscription in appeal to the Court of King's Bench from the Judge's order for investigation in this matter; also a list of proceedings in the above Court showing that the appeal in question had been instituted.

The Department was informed that the preliminary meeting of the Board of Investigation was held in Montreal, on March 21, adjournment being made in order to afford time for the employment of clerical and stenographic assistance and for purposes of organization.

On March 22, a petition was filed on behalf of the United Shoe Machinery Company of Canada in the Superior Court, Montreal, for the issue of a writ of prohibition enjoining the above mentioned Board of Investigation from proceeding with its inquiry, also asking that it be declared that the said Board of Investigation was acting without jurisdiction and illegally, and that the appointment of the said Board be declared illegal. The petition in question recited the proceedings which had already taken place before Judge Cannon, in Quebec, and asked that the Judge's order and the appointment of the Board be declared illegal, for among others, the following reasons: Because the application was invalid; because the application was not made by six persons, British subjects resident in Canada, to the detriment of whom the alleged combine operated as consumers or producers; because no order for investigation should have been given without the United Shoe Machinery Company having an opportunity of answering the same and filing a defence, and also having an opportunity of showing that the same was unfounded in law and in fact; because the Company's defence and answer to the said application were rejected by Judge Cannon; because the Board of Investigation had illegally purported to act as a tribunal of inferior jurisdiction and assumed a jurisdiction which it did not in law possess; because the constitutional rights of the Company had been violated and set aside; because an appeal from the order of Judge Cannon had been legally instituted by which the execution of the Judge's order was by law suspended until final adjudication upon the said appeal, the Board having no right to proceed in the premises until the said appeal had been finally adjudicated upon.

Upon being apprised of the above petition of the United Shoe Machinery Company of Canada, Mr. Amie Geoffrion, K.C., of Montreal, was instructed on March 23 to appear on behalf of the Dominion Government to oppose the issue of such writ of prohibition. The hearing of the petition was held before

[1] See *Labour Gazette* for March, 1911, pages 969 to 974, for the terms of Judge's order and reference to application of Napoleon Drouin and others, of Quebec, which the same was based.

the Honourable Mr. Justice A. A. Bruneau, of the Superior Court, Montreal, judgment being given by the Court on April 1, which permitted the issue of a writ of prohibition against the Board of Investigation, and also granted an interlocutory order suspending proceedings before the Board until June 15 next.

BRITISH COLUMBIA FEDERATION OF LABOUR—ANNUAL CONVENTION.

WITH delegates present from almost every section of the Province, the British Columbia Federation of Labour, organized last year, opened its convention in the Labour Hall, Victoria, B.C., on Monday morning, March 13, 1911. Mr. J. C. Watters, president of the Victoria Trades and Labour Council occupied the chair. Addresses of welcome were delivered by Premier McBride on behalf of the Province and Mayor Morley on behalf of the city.

Reports were read from various officials. Secretary Pettipiece reported that the expectations of the founders of the Federation had been greatly exceeded. Three central bodies and forty-five local unions have affiliated.

After discussion the following resolution was carried: "Whereas the spread of technical education is both inevitable and ultimately desirable in the best interests of the working class: Therefore, be it resolved that this convention is in favor of the establishment of an educational institution, supported and controlled by organized labour, for the instruction of its members in the fundamental principles of our modern industrial system."

Another resolution carried was to the following effect: "That the Executive Council of the Federation be instructed to request the Provincial Government to have inserted in the contracts for the erection of the new provincial university a clause that wages shall not be less than the minimum union rate of wages established in Vancouver for respective crafts."

Resolutions endorsing the strike of the machinists to establish the eight-hour day, and the action of the Trades and Labour Council of Vancouver in calling for a commission to investigate the price of coal in British Columbia, were carried.

A resolution, protesting against assisted immigration was adopted, the immigration methods of the Salvation Army Army being severely criticized. A resolution was offered that a delegate should be sent to England to offset the work of these immigration societies, but was defeated on division.

The Convention went on record in favour of a universal work day of not more than eight hours. The following resolution was unanimously passed: "Resolved, that the British Columbia Federation of Labour urges upon the membership of organized labour the necessity of supporting those candidates who are pledged to support the interest of the working class."

A resolution demanding sanitary conditions in bake shops was passed. It was ordered that copies of Premier McBride's reply to a memorial of the Trades and Labour Congress, be sent to all labour organizations in the Province. The Federation advocated the entire exclusion of Chinese, or failing that, that the head tax be raised from $500 to $1,000. Other resolutions were passed, protesting against marching prisoners through the streets and permitting them to compete with free labour; in favour of the principle of co-operation; asking an eight-hour day for all women employés; condemning abuses of the Factory Act as practised in laundries, and in favour of the initiative, referendum and recall.

Two fraternal delegates were present from the Washington State Federation of Labour, and one from the Western Federation of Miners.

There were more than sixty delegates in attendance.

The following officers were elected: President, J. C. Watters, Victoria Trades and Labour Council; first vice-president, J. W. Wilkinson, Vancouver, Amalgamated Society of Carpenters and Joiners; second vice-president, R. A. Stoney,

New Westminster Typographical Union; third vice-president, C. Sivertz, Victoria letter carriers; fourth vice-president, J. H. McVety, Vancouver Machinists' Union; general secretary, R. P. Pettipiece, Vancouver, Trades and Labour Council; secretary-treasurer, Victor R. Midgley, Ladners, Trades and Labour Council; J. C. Watters, delegate to the Dominion Trades and Labour Congress, Calgary, next September; R. P. Pettipiece, fraternal delegate to the Washington State Convention at Spokane, January 1912.

FAIR WAGES ENFORCEMENT AND FACTORY INSPECTION IN SASKATCHEWAN.

IN the Province of Saskatchewan, the payment of fair wages is secured to all workmen engaged on public works by a clause inserted in all Government contracts, which provides that: "The contractor shall employ none but skilled workmen and their apprentices, and shall not pay less than the average rate of wages paid in the locality where the work is being done." In order to see to the carrying out of this clause, a Fair Wages Officer was appointed in September, 1909, whose duty it is to investigate all complaints as to the violation of this clause.

In the First Annual Report of the "Fair Wages Officer", covering the year 1910, a copy of which has been furnished to the Department, a detailed account is given of all the occasions in which his intervention was sought. The occupations of the men who claimed not to be receiving current wages comprised the laying of plaster block, electrical working, painting, unskilled labour, and carpenters. The claims of the men were allowed in three cases, and disallowed in two. In the investigation of a claim affecting unskilled labour at Regina during November, it was found that there had been a wholesale reduction in wages for this class of employés, but that there was practically no average rate that was anything like permanent. One strike was settled through the friendly mediation of the Fair Wages Officer, but two others which took place at Regina did not come within his province, as they did not concern questions of wages or hours of labour.

The year was stated to have been an exceedingly prosperous one for mechanics in the various branches of outside employment. Unskilled labour was in very active demand, and in places there was a shortage in this class of employment, causing a sharp advance in wages.

Factory Inspection.

On April 4, 1910, Mr. T. M. Molloy, the Fair Wages Officer, was appointed also the Inspector of Factories for Saskatchewan. His First Annual Report covers the nine months ending December 31, 1910. The work of the year consisted chiefly in securing lists of industries throughout the province, and in acquainting factory managers and employés with their duties, rights and privileges under the Factories Act. Copies of the Act were mailed to factory managers and to architects, and letters were sent to the latter, drawing their attention to the provisions respecting to the construction of buildings to be used as factories.

Child Labour.

According to the Factories Act of Saskatchewan, the age of admission into factories is fixed at fourteen years. Establishments with less than six employés are not within the scope of the Act. Twelve children under age were found to be employed in factories contrary to the law. In each case the immediate discharge of the child was ordered. Many children were found to be working in smaller establishments, but they could not be prevented by the inspector. Recommendations are made that children between the ages of fourteen and sixteen years should be required to be able to read and write before being allowed to work in factories, and that the Truancy Act should be more

strictly and generally enforced in the case of messenger boys, delivery boys, elevator boys, bell boys in hotels, and young girls working as domestics and millinery and dressmaking apprentices.

Forty-five Hour Week.

The introduction of the compulsory forty-five hour week is stated to have caused some inconvenience and hardship on certain employers. Sixteen overtime permits were granted, covering in all 149 days. Twelve of these permits were issued to steam laundries. Three prosecutions were made under the Act for violation of the forty-five hour week.

Sanitation.

Much attention was given to the question of sanitation. While many places were found to be poorly equipped in this respect, in every instance except one the instructions of the inspectors were promptly carried out.

Accidents.

In was found that with few exceptions little consideration had been given to the guarding of machinery by employers, in many cases unprotected drive belts and shafts being placed within a few inches of the floor. Orders were given that these should be boxed, that set screws be cut down or covered in, that railings be placed around openings in floors, that bevel gear wheels be covered, that fly wheels be boxed, and that shafting having keys or key-ways exposed be guarded.

During the year, thirteen accidents to employés were reported, of which one was fatal. In six cases, fingers were cut. The other injuries consisted of cuts of the hand, wrist, and arm, a bruised shoulder, scalded face, and wounded leg. The one fatal accident was caused by a crushed skull.

WELFARE WORK BY THE McCLARY MANUFACTURING COMPANY, LONDON, ONT.

A WELFARE Department was organized about a year ago by the McClary Manufacturing Company of London, Ont., to operate in conjunction with the benefit society for the well-being of its employés. The McClary Company is one of the first of Canadian manufacturers to take up this work seriously. In reviewing what has been accomplished during the year, the results are very gratifying to the Company, since they feel assured that, through the efforts of the Department, much good has been done among their employés.

"Welfare work" as applied to factory or shop employés is interpreted to mean "anything done by the employers for the welfare of their employés, which they are not compelled by law, or expected by common custom to do." Some of the things coming under this head, which the McClary Company has done, are outlined below.

The Welfare Department employs a graduate nurse in the person of Mrs. Reynolds, who advises as to the sanitary conditions throughout the plant, gives first aid assistance in cases of accident, dresses wounds of such persons until completely recovered, and visits employés at their homes in case of sickness. Mrs. Reynolds has a perfectly appointed hospital at the foundry plant in the east end of the city, and also one at the Wares plant down-town. During the past year, she attended twenty-six accidents, 619 dressings, and made 240 visits.

There is also a café at each plant where a chef is employed, and wholesome food supplied at cost to those who care to avail themselves of it. An average of 360 lunches per day are served.

There is a library at each plant, in connection with which thanks are due Mr. W. S. Leslie, of Montreal, for a gift of thirty-one excellent books to the library at the down-town plant, and to the public library, which has loaned

forty volumes. The Company is also indebted to Rev. Mr. Howard, Rev. Father McKeon, and Mr. P. H. Millman for donations of books to the Foundry library, and some technical works have been loaned to it by the Superintendent, Mr. F. King, and Mr. W. Pepper. The libraries have proved a much-appreciated branch of the work, and are well patronized.

Other features of the work are dining rooms, with separate lunch and rest rooms for girls, games and entertainments or lectures for the winter noon-hours, and tennis and baseball grounds for summer recreation.

The Company hopes during the year to add to this list other items which will further increase the comfort and enjoyment of their large and efficient staff of work-people.

PEOPLE'S BANK OF LEVIS, QUE.—TENTH ANNUAL REPORT.

THE tenth annual report of the People's Bank of Levis, Que., of which a copy was received at the Department during March, covers the operations of the bank during the year ended November 30, 1910. The operations of the year were more successful than ever before. The total assets of the Bank now stand at $128,618.11, compared with $102,870.35 in the previous year. Share capital increased by $12,573, and savings by $10,337, while profits were $6,172 compared with $4,861.72 last year. The volume of general operations increased by $270,108 during the year, whereas last year it increased by $117,423. It has, therefore, doubled during the year, giving a monthly increase of $22,509 against one of $12,723 the year before, until it has now reached $887,591.69. The number of loans granted was 788, against 638 in the previous year, while the amount loaned was $136,903.49, compared with $110,404.47 in the preceding year. As in past years these loans have been made without loss. The bank has now a reserve of $5,146.37. There are now fifty-three of these banks established throughout the Province of Quebec, and others in Ontario and the United States. A section of the report states that the results obtained by the establishment of school savings banks in the Town of Levis and vicinity have been most gratifying, the economies thus realized after three year's operations amounting to the sum of $4,649.08.

THE INDUSTRIAL EDUCATION ACT OF ONTARIO, 1911.

WITH the prorogation on March 25 of the Ontario Legislature, an important act "respecting Education for Industrial Purposes" went into force in that Province. The Act provides for a considerable enlargement of the facilities offered for industrial training, under the supervision of the Provincial Department of Education, and is largely the outcome of a special report on technical Education by the Superintendent of Education for the Province, Dr. John Seath.*

The Act is divided into two parts, the first of which has reference to industrial, technical and art schools, and the second, to agricultural and commercial departments of schools.

Industrial, Technical and Art Schools.

The Act sets forth that, with the approval of the Minister of Education, a high school board or board of education of any city, town or village, may provide for the instruction of duly admitted pupils in the following classes of schools:

(1) General Industrial Schools for instruction in such subjects as may form a basal preparation for the trades, including work-shop practice, with correlated drawing, English, and practical mathematics and science, and continuing the essential subjects of a good general education.

(2) Special Industrial Schools, providing for instruc-

*A review of this report is published in the next following article.

tion in the theoretical and practical work of particular trades carried on in the city, town or village, and when deemed desirable in the essential subjects of a good general education.

(3) Technical High Schools and departments of High Schools for the training of duly admitted High School pupils for minor directive positions in industrial establishments.

(4) Co-operative Industrial Schools in which and under such conditions as may be agreed upon between the Board and the employer: (*a*) apprentices, whether articled or not, employed in the workshops may receive in the day schools instruction bearing upon their trades; and (*b*) pupils attending the day schools may receive practical instruction in the workshops.

(5) Schools for instruction in the Fine and Applied Arts.

(6) Industrial, Technical and Art Evening Schools, in which workmen and workwomen employed during the day may receive theoretical and practical instruction in their trades.

Pupils may be admitted to a special or a general or a corporative industrial school from the fourth form of the public or the separate school.

Management of Technical Schools.

The Act provides for the management and control of schools established as above by a committee of twelve persons, the members of which shall be appointed by the School Board as follows:—

(*a*) Six members of the Board, including one representative of the Board of Public School Trustees and one representative of the Board of Separate School Trustees, if any;

(*b*) Three persons not members of the Board who are engaged as employés in the manufacturing or other industries carried on in the local municipality or in the county in which the school is situate; and

(*c*) Three other persons not members of the Board who are employers of labour or directors of companies employing labour in manufacturing or other industries carried on in the local municipality or in the county in which the school is situate.

This committee is to be known as the Advisory Industrial Committee. Where more than one technical or industrial school exists, a separate committee may be appointed for each school or the Board may place two or more of the schools under one committee. Where two or more committees are appointed, the members of the Board may be appointed to more than one committee, except these specified under clauses (*b*) and (*c*) above. The Act also sets forth in detail the method of appointing committees, the tenure of office of members, the filling of vacancies, and the qualification of members. The powers of the committee are defined as follows:—

(1) Subject to the approval of the Minister and the Board, every Advisory Industrial Committee shall have authority: (*a*) to provide a suitable site and building and suitable equipment; (*b*) to arrange for conducting the school or any classes thereof in a High, Public or Continuation School or other building in the municipality; and (*c*) to prescribe courses of study and provide for examinations and diplomas.

(2) Subject to the approval of the Board, every Advisory Industrial Committee shall have authority: (*a*) to employ and dismiss teachers and fix their salaries; (*b*) to visit and report on the school or schools in its charge; (*c*) to fix the fees payable by pupils in attendance; (*d*) to submit annually to the Board at such date as the Board may require an estimate of the amount required to carry on the work of the school during the next calendar year; and (*e*) generally to do all other things necessary for carrying out the true object and intent of this Act with respect to any school which may be established thereunder.

The cost of establishing a school is to be provided in the same manner as in the case of a high school.

Regulations under the Act are to deal with the following questions: (1) the the qualifications of teachers; (2) the courses of study; (3) the character of the site, accommodations, and equipment; (4) the maximum and minimum fees that may be charged to pupils; and (5) generally as to any matter relating to the conduct and efficiency of the schools not herein expressly provided for.

Agricultural and Commercial Education.

With regard to agricultural and commercial departments of high schools, the board in control of the same is required to appoint a committee of management consisting in each case of eight persons, (*a*) four of whom shall be members of the Board, including one representative of the Board of Public School Trustees and one of the Board of Separate School Trustees, if any; and (*b*) four of whom shall be resident ratepayers of the local municipality or of the county in which the school or department is situated, but not members of the Board, each appointee being also a British subject of the full age of twenty-one years and actually engaged in agricultural or commercial pursuits, and, in the judgment of the Board, competent to advise and give other assistance in the management of the departments or schools.

Such Committees shall be respectively known as the Advisory Agricultural Com-

mittee and the Advisory Commercial Committee.

The Act after providing for the appointment and tenure of office of the committee defines its powers as follows:—

Subject to the approval of the Minister and the Board, every Advisory Agricultural Committee and every Advisory Commercial Committee shall have authority to prescribe courses of study and provide for examinations and diplomas; and, subject to the approval of the Board, (*a*) to visit and report on the school or department under its charge; to provide accommodations, equipment and supplies; (*b*) to fix the fees payable by pupils in attendance; (*c*) to submit annually during the month of January to the Board an estimate of the amount required to carry on the work of the school or department during the ensuing year; and (*d*) generally to do all other things necessary for carrying out the true object and intent of Part II of this Act.

Legislation Repealed.

In view of the above, the Act respecting Technical Schools and certain paragraphs of the Public Libraries' Act and Consolidated Municipal Act relating to technical education are repealed.

REPORT ON TECHNICAL EDUCATION BY SUPERINTENDENT FOR EDUCATION IN ONTARIO.*

A REPORT on Education for Industrial Purposes issued by the Department of Education, of Ontario, comprises an account of technical schools and other similar institutions abroad which were visited by Mr. John Seath, Superintendent of Education for Ontario. The countries in which the schools described are situated are: England, Scotland, France, Switzerland, Germany and the United States. An account is also given of the present condition of technical education in the Province of Ontario, and in three appendices to the report there are shown the attitude of interested public bodies, the opinions of employers of labour and of educationists, and the laws of Ontario respecting technical education and regulations of the Department of Education on the subject.

In the summary of recommendations, it is stated that the fundamental requirements are a good general education as an essential preparation for all vocations, and a closer connection between our schools and the activities of life. To meet these requirements the following changes are recommended: The extension of the present provision for teaching household science and manual training for the benefit of those who leave school at or before fourteen. For those who remain at school after fourteen, the establishment of the following classes of day schools: (1) The General Industrial School with courses in shop work, and in English, Mathematics, and Science related thereto. (2) The Special Industrial School, providing for the trades and similar occupations, and (3) The Technical High School or High School Department, for pupils who will remain three or four years at school and are preparing for directive positions in connection with the industries.

In the case of workpeople engaged by day, the establishment of the following classes of schools is recommended:

1. The Apprenticeship School, in which the apprentice attends for part time the Day Industrial School, and the Day or Evening Apprenticeship School provided by the employer himself.

2. The Evening School, supplementing the day shop-work by instruction in the evening.

3. The Correspondence-Study School, providing instruction partly by correspondence and partly by a staff of travelling teachers.

The establishment of an Ontario Industrial and Technical College with an industrial museum is recommended, for the training of all grades of industrial teachers, of workmen who have already spent some years in apprenticeship, and of advanced pupils, and for the conduct of a Correspondence-Study School with travelling teachers.

Each industrial centre should rank as a unit for the purposes of organization, and a special departmental officer should be appointed to act as Director of Industrial and Technical Schools, and to assist

*Education for Industrial Purposes. A report by John Seath, Superintendent of Education for Ontario. Toronto: King's Printer, 1911. Pages, 390.

local School Boards in their establishment.

It is suggested that the Dominion Government should establish an Institute of Industrial Research, for the advancement of the trades, as the Dominion has already done in the case of agriculture, mining and other departments.

For the fostering of the Fine Arts and the special education of workmen in the more artistic trades, it is recommended that there should be further extension of the provision for art and drawing in the primary and secondary schools, and that a Central Art School should be established in Toronto with both day and evening classes, and other Art Schools in other centres of the Province.

For the purpose of agricultural education, the further extension of nature study and elementary agriculture in the primary schools is recommended, and the re-organization of the provision for agriculture in the high and continuation schools, as a step in the development of school departments of agriculture and agricultural high and continuation schools. The appointment of a special departmental officer to act as Director and Inspector of the Primary and Secondary agricultural classes is also suggested.

REVIEW OF PARLIAMENTARY PROCEEDINGS AFFECTING LABOUR DURING MARCH, 1911.

A BILL to prohibit the improper use of opium and other drugs, to which reference has been made in the December, February and March numbers of the *Labour Gazette*, was considered by the Senate in Committee of the Whole on March 15, March 22 and March 23, and subjected to amendment in certain respects, in which form it received third reading on March 28. The amendments referred to did not affect the principle of the Bill, the most important change being the addition of certain substances to the schedule of the Bill. As adopted by the House of Commons the measure was designed to apply a strict regulation to the sale and use of opium, morphine and cocaine. The Bill as amended by the Senate will regulate the sale and use of opium, morphine, its salts and compounds thereof, cocaine, its salts and compounds thereof, and eucaine, its salts and compounds thereof.

The extension of the Bill in this respect was deemed advisable to the end that it might effectually suppress the traffic in habit-forming drugs which is understood to have already attained considerable proportions in some parts of the country. The drug eucaine which has been added to the schedule is one having somewhat similar properties to cocaine.

At the end of the month the Bill awaited concurrence by the House of Commons in the Senate amendments above mentioned.

In the Senate on March 23, Honourable Mr. Campbell moved the second reading of Bill No. 3.—*An Act respecting Hours of Labour on Public Works.* This motion was followed by a debate participated in by a number of the members of the Senate. The debate on the second reading of the Bill was continued in the Senate on March 28.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published except where otherwise stated, by courtesy of the Department of the Interior, Canada.

DURING March, 1911, the inflow of immigrants into Canada was reported heavier than in any previous year at this time. Steamships from Bristol have been compelled to stop bookings owing to lack of accommodation. The officials add that the class of immigrants offering is the very best possible. The latest official returns of the movement are as follows:—

British Emigration to Canada.

During the month ending February 28, 1911, compared with February, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

	NATIONALITY.															
	English.		Welsh.		Scottish.		Irish.		British Colonial.		Total British Subjects.		Foreign.		Total.	
	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910

Of 371 homestead entries made during February, 1911, by persons coming from the United States, there were 185 from North Dakota, thirty-five from Minnesota and twenty-one from Wisconsin.

Lands Patented.

An abstract of Letters Patent covering Dominion lands, situate in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory issued by the Department of the Interior, during February, 1911, as compared with February, 1910, was as follows:—

Nature of Grant.	February, 1911.	
	No. of Patents.	No. of Acres.
Alberta Railway & Irrigation Company's sales	2	962.00
Assignment of mortgages		
British Columbia homesteads	9	1,271.60
British Columbia sales	1	3.84
Coal lands' sales	7	1,293.05
Homesteads	1,690	267,844.261
License of occupation	3	
Military bounty grants	1	160.00
Military homesteads		
Mineral rights (4,765.745 acres)	20	
North-west half-breed grants	16	2,553'92
North-west Mounted Police grants		
Parish sales		
Quit claim, special grants (320 acres)	2	
Railways:—		
Calgary and Edmonton Railway	1	156'00
Canadian Northern Railway	83	1,760'13
Canadian Pacific Railway grants	5	545'93
Grand Trunk Pacific Railway	9	256'91
Manitoba and North Western Railway	1	6'37
Manitoba and South Eastern Railway	1	160'00
Sales	38	5,755'76
School lands sales	23	3,075'00
Special grants	8	228'06
Yukon Territory Sales (37'10 acres, Under rights)	14	599'79
Totals	1,934	286,362'62

In February, 1910, the number of patents issued was 2,039 covering an area of 317,089.49 acres, showing a decrease for the month of February, 1911, of 105 in the number of patents issued, and of 30,456.87 acres in the area patented.

Note.

In the House of Commons, on March 13, 1911, the Honourable, The Minister of the Interior, announced that the immigration year just closed was the most satisfactory and successful in Canadian history. The immigration has been larger than in any previous year, and the character of it has been distinctly superior. The total immigration of the year was over 300,000, as against 189,000 five years ago, 49,000 ten years ago, and 21,000 fourteen years ago, when the Government inaugurated its present immigration policy. Fourteen years ago expenses attached to the work were $261,000, while last year they were $960,000. The character of the new citizenhood had been greatly improved. Last year there was less complaint than ever before in the history of Canadian immigration. There was less lack of employment, less lack of financial means on the part of the arrivals, and less lack of physical condition. Both in nationality and in suitability for ready assimilation progress had been made. This satisfactory condition had been brought about largely by a general increasing of the stringency of the regulations, and by the adoption of a permanent policy of independence of aid.

TRADE DISPUTES DURING THE MONTH OF MARCH, 1911.

THERE was no great disturbance of industrial conditions through trade disputes during the month of March, the prolonged strike of coal miners at Springhill, N.S., being the only one in which large numbers were involved.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during March

was eleven, being five more than in February, and the same number as in March, 1910. About eleven firms and 3,207 employés were involved in these disputes, seven firms and about 1,190 employés having been involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during March was approximately 33,600 working days, compared with a loss of 32,525 days in February, and 50,570 in March, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes, and the number of employés in each group of trades.

Trades.	No. of disputes.	No. of employés.
Mining	1	550
Woodworking	1	42
Textile trades	1	114
Clothing trades	3	432
Miscellaneous trades	1	52
Total	7	1,190

Localities affected by new disputes.—Two new disputes of the month occurred in the Province of Quebec, four in Ontario, and one in Alberta.

Causes of disputes.—The following were the causes of the new disputes of the month:

Cause	No. of disputes.
For higher wages	3
Against employment of a particular person	1
Lockout, on account of employés joining a Union	1
Against action of a foreman	1
Alleged withholding of Union fees	1
Total	7

Methods of settlement.—Of the eleven disputes in existence during March, definite settlements were reported in four, and in two others conditions ceased to be affected. One dispute was settled through negotiations between the parties concerned, one by arbitration and the remaining disputes were settled without negotiations, either by the places of the strikers being filled, or by the return of the strikers to work.

Results of disputes.—One dispute ended in a compromise. In one the result was not reported; in one, both sides claimed to have been successful, and in another, work was resumed pending settlement. The remaining three that were terminated resulted in favour of the employers.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes in existence in March, which began in previous months comprised strikes of coal miners at Springhill, N.S., and Michel, B.C., silver miners at Silver Centre, Ont., and fur workers at Sandwich, Ont.

Strike of Coal Miners at Springhill, N.S.

The strike of coal miners at Springhill, N.S., which had begun on August 11, 1909, still continued throughout March, about 1,000 men being involved. The only change in the situation reported during March was the formation of the town into a police district, so that the authorities might be better able to preserve order.

Strike of Coal Miners at Michel, B.C.

A strike of 950 coal miners at Michel, B.C., which began on February 21, was reported to have terminated on March 1. The cause of the dispute was the refusal of the Company to place four more men on the ventilation fans. The Company, however, installed a telephone from the fan house to points underground, and work was resumed.

Strike of Silver Miners at Silver Centre, Ont.

No settlement was reported in the case of a strike of silver miners at Silver Centre, Ont., which began on January 15, on account of a reduction in wages, but conditions ceased to be affected by the dispute.

Strike of Fur Workers at Sandwich, Ont.

No settlement was reported in the case of a strike of fur workers at Sandwich, Ont., which began on January 14,

on the refusal of the employers to grant a demand of the men for an increase of ten per cent., in their wages. Seven men were directly affected by this dispute, and twenty-five, indirectly.

New Disputes.

The new disputes of the month, comprised strikes of coal miners at Coleman, Alta., shoe fitters, hotel waiters and billiard table makers at Toronto, Ont.; garment workers at Montreal, and shoe machine workers at Quebec, and a lockout of carpet weavers at Toronto, Ont.

Strike of Coal Miners at Coleman, Alta.

A strike of coal miners was reported to have taken place at Coleman, Alta., on March 20, the alleged cause having been the withholding by the Company of fees belonging to the Miners' Union, which had been deducted from the wages of the men. The Company claimed they had taken this step in order to force a settlement of bills owed by the Union for water and electric light supplied to the Union Hospital. The matter was placed in the hands of their respective attorneys, who arranged that it should be referred to a district judge for settlement. Work was resumed on March 24, about 550 men were involved in this dispute.

Strike of Shoe Workers at Toronto.

On March 29, a strike of shoe workers took place at Toronto, Ont., on account of their objection to the piecework prices which were offered. According to the employers twelve male and three female workers were directly involved, and fifty-five male and ten female employés were indirectly involved. No settlement of the dispute was reported at the end of the month, but the employers stated that they were employing girls in the place of the foreigners who had gone out, as what they had been engaged in was girls' work.

Strike of Hotel Waiters at Toronto, Ont.

On March 3, about fifty-two waiters of the staff of the King Edward Hotel at Toronto, Ont., declared a strike. According to a report received from the management of the hotel, the dispute arose from a fine imposed on one of the men who was charged with losing a check. The manager after finding that no food had been served on this check, waived the charge, but the men then demanded an increase in wages from $25 to $30 a month. This was refused. No definite settlement of the dispute was reported, but by the closing of one room for renovation, the hotel ceased to be affected by the dispute.

Strike of Billiard Table Makers at Toronto, Ont.

On March 29, about forty-two billiard table makers of the firm of Samuel May & Company, at Toronto, declared a strike on account of the refusal of the employers to grant a demand for an increase of ten per cent., in their wages. The dispute was still unsettled at the end of the month.

Strike of Garment Workers at Montreal, Que.

On March 20, a strike of twelve male and eight female employés of the Paragon Trouser Company took place at Montreal, Que. It was stated by the employers that the cause of the dispute was their refusal to discharge an employé without notice. On March 24, the Company ceased to be affected by the dispute, the places of the strikers having been filled.

Strike of Shoe Machine Workers at Quebec.

On March 17, about thirty-two shoe machine workers of the John Ritchie Company at Quebec stopped work on account of a foreman giving assistance in getting out a rush order, in the absence of two of the hands. It was reported by the Company that the strikers returned to work on March 20, on the

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES C, No. 126.

TABLE OF TRADE DISPUTES DURING THE MONTH OF MARCH, 1911.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of commencement.	Date of termination.	Result.
					Directly.		Indirectly.				
			Directly.	Indirectly.	Males.	Females.	Males.	Females.			
DISPUTES WHICH COMMENCED PRIOR TO THE BEGINNING OF THE MONTH.											
Mining—											
Coal miners	Springhill N.S.	For recognition of Union and increase in wages, and against conditions of employment	1		1,000				Aug. 11 1909		No settlement reported, but places of many strikers were filled.
Coal miners	Michel, B.C.	Demand for more men on ventilation fans	1		950				Feb. 21	Mar. 1	Work resumed; Company made changes in mines.
Silver miners	Silver Centre, Ont.	Against reduction in wages	1		35				Jan. 15		No settlement reported at end of month, but conditions ceased to be affected.
Clothing trades—											
Fur workers	Sandwich, Ont.	For increase of 10 per cent. in wages	1		7		25		Jan. 14		No settlement reported at end of month.
DISPUTES WHICH BEGAN DURING THE MONTH.											
Mining—											
Coal miners	Coleman, Alta.	Company with held Union fees deducted from wages to force settlement of claim against Union.	1		550				Mar. 20	Mar. 24	Dispute referred to a District Court Judge.
Wood working—											
Billiard table makers	Toronto, Ont.	For increase in wages	1		42				" 29		No settlement reported at end of month.

Textile—											
Carpet weavers	Toronto, Ont.	Lockout on account of employés joining Union	1		114			"	22		No settlement reported at end of month.
Clothing—											
Garment workers	Montreal, Que	Refusal of firm to discharge an employé without notice	1		12	8		"	20	Mar. 24	Places of strikers were filled.
Shoe machine workers	Quebec, Que	Men objected to foreman doing work of an absent employé	1		32	300		"	17	Mar. 20	Work resumed. Both employers and strikers claimed settlement in their favour.
Shoe fitters	Toronto, Ont.	For higher piece-work prices	1		12	3	55	10	"	29	No settlement reported at end of month, but firm was engaging female workers in place of strikers.
Miscellaneous trades—											
Hotel waiters	Toronto, Ont.	For increase in wages	1		52				Mar.	3	No settlement reported; but conditions ceased to be affected.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

understanding that the foreman could assist in any work when required, and must not be interfered with by the men under penalty of instant dismissal. According to report received from the men, there had been an understanding that the foreman should not do such work. The men claimed that the result of the strike was that the foreman would not do work in future.

Lockout of Carpet Weavers at Toronto, Ont.

When the factory of the Toronto Carpet Manufacturing Company, at Toronto, was closed down in March for stock-taking, they were notified that their Brussels weavers had joined a Union. As the Company had a regulation in force to the effect that "No employé may be a member of any organization or Union whose rules govern their conduct while in our employ", the following notice was issued to their men on March 22.

Memorandum for Weavers:

No. 1. We have been notified by Mr. Hibbard of Falls River, that all our Brussels Weavers belong to a Union. This is against our Rules and Regulations, which all our employés signed when they came into our employ, and in breaking them by joining a Union, they render themselves liable to suspension or discharge.

No. 2. Any Brussels weaver wishing to enter our employ again will be required to sign an agreement, pledging himself not to belong to any Union. This pledge will be enforced. Our mill will be run absolutely as a non-union shop, which it has been ever since we started.

Any grievance complained of by any individual weaver we absolutely pledge ourselves to look into and, if advisable and possible, to remedy it.

About 114 men were involved in this dispute, which was still unsettled at the end of the month.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of February, and which have been reported to the Department.

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month preliving in the leading centres of industry throughout Canada.

The list of commodities includes twenty eight varieties of food, with fuel and coal oil. In addition a statement usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of

The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the the Department.

Making and repairing rubber dating stamps and type, also other stamps	53.70
Supplying stamping material and wooden boxes, and repairing stamping pads	389.38
Supplying mail bags	341.00
Repairing Post Office scales	18.00
Making and repairing mail locks and supplying mail bag fittings	1,816.35
Supplying Railway Mail Clerks' tin travelling boxes and street letter boxes, and repairing portable letter boxes, parcel receptacles, Railway Mail Clerks' tin travelling boxes and street letter boxes	5,403.70
Making and repairing miscellaneous articles of Postal Stores	115.55
Making and supplying articles of official uniform	2,204.36

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MARCH, 1911.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb, or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The Department is also indebted to the Bureau of Mines of Ontario, and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their assistance in furnishing the Department with a statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 322 individual work-people in Canada during the month of March, 1911,

were reported to the Department of Labour. Of these 104 were fatal and 218 resulted in serious injuries. In addition, two fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before March, 1911.

In the preceding month there were eighty-four fatal and 180 non-fatal accidents reported, a total of 264, and in March, 1910, there were 133 fatal and 261 non-fatal accidents, a total of 394. The number of fatal accidents reported in March, 1911, was, therefore, twenty less than in the preceding month and twenty-nine less than in March, 1910. The number of non-fatal accidents reported in March, 1911 was thirty-eight more than in the preceding month and fifty-three less than in March, 1910. Altogether there were fifty-eight more industrial accidents reported in March, 1911, than in the preceding month and seventy-two less than in the same month of the preceding year.

Of 152 returns received during the month, giving the ages of the victims of industrial accidents, twenty-two referred to persons under twenty-one years of age, fifty to persons between twenty-one and forty-five, and eighteen, to persons over forty-five. Sixty-two persons were over twenty-one years of age, but their exact ages were not specified.

The following is a record of the accidents of the month by industries and trades:—

STATEMENT OF ACCIDENTS DURING MARCH, 1911, BY INDUSTRIES AND TRADES.

Trade or Industry.	Killed.	Injured.	Total
Agriculture	17	18	35
Fishing and hunting	2	.....	2
Lumbering	10	17	27
Mining	11	19	30
Building trades	5	15	20
Metal trades	8	53	61
Woodworking trades	.....	13	13
Printing trades	.....	1	1
Clothing trades	.....	1	1
Textile trades	1	2	3
Food and tobacco preparation	1	3	4
Leather trades	.....	2	2
Railway service	18	26	44
Navigation	7	1	8
General transport	4	11	15
Civic employés	2	16	18
Miscellaneous	5	7	12
Unskilled labour	13	13	26
Total	104	218	322

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were: The drowning of the crew, five in number, of the steamer *Sechelt* off Beachy Head, B.C., in the wreck of that vessel; the death of four workers by an explosion of gas at Niagara Falls, Ont.; the killing of three railway employés in a collision at Schreiber, Ont.; the drowning of two millmen at Meadowvale, Ont.; and the death of two labourers caused by an explosion of dynamite at LaTuque, Que.

Wreck of Steamer "Sechelt" off Beachy Head, B.C.

On March 25, the small deck steamer *Sechelt* operating between Victoria and Sooke, B.C., capsized off Beachy Head, B.C., and the captain, engineer, fireman and three deckhands were drowned.

Four Killed by Explosion at Niagara Falls, Ont.

Three men were instantly killed, one man received injuries which caused his death a week later, and six men were seriously injured in an explosion on the works of the Ontario Power Company, at Niagara Falls, Ont., on the morning of March 3. A tunnel in the rock had been closed by a bulkhead during the night. The explosion occurred when the tunnel was opened. An accumulation of gas is supposed to have caused the explosion, ignition occurring when one of the men struck a match. The coroner's jury did not place responsibility for the accident.

Disasastrous Railway Collision at Schreiber, Ont.

A head-on collision occurred on March 25, one and one-half miles east of Schreiber, Ont., between west bound passenger train, 2nd No. 83, from Toronto and east bound 5th, No. 124, of empty passenger coaches. In the wreck the brakeman and fireman of the east bound train and the porter in charge of the empty coaches were instantly killed, and the engineer and brakeman on the west bound train seriously injured. The cause of the disaster was assigned to an overlooking of orders.

Drowning of Two Workers at Meadowvale, Ont.

On March 12, while breaking an ice jam above a mill dam at Meadowvale, Ont., the proprietor of the mill and another workman fell into the Credit river and were drowned.

Explosion of Dynamite at La Tuque, Que.

On March 24, two workmen in the employ of the Quebec and St. Maurice Industrial Company at La Tuque, Que., were instantly killed by a premature explosion of dynamite in a blast they were charging.

Record by Industries and Trades.

Agriculture.—In this industry, there were seventeen fatal and eighteen non-fatal accidents in March, 1911, compared with fourteen killed and twelve injured in the preceding month and thirteen killed and twenty-seven injured in March, 1910. Of the fatal accidents six were due to runaways, two each to falling material, and to drowning and one each to livestock, to exposure, to being run over, to being burnt to death, to an explosion of dynamite, to flying material, and to machinery. Six of the non-fatal accidents were due to machinery, five to falling material, three respectively to livestock and to falls and one to a runaway.

Fishing and hunting.—There were two fatalities in this group, one caused by exposure and one by drowning. In February last, there were two fatalities, and in March, 1910, two.

Lumbering.—During March, 1911, there were ten workers killed and seventeen injured, compared with fifteen killed and twelve injured the month before, and ten killed and eighteen injured in March a year ago. Three each of the fatalities were due to machinery and to falling material, two to drowning and one each to being run over and to being burnt to death. Seven each of the other accidents were due to falling material and to machinery and one each to exposure, to flying material and to a fall.

Mining.—Accidental death befell eleven mine workers during March, 1911, and nineteen others were injured, as against eight killed and twelve injured in the previous month, and eight killed and twenty-eight injured in March, 1910. Four respectively of the deaths were caused by the victims being run over and by falling material, two by explosions of dynamite and one by a fall. Seven of the accidents were caused by explosions of dynamite, four each by falling material and by being run over, two by explosions of gas and one each by machinery and by a fall.

Building trades.—Among these workers there were five killed and fifteen injured during March last past, compared with three killed and seven injured in February last and five killed and twenty-four injured in March, 1910. Of the fatalities four were caused by an explosion of gas and one by falling material. Six of the injuries were caused by an explosion of gas, five by falls, two by falling material and one each by flying material and by being run over.

Metal, engineering and shipbuilding trades.—The record in these trades during March, 1911, was eight killed and fifty-three injured, as against seven killed and forty-two injured in the preceding month and five killed and sixty-one injured in March a year ago. Of the fatalities two respectively were due to electric shock, to machinery, to falls and to falling material. Twenty-one of the injuries were due to machinery, twelve to explosions of gas or steam, seven to falls, five to falling material, three to molten metal, two each to being scalded and to flying material and one to being run over.

Woodworking trades.—During March, 1911, machinery caused thirteen non-fatal accidents. In the month before three woodworkers were killed and eighteen injured, and in March, 1910, the record was one killed and eleven injured.

Printing trades.—In these crafts one workman was injured by machinery, in March, 1911, compared with one injured the month before and five injured in March, 1910.

Clothing trades.—One workman was injured by being burnt while extinguishing an incipient fire in his shop. Two workers were injured in February last and five in March, 1910.

Textile trades.—An oilcloth worker was

Statistical Table, Series F., No. 91.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MARCH, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Newcastle, Ont	Mar. 1	1	In a runaway.
"	Moore Township, Ont	" 16	1	Gored by a bull.
"	Irland Township, Que	" 16	1	Crushed to death by fall of snow-laden roof.
"	Boughton Island, P.E.I	" 17	1	Frozen to death.
"	Berlin, Ont	" 20	1	Run over by electric railway car.
"	Hillcrest, Alta	" 20	1	Burned to death in house.
"	Wellington, N.S	" 22	1	Fell on portable circular saw.
"	Seven Persons, Alta	" 21	1	In a runaway.
"	Clonbrone, Que	" 18	1	In a runaway.
"	Ste. Martine, Que	" 28	1	Drowned, team broke through ice.
"	Meadowvale, Ont	" 10	1	Drowned when clearing ice from mill dam.
"	Thetford Mines, Que	" 16	1	By fall of barn roof.
"	Macleod, Alta	" 27	1	In a runaway.
"	Arrow Park, B.C	" 23	1	By explosion of dynamite.
"	Barford, Que	" 28	1	In a runaway.
"	Arthur, Ont	" 31	1	By flying wood.
Fruit grower	Saltfleet, Ont	" 25	1	Thrown from vehicle.
Fishing and hunting—				
Trapper	Green Lake, Sask	" 29	1	Found frozen to death.
Fisherman	Blenheim, Ont	" 28	1	Drowned, boat upset.
Lumbering—				
Saw mill hand	Kennedy Township, Ont	" 6	1	Caught in machinery.
"	Meadowvale, Ont	" 13	1	Drowned, while breaking ice jam at mill.
Saw mill owner	Rimouski, Que	" 13	1	Fell on saw.
"	Meadowvale, Ont	" 13	1	Drowned, while breaking ice jam at mill.
Logger	Treherne, Man	" 16	1	Struck by axe, bled to death.
"	Grand Coteau, Que	" 21	1	Tree fell on him.
"	Rimouski, Que	" 29	1	Tree fell on him.
"	Mattawamkeag, N.S	" 27	1	Run over by train.
"	Smokey Lake, Alta	" 13	1	Tree fell on him.
Lumber camp cook	Campbellton, N.B	" 5	1	Burned to death in camp.
Mining—				
Miner	Coal Creek, B.C	" 9	1	Run over by mine train.
"	Kaslo, B.C	" 10	1	By a snowslide.
"	Cobalt, Ont	" 16	1	By an explosion of dynamite.
"	Sydney, N.S	" 17	1	By fall of stone.
"	Sydney, N.S	" 17	1	By fall of coal.
"	Westville, N.S	" 16	1	Crushed to death by mine train.
"	Phoenix, B.C	" 20	1	Fell down chute.
Tally boy	Coal Creek, B.C	" 9	1	Run over by cars.
Prospector	near Nelson, B.C	" 11	1	By a snowslide.
Quarryman	Dundas, Ont	" 28	1	Run over by stone car.
"	Eburne, B.C	" 28	1	By explosion of dynamite.
Building trades—				
Carpenter	Niagara Falls, Ont	" 3	3	Explosion of gas in power tunnel.
"	Vancouver, B.C	" 25	1	By falling lumber.
Rock driller	Niagara Falls, Ont	" 3	1	Explosion of gas in power tunnel.
Metal, engineering and shipbuilding trades—				
Electrical worker	Morrisburg, Ont	" 1	1	Electrocuted.
"	Belleville, Ont	" 13	1	Electrocuted.
"	Peterborough, Ont	" 2	1	Caught in machinery.
Structural iron worker	Winnipeg, Man	" 3	1	Fell from scaffold.
Machinist	Toronto, Ont	" 2	1	Fell into ash pit.
Iron and steel worker	Brantford, Ont	" 2	1	Shaft weighing 1,800 lbs. fell on him.
Stationary engineer	Brockville, Ont	" 2	1	Caught in belting.
Foundryman	Toronto, Ont	" 23	1	By falling metal.
Textile trades—				
Oil cloth worker	Montreal, Que	" 7	1	Caught in elevator, crushed to death.

DEPARTMENT OF LABOUR, CANADA
STATISTICAL TABLE, SERIES F., No. 91

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MARCH, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Food and tobacco preparation—				
Butcher	Lethbridge, Alta	" 16	1	In a runaway.
Railway service—				
Conductor	Jackson, Ont	" 6	1	Run over by train.
Firemen	Schreiber, Ont	" 25	1	In head-on collision.

crushed to death in an elevator in Montreal during March, and two others were injured by machinery, compared with no accidents in the previous month and three injuries in March of last year.

Food and tobacco preparation.—In this group one worker was killed in a runaway, and three were injured, one each by machinery, by being run over and by a runaway. In the preceding month, there were one killed and five injured and in March, 1910, two killed and six injured.

Leather trades.—Two workmen were injured, one by an elevator and one by flying material. There were no accidents in the previous month nor in March, 1910.

Railway service.—Eighteen railway employés were killed and twenty-six injured in March last, compared with twenty-four killed and twenty-six injured the month previous and seventy-two killed and thirty-three injured in March, 1910. Twelve of the fatal accidents were due to being run over, three to collisions and one respectively to a derailment, to being caught between cars and to an explosion of dynamite. Of the injuries seven were due to collisions, six to falls, five to being caught between cars, three each to being run over and to falling material, and one each to flying material and to exposure.

Navigation.—In March, 1911, seven were killed and one injured, as against two injured in February last and no accidents a year ago. Six of the fatalities were due to drowning and one to a fall, while a fall also caused serious injury to a workman.

General transport.—Four workers were killed and eleven were injured during March, compared with fourteen injured the month before and four killed and thirteen injured in March, 1910. Of the fatalities two were due to falls and one each to a runaway and to being run over. Four of the minor accidents were due to being run over, two each to being crushed and to falling material and one each to livestock, to an explosion of dynamite and to a fall.

Public employés.—During March, 1911, two public employés were killed and sixteen were injured, as against two killed and thirteen injured the month before, and six injured in March, 1910. An asylum guard was assaulted and killed by an insane patient at Montreal and a fireman in the same City was run over by a ladder truck and killed. Of the sixteen injuries, seven were caused by falls, three respectively by asphyxiation and by being run over, two by falling material and one by flying material.

Miscellaneous.—The record for March, 1911, was five killed and seven injured, compared with one killed and eight injured in February last, and six killed and nine injured in March a year ago. One each of the fatal accidents were due to an elevator, to being run over, to a fall, to an explosion of gasoline and to machinery, while of the other accidents two each were due to machinery and to falls and one each to falling material, to being run over and to an elevator.

Unskilled labour.—Thirteen labourers were killed and thirteen injured in March last past, compared with four killed and six injured in February last and five killed and fifteen injured in March, 1910. Being run over caused six of the fatalities, falls, falling material and explosions of dynamite two respectively, and flying material one. Of the injuries four each were caused by falls and by falling material, two each by being run over and by explosions of dynamite and one by machinery.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during the month of March, 1911.

DOMINION REPORT.

Fifth report of the Board of Railway Commissioners for Canada, for the year ending March 31, 1909. Ottawa: King's Printer, 1910. Pages, 407. Price, 25 cents.

A GREAT many subjects are dealt with in the Fifth Report of the Board of Railway Commissioners of Canada, which contains an account of the work of the Commissioners during the year ended March 31, 1910. Orders

were issued by the Board providing for the equipment of passenger coaches with fire extinguishers, the equipment of freight vans with coupler-operating levers, and cupolas of cabooses with airguages and air-controlling valves. Rules and regulations were issued concerning highway crossings, railway fencing and cattle guards, loading long material and stone on flat or open cars, and the carriage of explosives. A uniform bill of lading, and a uniform code of train-rules were sanctioned by the Board.

The returns of railway accidents show that there were 456 persons killed and 1,123 injured during the year. Of those who were killed, fifty-one were passengers, 194 were employés and 211 were other persons. Of the injured, 211 were passengers, 745 were employés and 167 were other persons.

QUEBEC REPORT.

Mineral Production of Quebec.

Preliminary statement of the Mineral Production of the Province of Quebec, during the year 1910. Mines Branch, Department of Colonization, Mines and Fisheries. Quebec: 1911. Pages, 8.

The Preliminary Statement of the mineral production of the Province of Quebec for the year 1910 shows a substantial increase over the preceding year. The asbestos industry was very active, the amount sold and shipped exceeding any previous year, with the exception of 1908. In some cases, the mines are over 200 feet in depth, but there is no apparent decrease in the contents of asbestos in the rock. There were increase in the sales and shipments of mica and phosphate, and the market is markedly improving. The value of cement products was forty-eight per cent. over that of the preceding year.

The following table shows the quantity and value of the mineral production in the Province of Quebec during the calendar year 1910, with the value of the production in 1909.

ONTARIO REPORTS.

Education in Ontario.

Report of the Minister of Education, Province of Ontario, for the year 1910. Toronto: King's Printer, 1911. Pages, 591.

The Report of the Minister of Education of Ontario for the year 1910, shows a distinct improvement in the educational conditions of the Province. In the year 1909, the average salaries of male and female teachers in urban schools was $1,009 and $532 respectively, being increases of $14 and $16 for the year. In rural schools there were increases of $22 and $17, the average salaries being $484 for males and $399 for females. There were 189 more teachers in the public and separate schools than in the preceding year, and 720 more than five years previous. There was a great improvement in the relative number of the high grades of teachers, owing to the opening of three additional normal schools. There was an increase of 3,081 in the number of enrolled pupils, the total enrollment being 456,302. The rural schools showed a

decrease of 2,997 pupils, and the urban an increase of 6,078. In 1909 there were 128 continuation schools, with an attendance of 5,866, and in 1910 there were 135 schools, with an attendance of 5,917 pupils. There were 145 high schools and collegiate institutes in 1909, with an attendance of 33,101 pupils, an increase of 1,189 pupils over the previous year.

UNITED STATES REPORTS.

Industrial Conditions in Colorado.

Twelfth biennial report of the Bureau of Labour Statistics of the State of Colorado, 1909–1910. Denver: State Printers, 1911. Pages, 360.

The Twelfth Biennial Report of the Bureau of Labour Statistics of Colorado for the years 1909 and 1910, contains chapters on the following subjects: Labour Organizations of Colorado, Industrial Labour Disturbances, Agricultural Statistics, Mining Statistics, Railroad Statistics, Assessors' Schedules, and Census Reports. In addition, it contains department reports on mine disasters, factory inspection, and employment offices, and a general review of the work of the Bureau.

Recommendations are made that a board of examiners be created to examine every coal miner as to his competency, before he be allowed in the mines, and that in no case should an inexperienced man be allowed to work in a coal mine, unless he is put with an experienced miner. A new child labour law is recommended, which would give the Bureau of Labour power to issue all employment permits to children.

Industrial Conditions in Connecticut.

Twenty-fourth report of the Bureau of Labour Statistics of the State of Connecticut, for the two years ended November 30, 1910. Hartford: 1910. Pages, 400.

The Report of the Bureau of Labour Statistics of Connecticut for the two years ended November 30, 1910, deals with the following subjects: New Factory Construction, Free Public Employment Bureaus, Child Labour, Tenement Houses, Directory of Labour Organizations, Strikes and Lock-outs, Employers' Liability and Workmen's Compensation, Proposed Legislation. The chapter on Child Labour contains tables prepared by the American Association for Labour Legislation, showing the legislation in force in the various States of the Union, with reference to the ages at which employment of children is unlawful and in what establishments such employment is forbidden, the maximum hours of labour allowed them per day and per week, and the prohibition of night work; the names of the various permits, certificates and proofs required, and the compulsory education age and period, the exemptions and the educational requirements for employment. The need for the medical examination of children employed in factories is pointed out, and an account is given of a Bill which has been introduced in the Federal Congress for the establishment of a Children's Bureau in the Department of Commerce and Labour.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

QUEBEC CASE.

Benefit Association Life Insurance.

The late J. A. Farlinger was a member of a Valleyfield Lodge, and in January, 1894, entered into a contract of life insurance with the Order, for the benefit of his wife, for $2,000, on the assessment plan. In December, 1905, he applied, in accordance with the rules of the Order, for a "clearance card" or certificate which would entitle him to have his membership transferred to another lodge known as the Longueuil Lodge. By the Constitution of the Order no such certificate could issue, nor could such a transfer be effected, unless the member requesting it was in good standing, and had paid all dues and assessments up to and including those for the month in which his application was made. He received the necessary certificate from the defendant, and, on June 2, 1906, applied for affiliation and was transferred to the Longueuil Lodge. He paid his dues and assessments to that lodge, from month to month, up to the time of his death on November 19, 1906. The claim by his widow, the plaintiff, was resisted by the Order on the ground that at the time of the transfer, on June 2, 1906, Farlinger had not in fact been a member in good standing, as he was then in arrears for dues and assessments which should have been paid to or through the lodge to which he had previously belonged; that he was under suspension at the time of his death, and consequently, that, by the conditions of the policy, the Order was relieved of obligation to pay the amount of the insurance. The plaintiff's action was dismissed at the trial in the Superior Court, District of Montreal, but that judgment was reversed on appeal to the Superior Court sitting in review. The judgement appealed from affirmed the judgement of the Court of Review. An appeal from that judgement to the Supreme Court of Canada was dismissed with costs. The Supreme Court held, that where the constitution of a benefit association provides that members shall not be transferred from one lodge to another unless all dues and assessments have been paid, up to and including those for the month in which the application for affiliation is made, the fact that, upon such an application a member was transferred from one lodge to another involves the presumption, as against the association, that the transfer was regularly made when the member was in good standing and in accordance with the regulations.

(Turner v. The Grand Lodge of the Ancient Order of United Workmen of Quebec and The Maritime Provinces, 44 S. C. R., 145)

ONTARIO CASES.

Master and Servant.

In an action by the plaintiff against the defendants for damages for the death of the plaintiff's son, through the alleged negligence of the defendants, judgement was given by Mr. Justice McGee, the trial judge, in favour of the plaintiff, upon the findings of the jury. This judgement was affirmed hy the Divisional Court, and, upon appeal, was reaffirmed by a majority of the Court of Appeal, Mr. Justice Meredith and Mr. Justice Riddell being the dissenting judges in that Court.

The plaintiff's son, while engaged in the employ of the defendants in wheeling a barrow containing mixed concrete from a platform where it was made up, along a narrow plank-walk or way, spoken of in the evidence as the "north runway," in the direction of an abutment of a bridge over a highway, in course of construction by the defendants, fell in some way to the ground below and was killed. The runway in question ran in a northwesterly direction from the platform on which the concrete was mixed, to another runway situate on the east side of the abutment, and west of the platform from which the mixed concrete was be-

ing wheeled. From the south end of this latter runway, another runway, spoken of as the "south runway," extended in an easterly direction to the platform on which the concrete was mixed. The north runway was constructed by laying two planks, 10 inches wide and 3 inches thick, alongside each other, thus giving a way of 20 inches in width.

The west runway was from 40 to 58 inches in width, and the south runway had four planks, and was 40 inches in width. All three runways were 20 feet above the highway underneath. No witness who testified actually saw the deceased fall. He and three others were engaged in the work of wheeling the concrete. Each would in turn leave the mixer platform with his barrow loaded with about 200 pounds of concrete, and proceed along the north runway towards the west runway, from which he would empty his barrow into the excavation for the concrete wall, and then return to the mixer platform by way of the south runway. It was said it would not take more than a minute of time to make the round, but this does not appear to be very accurate.

On this particular occasion, the deceased left the mixer platform with his loaded barrow, and went along the north runway as usual. Very soon after—how long is not clear, but certainly not more than a minute—an alarm was given that he had fallen, and he was found unconscious on the roadway below. The base of his skull was fractred, and there was an abrasion on his right arm from the wrist to the elbow and towards the shoulder. He never recovered consciousness, and died shortly afterwards. As he lay, his feet were about 12 feet out from the north runway. The head was towards the north-east, and his feet pointing towards the south-west, that is, partially towards the north runway. and partially towards the west runway.

Chief Justice Moss, for the majority of the Court, said: "The sole question is as to how the accident happened. It is well-settled that, where there is a conflict or doubt as to the proper inference to be drawn from the facts in proof, or, if the evidence is such that the jury might reasonably come to a conclusion in favour of the plaintiff, or might reasonably draw a contrary inference, the case is for the jury to decide. I agree with the Divisional Court, that facts were proved from which the jury might reasonably conclude that the cause of death was the fall of the deceased from the north runway. And I have no difficulty in also agreeing that there was in the testimony quite sufficient to justify the jury in finding that the north runway, constructed where and in the manner shewn by the evidence, was dangerous to persons using it for the purposes to which it was put."

(McKean vs. Canadian Pacific Railway Company, Ont., W. N., 812.)

Odour from Tobacco Factory—Nuisance—Injunction.

The plaintiff complained of the odours arising from the manufacture of tobacco on the defendant's premises as detrimental to his enjoyment of his own neighbouring premises. The odour from the tobacco arose chiefly from the processes of steaming, steeping and stewing which it had to undergo, and the boiling of sugar, licorice and other ingredients with which it was mixed before it was reduced to "plug tobacco", ready for the market. Is appeared that the odours could not be prevented if the manufacture was to go on, and, upon the evidence, the defendants appeared to be doing their best to prevent injury to their neighbours. Many witnesses were called for the plaintiff, who described the odour as a "most sickening smell," "a very bad smell," "very, very offensive," and "very nauseating." Some said that it produced vertigo and dizziness, others, nauseau and headache. Some did not find any evil result beyond that incident to the disagreeable nature of the odour. The defendants produced a number of witnesses, many of whom said that the odour was "not unhealthy" others said that it "did not affect" them; and one lover of tobacco described it as "just splendid." Upon the whole evidence, in the opinion of the Divisional Court, there was no doubt that there was a strong odour that to many, if not most, was extremely disagreeable.

The action was brought by a merchant of Windsor complaining of the odour, and claiming an injunction in respect of such odours and other matters. Chancellor Boyd dismissed the action in respect of the claim for an injunction without costs; but granted the plaintiff a reference as to damages, if he chose to take it.

Upon appeal to the Divisional Court, it was held, upon the evidence, that the odours caused material discomfort and annoyance and rendered the plaintiff's premises less fit for the ordinary purposes of life, even making all possible allowances for the local standard of the neighbourhood, and, therefore, constituted a nuisance. The court said that the reasonableness of the defendant's use of his own premises does not affect the plaintiff's rights. It was also held that, as the comfort and enjoyment of the plaintiff's property was interfered with, he was entitled to an injunction; damages would not be an adequate remedy. The operation of the injunction was stayed for six months to enable the defendants to abate the nuisance.

(Appleby v. Erie Tobacco Company, 22 O.L.R., 533.)

$1000 Damages for the Loss of an Arm.

The Divisional Court has dismissed the appeal of the Canadian Pacific Railway from the decision of Mr. Justice Teetzel awarding Lloyd Brown, of Brantford, $1,000 damages for the loss of his right arm. Brown was stealing a ride from Toronto, riding on an oil tank-car. At Galt the conductor ordered him off, and he fell, his arm going under the wheels. The Divisional Court held that he was unlawfully on the train, but this did not justify the conductor ordering the man off when his getting off the train might have been accompanied with danger, by reason of the rapid rate at which the train was going.

The case has been tried twice, Chancellor Boyd awarding the man $2,000 damages at the first trial. The Court of Appeal directed a second trial.

Labourers Lose Appeal.

Mr. Justice Riddell has dismissed the appeal of Roki Gaetano, an assignee of the claims of sixteen foreign labourers on the National Transcontinental Railway, who were in the employ of the Nepigon Construction Company. The defendants took $3,278.73 from the wages of the men for railway fare and other necessaries. The men disputed the claim, but Judge O'Leary, of Port Arthur, dismissed their claim, and he was sustained by Mr. Justice Riddell.

Laundries Placed Under Rules of Factories Act.

The Ontario Government proposes to place all laundries subject to the Factories Act, and, of course, under the jurisdiction of the factory inspector.

This move has the endorsation of the board of health of London, Ont., Last year complaints were made to the board that the sanitary condition of some of the Chinese laundries of the city was not good. Dr. Hutchinson, M. H. O., made an inspection, and it was found that many of them were not up to the standard. They were instructed to clean up, and while there was a certain improvement, it was not sufficient to meet with the endorsation of the board. It was also found that they had not sufficient power to force the Chinamen to maintain the proper degree of cleanliness.

The steam laundries of the city are all inspected. The factory inspector makes regular calls on them, and they keep them properly looked after. The local Trades and Labour Council also made a plea some time ago for a better inspection of laundries.

Restraint of Trade. Agreement between Servant and Master as to Similar Business.

Upon an appeal by the plaintiffs from the judgement of Chief Justice Mulock dismissing the action, which was brought for an injunction and damages in respect of an alleged breach by the defendant of his contract not to engage, in Canada, in a business of a kind similar to that carried on by the plaintiffs, for three years after leaving their employment, it apppeared that the plaintiffs

carried on a compound business, namely: (1) the manufacture of whitewear and the laundering of it; (2) a general or custom laundry business. The defendant, who had been employed in the laundry department of the plaintiff's business, and had learned their methods and secret processes, left their employment in June, 1910, and began to carry on a rival custom laundry business. By a restrictive clause contained in an agreement between the plaintiffs and defendant, made in 1904, the defendant, for good consideration, had become bound, for three years after leaving the employment of the plaintiffs, that he would be "neither directly nor indirectly interested or employed in any way by himself, or with, by, or through any other person, in any business of a similar kind to that carried on by the plaintiffs within the limits of the Dominion of Canada."

The Divisional Court held, that the defendant was carrying on "business of a similar kind" to that of the plaintiffs, even though the plaintiffs' laundry should be regarded as ancillary to their manufactury—all was the one business of compound and cognate nature, a material part of which the defendant was injuring. It was also held, that the burden rested on the defendant to show that the contract was invalid, in that the protection extended beyond what the plaintiff's interest required, which is the modern test of validity; and, as the evidence showed that the business of the plaintiffs as a whole extended over all parts of Canada, and, as to the laundry branch, extended over the greater part of Canada, the covenant not to engage in business "within the limits of the Dominion of Canada" was not too wide for the plaintiff's protection, and its validity had not been successfully impeached—regard being had, moreover, to the trade secrets and improved methods of the plaintiffs communicated to the defendant.

Public policy requires that men of full age and competent understanding shall have the utmost liberty of contracting, and that their contracts, when entered into freely and voluntarily, shall be held sacred and shall be enforced by Courts of Justice. *Nordenfelt v. Maxim Nordenfelt Guns and Ammunition Company*, (1894) A. C. 535; *Printing and Numerical Registering Company v. Sampson* (1875), L. R. 19 Eq. 462, 465; and *E. Underwood & Son, Limited v. Barker*, (1899) 1 Ch. 300, followed. *Henry Leetham & Sons, Limited v. Johnstone-White*, (1907) 1 Ch. 189, 322, distinguished.

The judgement of Chief Justice Mulock was reversed.

(Allen Manufacturing Company v. Murphy, 22, O.L. R., 539.)

MANITOBA CASES.

Machinists' Appeals Dismissed.

The appeals of the Machinists' unions to the Court of Appeals of Manitoba against the judgement of Justice Mathers, in the Vulcan Iron Works' case, was dismissed. Appeals of the Vulcan Iron Works on another branch of the judgement was also dismissed. The full bench of judges was unanimous in upholding the findings of the trial judge. This leaves the machinists with a perpetual injunction against picketing the Vulcan Iron Works, and an award of $500 damages against them. If the case is pursued further it will either be appealed to the Supreme Court of Canada, or special leave will be applied for to appeal direct to the Privy Council.

As the appeal judges were unanimous it is altogether likely that the decision would be upheld in the Supreme Court. On the other hand there would seem to be a necessity of getting the question involved before the Privy Council for final decision. The recent case of the Plumbers, out of which Canadian organized labour hoped to get the decision of the Privy Council that peaceful picketing was not unlawful, failed to get before the Council on account of delay in making the necessary application. Therefore, as things now stand, labour in this country is under the disabilities of the Taff Vale decision, although it has long since been remedied in Great Britain.

Desertion of Employment.

The Manitoba Iron Works' employés in the moulding shop went on strike last

fall when the piece system was introduced and, arising out of the subsequent development, an interesting case came before the Police Magistrate in Winnipeg on March 6, 1911.

Fred H. Hilkins was charged by the Company with deserting his employment. It appeared that he had been brought from Montreal, and had been advanced the price of his ticket. He signed a contract with the Manitoba Iron Works at a scale of 32½ cents an hour. If he remained in their employ for six months the fare advanced him would not be deducted, but during this six months it would be deducted from his salary in weekly instalments.

T. R. Deacon, the general manager of the iron works, was himself the first witness, and stated that the man had reported to work, but had immediately left the premises without giving any reason. He also said that during the past year he had sent fares to various points of the Dominion for no less than 100 men. He argued that Hilkins had broken his contract.

Hilkins, through his solicitor, W. Manahan, set up the defence that the iron works was not an "open shop," as had been represented in Montreal, and that it was a "closed shop", no union man being permitted to work there.

Magistrate Daly said that it was not a matter of union or non-union; it was whether the defendant had broken his contract or not. He found that he had done so, and fined him $20.

ALBERTA CASES.

Mechanics' Lien.—Construction of Statute.

Section 4 of the "Alberta Mechanics' Lien Act" (6 Edw. VII ch. 21) gives to any contractor or materialman, furnishing labour or materials for a building at the request of the owner of the land, a lien on such land for the value of such labour or materials. Sub-section 4 of section 2 provides, that the term "owner" shall extend to and include a person having any estate or interest "in the land upon or in respect of which the work is done or materials are placed or furnished at whose request and upon whose credit or on whose behalf or with whose privity or consent or for whose direct benefit any such work is done, &c." By section 11 "every building.....mentioned in the fourth section of this Act constructed upon any lands with the knowledge of the owner or of his authorized agent.....shall be held to have been constructed at the request of such owner", unless the latter gives notice within three days after acquiring such knowledge that he will not be responsible.

The lessee of land, as permitted by his lease, had buildings thereon pulled down and proceeded to erect others in their place, but was obliged to abandon the work before it was finished. The owner of the land was aware of the work being done, but gave no notice disclaiming responsibility therefor. Mechanics' liens having been filed under the Act, it was held by the Supreme Court of Canada, upon appeal from the Supreme Court of Alberta, that the interest of the owner in the land was subject to such liens. Judgement appealed from, varying that at the trial (2 Alta., L.R., 109) in favour of the lienholders, affirmed.

(Scratch v. Limoges, 44 S. C. R., 86.)

BRITISH COLUMBIA CASES.

Workmen's Compensation Act."—Compensation for Injury.

In an action in the Supreme Court of British Columbia claiming damages under the "Employer's Liability Act", and, alternatively, under the "Workmen's Compensation Act," the plaintiff, at the trial, abandoned the claim under the former Act, and, thereupon, the judge dealt with the case as a claim under the "Workmen's Compensation Act". He found that the plaintiff's deceased husband came to his death solely in consequence of his own "wilful and serious misconduct", and, therefore, under sub-section 2 (*c*) of section 2 of the Act, held that she was precluded from obtaining compensation in consequence of his death.

Upon an appeal from the Court of Appeal for British Columbia, to the Supreme Court of Canada, it was held by Justices Davies, Duff and Anglin, that the right of appeal from a decision in the course of

proceedings to which article 4 of the second schedule of the "Workmen's Compensation Act" applies is available only for questioning the determination of the court or judge upon some question of law. Decisions upon questions of fact, in adjudicating upon a claim brought before the Supreme Court under sub-section 4 of section 2 of that Act, are not subject to appeal. Whether or not there is any reasonable evidence to support a finding of "wilful and serious misconduct" is an appealable question. In the circumstances of the case the Court held, Justices Davies & Anglin dissenting, that there was not reasonable evidence to support the finding of "wilful and serious misconduct." The appeal from the judgement of the Court of Appeal for British Columbia (15 B.C., Rep. 198) was dismissed, Justices Davies and Anglin dissenting.

(Granick v. The British Columbia Sugar Refining Company, 44 S.C.R., 105.)

$3,000 Damages to Brakeman.

An action dealing with the liability of railways towards employés which was tried by Mr. Justice Clement and a jury in the Supreme Court resulted in a verdict for plaintiff for $3,000 and costs. The action was brought by a brakeman, named Carrington, against the Canadian Pacific Railway Company for damages in respect of his having been thrown from the top of a freight car through the alleged improper use of the emergency brake.

On behalf of the defendant Company, it was contended that the engineer undoubtedly only pressed the handle of the brake to "service conditions", but from some unexplained reasons the brakes went into "emergency" unconsciously, without any fault on the part of the engineer. The engineer, fireman, brakesman, and conductor had all testified that the train had not been going at more than five or six miles an hour, and that the emergency brake was absolutely unnecessary. As to the accidental aspect of the case it was contended that, although every precaution was taken, if some small piece of foreign matter did get into the port, it was a pure accident.

For plaintiff it was contended that, if the engineer was negligent or careless, or if the machinery was defective, then the defendant company must pay the damages the jury assessed. The accident was clearly due to the involuntary carelessness of the engineer, and, therefore, the company were liable, as they also were, even had it been proved that a speck of dirt had got into the machinery as suggested. This entry of any foreign matter had not, however, been proved. It was also contended that the handle of the brake was put on so suddenly into "full service.' that it went to "emergency" or else it was put directly to "emergency."

Mr. Justice Clement stated this was a comparatively simple case as regarded the law. The facts he left to the jury, after explaining the meaning of the Employers' Liability Act. After being instructed as to the elements of damage, the jury retired and after a short absence returned with a verdict for the plaintiff for $3,000, for which sum and costs judgement was directed.

UNITED STATES CASE.

Railway Employés Claims for Damages Despite Relief Contracts.

Under a decision rendered by the United States Supreme Court, employés of railroads in Iowa cannot sign away their right to damages for injuries suffered through the neglect of their employers. The fact that they may be members of a relief association and have signed contracts relieving the railroads of liability for damages in case of injury, does not affect their rights.

An Iowa law passed in 1898 established this proposition. The constitutionality of the law was attacked when Charles L. McGuire sued the Chicago, Burlington & Quincy Railroad Company for $2,000 damages for injuries. McGuire had been given $882 by the Burlington relief department, an association maintained by the railroad and its employés, one of the regulations of which was that employés must elect between relief from it and pressing a claim against the Company.

The Supreme Court of Iowa upheld the constitutionality of the law. The United States Supreme Court affirmed the decision of the state court in an opinion announced by Justice Hughes.

THE

LABOUR GAZETTE

MAY, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF APRIL, 1911.

I.—GENERAL SUMMARY.

As a result of cold and unsettled weather during the first three weeks of April, labour was somewhat less active than at the corresponding period of 1910, though the amount of general employment in view is greater than a year ago. Agriculturists were late in getting on the land, and growth was backward until the closing days of the month when seeding was in rapid progress under favourable conditions for the seed-bed. The opening of navigation was from two to three weeks later than last year. In the lumbering industry, also, the drives promise to be unusually late. In other respects, however, the month was favourable, and the general tone of trade and industry remained buoyant. Mining and lumbering outputs promised to be heavy, and in building and railway construction the outlook is for a summer season of exceptional activity. Manufacturing establishments continued to run for the most part to full capacity with full staffs, while immigration, trade, and transportation returns showed a considerable increase over the corresponding period of 1910. The supply of unskilled labour was well absorbed in most localities in the closing days of the month.

Changes in Wages and Hours of Labour.

The following is a statement by industries and groups of trades of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during April, 1911.

Building trades.—Carpenters (2,000) at Vancouver, B.C. received an advance from $4 to $4.50 per day, and bricklayers (300) from $5.50 to $6.00 per day. Carpenters (125) at Brandon received an advance, dating from May 1, and bricklayers (50) an increase to date from June 1. Dating from May 1, the following changes took place at Toronto, Ont.: Stonemasons (700) from 50 to 52½ cents an hour; bricklayers (1,500) from 50 to 52½ cents an hour; carpenters (3,500 to 4,000) from 35 to 37 cents an hour; and plasterers' labourers (200) from 30½ to 32½ cents per hour.

Metal trades.—Horseshoers at Stratford, Ont. raised their prices from 35 to 40 cents for sizes 5 to 7; the cost of wagon-tiring was at the same time raised from 50 to 60 cents.

Woodworking trades.—Employés of a billiard factory at Toronto, Ont., to the number of forty-two, received an increase of five per cent. in their wages.

Food and tobacco preparation.—Brewery workers (70) at Berlin, Ont., received an advance in wages, dating from March 17, amounting to $1 per week, and a reduction in hours from fifty-nine per week to fifty-eight in summer and fifty-seven in winter months. The hours during which hotel bars may be open in the Province of Quebec were reduced

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

by ten a week, by an amendment to the law which took effect on May 1.

Railway service.—Machinists (75) of the Michigan Central Railway at St. Thomas, Ont., were granted an increase from 31½ to 34½ cents an hour, dating back from February 1.

General transport.—Teamsters at Lethbridge, Alta., received an increase in wages.

Civic employés.—Policemen at Windsor, Ont., received an advance from $750 to $775 per year, dating from January 1. Day labourers at Prince Rupert, B.C., received an increase from 37½ to 45 cents an hour. Firemen at St. Thomas, Ont., received an advance in their annual pay.

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during April, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Car shops at Amherst, loss, $200,000; junk warehouse at Halifax, loss, $3,500; school house at New Aberdeen, loss, $7,000; stationery and fancy goods warehouse at Truro, loss, $20,000.

New Brunswick.—Lumber mill at Booth Station, loss, $12,000.

Quebec.—Woollen mill at Joliette, loss, $3,500; village of Kippawa, loss $60,000; apartment house at Montreal, loss, $165,000; dwellings at Montreal, loss, $6,000; sheds and dwellings at Montreal, loss, $4,000; drygoods store, Montreal, loss $4,000; tailor shop at Montreal, loss, $3,000; office building at Montreal, loss $3,000; store at Point au Pic, loss, $18,000; laundry and two dwellings at Sorel, loss $10,000; piggeries at St. Vincent de Paul, loss, $10,000; sawmill at Sorel, loss, $10,000; sawmill at South Roxton.

Ontario.—Screw factory at Brantford, loss, $3,000; planing mill at Brockville, loss, $6,000; Forester's block at Cottam, loss, $17,000; cheese factory, Coburg, loss, $8,000; furniture plant, Goderich, loss, $50,000; lumber mill at Guelph, loss $15,000; store, houses and barn, Keewatin, loss, $4,800; restaurant and dwelling, London, loss, $6,500; tannery, London, loss, $10,000; barns and stables, Niagara Falls, loss $2,500; shop, Ottawa, loss, $3,300, barns and piggery, Ottawa, loss, $15,000; box factory, Parry Sound, loss unknown; drying-house of explosives plant at Sand Point destroyed by explosion, 4 employés killed; business block, Seaforth, loss, $14,000; stores at Stittsville, loss, $30,000; townhall at Thamesville, loss, $25,000; flour mill, Walkerton, loss, $14,000; factory, Woodstock, loss, unknown;

Manitoba.—Store at Brookdale, loss, $7,000; general store at Hilton, loss, $10,000; flour-mill at Pilot Mound, loss, $30,000. Portage la Prairie, store, loss, $40,000.

Saskatchewan.—Store at Kirley, loss, $7,000; store at Langenburg, loss, $30,000; farmhouse and stable at Rosthern, loss, $5,000; stores at Saskatoon, loss, $7,000.

Alberta.—Warehouse at Vermillion, loss, $2,000.

British Columbia.—Lumber mill at Coquitlam, loss, $200,000; stores at Port Essington, loss, $10,000; lumber mill, South Vancouver, loss, $5,000.

Loss of Steamer *Iroquois* off Shell Island, B.C., April 10, through shifting of cargo.

Conditions in the Industries and Trades.

Conditions of employment during April in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to the *Labour Gazette*, and by information received at the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

The weather has been unusually backward, but agriculturists throughout Ontario and the eastern provinces were busy seeding in the closing week of the month. In western Canada, timely rains have provided the seed bed with abundant moisture, and work on the land was going forward very rapidly by May 1. Fall wheat made slow progress in the first half of the month. but growth was rapid at the close. The first crop reports to be received were generally favourable, showing a considerable increase in acreage. The grain markets were characterized by strength, but live stock was somewhat weak, with dairy produce steady. The general outlook was regarded as favourable for a good agricultural year.

The final estimate of the Saskatchewan Government of the crop of 1910 shows that there were 72,666,399 bushels of wheat raised, the average yield per acre being 15.58 bushels. The oat crop amounted to 62,315,295 bushels, representing an average yield of 30.40 bushels per acre. The total value of farm crops of the province was $92,335,190.

Two dairy inspectors have recently been appointed by the province of Saskatchewan and have started work, the province having been divided for this purpose into two districts, namely, Northern and Southern Saskatchewan.

Fishing.

The month was quiet in the Maritime Provinces, drift ice hampering coastwise fishing. There was some activity following the opening of the lobster season, but catches were light as a result of the above mentioned conditions. It was

stated that upward of seventy vessels had left Lunenburg for the banks. There had been a very large increase in the number of vessels sailing from this port during the present season. Elsewhere in Canada the industry was quiet. A fair run of spring salmon was reported in British Columbia.

During the year 1910, British Columbia produced 762,201 cases of packed salmon, totalling in value $4,192,105. The production of fresh salmon amounted to 2,500,000 pounds. The production of halibut is also an important industry in that province, the year's take amounting to 22,500,000 pounds, valued at $1,125,000. These with other kinds of ocean products such as salt and dried salmon, herring, oysters and other shell fish, make up a total production for that Province of $8,602,306, which represents a total capital employed of $6,823,852, requiring the labour of 19,500 persons with their earnings totalling $5,580,000.

Lumbering.

The backward weather has delayed the drives, and the sawmilling season will be late in opening. The opening up of the spring demand for labour has been delayed by the same conditions. Stocks are low throughout Ontario and the eastern provinces, and a busy sawing season is expected. The Northwest lumber market has developed signs of activity. In Manitoba, the cut will considerably exceed that of 1910. In British Columbia, work in the mills and logging camps had resumed activity, and a very busy summer is in prospect in most sections of the province.

An important change in the land policy of the Government of British Columbia is indicated by an order-in-council passed in April increasing the price of land classified as first class from $5 to $10 per acre, and that of land classified as second class from $2.50 to $5 per acre.

The Government of the Province of New Brunswick has introduced a bill prohibiting the export of pulpwood on crown lands.

Mining.

The delay in the opening of navigation somewhat curtailed operations in the Nova Scotia collieries, but the month in most districts was an active one. In Ontario and Quebec, mining work has been actively resumed. Development work was very active in the Porcupine district. Labour disturbances curtailed the output of the Alberta and Eastern British Columbia collieries, but on Vancouver Island the month was a busy one. Ore production in the metalliferous camps of British Columbia was well maintained.

According to statistics published by the Ontario Bureau of Mines, the output of all the silver mines of that province during 1910 was 30,558,825 ounces, an increase of 4,500,000 ounces compared with 1909. Of this total the Cobalt camp produced about 25,000,000 ounces.

The Department of Mines, Canada, has issued a report on the asbestos industry. Canada now produces eighty-two per cent. of the world's supply of asbestos. The companies operating asbestos quarries and factories in the Dominion are capitalized at $24,290,000. In 1880 only 380 tons of asbestos were produced, valued at $24,700; whereas in 1909 the production amounted to 63,300 tons, valued at $2,300,000. In 1909, 3,000 men were employed in the asbestos industry and received wages amounting to $1,350,000. These facts and much valuable technical information of practical value to the general public are contained in the report.

Manufacturing.

The general situation was one of pronounced activity in nearly all branches and localities. Labour, especially female labour, was in demand in certain centres. The enlargement of factory premises on a considerable scale promises to be a feature of the present building season. Among the branches in which activity was especially pronounced during the past month may be mentioned iron and steel plants, agricultural implement factories, and garment factories.

The annual report of the Nova Scotia Steel and Coal Company was published

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

CANADA DURING THE MONTH OF APRIL, 1911.

and is intended to present, in brief and accessible form, a generalized statement as to the state of employment in the prevailing, no account being taken as to wage changes, trade disputes and kindred phenomena treated under separate the order indicating in each, the degree to which general conditions were favourable or unfavourable, as follows: (1)

	Metal, engineering and ship-building.	Wood-working.	Printing and Allied trades.	Clothing.	Food and tobacco preparation	Leather.	General transport.	Miscella-neous.	Unskilled labour.

under date of March 29. The output and turnover of the Company showed an increase over the previous or any past year. The following is a statement of output:—

Coal.—The total quantity mined, used, and shipped from the Sydney Mines Collieries, was 847,176 tons, an increase of 37,835 tons over the previous year.

Ore.—The total quantity of ore shipped from Wabana was 532,058 tons, an increase of 71,671 tons.

The other outputs were:—

Coke made	90,360	tons.
Limestone and dolomite quarried	71,773	"
Pig iron made	65,384	"
Steel ingots at Open Hearth Dept. Sydney Mines	73,019	"
Steel billets rolled at New Glasgow mills	59,244	"
Bars and plate rolled	50,915	"
Street railway car-axles forged	34,736	"
Total shipments of finished steel forgings, etc.	60,940	"
Pig iron shipments	2,056	"

The royalty paid to the Nova Scotia Government on coal mined was $78,089.33.

Railway Construction.

There was an active demand for men to work in the railway construction camps, the amount of work projected for the approaching summer being very large. The demand for labour was already equal to the supply in some localities, and a relaxation of the immigration regulations went into force from April 15 to meet the situation.[1] It is estimated that over seventeen million dollars will be spent by the Grand Trunk Pacific Railway Company on new lines and station buildings in Western Canada during 1911.

The contract for the new Quebec bridge was awarded by the Dominion Government to the St. Lawrence Bridge Company, the contract price being $8,650,000, the structure to be completed by September 1, 1913.

The Canadian Northern Railway Company called for tenders for the construction of a line through the Fraser and Thompson canyons, the cost to be approximately $15,000,000.

The Honourable the Minister of Railways recently presented the following general statement respecting the Grand Trunk Pacific Railway Company in the House of Commons:

MOUNTAIN SECTION.

Total expenditure as certified to by Chief Engineer		$18,765,330.20
Total payments made to the company		11,763,509.61

PRAIRIE SECTION.

Total expenditure as certified to by Chief Engineer		34,436,168.48
Total payments made to the company upon guarantee	$10,735,482.92	
Total payment made to the company on account of special loan	10,000,000.00	
		20,735,482.92

The amount spent by the Grand Trunk Pacific Railway Company, for rolling stock, locomotives, etc., up to date is $14,744,253.14.

General Transport.

The feature of the month was the resumption of shipments by water at a date from two to three weeks later than last year. Longshoremen at points on interior waterways resumed work. Railway traffic was well maintained, the heavy immigration movement having swelled receipts from passengers. In view of the increasing bouyancy of trade an active season is expected.

The Trades.

Building.—Returns with regard to building permits in a large number of Canadian cities show a pronounced increase as compared with the corresponding period of 1910. The outlook in nearly every section is that the present season will be considerably more active than in 1910, which it will be remembered, was the most active year since 1906. The outdoor trades resumed work during April, and painters and carpenters were especially busy.

Metal and woodworking trades.—Employés in these trades had a very active month, with the prospect of similar conditions for some time to come.

Printing and allied trades.—These trades were busy in nearly all localities.

Clothing.—Journeymen tailors were very busy. Garment workers also were busy. Boot and shoe workers were somewhat quiet, as is usual at this season.

Textile trades.—Cotton and woollen mills continued very active.

[1] See article on Immigration and Colonization elsewhere in present issue.

Leather.—Leather trades reported favourable. There was a strong demand for leather, with prices firm.

Food and tobacco preparation.—Bakers and confectioners had a fair month. Cigar and tobacco makers reported steady conditions.

Miscellaneous.—Barbers, hotel and restaurant employés, and retail clerks reported normal season conditions.

Unskilled labour.—The demand for this class increased very rapidly in the closing days of the month, and in several localities had fully absorbed the available supply. The outlook is for a very active season on civic improvement work and for steady employment for workmen of this class until autumn.

Canadian Trade and Revenue.

Foreign and Imperial trade.—During March 1911, the total value of imports entered for consumption into the Dominion of Canada was $49,477,055, compared with $43,241,975 in March, 1910. In the fiscal year ending March 31, 1910, the total value of imports entered for consumption was $451,891,814, compared with $369,766,071 in 1910. The total value of domestic exports during March, 1911 was $20,364,254, compared with $22,199,295 in March, 1910. The total value of exports during the fiscal year ended March 31, 1911, was $274,316,553, as against $279,211,537 in the previous fiscal year. During March, 1911, there were increases in exports of animals and their products, and decreases in products of the mine, fisheries, forest, agriculture, and manufactures, compared with the corresponding month of 1910. The grand total of Canadian trade for March, 1911 was $69,841,309, compared with $65,441,250 in March 1910. For the fiscal year the grand total of Canadian trade amounted to $726,008,367, compared with $648,977,608 in the previous fiscal year.

During April, reports were received at the Department of Trade and Commerce, Canada, from Trade Commissioners with reference to foreign markets for vehicles and forest products. A good market for bicycles and motor cars is reported in China. In Brazil, the extension of rice cultivation has created a demand for agricultural machinery, and manufacturers of canned goods are said to have an excellent opportunity to extend their trade in that country. An increasing demand for flour exists in Japan. The principal woods imported into Great Britain of interest to Canadian shippers are white and red pine, spruce, oak, birch, elm and maple. There is a small market there for telegraph and telephone poles, joists, and railway ties, as the trade is all done with the Baltic; but a good trade might be done in pulpwood and ground and sulphite pulp. Siberia has become a new competitor in the British market in white pine.

Domestic trade.—General trade was somewhat retarded by continued cold weather, but a decided improvement was reported during the last week of the month. Collections showed a marked improvement. Commercial suspensions during the first quarter of 1911 numbered only 367, compared with 426 in the corresponding period of 1910 and 425 in 1909. The manufacturing failures numbered eighty, the same as in 1910, but twenty less than in 1909.

Clearing house returns have shown a steadily increasing tendency for some time past.

The bank statement for March showed an increase in circulation and deposits, a falling off in call loans, and a large increase in current loans. The circulation of notes amounted to $81,938,753, compared with $79,927,785 in February, and bank deposits amounted to $831,204,258, compared with $819,784,876 in February and $762,834,288 in March, 1910. The current loans amounted to $710,604,072 against $689,234,781 in the previous month.

Notes.

A project for the organization of a Child Welfare Exhibition in Montreal, similar to that held in New York in 1910, was set in motion during the past month. Schemes of operation have been submitted and committees appointed.

On April 4, sixty acts passed by the

Parliament of Canada, received the Royal assent. Thirty-eight of these acts related to railway companies. The Immigration Act was amended in the way of providing more stringent provisions against the importation of undesirable immigrants. The Inspection and Sale Act was amended by the insertion of a clause defining a barrel of potatoes as 160 pounds.

Representatives of nineteen municipalities between Picton and Morrisburg, Ontario, held a meeting at Brockville for the purpose of discussing the securing of cheap power. Honourable Adam Beck, chairman of the Hydro-Electric Power Company was present and addressed the meeting and outlined a plan for the obtaining of power by these municipalities. A resolution was passed appointing an executive, composed of one member of each municipality.

The Industrial Education Act, passed by the Legislature of Ontario and now in force provides that the members of the advisory industrial committees shall be appointed at the first meeting of the boards held after the passing of the Act. This provision applies to the technical schools at Toronto, Hamilton, and Sudbury, the industrial classes at Brantford Collegiate Institute, and the co-operation Industrial School at Sault Ste. Marie, and to such other secondary schools, whether day or evening, as may have already provided classes of an industrial or technical character.*

* See the Labour Gazette for April, 1911, p. 1139.

The free employment bureau system, under the control of the Quebec Legislature, has been officially inaugurated. Persons out of employment may register free of charge, and manufacturers and others will be supplied with all classes of labour. Private labour offices will handle the foreign element, and will be under government inspection, and keepers will be required to get a licence from the chief factory inspector. To prevent frauds their books will be examined from time to time.

During the past month the Canadian Householders Economic Association of Toronto held a meeting for the purpose of discussing the advisability of forming a consumers' league in view of the prevailing high prices of staple articles. Inasmuch as the work contemplated differs somewhat from that carried on by the National and International Consumers' League. it was decided to appoint a strong committee to be named the Housekeepers' Protective League. Each member of League pledges herself to weigh and measure all supplies and to protest with tradesmen whenever there is occasion to do so, and to report those found systematically giving short weight and inferior quality for prices paid. The Association was successful last year in establishing infant milk depots, where certified milk was sold at the price charged for the ordinary commercial milk. Altogether 12,900 bottles were distributed.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions were active until the latter part of the month when the collieries were idle for a few days. This was due to the late opening of navigation and the desire of the coal companies to refrain from placing much more coal in the coal heaps, which were larger than usual.

Prevailing north winds kept the drift ice close in on the coast and the cold weather was not favourable to the breaking up of the bays and harbours.

Nearly all lines of business were well advanced during the winter season and it was hoped that an early spring would follow the severe winter. The season, however, up to the present is at least one month later than last year. The late opening of navigation has had an unfavourable effect on the coal trade, the ore

and dolomite business, shipping and the building trades.

The steel industry continued active. During the month, the Dominion Steel Company received large orders for rails, which in addition to its other heavy orders will keep the works well employed for many months to come. The Sydney Mines Steel Works had a busy month and large outputs were obtained. This Company has also many orders ahead, which makes prospects bright for the year. Port Hood Colliery, after a lapse of several months, resumed operations, and large developments are contemplated.

Work on the fertilizer plant at Sydney was begun, and men are busy on the foundation for the buildings. The building trades were not so active as was expected, and general activity will be delayed until well on into May. Besides several building blocks, there will be a number of residences erected in Sydney. There will be a large number of houses erected in the Colliery districts and building will begin as soon as the roads become passable.

Transportation by rail continued heavy. The wholesale and retail trades were active and a large volume of business was done.

The United Mine Workers held a conference in Halifax to which they invited the coal operators to discuss the matter of a new wage scale. No operators attended the conference.

CONDITION OF LOCAL INDUSTRIES.

Agriculturists were quiet, owing to weather conditions.

There has been no coast *fishing*, owing to drift ice.

Lumbering was quiet.

CONDITION OF PARTICULAR TRADES.

Activity was the rule both for skilled and unskilled labour.

WESTVILLE, N.S., AND DISTRICT.

Mr. T. Hale, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work, in general, throughout this district in April was brisk. Collieries worked full time. The outputs and shipments showed an increase over the corresponding month of 1910. A demand for unskilled labour is anticipated, and the outlook for a good summer's work is very favourable.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists have started preliminary work in anticipation of a busy season.

Lumbering.—Prospects are favourable. Preparations towards getting timber ready for the market have started.

Manufacturing.—The several industries were generally well employed.

Mining.—Conditions in this industry were exceptionally good, all the mines working steadily. The shipments for the three months ending March 31 showed a marked increase over the corresponding period of 1910.

CONDITION OF PARTICULAR TRADES.

Activity prevailed in the building, metal, woodworking, printing, clothing and other skilled trades.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The past month was an improvement, industrially speaking, over March. But while marked activity characterized many lines, building operations were dull, with no appearance of any immediate improvement, and mechanics in some branches were compelled to adopt other means of livelihood, some contemplating migrating to the western Canadian cities. Work along the waterfront maintained its activity. The immigration records were higher than in any previous year, the figures for the season being approximately

39,760, as against 16,333 in 1908–09, and 36,609 in 1909–10. The steamship lines bringing the immigrants were: Allan, 25,065; Canadian Pacific Railway, 1,058; White Star (Dominion), 4,791; Royal, 4,846; Uranium, 3,042. The total number of detentions was 765. These steamers' arrivals made much activity among longshoremen, but the latter were in sufficient number to always cope successfully with both freight and baggage.

At the present time all journeymen plumbers, before engaging in their calling, must have certificates of competency from the Health Department of the city. Some weeks ago a notice of motion was given by one of the members of the Halifax Board of Health that he would move to repeal the sections governing licensed pumbers, thus enabling employers to engage practically anybody at plumbing work. This the plumbers' union strongly opposed, stating it was a step backward, as far as sanitation was concerned. The matter came up before the Health Board on April 13. The Union was represented by several members, and the matter was thoroughly debated. The City Engineer, who was requested by the Board of Health to report on the matter, endorsed the contention of the men, which was also supported by a resolution from the Halifax District Trades and Labour Council. The amendment was withdrawn.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Some mid-month wholesale prices are:—

Butter, creamery, prints, 28 cts.
Butter, creamery, boxes, 26-27 cts.
Butter, creamery, 30-lb. tubs, 27 cts.
Butter, dairy, ordinary, 19-21 cts.
Butter, dairy, rolls, 23-24 cts.
Butter, dairy, prints, 23-24 cts.
Cheese, large, 14 cts.
Cheese, twins, 14½ cts.
Eggs, fresh, 18-19 cts.
Beef, per quarter, 8 to 9½ cts.
Beef, hind quarter, 10-12 cts.
Lamb, lb., 11 cts.
Mutton, 7-9 cts.
Veal, 7-9 cts.
Pork, 8-9 cts.
Bacon, 18 cts.
Turkey, 20-25 cts.
Fowl, 12-14 cts.
Geese, 16 cts.
Chicken, 14 cts.

Fishing.—Local fishermen report small catches, but more fish (herring) were taken than in March. A Yarmouth despatch of April 15 says: Some good-sized shipments of fish have been forwarded to Boston, among the lot being 10,000 lbs. of halibut, and 1,200 crates of live lobsters

Manufacturing.—Local concerns are working up to season's average in general lines. The Nova Scotia Car Works report an average output of four cars per day, with prospects of an increase.

Mining.—New tungsten deposits are reported, this time near Waverley, Halifax county. Two shafts are being sunk, and much interest is being taken.

The coal operators of Nova Scotia were invited by the scale committee of the United Mine Workers to meet them at Halifax. The invitation was issued March 31, and was for the purpose of endeavouring to bring about "a more harmonious, peaceable and beneficial arrangement between both parties." The conference was to have taken place at the Board of Trade rooms, Halifax, April 17. The representatives of the miners were present, but the operators did not respond.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and plasterers were dull. Painters, decorators and paper hangers were fairly active. Plumbers and gas fitters were quiet. Steam fitters were dull. Stone-cutters were quiet. Builders' labourers were dull. Electrical workers were fair. Boilermakers were busy. Printers, pressmen and bookbinders were fairly well employed, but experienced a falling off from March. Tailors showed an improvement over March. Barbers were busy. Transport men, with few exceptions, were busy. Miscellaneous employés were employed up to the April average. Unskilled labour showed an improvement over March.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

A disastrous fire, which occurred on the morning of April 27, at the extensive plant of the Canada Car and Foundry Company, has seriously disorganized labour conditions in the city. The forge shop, machine shop, blacksmith shop and moulding shops were completely destroyed. As a result, 250 men lost their positions, and more than 500 additional men, whose work depended on the output of these shops, were also thrown out of employment. The head officials of the Company arrived in Amherst to-day. The work of rebuilding will be begun at an early date, but it will be some weeks before a large number of the men can find places, although the Company will do its best to have them taken on as speedily as possible.

Outside of the disturbing condition produced by the fire, the industrial situation in Amherst is all that could be desired. The industries are all operating on an extensive scale, and continually adding to their working staffs. The Hewson Woollen Mills held its annual meeting during the month, and a dividend of six per cent. was declared. This is the first dividend in three years.

The strike in Springhill still continues. The town was placed under a police commission, and a decided improvement followed; about twenty of the strikers resumed work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The backward spring has seriously handicapped the farmer. Little or nothing has as yet been done towards this season's work. Thousands of tons of hay will be carried over to next season. In other lines of farm produce, prices are good.

Fishing.—The lobster season opened on April 20, but owing to the presence of ice in the bays and harbours the fishermen have not as yet been able to set out their traps, and no lobsters have as yet been taken to the packers.

Lumbering.—The lumber cut in this county will total fully eighty million feet, the largest for years. Shipping will be begun at once. Stream driving and hauling is very active at present.

Manufacturing.—As mentioned before, the fire at the Canada Car Company has seriously interfered with the output of cars, but in other manufacturing lines business is good.

Mining.—With the exception of Springhill, the collieries are active and have increasing outputs. The Maritime Gypsum Company resumed work at its quarries this month. It is at present employing sixty men, but the number will be shortly increased. The Company sells its entire output in the United States.

CONDITION OF PARTICULAR TRADES.

The weather has been cold and backward, but even with this disadvantage an improvement in building operations has been noted. Bricklayers and masons, who have been idle through the winter, are gradually resuming work. Carpenters and joiners are busy, and painters and paperhangers, active. Electrical workers, horseshoers and woodworkers have been busy. Carriage and wagon makers report business active. Many car builders are out of employment owing to the recent fire. Pattern makers were fairly busy. Printers, pressmen and journeymen tailors are busy, with garment workers active. Boot and shoe workers were very busy, with a small demand for more men. Butchers and meatcutters were active. Leather trades, trunk and bag makers were busy. Barbers report business good. Clerks and stenographers were well employed. Unskilled labour is well employed.

CHARLOTTETOWN, P.E.I. AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month of April showed improvement over that of March. Outside building operations included the remodelling of the new Royal Bank,

and the starting of several residences. The new Heartz Memorial Hall was almost completed and work was started on the enlargement of the Notre Dame Convent. A feature of the month was the arrival of forty-three immigrants from Great Britain, including several families who will settle on farms, a number of farm labourers and domestics, all of whom quickly found employment. The majority had been engaged in advance. The opening of navigation was considerably later than usual, the winter boats being kept running until the 27th.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Cold weather during the first part of the month delayed operations but the closing week found the land beginning to dry up and preparations under way for starting cultivation, although very little ploughing was done.

Fishing.—With the opening of the lobster fishing on the 26th, the busy season of the fishermen began. The ice, in some sections, hindered the running of lines, and the first catches will be later this season than last year.

Manufacturing.—There were no changes under this heading to note, the supply and demand for labour being well balanced.

Railroad construction and employment. With the advent of spring there was renewed activity on the Elmira Branch Railway. The summer timetable which meant the putting on of additional trains went into effect on the 24th.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers were active. Painters, decorators and paper hangers were busy; plumbers, gas and steam fitters, stone cutters, were active. Builders' labourers were fairly active. Iron moulders, workers and helpers, machinists and engineers, steam engineers, electrical workers, linemen and switchmen were active. Bicycle workers were busy. Woodworkers, upholsterers, carriage and wagon makers and car builders were active. The printing, clothing, food and tobacco preparation, leather and miscellaneous trades were active. Railroad conductors, locomotive engineers, firemen, railroad telegraphers, trainmen, switchmen and trackmen were active; steamboat men and steamboat firemen, and longshoremen were busy. There was a fair demand for unskilled labour.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Industrial and commercial conditions during April showed but little advancement over those reported in March, and were scarcely up to the standard of April, 1910. Weather conditions are partly responsible for this; retarding alike log driving and agricultural operations. Navigation of the Petitcodiac river opened April 19, while the steamer on the Summerside, P.E.I. and Point du Chene route made the first trip April 27, each being three weeks later than in 1910. Building operations are promising, several permits for dwellings having been issued. The work of trenching for the installation of natural gas has so far proceeded slowly owing to the great depth of frost, but with settled conditions a large force of men will be employed and the work of pipe laying and street railway construction rapidly pushed. A site on Mechanic street has been purchased for offices and car sheds. All local manufacturing industries report very active conditions prevailing during the month and much work in sight. Retail trade has been seasonable and wholesale trade expansive. Rents remain steady and real estate firm. No change in hours of labour or wages noted and no labour troubles in evidence.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farming operations have not begun yet. Produce of all kinds except hay is in good demand and prices are fair. The eighth Annual Seed Fair of the Sussex Studholm Agricultural Society was held March 31—April 1, being

well patronized. Country cheese factories will re-open May 1.

Lumbering.—Driving upon the Miramichi waters and other north shore streams has not yet commenced but operators are ready for the rise of water. Current wages offered are from $2.25 to $2.75 per diem. Heavy cuts of lumber have been made in Albert county, 12,000,000 feet on the Shipody river alone. Small operators are receiving $13.00 per thousand feet for their output.

Mining.—Drilling work has been resumed by the Maritime Oil-fields Company on the Coverdale areas and on April 14, in well No. 19, at a depth of 1,285 feet, gas yielding 6,000,000 cubic feet daily was struck. A company to develop the tungsten deposits on the Miramichi are seeking incorporation. Coal mining operations at Bursville are also being actively carried on, about 100 men being steadily employed.

CONDITION OF PARTICULAR TRADES.

The various craftsmen of the building trades still continue quiet with the exception of painters, decorators and paper hangers who are very active and in demand. Steady conditions prevail among the various metal and engineering trades. Woodworkers were active, upholsterers busy, carmen active and barrel factory hands very active. Printers, pressmen and bookbinders were active. Journeymen tailors were active and garment workers active and in demand. Bakers and butchers were active. The leather trades were quiet. Barbers were busy, clerks and stenographers steady, hotel and theatre employés busy, laundry workers active. All classes of railway operating staff were active, with carters, teamsters and expressmen busy. For unskilled labour the demand continues light but will very materially increase in May.

ST. JOHN, N.B. AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

With the advance of spring and warm weather the labour market is improving, although no new work has been started with the exception of the excavation for the new armoury. A large amount of remodelling and improving of buildings is in progress, and it is anticipated that next summer will be an improvement on last.

The winter port business is drawing to a close. Up to April 22 there had been filed at the Custom House cargoes for one hundred steamships, which carried away Canadian goods valued at $13,586,312, and foreign goods valued at $7,390,932, making a total of $20,977,244. The total valuation of shipments last year per 100 steamships was $20,575,604, an increase of $401,640 in valuation over last season. The total amount of shipments from this district to the United States for the quarter ending March 31 was $318,344.89, and for the corresponding period last year, $634,103.95, a decrease of $315,759.06.

The inland revenue receipts for the month of March were, $13,765.03.

The Savings Bank deposits for the month of March were $55,821.43, and the withdrawals $63,614.66. For the fiscal year ending March 31 the deposits were $750,623.97, and the withdrawals, principal and interest, $895,785.48. There is more money on deposit in the Savings Bank now than there was a year ago, notwithstanding that the withdrawals during the year exceeded the deposits by $145,161.51.

Extensive repairs, alterations and improvements are to be made to the cold storage plant on Main street, recently taken over from the New Brunswick Cold Storage Company by the Canadian Pacific Railway.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—At the monthly sale of vacant Crown lands at the Crown Land Department on April 4, a lot of 100 acres at Allandale Settlement, York county, was bid in at $3.50 per acre. The upset price was $2 per acre. The other lots, including one of 368 acres east of Beaver Harbour, Charlotte county, were purchased at the upset price.

Lumbering.—The first bank logs to come down the St. John River this season

reached Springhill April 27. It is estimated that there will be about 10,000,000 feet of bank logs coming to Springhill, making a busier season than last year. The opening prices being paid by lumber buyers stationed there are $10 for battens and $13 for deal logs in spruce, while hemlock logs bring about $8.75 per thousand feet.

The annual meeting of the St. John River Log Driving Company was held at the Queen Hotel, Fredericton, on April 5. Messrs. William W. and George Aitken, of Fredericton, were awarded the contract for the Corporation Drive, at the advertised rates. The president, J. Fraser Gregory, stated there would be upwards of 100,000,000 feet of logs to drive this year, and that this would include 30,000,000 feet hung up last year, 17,000,000 of which was at Black River.

The wages paid to stream drivers are from $1.50 to $2.50 per day.

Nearly all the mills have started sawing for the season.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and builders' labourers were quiet, but carpenters and joiners, painters and decorators, plumbers, gas and steamfitters were active. The metal and woodworking trades were active, with the exception of shingle weavers. Active to busy conditions prevailed in the other skilled trades and unskilled labour was well employed.

DISTRICT NOTES.

Richibucto.—Contracts for the repairing and extension of the Government wharf at this place have been awarded, and work thereon will commence at once. Contract price, $22,800.

Hillsboro.—The Albert Manufacturing Company has decided to rebuild the gypsum mill destroyed by fire in March. The plant will cost about $100,000. The Salisbury and Harvey Railway Company has decided to discontinue the operation of the twenty-mile section between Hillsboro and Albert, the former terminus, after May 1, owing to the damage by tides to the bridges over the aboideaus in that division.

NEWCASTLE, N.B., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market at the present time is very dull, and the supply is much greater than the demand. There is little or no work at the present time. The only industries here are the lumber mills, and they will not start for at least two weeks. Of course, many are going to the lumber drives, but the weather is so cold that the water has not risen sufficiently to do much. April was a remarkably cold month. The ice is all broken up, but has not run out, as the wind is east all the time. There will probably be no change in the rates of wages this summer.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It is going to be a very late spring. Farmers in general are beginning to take a much greater interest in the cultivation of the land, in having good seed, and in raising stock. Horses and cattle are becoming more valuable and it is impossible to buy a good team of horses to-day for less than $450. The price of cows now is double what it was a few years ago.

Fishing.—There is nothing being done at present, further than getting ready for the season's work.

Lumbering.—The prospects are fairly good if the drives all come out. Some of the mill owners are making ready to run their mills day and night, that is, twenty hours out of the twenty-four.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were practically idle. Carpenters and joiners were a little more active. Painters, decorators and paperhangers were busy. Steam engineers were busy getting the mills ready for sawing and getting the steamboats ready for the opening of navigation. Carriage builders were very active and the prospect better than for the last two years.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and E. Little, correspondents, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been some increase in the activity of labour during April as compared with March, and the outlook for the season is promising. Work was starting in the building trades, and painters especially were active. Navigation has opened, the first arrival being a coasting steamer on April 10. The date is considerably later than last year.

The free-employment bureau established by the Provincial Government was opened on April 18, with Mr. Felix Marois as superintendent, and Mr. A. Crowe as assistant superintendent.

A large number of watchmakers and jewellers have given notice that they will close their establishments at 7.00 p.m., except on Saturdays and the eves of holidays.

The sum of $4,000 was distributed by the Ross Rifle Company as a bonus among its employés. The recipients numbered thirty, the maximum bonus amounting to $525, and the minimum to $56.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The season is very backward, the snow being still in the fields at the end of the month.

Lumbering.—The men have returned from the woods. As the ice is still holding in the rivers, work on the drives has not begun.

Railway construction.—The demolition of the Champlain Market hall to make room for the new transcontinental and union station is about completed, and the work of construction will soon begin.

CONDITION OF PARTICULAR TRADES.

The building trades are well employed. The Customs House, which was destroyed by fire, will be rebuilt, the men being already at work clearing the ground. The metal and woodworking trades were active and busy. The printing and clothing trades were also active, with the exception of boot and shoe workers who were quiet. Ice-cutters, tanners, hotel and restaurant employés were dull. Transportation employés were busy, with the exception of ship-labourers and longshoremen who remained very inactive. The supply of unskilled labour continued to be in excess of the demand.

NAVIGATION NOTES.

The first coasting vessel to arrive here this season was the schooner *Velleda,* from the north shore, on April 9. The steamer *Aranmore* left here on the tenth instant, for ports on the north shore. Last year she left here on March 24. The steamers *Lady of Gaspé, Amethyst* and *Cascapedia* left here on the twenty-sixth instant, for Montreal, from which city they will commence their regular trips to the lower St. Lawrence and Gulf. Navigation to the sister city is nearly a month later than last year. The steamer *Royal George,* from Bristol, arrived in this port on the twenty-seventh instant. She is the first ocean steamer to arrive this season. The first ocean steamer last year, the steamer *Iona,* arrived here on April 25.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Owing to the season opening late, it was near the close of the month before there was any great demand for outside labour. Now that work has begun there is a big demand for unskilled labour, while the building trades have also started up with a good demand for men. As already mentioned, there are several large contracts which will keep all branches of the building trade busy until the close of the season. The E. & T. Fairbanks Company has already a portion of a large extension under way. This Company has secured a large order from the Montreal Harbour Commissioners for fourteen automatic grain weighing scales. They

will be placed in the new two-million-bushel elevator at Montreal Harbour. In order to carry out this order, a portion of which has to be finished by fall, it will be necessary to employ more hands, and to work overtime during the summer months. The new addition to be erected by this Company will be three stories high, and will be 80 by 90 feet.

The Sherbrooke Power & Railway Company began work on the extension of the railway system the last week in April. Over 200 men are employed, a day and night shift being employed. This extension work will take some time to complete, and more men will be taken on.

The inside trades are well employed, and the various machine shops are running full time, in one case a night shift being engaged.

Owing to the late opening of navigation, the railway employés have been kept busy both on the Grand Trunk Railway and Canadian Pacific Railway.

The wholesale and retail trades report business very good.

The City Council has given a grant of $2,000 towards the expenses of an industrial commissioner. This now gives an amount of $4,500 to be devoted for the purpose of advertising the city as an industrial centre. Negotiations are now under way with several concerns with a view to their establishing a branch in Sherbrooke.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were just beginning their spring work about the last of the month. Those who own "sugar bushes" have had a good return, for more than the average of sugar and syrup was made, notwithstanding the fact that the season was late in starting.

Lumbering.—There is a better demand for pulpwood this spring than for the past three years from American mills. A considerable quantity was cut during the winter. There are many thousands of cords lying at the various sidings ready for shipment. The large pulp mills at Brompton and East Angus had large forces of men employed in "driving" the logs down the various streams.

Manufacturing concerns are running full time, with plenty of orders ahead.

Railway construction.—The various railways have increased their staffs of track workers, in order to get the permanent way into proper shape, now the frost is out of the ground.

All other industries in Sherbrooke are fully employed, and there is no concern that is not running to full capacity.

CONDITION OF PARTICULAR TRADES.

The building trades were busy, and will be so for some time to come. Painters and paperhangers were very busy. Iron workers and machinists were busy, as also were electrical workers and linemen. The various branches of the woodworking trade were very busy. Printers, pressmen and bookbinders were busy. Journeymen tailors and garment workers had a busy month. Bakers and confectioners were active. Icemen were busy. All the miscellaneous trades were active. Railway men were busy during the month. Street railway, cabmen, &c., were active. Teamsters and expressmen were busy. Unskilled labour, towards end of month, was busy.

DISTRICT NOTES.

Beebe.—Granite-cutters are arriving here every day to supply the demand of the Stanstead Granite Company.

Richmond.—The Boston Last Company has been running nights.

Thetford Mines.—Messrs. Bennett and Martin of the new mine, recently acquired by the sale of the former Ward-Ross property, are making preparations for extensive mining operations during the ensuing summer. The Beaver Mine, of the Amalgamated Asbestos Company, commenced operations with about 100 men, preparatory to beginning work shortly with a full staff. The two mills of the King Mine have resumed work after being closed for the winter, with a staff of men arranging for a resumption of full work.

Lake Megantic.—The Arnold River Gold Mining Company, a newly incorporated gold mining company, at Wo-

burn, near the head of Lake Megantic, is preparing to start work this spring.

Castlebar.—The pulp mill at Nicolet Falls is running.

Graniteville.—With the breaking up of the severe weather, work is again being resumed at the quarries.

Kingsbury.—The box factory is kept very busy, the plant having to be run night and day to keep up with orders.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions were more active in April, compared with the previous month, but the season was nearly three weeks later than usual. There was a fair demand of labour for construction. There was no special activity in factories or public works during April. Commercial activity showed an improvement over March, both in wholesale and retail circles. Rates of wages and hours of labour remained the same. No strikes or lockouts were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy only part of April, making maple syrup and sugar.

Fishing.—Very little fishing was done in April.

Lumbering.—Lumber firms are getting mills in working form for the sawing season and are expecting the logs soon. Most of their men are still in the bush.

Manufacturing.—All factories were running full time.

Railway construction.—There was no railway construction done in this district this month, but the Union Paper & Bag Company is rushing the construction of their pulp and paper mill at the Cap de la Madeleine, and The Wyagamack Pulp & Paper Company is doing the same on its mill at Baptist's Island.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet. Carpenters and joiners, lathers and plasterers were fairly employed. Painters, decorators and paperhangers were busy. Plumbers, gas and steam fitters were fairly active. Stone-cutters were quiet, and builders' labourers were fairly employed. Iron moulders, iron workers and helpers, coremakers, machinists and engineers and all others in the metal trades were active. Blacksmiths, bicycle workers and horseshoers were also well employed. Woodworkers, upholsterers, varnishers and polishers, carriage and wagon makers and pattern makers were all active in April.

Printers, pressmen and bookbinders were fairly employed. Journeymen tailors, garment workers, glove makers, boot and shoe workers all report a good month. Bakers and confectioners, butchers and meat-cutters, cigar makers and tobacco workers were active, but ice-cutters and drivers were idle. Tanners and curriers were fairly active. Barbers were active, clerks and stenographers were busy. Delivery employés, and furriers were fairly employed. Hotel, restaurant and theatre employés and laundry workers were active. Freight and passenger traffic are both becoming more active. Navigation will open later this season, so there was no activity to report in the harbour for this month, but cab drivers, hackmen and carters made a good month. The demand for unskilled labour was fair and up to the average for this season of the year, and the supply was about equal to it.

DISTRICT NOTES.

There was special activity in construction at Shawinigan Falls and at the Cap de la Madeleine. The City Council of Grand Mère has voted a bonus to a new stove foundry.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chénevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Sorel has not for many years witnessed

so much activity as during the past month. Yards and shops were all in full operation. In several shops they had to work day and night. More than 900 men were employed in the government yards and shops, nearly 600 by the Richelieu & Ontario Navigation Company, and about 300 by the Sincennes-McNaughton Company. Many workmen also found employment with private companies or individuals. Several building permits have been issued and work commenced on several houses. Business was good. The wood and coal trade had a good month on account of the cold weather. There will be plenty of work for all trades during the summer, with wages ranging from $1.35 to $2.75 a day.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The meat market was strong and prices have come up a little. On the other hand, the price of farm produce has fallen. Eggs and butter were twenty per cent. cheaper; potatoes have gone up from 60 cents to 70 cents a bushel; hay sold at from $8 to $8.50. Farmers have come to town only once a week, on Saturdays, to sell their products, as the roads were not in good condition.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during April was not very active. The building trades were quiet, on account of the cold weather. Sash and door factories were busy enough to employ their full staffs. The shoe industry was quiet, the J. A. & M. Côté Company's plant having been closed for stock-taking early in the month, and the Ames-Holden establishment rushing work in hand in order to close down for repairs and the installation of new machinery in the addition built last winter. The other industries, with the exception of leather, were fairly active. The Augustin & Daudelin and O. Chalifoux & Son, Limited, Companies were merged during the month; the firm will be known as O. Chalifoux & Son, Limited, and besides manufacturing motors and farming implements will pay special attention to the class of implements used in Western Canada. It will build a shop 70 x 250 feet, in Ward 5, near the railway track.

The late spring has delayed city work considerably and deprived many workmen of their usual employment. Retail business was not very active. Wholesalers reported a quieter month than March. Banks reported an active month, with comparatively easy collections. There was no change in the hours of labour or rates of wages, and the relations between employers and employés were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work on the land has not yet been started, on account of the cold weather. Farm products sold well and at good prices. There was much activity among sugar-makers. The maple sugar crop will be large, but prices remain firm, 12 cents a pound for sugar and $1 per gallon for syrup of the best quality. Labour on the farm was quiet, and there was little new demand. Much hay has been shipped abroad; towards the end of the month bad roads interfered with hauling.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators, and paperhangers had a quiet month. Plumbers and steam and gas fitters were fairly well employed. Stone-cutters and builders' labourers were quiet. Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, blacksmiths, boiler makers and horseshoers had an active month. Woodworkers, upholsterers, varnishers, woodcarvers, wagon makers and pattern makers were fairly well employed. Printers, pressmen, bookbinders had a fair month. Journeymen tailors and garment workers were well employed. Boot and shoe workers were very quiet. Bakers and confectioners, butchers and ice cut-

ters and handlers had a good month. Tanners and curriers and leather workers had a quiet month. Barbers, clerks, delivery employés, hotel and restaurant employés and laundry workers were active. Railway employés and the transport trades were well employed. Unskilled labour found little employment. There are many idle men at present, but work promises to be plentiful within a short time.

ST. JOHNS & IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market during April was more active than in March. The demand early in the month somewhat exceeded the supply. Work was started on the free public bridge between St. John and Iberville; a number of men are employed, the contractor wishing to rush the work. New machinery was installed at the Trenton Potteries to accommodate the increased number of hands. Repairs were almost completed on the umbrella and hat factories which were damaged by fire in March. Sash and door factories were rushed with orders. Men in all the skilled trades were in demand. Business, wholesale and retail, was very satisfactory for the time of the year. Banks reported the month satisfactory. There was no trouble between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy. The demand for farm hands was large and the pay offered high.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, painters and decorators all reported an active month. Plumbers and steamfitters were very busy. Stone cutters and builders' labourers were active. Iron moulders and workers and helpers, coremakers, machinists and engineers were well employed. Electrical workers reported a good month. Blacksmiths, shipwrights, caulkers, tinsmiths, tool sharpeners, horseshoers and jewellers had a very good month. Printers, pressmen, electrotypers, bookbinders, steel and copper-plate printers and photo-engravers reported a busy month. Journeymen tailors and garment makers were well employed. Bakers and confectioners, butchers and meat-cutters, and tobacco workers had a good month. Tanners and curriers, leather workers and saddlers were well employed. Barbers, clerks, stenographers, delivery clerks, furriers, hotel, restaurant and theatre employés were active. Railway conductors, engineers, firemen, telegraphers, switchmen, trackmen, freight handlers and trainmen were well employed. Cab drivers, hackmen, carters, teamsters, expressmen and unskilled labourers were all active.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was not much change in the labour market from the preceding month, except that carpenters seemed to be very active. All the trades seemed busy, while the building trades, after a quiet winter, anticipate a very active season, as the permits issued last month were much more numerous and for greater values than at the same time last year. There was no sign of trouble between employers and employés. Carpenters and joiners, as well as painters and plasterers, have opened negotiations with the employers for an increase of wages.

CONDITION OF PARTICULAR TRADES.

The building trades were quiet, as is usual in April. Plumbers and decorators, however, were in demand. Electrical workers, stove mounters, blacksmiths and tinsmiths were in demand, the other metal

trades being well employed. The woodworking and furnishing trades were fairly busy, upholsterers and wagon makers being in demand. The printing, clothing and food and tobacco preparation trades were active. The leather trades had a fair month. The miscellaneous trades were active, with barbers, delivery employés and laundry workers in demand. The transport trades were fairly active. Unskilled labour was better employed than in March.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Although building operations were fairly active during the winter season up to the middle of April, the latter half of the month was remarkable for its exceptional activity and the large demand for skilled men in all the building trades. The building permits issued in March showed a large increase over those of the same month last year, as will appear from the following official statement:—

March, 1911—247 permits; value.....	$ 1,101,577
March, 1910—200 permits; value,.....	676,804
Increase for 1911.....	$ 424,773

Bank clearings for March totalled $146,576,212, as against $170,437,100 for March, 1910. The customs receipts at the Port of Montreal for the month of March showed an increase of a quarter of a million dollars over March, 1910. The figures were $1,569,394 in 1910 and $1,825,217 in 1911, or an increase of $255,623. For the fiscal year ending March 31, 1911, the customs receipts showed an increase of two million dollars over the same period last year. The following figures are for the last five years:—

1911.....	$ 18,329,199
1910.....	16,325,229
1909.....	12,935,098
1908.....	16,480,921
1907.....	11,433,595

The postal receipts for the fiscal year showed an increase of $355,101 over last year.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing establishments in general were active, particularly sash and door factories.

CONDITION OF PARTICULAR TRADES.

All the various trades were from active to busy, with the exception of ship carpenters and caulkers, steamboat men, steamboat firemen and longshoremen, who were quiet. Unskilled labour found good employment in removing the snow and ice from the streets of the city.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of labour has been more active than in March. The demand for labour is keen. The mills supplied by the water from Chaudière Falls are working day and night, now that there is plenty of power. During part of March, these mills were reduced to half-time.

Outdoor building operations are not very active, but the opening of navigation has given work to some two hundred men from Hull and district.

The merchants from the whole district report favourably. Collections are better than last year. Some of the lumber camps have not yet been abandoned, as there is still plenty of snow in the bush, and the ice is solid on the lakes. All manufacturing concerns are working full time. Agricultural work is quiet; the farmers are waiting for warm weather.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The starting of several municipal works and an expansion of building operations increased the opportunities for employ-

ment in April over the previous month. The only quietness in labour circles prevailed among those depending on saw mills for work. Lumber manufacture was hampered by the late spring. At the end of April, 800 men were employed on city streets, water mains, sewers and such like, with plans for increasing the staff fifty per cent. next month. The lowest wage paid these corporation men is $1.98 per day, or 18 cents more than last year. It is estimated $500,000 will be spent in civic works during the summer. The record of building permits for April is expected to compare favourably with the corresponding month of last year. March, 1911, yielded $134,475 in building permits, as to $219,350 in March, 1910. Under an agreement signed in 1909, bricklayers and stonemasons receive 2 cents an hour more than last year. An agreement of 1910 gives sheet metal workers an increase of 5 cents (in force since January1), and about half the painters and paperhangers have received an advance in pay ranging from 2 to 5 cents per hour. A request for increases for carpenters and plasterers' labourers is under consideration.

Wholesale and retail trade had a good month. Real estate transactions were numerous and three or four of the best known merchants moved into new quarters in preparation for larger business. The growth of the city's trade during the fiscal year ending March 31 was reflected by an increase of twelve per cent. in the customs receipts which totalled $1,268,-047 for the 1910–11 term. The Ottawa bank clearings declined slightly, as shown by this comparative weekly statement:—

April, 1910.....	$4,723,651	April, 1911...	$4,341,366
"	3,853,275	" ...	4,262,631
"	4,318,934	" ...	3,661,445
"	3,691,047	" ...	3,937,225
Total.....	$16,586,907		$16,202,667

The Geo. M. Mason Lumber Company has purchased a site for a branch lumber mill on the Britannia electric railway. McFarlane & Douglas, Limited, announce they will erect a new factory for making fire-proof doors and windows. The campaign of the civic publicity bureau has brought many representatives of manufacturing firms to Ottawa to look over sites.

The City Corporation granted an increase of 25 cents per day to about thirty pipe-layers who were receiving from $2.25 to $2.50 per day. The master painters' association and some small contractors outside it advanced wages for painters and paperhangers whose wages ranged from 25 to 33 cents per hour. It is reported that each workman was dealt with individually and that approximately 100 were raised 2, 3 or 5 cents per hour.

A strike of the tailors in a local shop affecting ten employés, occurred on March 27 and was settled on April 7. The employer had dismissed a girl belonging to the union, alleging that she was incompetent. The union claimed the employer wanted to get work done at lower cost. The girl was reinstated. The strike of twelve stage hands which occurred on March 6 is still in progress.

The C. W. Lindsay Company, piano store owners, gave a bonus to each of their employés who had been with them from March 1, 1910, as a result of a satisfactory year's business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work was delayed by the late spring, but the last week of April promised marked improvement. Consumption of fodder will be much larger than last season, owing to the backward state of pastures. Horticultural work is progressing favourably. The offerings of pork and beef from local farmers declined toward the end of the month. Beef produced in the Ottawa valley sells from $2.50 to $3.50 less than that brought from Western Ontario. Ottawa market quotations at the end of April were:—Pork, $9 to $11 per cwt.; Beef, $7 to $10 per cwt.; Veal fronts, 4 cents to 9 cents per lb.; and hinds, 6 cents to 9 cents per lb. Chickens and turkeys, 20 cents to 22 cents per lb.; potatoes, $1.10 per bag; parsnips, 75 cents to $1 per bag; Beets, 50 cents to 75 cents per bag; Butter, 22 cents to 25 cents per lb.; Eggs, 18 cents to 20 cents per doz.

Lumbering.—Saw mills were prevented from starting by ice on the rivers. The

log drive is delayed by the same condition. The pulp and paper industry, which was hampered during February and March by low water, was relieved by a rise in the Ottawa river.

CONDITION OF PARTICULAR TRADES.

Several of the building trades were not so actively employed as during April last year. This was apparently due to the late break-up. There was, however, an exceptionally brisk demand for painters. Next to them, bricklayers were busiest. Carpenters and joiners were fairly well occupied, and there were several isolated instances of increased wages among them. The season's outlook promises steady employment and absence of labour disputes in the building trades generally. Iron workers, etc., were given considerable work on repair work for mills soon to open. Woodworking trades were very busy on fittings for the interior of shops and dwellings. The Ottawa Electric Railway Company received a large number of new cars from a local shop. Carriage makers were actively employed. Printing and allied trades are, as usual, well employed. Coat makers are in demand, and other branches of the clothing trades are busily engaged. Normal conditions prevail among the food preparation trades. Civic authorities demand extra caution in handling ice, meats, milk, &c., owing to a typhoid epidemic just passed. Clerks, theatre hands and laundry workers are well employed. All branches of railway work are active. Unskilled labour promises to be scarce during the summer.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During the month of April labour generally was very active, all the industries being well employed. The continued warm weather had the effcet of breaking up the river, in consequence of which came the opening of navigation, which was delayed by the late spring.

An exceptionally busy season is anticipated in civic work, the corporation having begun the construction of 2½ miles of macadam roads, the top-dressing of 1 mile of asphalt, the laying of five blocks of permanent pavement, together with new concrete walks. Contracts to the amount of $4,300 were let by the congregation of Chalmers Church for redecorating and refinishing. The Kingston & Pembroke Railway Company has started the season's work, giving employment to a large number of men, the work being chiefly that of painting station buildings.

The event of the month in the shipbuilding industry was the launching of the first vessel built by the Kingston Shipbuilding Company. The incident was the occasion for a large gathering of citizens. The opening of this shipbuilding plant will give employment to a considerable number of skilled and unskilled workmen. The plant of the Ontario Exploration Company was moved to Collins Bay, and the head office of the Company has been moved to Kingston from New York.

A resolution condemning the employment of "short-course men" at the Central Prison in the erection of buildings,as being detrimental to the interests of labour was drawn up for presentation to the Premier of Ontario.

No changes in rates of wages or hours of labour, and no strikes or lockouts occurred during the month.

CONDITION OF LOCAL INDUSTRIES.

Farmers, fishermen, lumbermen, manufacturers, miners, and those engaged in railway construction reported an active month.

CONDITION OF PARTICULAR TRADES.

The building, metal, shipbuilding, woodworking, printing, clothing and other skilled trades reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally has been well em-

ployed. Building operations were rapidly increasing in activity, and the year promises to be prosperous. Manufacturing industries were very active, a number of factories having to work overtime. Labourers were in good demand during the latter part of the month, and from now on work will be plentiful in nearly all trades. The contracts have been let for the new Murray Street Church, and the contractors have started to put in the foundation. Work has commenced on the erection of the factory for the Bonner Worth Worsted Yarn Company. The Canadian Canoe Company will build a new structure, about 32 x 114; it will be three stories high, with a basement and storehouse, 48 x 80, with lumber shed 20 x 114. A new home for the Protestant poor will be built this summer. The board of works has contracted for 4,000 barrels of cement, and will build about 5 miles of granolithic walks. A new navigation company has been organized here, viz., the Peterborough & Lake Simcoe Navigation Company. It has a fleet of six steamers to operate on the waters of Lake Simcoe and the intermediate lakes and rivers to Rice Lake. The question of cheap power for Peterborough is engaging the attention of the Industrial Commissioner and the City Council. There are two or more propositions to be considered, viz., the hydro-electric power, under Government auspices; the purchase of the Lakefield dam and the purchase of power on the river Trent, at Healey's Falls and other points. The pattern makers at the Canadian General Electric Company are out on strike for an increase of pay.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy seeding. Fall wheat in this locality is said to have wintered well. There was a good demand for farm labourers.

Lumbering and *manufacturing* were active.

CONDITION OF PARTICULAR TRADES.

The building trades were unusually active for this time of the year. Iron moulders and core makers had a busy month. Machinists and electrical workers were active. The printing and allied trades were active. Journeymen tailors and garment workers very busy. Bakers and confectioners, butchers and meat-cutters were active. Leather workers were fairly well employed. Textile workers were active. Railway and street railway employés were active. Teamsters and expressmen were busy. Unskilled labour was fairly well employed.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

April was an active month in most lines of industry, with a marked improvement in general business. Extensive building operations and civic contracts have absorbed most of the surplus unskilled labour. The prospects for a busy season are good, except for a threatened strike by the members of the Bridge & Structural Iron Workers' Union, who have demanded an increase of wages from 35 to 40 cents per hour for the men engaged in steel construction work. Other difference, which it was thought might result in strikes, have been amicably settled.

Permits for new buildings issued by the City Architect's department in March represented an approximate value of $2,210,770, as compared with permits to the value of $1,683,165 in March, 1910. For the three months ending with March, 1,085 permits, of the approximate value of $3,638,940, were issued, as against 782 permits, representing a value of $3,125,693, for the corresponding months of 1910.

The receipts of the Street Railway Company for March were $372,945, of which the City's percentage was $55,941, as against $343,541 in March, 1910, of which the City received $51,531.

The Toronto Typographical Union has adopted a resolution favouring the organization of typographical unions throughout Ontario into a provincial conference similar to those existing in several of the United States. Circulars have been sent

to the other unions to obtain an expression of opinion from them.

The Bank of Toronto is erecting a bank building on the south-west corner of King and Bay streets, to cost $1,000,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very busy with spring sowing, for which the land was generally in good condition. A large area has been sown with alfalfa, which is coming more into favour in this locality. The fall wheat is generally backward, owing to the cold weather of the earlier part of the month, but with favourable weather promises to be a good crop. The trade in live stock has been active, and farmers have realized good prices on horses, cattle and hogs. The Milk Producers' Association, at a meeting held on the first, fixed the wholesale rate of milk for the summer months at $1.25 per eight-gallon can—an increase of 10 cents over last year's rate.

Manufacturing. — Active conditions prevailed in most lines of manufacturing industry, with orders coming in well. Numerous new plants and extensions are being erected or are in contemplation. Brigdens, Limited, will build a large engraving and printing plant on Richmond street, west. It will consist of five stories and basement, and cost $50,000. Conduits, Limited, will build an 80 x 150 feet addition to the factory on the Don Esplanade. The Reinhardt Brewery Company has given out contracts for a new brewery on the corner of Mark street and Don Esplanade, four stories in height, to cost $75,000. The Toronto Furniture Company is putting up a three-story factory, to cost $70,000. The R. S. Williams Company will erect a ten-story building at 145 Yonge street during the summer. It will cost about $70,000, and a portion of it will be occupied by the firm as a piano salesroom and warerooms.

CONDITION OF PARTICULAR TRADES.

The building trades were generally active, with few out of work, except immigrants who are coming in in large numbers. The union carpenters, who demanded an increase of the minimum pay from 35 cents to 40 cents per hour, have accepted 37 cents. The men employed in steel construction work have asked for an increase from 35 to 40 cents per hour, which has been refused by the employers. The iron trades were better employed than in March. Blacksmiths, boilermakers, sheet metal workers and electrical workers had steady work. Moulders, machinists and structural steel workers were fair. Brass workers, jewellers and silversmiths were active. Piano workers and wood workers had a good month. Printers, bookbinders, lithographers, stereotypers and pressmen were well employed. Custom tailors were active. Garment workers were fairly well employed, but not so busy as in March. The other departments of the clothing trade had steady work. Bakers, butchers, brewers and cigar makers were well employed. Harness and leather workers were active. Hotel and restaurant employés, barbers and laundry workers had continuous employment. Railway and street railway men were active. With the opining of navigation, some sailors, longshoremen and others were finding employment, with every prospect of an active season. Unskilled labour was generally well employed, except some recent arrivals.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Spring weather came late, but April saw a general revival in many trades, and conditions, on the whole, were satisfactory. Work to the extent of $40,000 was contracted for under the Queen Victoria Park Commission, and further items remain for consideration. Operations under contracts let last year were resumed and employment was given to many labourers, teamsters and some skilled labour. The E. J. Von Gal Hat Company commenced the erection of a large addition to its factory. Commercial interests reported satisfatory conditions.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural operations were brisk. Seeding was late this season. The acreage devoted to raising vegetables for canning factories will be greater than ever before.

Manufacturing.—Nearly all concerns reported heavy business.

Railway construction and employment.—General railway employment was good. Track improvements on a large scale continued to employ many men in the district.

CONDITION OF PARTICULAR TRADES.

The outlook in the building trades was good, but up to a late period in the month bricklayers, masons, plasterers and lathers were still quiet. Carpenters were more active. Painters were very busy, plumbers active and builders' labourers dull. Iron workers were generally active, though some foundry and machine shop men reported a slackening of employment. The railway switch and frog plant was busy. Electrical workers were more active, with linemen busy. Journeymen tailors and hat makers were busy. The neckwear factory advertised for girls. Office and salespeople were quiet. The summer hotels and restaurants were engaging employés for the season. Some will open in May. Laundry workers were busy. Railway freight traffic was not so heavy as in March. Passenger business was steady. The opening of navigation was delayed by heavy ice-fields in the lakes. Teamsters were busy. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Pelham.—The usual large forces of men commenced the season's work in the nurseries. About a hundred labourers were brought direct from England and Scotland.

Bridgeburg.—The number of employés at the Canada Foundry Company's plant was increased. The Grand Trunk Railway Company relaid its line from this place to Brantford, with 100-pound rails.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. James A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

A marked increase of activity in the labour market for April was noticeable. All lines of industry were active to busy, with rush conditions in some. The Steel & Radiator Company's first building will be 120 x 240 feet, of concrete and brick, with steel frame, costing $100,000; it will employ several hundred men to start with. Ultimately, nearly 1,000 men will be employed. The firm has secured thirty acres of land from the City. The Yale & Towne Lock Company will employ 200 men to start with and increase the plant and staff of employés with all possible speed. The first buildings will cost $50,000. These two companies, bringing as they will operatives with them, will increase the scarcity of houses for mechanics. This, in turn, has started a rush in building operations. Many new houses will be built this season. The prospects are for a very busy season in all lines of industry. Real estate transfers are very active, with a considerable advance in prices.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There will be a considerable advance in the prices paid by the canning factories for fruits this season. Tomatoes are being contracted for at 27½ to 30 cents per bushel, as compared with 25 cents last year; raspberries at $2 to $2.10 a crate, as compared with $1.68 last year; strawberries at $1.10 a crate, compared with 96 cents last year; and lawtons at $2 a crate, compared with $1.70 last year. The Simcoe Canning factory has already contracted for 150 acres of tomatoes. It is estimated that there will be nearly 1,000 acres in tomatoes in the central Niagara district, representing 3,000,000 plants, probably one million more than in any previous year. The output of the canning factories for the season is estimated at twenty million cans of fruit.

Manufacturing.—All mills and factories are busy. Navigation opened April 17. Several vessels have passed through the Welland canal during the month. The number compares favourably with that for the same time last year.

CONDITION OF PARTICULAR TRADES.

The building trades were all busy. All branches of the metal and engineering trades were active to busy. The woodworking and furnishing trades were busy. The printing and allied trades were all busy. Journeymen tailors and boot and shoe workers were busy. Food and tobacco preparation workers were active. The leather trades were busy. Barbers, clerks, stenographers, delivery employés, furriers, hotel and restaurant employés and laundry workers were active. All lines of transportation were active to busy, with the volume of trade satisfactory. Unskilled labour was active, supply and demand being about equal.

DISTRICT NOTES.

Port Dalhousie.—Labour was well employed.

Merritton.—All mills and factories were in full operation, with conditions of employment good.

Thorold.—The labour market was active. A new public library will be built this season, costing $10,000. Several streets will be paved or macadamized.

Grimsby will have a building boom this season. Robinson & Werner advertised for fifty carpenters and have secured thirty.

Ridgeville.—A new canning factory is to be constructed for A. W. Crowe. The factory will cover six acres of land. Mr. Crowe has contracted for nearly all the fruits and vegetables in Thelm township.

HAMILTON, ONT., AND DISTRICT.

Mr. William T. Cooper, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of labour during April was more favourable than the previous month in many lines of trade, especially the building and other outside lines. The City's outside work is progressing rapidly, and a larger force of men is now at work than were employed at any time during last year. While plenty of men are available, the City is having considerable difficulty in securing teams. About $30,000 worth of road work will be done as soon as possible. The City has ordered a double-cylinder combination eighty horse power chemical and hose auto apparatus, at a cost of $7,850. Contractors are complaining of a shortage of building stone. From the first of the year to April 26 inclusive, building permits were issued for 298 brick houses, and 131 frame houses, an increase of 102 in the number of brick, and sixty-three in the number of frame houses, over the corresponding period of a year ago. The value of the permits also shows a great advance. The number of permits was 327, an increase of seventy-four. The total value was $1,063,750, an increase of $364,685. Bank clearings for the four weeks ending April 1, 8, 15,. 22, as compared with those of the same weeks last year were:—

1911.....	1,829,416	1910.....	1,741,816
"	3,158,958	"	1,828,958
"	2,135,735	"	1,848,200
"	2,475,965	"	1,998,965

Customs collections for the fiscal year 1909–10 were $1,816,060.50, and for the year 1910–1911, $2,142,476.42, an increase of $326,415.92. Retail and wholesale business during the month has been fairly good. The wages of the men who will be employed by the City in its municipal garbage collection will be $2 per day. It is proposed to establish a British labour bureau here in connection with the British Welcome League.

The early closing movement among the large stores is steadily gaining ground. The Trades and Labour Council has adopted a resolution highly commending the merchants who are closing their stores early Saturday evenings, and is doing everything in its power to make the "shop-early" habit universal.

Steps are being taken by several Hamilton ladies to form a guild for the purpose of bringing servant girls to this country from Great Britain.

The Board of Education has decided that when teachers are away for more than twenty-one days in one year, on account of personal illness, they must pay for monitors. The Moulders' Union has been re-affiliated with the Trades and Labour Council. The Hamilton Labour Directory for 1911 has been printed and circulated by the local broom makers' union.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy plowing and seeding. Fruit-growers are busy with hot-bed crops. There is still a scarcity of farm help in this vicinity.

Manufacturing.—The Dominion Axminster Company will remove its carpet branch to Toronto and will extend its plant here and use it for the manufacture of cotton alone. The Riordon Plating Company is moving to new quarters on Park street, where it is adding several new branches. The Regal Shirt Company has added 25,000 square feet of floor space to its plant to enable it to install new machinery. The Westinghouse Company has taken out a permit for a brick extension to its foundry building, 112 x 208 feet. A permit has been taken out for the new assembly building for the Oliver Plow Company. The structure will be 92 x 370 feet, three stories high, and will cost $200,000. The Lyons Tailoring Company will erect a large four-story building on James street north. A Boston laundry firm has decided to establish a branch here.

Railway construction and employment.—The Grand Trunk Railway Company and Toronto, Hamilton & Buffalo Railway Company have increased the excursion rates from Hamilton to Detroit from $2.40 to $2.70; to Buffalo, from $1.25 to $1.40; and from Hamilton to Niagara Falls, from 75 cents to $1. A Toronto syndicate is anxious to build an electric railway from Galt to Hamilton, providing it could enter the city on one of the existing electric lines. An extension of the line to Toronto is also contemplated. Most of the right-of-way has been purchased for the Guelph Junction railway. It is stated that the Grimsby Beach Company has purchased a side-wheel boat for service between Hamilton, GrimsbyBeach and Toronto.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have been handicapped by a scarcity of lime and stone, otherwise they would have had steady work. Carpenters and lathers and plasterers were fairly busy. Plumbers and gas fitters were very quiet. Iron moulders and electrical workers were fairly active. Sheet metal workers and horseshoers had a good month. Stove mounters were quiet, Jewellers and silversmiths were fairly active. Carriage and wagon makers had plenty of work. Patternmakers found steady employment. The printing and allied trades had steady employment. Journeymen tailors and garment workers had a good month. Boot and shoe workers were fairly well employed. Bakers and confectioners, butchers, cigar makers and tobacco workers had a good month. Leather workers were well employed. Barbers and broom makers had plenty of work. Musicians had a fair month. Railway conductors had a good month; those working on the Toronto, Hamilton & Buffalo Railway were exceptionally busy. Street railway employés had steady work. Unskilled labour was more active than in the previous month. The supply is equal to the demand.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was well employed toward the close of the month. The building season opened with a rush, and from present indications many private houses will be erected this season. Vacant houses were quickly taken, and rents showed a tendency to rise. The iron trades were particularly busy, practically all the factories running on Good Friday.

Factory extensions are still a necessity; large additions are being made in several cases. The customs collections during the fiscal year amounted to $496,329.74, or an increase over the previous year of $129,635. Merchants had an active month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners were very busy toward the close of the month.

Manufacturing.—Manufacturers were busy, and prospects are bright.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons had some employment towards the close of the month. Carpenters and joiners, lathers and plasterers were active. Painters, decorators, paperhangers and plumbers were very busy. Gas and steam fitters were busy. Iron moulders, coremakers, machinists and engineers, metal polishers, buffers and platers, blacksmiths and boilermakers were very busy. Electrical workers, linemen, stove mounters, sheet metal workers and horseshoers were from active to busy. Woodworkers, carriage and wagon makers and pattern makers were very busy. Coopers were active. The printing and allied trades were busy. Tailors and tailoresses and shoe workers were very busy. Bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy. Railway trackmen were active. Freight handlers were busy. Street railway employés were actively engaged. Teamsters and draymen were busy. Unskilled labour was fairly well employed, and toward the close of the month was fully employed.

DISTRICT NOTES.

Paris.—Labour was well employed. The mills and factories were busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Increasing activity prevailed in the labour market with the advance of spring. Building operations are increasing in volume with an unusually busy season ahead, several large contracts being in sight, in addition to a number of residential contracts for which permits have been issued. Contracts have been let for four new structures in connection with the Homewood Sanitarium, the estimated cost to be $175,000. Work on the new Grand Trunk Railway station is being pushed ahead rapidly. Much activity is forecasted in connection with civic undertakings, the City Council having decided to erect two new cement bridges and to complete the sewerage beds in addition to a large amount of sewerage extension work and the paving of several streets. A new county jail and jailor's residence will be erected at a cost of about $25,000, the City to pay forty-five per cent. of the cost. The young men of the city raised nearly $70,000 in a vigorous six-days campaign for money to be spent in the building, equipping and furnishing of a Young Men's Christian Association building.

The customs receipts for the year ending March 31, 1910, were $211,992.60, and for the year ending March 31, 1911, $224,107.28, an increase of $12,114.29. For the month of March, 1910, the receipts were $26,405.27, and for March, 1911, $20,997.92, showing a decrease for March, 1911, of $5,407.35.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report a very busy month with seeding now well advanced. Fall wheat has wintered well in most localities. The annual spring horse show held in the Winter Fair building proved successful in every way. Entries for all classes were well filled, and a large crowd was in attendance.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons and carpenters report a good month, with good prospects ahead. Lathers and plasterers were only fairly active, new work not being far advanced. Painters, decorators and paperhangers were very busy, with plumbers, gas and steam fitters fair. Builders' labourers were busy, also iron moulders, coremakers and helpers. Machinists, electrical workers and linemen had a good month. Stove mounters, blacksmiths and horseshoers, piano and organ workers and sewing machine makers reported a good month; also sash and door and carriage makers. Printers and allied tradesmen reported trade fair. Journeymen tailors, garment workers, boot and shoe workers, textile workers had a fair month. Carters, teamsters and draymen were well employed. Unskilled labour had a good month, with supply and demand about equal.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was well employed during April, especially in the factories. In the building trades, the outlook is favourable for an active season. During the month there were forty buliding permits issued, the total value of which amounted to $77,995. Among the buildings to be erected are two for the Long Tanning Company, one to cost $12,000, and another $15,000, and an addition to the factory of the Berlin Interior Hardwood Company. Business, wholesale and retail, was very good. The month passed without any strikes or lockouts. The employés of the breweries in Berlin and Waterloo received a new schedule of wages, same to remain in force for a period of two years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists have been busy preparing the land for spring seeding, though as yet little seeding has been done. Good prices for market produce were maintained.

Lumbering.—Conditions throughout this industry were very active, one sawmill having completed its season's sawing by the close of the month.

Manufacturing.—Manufacturers were very busy; many of the industries worked overtime.

Railway construction.—Quietness prevailed.

CONDITION OF PARTICULAR TRADES.

The building trades were very active. Metal and woodworking trades were also well employed towards the latter part of the month. In the printing and clothing trades activity prevailed. Conditions in the leather, miscellaneous and among transportation employés and unskilled labour were very good. Among all the trades a season of activity is expected.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Reports received from manufacturers, business people and workingmen continued satisfactory, and the prospects are excellent. Most of the factories were working full time. Business in general was good. The customs returns for the year ending March 31 showed an increase of $27,943 over the previous year. The figures were: For 1910, $70,256.42; for 1911, $98,199.46.

There is apparently plenty of employment for everyone; indeed, there is beginning to be more complaint about the scarcity of labour, both skilled and unskilled. There is something of a movement from the city to the West, and into the country. Up to the present, the influx has about balanced the outflow, but some of the manufacturers are beginning to talk about the scarcity of help. The complaint is heard, too, of the difficulty of securing apprentices to learn trades. Some manufacturers are of opinion that technical education would serve a very

useful purpose if it did nothing more than encourage a taste for learning a trade. The building season is opening slowly. There promises to be a fair amount of work to be done.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters and joiners, lathers and plasterers are just beginning the building season. The prospect is fairly good. Painters, decorators and paperhangers were quite busy. Stone-cutters were regularly employed. There may be a scarcity of builders' labourers. Iron workers, moulders and helpers were regularly employed. Machinists and blacksmiths were busy. Woodworkers, upholsterers, varnishers, polishers and wood carvers were busy. Printers and pressmen were busy. There was demand for hand compositors. Tailors and garment makers were busy. Bakers, confectioners, butchers, cigar makers were all regularly employed, as well as tanners. There was some demand for unskilled labour at the factories.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of April was a busy one, especially among factory workers. The activity of the industrial establishments exceeded that of the corresponding month of last year. Other labour was well employed. Building permits to the value of $8,610 were issued during the preceding month, an increase of $2,300 over the same month of 1910. Contractors claim the season will be very active in the building line. The Grand Trunk Railway shopmen started the first day of the month on longer hours; they work from seven to six o'clock, except Saturdays they quit at twelve, making a total of fifty-five hours a week, five hours a week more than they have been working during the winter season.

Wholesale and retail merchants report trade active. The customs returns for March amounted to $19,180.89, compared with $16,742.67, for the corresponding month of last year.

There is quite a scarcity of girl help and of boys for apprenticeship. No labour unrest occurred during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy the latter part of the month seeding. Market prices are:—

Butter, 22 to 24 cts. per lb.
Eggs, 16 cts. a dozen.
Potatoes, 80 to 85 cts. a bag.
Wheat, 80 cts. a bushel.
Oats, 35 cts. a bushel.
Barley, 48 to 50 cts. a bushel.
Peas, 65 to 70 cts. a bush.
Flour, $2.60 per cwt.

Manufacturing.—All establishments were busy.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers have been fairly well employed the latter part of the month. Painters and paperhangers were busy. Plumbers and gas fitters were active. Iron moulders, workers and helpers were active. Machinists, engineers and linemen were busy. Blacksmiths and boilermakers had steady work. Horseshoers have raised their prices: horseshoes from size 5 to 7 will cost 40 cents instead of 35. It will cost 60 cents, instead of 50 cents, to have a wagon-tire put on. The advance went into effect on April 1. Woodworkers, upholsterers, varnishers and wood carvers were active. Carriage and wagon makers were busy. Coopers were busy, and stave factory workers are doing a good trade. Printers were steadily employed. Journeymen tailors and factory workers were busy. Bakers, confectioners and butchers were active. Cigar makers were busy. Harness makers and leather workers were busy. Barbers, clerks and delivery employés were active. Hotel, restaurant and laundry workers were busy. Railway conductors, engineers, firemen and trackmen had plenty of work. Freight handlers were busy. Cab-drivers, draymen and teamsters are doing a good trade. Unskilled labour was fairly well employed.

DISTRICT NOTES.

St. Mary's.—The Thames Quarry Company have installed a new stone-crushing plant. The plant will have a capacity of from 800 tons to 1,000 tons of stone per day.

Mitchell.—The factories and foundries are very busy. One foundry has added thirty men to its staff. A large gang of men has secured work with the Hydro-Electric Commission. The contract is let for the new post and customs offices. The building will have a frontage of 50 feet and a depth of 40 feet, with basement.

LONDON, ONT., AND DISTRICT.

Mr. Alex. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions among the workers show a decided improvement over last month, and idle men are scarce. In some lines there is a demand. Already the shortage of female help is being felt, and a number of factories are advertising for this class. In the building lines more permits have been taken out than for the corresponding month last year, and the Canadian Pacific Railway Company has just let the contracts for a $75,000 round house. Two new industries have received charters, and are to commence business immediately: the Holeproof Hosiery Company of Canada, Limited, capitalized at $50,000, an offshoot of a large firm in Milwaukee, Wis., of the same name; they are to manufacture all kinds of knit goods, stockings, underwear, &c.; and W. J. Reid & Son, Automobiles, Limited, capitalized at $100,000. The McClary Company is building another large storehouse. The London Bolt & Hinge Works are exceptionally busy, working two nights a week overtime. The brickyards are taking on help. Several of the yards have about exhausted their supply from last year.

The City this year will clean the pavements by day labour, instead of contract. The exodus to the West from this district continues very heavy. A large number of empty houses continue in evidence.

A new sick benefit society known as The London Sick and Accident Benefit Association has been formed here, including employés from twenty-two of the leading factories. For 50 cents a month members receive $5 per week for fifteen weeks, and $2.50 for a further ten weeks sick benefit; and for 25 cents a month they receive half the above benefits; also a free doctor and medicine.

CONDITION OF PARTICULAR TRADES.

Bricklayers are all at work again. Carpenters are busy. Lathers and plasterers are doing a little. Painters and paperhangers are very busy. Plumbers and builders' labourers are busy. Moulders are extra busy. Iron workers are busy. Electrical workers and linemen are exceptionally busy, and are in demand. Metal polishers, brass workers, stove mounters, woodworkers, carriage and wagon workers and coopers are busy. Printers and pressmen are very busy, overtime being worked. Journeymen tailors are very busy. Garment workers report trade improving. Boot and shoe workers are busy. Bakers and confectioners, in the two large factories here, are very busy. Cigar makers, tanners and curriers and broom-makers report trade good. Railway train crews also report business good. Ballast trains are being sent out both on the Canadian Pacific Railway and Grand Trunk Railway lines. Teamsters are very busy. Unskilled labour had a good month.

ST. THOMAS, ONT., AND DISTRICT.

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Building operations are now very active in this city and district, and skilled and unskilled labour are well employed. During April traffic has been heavy on the railways, and regular men were busy. The fair weather made possible the hauling of heavier trains, and spare men were not so well employed.

In the railway shops, conditions were better than during the preceding month. Michigan Central Railway Company machinists have been granted an increase in pay from 31½ cents to 34½ cents per hour. This increase means more to Canadian workmen employed on the Michigan Central Railway than it does to the American workmen, inasmuch as Canadians were being paid a lower rate than was being paid to American machinists. Standardization, therefore, gives Canadians a greater increase. The schedule is to be retroactive, to date from February 1.

The merchants' delivery system has been inaugurated in this city, and merchants who employ the new system are well satisfied with the first month's results. Four deliveries per day are made to all sections of the city.

A co-operative grocery store has been opened by members of the Co-operative Union of Canada, and those in charge claim that the patronage has been satisfactory to date. Shareholders may hold from one to five shares of $5 each. Five per cent. is guaranteed shareholders on money invested. After deduction of running expenses shareholders and customers will receive a percentage of whatever profits accrue, to be computed on the dollar value of stock held, or amount of purchases by customers. The no-credit system is to be strictly adhered to.

Civic firemen were granted a slight increase in salary, taking effect April 1. This increase affects night, day and call men. A petition has been presented to the City Council asking for an early-closing by-law. The petition is said to be well signed, but no action has been taken by the Council to date.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this district are late in starting spring work, on account of the cold weather. Vegetation will be backward, but this is lookedupon as a preventative against injury by late frosts.

Manufacturing.—Conditions were normal in manufacturing estabishments.

CONDITION OF PARTICULAR TRADES.

The building trades were well employed during April. Railway shop machinists, boilermakers and metal workers were busy. Printers were fairly well employed. Journeymen tailors and garment workers were busy. Trainmen employed on the different railways in the city report a full month. Unskilled labour was better employed during April than during the preceding month, and the prospects are that from now on there will be a steady demand for this class of labour.

CHATHAM, ONT., AND DISTRICT.

Mr. Alex. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general conditions of the labour market for April were far better than in the preceding month. The building trades have been well employed. There was a demand for good mechanics, especially carpenters and woodworking machine hands. The International Harvester Company is advertising for all classes of skilled mechanics and has at the present month 285 on the pay-roll. The Wolverine Brass Company reported the need of skilled men and purposes adding a large number to the present large staff. The carriage and wagon factories were working to their full capacity. The Chaplin Wheel Company was working over time. The Defiance Iron Works reported a large number of orders in excess of the corresponding month of 1910. The probabilities are that wages in all classes of the building trades will be advanced as soon as work is fairly under way. Merchants report the month's trade very good. Wholesale trade was brisk. The City board of works employed a large number of men during the greater part of the month, and all labourers had ample employment. No strikes or lock-outs were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the backward spring, farmers are far behind with

spring work, and find it had to secure sufficient experienced farm hands to carry on their work.

Railway Construction and Employment.—The Chatham, Wallaceburg & Lake Erie Electric Railway Company were surveying for the purpose of extending the line to Blenheim, and had a large number of men employed improving the roadbed.

CONDITION OF PARTICULAR TRADES.

Bricklayers and plasterers showed a slight improvement. Carpenters and joiners, painters and paperhangers were exceedingly busy. Plumbers and builders' labourers were busy. Machinists and engineers, electrical workers, linemen, polishers and brass workers were active. Boilermakers, sheet metal workers, horseshoers were fairly busy. Woodworkers, carriage and wagon makers were very busy. The various branches of the printing trades reported a fairly good month. Journeymen tailors and garment workers had a fair month. Bakers and confectioners and cigar and tobacco workers also had a very fair trade. Barbers, clerks, delivery employés and laundry workers were busy. Street railway employés, cab-drivers, carters and draymen, teamsters and expressmen were well employed. Unskilled labour was well employed.

DISTRICT NOTES.

Unusual activity prevails in the smaller places, especially in the manufacturing line, as well in the building trades. In the town of Tilbury a number of buildings are being erected. In the town of Wallaceburg the building trade is also active, and houses are in great demand.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The past month has been a very busy one for all branches of labour, and factory employés and the building trades have been well employed. There were sixty-nine permits issued during the first three months of the year, valued at $113,625, as compared with thirty permits for the first three months of last year, with a value of $37,975. There was a great demand for houses, and the planing mills and lumber yards were rushed with orders. Boats have started to load and unload at the docks, keeping labour well employed. Wholesale and retail merchants report trade brisk. Eight men of the City police get an increase of $25 a year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A great many of the farmers in this district have joined together and are paying the passage of immigrants, as farm help is hard to get. The crops have wintered well and are looking well. Wheat is in good condition. Tobacco promises to be a heavy crop; this is one of the principal crops among the farmers in this district.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy. Carpenters were in demand and all connected with the building trades were well employed. Metal and engineering trades had a good month. The woodworking and finishing trades were very busy. Printers and pressmen were busy. Journeymen tailors and garment workers were very busy, tailors working overtime. Food and tobacco workers were fully employed. The leather trades were active. Transportation employés had plenty of work. Unskilled labour was well employed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was well employed during April, the demand for, and supply

of workmen being well balanced. The general tone of industry was favourable, a considerable increase in activity having occurred, as compared with the preceding month. The building and iron working trades were particularly active. It is estimated that over half a million dollars will be spent on buildings this summer, exclusive of industrial establishments under contract for the Lake Superior Corporation. Trade, wholesale and retail, was fairly active. There were no changes in rates of wages or hours of labour, and no strikes or lock-outs reported.

The customs receipts for the year ending March 31 showed an increase of $589,698.94 compared with the previous year, the largest pro rata increase for any Canadian city or town.

The park commission was becoming active, and has outlined an extensive programme of improvements. Navigation is now open and the outlook is for a busy year. The municipality will construct a considerable number of sidewalks, sewers and other improvements this year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture and Fishing.—Seasonal activity prevailed.

Lumbering.—Work in the camps had been suspended for the season.

Manufacturing.—Normal activity continued. A 500-ton blast furnace was blown in by the Lake Superior Corporation during the month. This furnace is said to be the largest in Canada, and the only one blown by gas-driven engines. The coke plant had started and the plant for the utilization of the by-product from the coke ovens had also started.

Railway construction.—The extension to the Algoma Central Railway was being rapidly advanced.

CONDITION OF PARTICULAR TRADES.

The building and metal trades were busy, and the other skilled trades were normally active.

DISTRICT NOTES.

Steelton.—A lighting system and a considerable amount of permanent roads will be constructed this summer. The building season promises to be very active. The Lake Superior Corporation's industries situated in this suburb are very active and rapid progress is being made with the various improvements and extensions under way.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of April is always a month of uncertainty in the cities at the head of the Lakes. Navigation usually opens in this month and the lumber and tie camps break up. Many men return to the cities and many in the cities are looking forward to the spring and summer work.

This April there has been a large number of men in the two cities awaiting spring work. Things have been quiet in the cities throughout the winter; many strangers have come in with the spring and have not been able to find employment. There has been a heavy supply of labour, but little demand, except for work offered through the employment agencies on railway construction, but in this connection, many of the men will go out again only as a last resource. Consequently the men remain in the cities and the work on the railway is generally done by newly arrived immigrants.

There is no exceptional activity in any trade. No new industries are starting and City construction work is not yet much in evidence.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in the locality are all busy preparing for spring work after the winter bush operations. The market has been pretty well supplied with potatoes, butter, eggs and poultry from local farmers where they find a good market in these cities. In Fort William there is market accommodation provided for the farmers; in Port Arthur no such accommodation is provided, but the City Council has been in communication

with the farmers of the locality, and steps are being taken to provide a market building this year.

Manufacturing is quiet.

Mining claims are being staked out, but no extensive operations are going forward at present.

Railway construction makes steady employment for unskilled labourers, but the conditions obtaining in regard to sub-contracting cause a serious disinclination for men to go on this work, except as a last chance.

The opening of navigation has relieved the situation somewhat in the unemployed ranks. The freight-handlers are again employed, and several hundred have already been taken on in both cities; the numbers will be increased from now on.

CONDITION OF PARTICULAR TRADES.

The building trades are still very quiet as there is not much work in progress, though building operations are quietly starting. Many small buildings and alterations and additions are going forward, giving employment to a number of men in the aggregate, principally carpenters. There is, however, a large number of men in all branches of the building trades idle. The typographical men's agreement ends with this month; no new agreement has been arrived at. All other trades are quiet.

The printing trades have been quiet during the month; also journeymen tailors. Those employés engaged in food preparation have had a normal month and all miscellaneous workers, such as barbers, clerks, stenographers, delivery employés, laundry workers, etc., have had a fair month, without any rush of work. Owing to the opening of navigation, there has been greater activity among locomotive engineers, firemen and other railway workers. Steamboat men, ship labourers and longshoremen have been busier and will be still busier as the season advances. Four or five steamers wintering in these ports made up their crews on the arrival of their officers and have all taken cargoes of wheat and left port. The first steamer to arrive from the east was the *Arcadia*, arriving in Port Arthur at midnight on the twenty-third instant. The following week the fleet of steamers in port left for the east.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

As compared with the previous month there has been little change in labour conditions. The larger volume of outdoor labour required has been fully met by the steady flow of men into Winnipeg seeking employment. Generally speaking, the demand for skilled labour is being fairly well met and in some cases, notably in the building trades, there appears to be more than enough men to supply the wants of employers. Building activity, however, is increasing and the unemployed at the present time may be absorbed very quickly.

Trade activity has been very marked during the month of April. Bank clearings show an increase of 16.4 per cent., as compared with April of last year. Towards the end of the month, however, there was a sharp advance, due to trade activity caused by the heavy influx of settlers. For the week ending Thursday, April 27, the gain was over forty per cent. Buying on a larger scale at country points where new settlers are taking up locations has caused activity in local wholesale centres. There is a slight feeling of uncertainty in the building trades respecting wages during the ensuing season. During the month negotiations were carried on by the bricklayers, with a view to advancing the scale from 62½ to 67½ cents per hour. Marble workers have also been in negotiation with employers with a view to arriving at some agreement as to wages and hours. Street railway men's representatives have approached the manager of the Winnipeg Electric Railway Company.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding in the immediate vicinity of Winnipeg has been completed in so far as wheat is concerned.

The land was left in excellent condition by the rain and snow of March and early April, followed by extremely fine weather for land cultivation. Reports received at Winnipeg from all parts of the West are to the effect that wheat seeding generally is about completed. In one or two districts, of very limited extent, lack of moisture is reported, but generally speaking, the land is in excellent condition for growing wheat.

Some complaints are being made by farmers because of their inability to get competent help. They hoped to meet with an adequate supply from the immigration, but it is found that most of the men with any knowledge of agriculture are desirous of taking up land for themselves.

Building.—Towards the close of April there was a revival of building activity. During the month, 500 permits were issued, representing 602 buildings, of an estimated value of $1,922,150. During April of a year ago the number of permits issued was 496, representing 610 buildings at an estimated cost of $3,561,750, as compared with 919 permits, covering 1,169 buildings, at a cost of $5,387,950 for the corresponding period of last year. The buildings being erected this year are not individually as large as last year, and there is a greater proportion of dwelling houses. Several large undertakings are in prospect for which permits are likely to be issued very shortly. The above figures do not include the large amount of building going on at the present time in the districts which border upon the limits of the city of Winnipeg. Just over the southern, western and northern limits a very large number of dwellings are being put up and some factories; and on the east side of Winnipeg, in the city of St. Boniface, a very considerable amount of building is being done. To the east of St. Boniface, building is also active, especially in the vicinity of the Grand Trunk Railway shops, where the new town of Transcona has sprung up within the last two years. The Canada Cement Company have procured a site for the erection of a cement grinding plant at this point.

Railway construction.—So far, the weather has been excellent for starting operations on railway grading at different points throughout the west. A well-known employment agent said that within a week there would be a scarcity of men for this class of work. The number of men coming into the city looking for such work was greater than usual, but the demand was also heavier. Wages were practically the same as last year; also the price of board. Teamsters, however, were getting a slightly better rate. This year the maximum has advanced from $35 to $40 per month, which is paid to those men who stay through the whole season. The wages paid to bridge men and some men employed on special gangs is $2 per day, but the general average is $1.75.

Iron Trades.—All the factories are busy, and the good men available are all employed. Orders are coming in from western points very freely, and at present the outlook for a good season's work is very bright.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During the past month there has been a good demand for labour. Activity has prevailed in all trades. With only a few weeks of the building season passed the building permits show a great increase over all previous records. The contract for the new hospital for the insane has been let for $524,000. The building is to be fireproof throughout and mainly of reinforced concrete. Work on the new reinforced concrete fire-hall has already been commenced. Work has also been commenced on the reinforced concrete work of the Canadian Northern Railway Company's hotel. The hotel, when completed, will be seven stories high and will cost $450,000. The Canadian Pacific Railway Comapny has plans for a new passenger station for Brandon, and work will commence immediately. Wholesale and retail houses report exceptional activity in almost all lines. The labour market was quiet.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Sixty per cent. of seeding has been done, and wheat was showing out of ground in some cases.

Manufacturing.—All sash and door factories were working full time.

CONDITION OF PARTICULAR TRADES.

The majority of bricklayers and masons were working, and prospects are very good. Carpenters and joiners, lathers and plasterers, and painters and decorators were very busy. Plumbers and steam fitters were dull. Builders' labourers, iron moulders, machinists and electrical workers were busy. The printing and allied trades were busy, as well as journeymen tailors. Cigar makers were active. Railway employés, the transport trades and unskilled labour were busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Throughout the past month exceptional activity has existed in all branches of labour, especially in the building trades, which have taken advantage of the weather conditions that have been so favourable to building construction. The month of April from the labour standpoint was considerably in excess of the previous month and the corresponding period of last year, as far as the prevailing conditions were concerned. Though there is an abundance of work, the supply apparently meets all demands, owing to the large influx of immigrants arriving in the city. Both wholesale and retail trade are reported excellent. Tenders are being called for many new warehouses, to be built as soon as possible, which shows that the present number of wholesale houses is inadequate to cope with the demands of trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding has been general throughout this district for the past two weeks, ideal weather prevailing.

Railway construction.—Activity seems now to be commencing in earnest, and the amount of construction going on in the districts surrounding Regina is assuming large proportions. Two gangs have already arrived in the city to commence construction work on the new lines, and more are expected in the very near future. There is apparently ample labour available.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had a very active month; if there was an idle one, it was on account of a shortage of material. Carpenters and joiners experienced a busy month; also lathers and plasterers. Painters and paperhangers were very active, with first-class men in demand. Plumbers were fairly well employed, as were stone cutters. Builders' labourers were active and in demand. Iron workers, machinists, electrical workers, blacksmiths and bicycle workers were well employed. All branches of the printing trade experienced a busy month, the supply being equal to the demand. The journeymen tailors and garment workers were very active. Bakers and confectioners were active and in demand, Butchers and meat-cutters were busy. Barbers were active; also clerks and stenographers, for which there was much demand. Delivery employés, hotel, restaurant and laundry workers all report having an active month. Freight handlers were busy; also cab-drivers, hackmen and draymen. Teamsters were in demand, also unskilled labour.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There has been a considerable improvement in the labour market during April. Painters, plumbers, labourers and many others are now fairly well employed. There is still a surplus, however, of stonecutters, stone masons, bricklayers and carpenters. Excavations are being made for a considerable number of buildings;

and it is expected shortly that the building trades will be employed to full capacity. The contract for City's market has been let, at $41,400, and for a new fire-hall, at $39,925. The following is a list of buildings which are to be erected this year:—

Three school buildings	$ 875,000
Court House	200,000
C.P.R. hotel	200,000
King George hotel	180,000
Alexandra hotel	170,000
Col. Walker block	250,000
P. Burns block	200,000
C. P. Irrigation	100,000
City power station	100,000
Molson's bank	150,000
W. McLean block	150,000
Beveridge block	120,000
Knox church	90,000
Bevenish apartment block	130,000

In addition, there are in prospect about twenty apartment blocks, the particulars of which are not obtainable. The inspector says that this will be by far the busiest year in building that Calgary has ever had.

There were 329 building permits issued during the month, aggregating $1,127,256; as against 189 permits, $603,930, for April, 1910. Customs receipts for April, 1911, were $147,966, as compared with $113,147.15 for the month of April, 1910. April building returns were 329 permits, involving the sum of $1,127,256, as against $603,930 for April, 1910. Bank clearings were $14,449,866, as against $14,075,142 for April, 1910.

The Sandstone Brick & Sewer Pipe Company, Limited, operating 20 miles south of Calgary, with head office in Calgary, is expected to start manufacturing July 1, and to turn out 500,000 brick per week. The consulting engineer of the Steger-Ferrier Silica Brick Company is in the city to select a site for a factory building, to be ready to operate by July 1; the capacity will be 40,000 brick per day.

Wholesalers and retailers report an improvement in trade over the previous month, and the corresponding period of 1910. Moulders have received an increase of wages from 35 cents to 40 cents. The stone-cutters received an increase of wages from 62½ to 65 cents per hour on April 1. The plumbers and steamfitters have signed a two-year agreeement for an increase in their wages from 55 cents to 60 cents per hour; to be paid as follows: viz.: 57½ cents per hour on and from May 1, 1911, to May 1, 1912; and 60 cents from May 1, 1912, to May 1, 1913. The City Council stated that it will pay its labourers 28 cents, instead of 27½ cents, as previously stated.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers, steam fitters, stone-cutters and builders' labourers had a quiet month. Plumbers, painters and gas fitters were fairly well employed. Moulders, iron workers, machinists, steam engineers, electrical workers had a fair month. Linemen were very busy. Blacksmiths, boilermakers, sheet metal workers, horseshoers and jewellers were well employed. Woodworkers, upholsterers, carriage makers were fairly well employed. Car makers, pattern makers, coopers were well employed. Printers, pressmen and bookbinders, and photo-engravers had a good month. Journeymen tailors were fairly well employed. Bakers, confectioners, butchers, meat-cutters and cigar makers were active. Leather trades were fairly well employed. Barbers were active. Clerks, stenographers, delivery employés, hotel, restaurant and theatre employés had a good month. Laundry workers were active. Transport employés were well employed. In unskilled labour there was still a surplus.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The demand for labour has improved somewhat over the previous month, but owing to a large influx from outside points the supply was greater than the demand, especially unskilled labour. The opportunities for employment will increase as spring advances, as railway contractors have not yet commenced operations to any great extent. On the twenty-fourth instant money by-laws

amounting to $700,000 were passed The money is to be expended on various civic works. The volume of business done during the month of March is shown by the following returns.

	March, 1910	March, 1911	Increase
Customs Returns..	$ 23,990	$ 58,546	144%
Buliding Permits..	266,585	276,825	4%
Bank Clearings. ..	4,766,375	8,804,702	85%
Post Office (Stamps Only).....	6,640	6,640	28%
Street Railway—			
Passengers carried	257,607	402,817	56%
Revenue.....	11,356	16,843	48½%
Homestead Entries	302	440	46%

An increase of $833.85 is reported in Customs returns for March for the Port of Nelson over those for the same period last year.

Transportation companies reported business very active. Wholesale trade was active, and retailers reported a good month. There were no changes in rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers made favourable progress with their spring seeding, and a much larger acreage is being planted than in previous years. There was a steady demand for farm land and a large number of applicants for homesteads.

CONDITION OF PARTICULAR TRADES.

There was a fair demand for bricklayers and masons during the month. Carpenters and joiners were active. Lathers and plasterers were active during the latter part of the month. Painters and plumbers were busy. Stone-cutters and builders' labourers were quiet. The metal and engineering trades had a good month. The printing and allied trades were active. Journeymen tailors and garment workers were busy. Bakers, butchers and meat-cutters were active. Cigar makers were busy. The miscellaneous trades were active. There was a surplus of unskilled labour.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour has been fairly well employed. The demand is in excess of what it was during the month of March. Compared with April, 1910, it is about the same, with indications of an increase in all lines. The brickyards are going to be very busy; an order from the Lethbridge Collieries for 1,250,000 bricks has been placed with the Lethbridge Brick Company, brick to be shipped at the rate of 12,000 per day. This, along with city orders, will keep the yards busy. There are about fifty cottages to go up at the collieries. The permits for buildings in the city of Lethbridge were, for March, $61,750, and for April, up to the twenty-fifth, $81,225. Work on the railways is opening up at present; about 160 men are wanted to be sent to various points. With the exception of two small coal mines, all other mines are idle in this district, owing to a strike of the miners. There is no exceptional activity in any line, unless in farming, which is very brisk; $40 to $45 is being offered to farm hands. Good men are scarce. There are numbers of men employed with steam tractions. The increase in wages in the buildings is being paid. Teamsters are getting better wages this spring, $75 per month being the avage.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy, and the proper help is very scarce; $40 to $45 per month is being offered to farm hands. The quantity of farming machinery being sold is enormous, compared with other seasons. This is a remarkably fine spring for crops, and everybody is busy in the farming line.

Mining.—Coal mining is almost at a standstill for the present, owing to the strike of miners.

Railway construction.—Several parties of railway surveyors are at work in this

district. There is a demand for surface men on the railways.

CONDITION OF PARTICULAR TRADES.

The building trades are not as yet very busy. The most of trades are calling for an increase of wages, which is being paid; a great number of the men going to other centres to find work. All the small towns are going to be busy. Bricklayers have been very slack during the month. Carpenters and joiners were fairly busy, but a number are still idle. Lathers and plasterers were rather dull. Painters and paperhangers are getting busy. Plumbers were very busy, and gas and steam fitters fairly busy. Stonecutters and builders' labourers have been slack. Printers and pressmen were very busy, as were bakers and confectioners. Clerks, stenographers and hotel employés were well employed, with laundry workers slack. Teamsters and expressmen were well employed. There is a good demand for ordinary labour, the City of Lethbridge having a large amount of work in hand.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market throughout East Kootenay during April was very quiet, the strike of the coal miners commencing April 1 having paralyzed industry. West Kootenay, however, is enjoying normal conditions, though should the coal miners and their employers fail to arrange a new working agreement within next three weeks some of the smelters would run short of coke. Outside of this, the general outlook for a prosperous summer within Kootenay district has never been brighter.

The new experimental zinc smelter which is being erected by A. G. French, at Nelson, B.C., is nearing completion. It will have a capacity of from four to five tons per day. Should the method prove successful, it will be of very material advantage to the mining industry of this district.

A new discovery of high-grade free-milling gold ore has been recently made on the Nugget mine, near Salmo, B.C. This new ore-shoot is in the fourth level of the main vein and is about five feet in width. The management of this property purpose to erect a new twenty-stamp mill and cyanide plant, during the summer.

A promising gold prospect on Eagle creek, near Nelson, B.C., known as Shoestring, has been recently bonded by a syndicate of Spokane capitalists, who are to start development work immediately.

The first steel steamer of the Canadian Pacific Railway interior service was successfully launched at Nakusp, B.C., on the twenty-fourth instant, and christened *Bonnington.* This new steamer is the largest and most commodious on the British Columbia Lakes up to the present date, and has twenty water-tight compartments reported as making the vessel unsinkable. The local Canadian Pacific Railway Company shipyards at Nelson, B.C., have a busy programme arranged for the spring and summer. In addition to routine repair and alteration work, the steamer *Kokanee* is now on the ways for a general overhauling and repairs to her hull, which it is reported will occupy about two months; also a new steel barge for Kootenay lake service is to be built; and following that later on, the sister ship to the *Bonnington* is to be built to accommodate the heavy tourist and general passenger travel, which is expected on the lake, following the opening of the Canadian Pacific Railway Company's hotel, at Balfour, B.C. The Great Northern Railway Company is reported to have sold the Kaslo & Slocan Railway to citizens of Kaslo, B.C., and the Government of British Columbia has come to the aid of the new railway operators, therefore the railway will be in operation again this summer, much to the relief of a section of the Slocan mining district.

The Doukhobor society or settlement is reported to have set out 40,000 fruit trees this spring, near Castlegar, on the south side of the Columbia river.

An increase of $833.85 is reported in customs returns for March, for the port of Nelson, over those for the same period last year.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent reported as follows:—

GENERAL CONDITION OF LABOUR.

Never in the history of New Westminster has work been so forward at this season of the year as at present. This is due largely to the activity of the present civic administration. The board of works is carrying on a vast amount of work, including the opening, cleaning and grading of streets, laying of sidewalks and doing general repair work. It is hiring all the men and teams they can secure to help the work. The new 25-inch main from Coquitlam lake is being rapidly laid, one gang of men working at Westminster Junction, and another near the Fraser mills. The Kootenay Jam Company has purchased in Brownsville a factory site containing five full lots, on which it intends to erect a factory, to cost $50,000. This factory site is situate on the south bank of the Fraser river, near the New Westminster city limits. It is expected that part of the factory will be ready by June 1, so as to be able to handle this season's crop. When completed the premises will be 264 x 132 feet. A $200,000 plant for the manufacture of nuts, bolts, fish plates and other railway material will shortly be erected at Port Mann. It is stated that at the outset the plant will employ 200 men. At the Land Registry office for the past month 1,325 applications were made, and the fees amounted to $8,447.20. The corresponding month of last year showed applications numbering 862, and fees paid $4,935.20. By next July it is expected that the Western Canada Power Company, at Stone Lake, will be ready to deliver 25,000 horse power in New Westminster and the surrounding districts. The Company employs over 510 men, and the wages amount to over $40,000 per month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the exceptionally fine weather the farmers have commenced seeding operations. The season is about two weeks in advance of last year, but cannot be said to be early. In spite of the lateness of the spring, however, indications for a bumper hay crop are very favourable. The fine weather has been very beneficial to the potato crop, in which this year has an advantage over last year, when the late arrival of spring almost ruined that part of the farming produce.

Fishing.—Canners are expecting a comparatively poor fishing season, this being an off year, and as a result only a few of the canneries on the river are being got ready for operations. The British Columbia Packers' Association will operate only five out of fifteen canneries.

Lumbering.—The past month has been an unusually active one in the lumbering trade. The Canadian Western Lumber Company shipped no less than 12,500,000 feet, or 600 cars, of lumber; 200 of these car-loads were for the Grand Trunk Pacific Railway construction work, west of Edmonton. In one day alone, thirty-six car-loads of lumber were shipped from the mill, while on April 11, the cut for the day totalled 516,000 feet.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters, lathers and plasterers, plumbers and steamfitters were active. Builders' labourers were fairly busy. Iron moulders were quiet. Electrical workers, linemen, blacksmiths and sheet metal workers were active. Shipwrights and caulkers were quiet. Horseshoers, upholsterers, varnishers and electric car builders were active. Printers, pressmen and bookbinders were active. Journeymen tailors, bakers, butchers and cigar makers were busy, with barbers, clerks, stenographers and delivery employés fairly active. Laundry workers were exceptionally busy. Railway employés were active, with steamboat employés fairly busy. Street railway men, draymen, teamsters and unskilled labour were active.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The outlook in the building trades during April was promising, and a season of exceptional activity in the construction of industrial plants, apartment houses, residential buildings and in civic improvements is in prospect. The supply of labour, owing to the constant influx of workingmen, is becoming in excess of the demand. The value of building permits issued in March was $2,147,789, the highest of any city in the Dominion. Property to a very considerable amount changed hands during the month, in many cases high prices being paid by the purchasers.

Among the buildings to be erected are two on Main street, one a large business block at the corner of Main street and Seventh avenue, and the other a seven-story concrete building at the corner of Main street and Broadway. The printing firm of Evans & Hastings will erect a three-story building on Seymour street, the cost of which will be $45,000. A plan for the erection of 100 dwellings of the bungalow style, ranging in cost from $1,400 to $2,800 has been outlined by Messrs. Springer Brothers. The object is to reduce the high rate of rent which prevails in the city. The erection of a $3,000,000 plant by the Western Canada Power Company, at Stave river, 35 miles northwest of Vancouver, has been started, giving employment to over 500 men. A trainload of electric generating machinery had arrived from the east for installation.

The City paid $45,000 for 12½ acres to be used a a site for an isolation hospital. It is the intention of the Park Commissioners to erect a band stand in Stanley Park to cost $14,000.

An addition to the hotel Metropole, at a cost of $18,000 will be built, and the Sailors and Loggers' Institute intend erecting a new building, the cost of which will be $100,000.

CONDITION OF PARTICULAR TRADES.

The building, metal, woodworking, printing and clothing trades were fairly active. The leather trade was fair. Dullness prevailed throughout the miscellaneous trades, especially among hotel and restaurant employés, many of whom in the former class were out of work. Conditions among railway employés were reported good, while among the unskilled classes extreme quietness prevailed.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During April the demand for labour has been greater than during March, and it may be said that at no time in the history of this city has labour been so extensively employed as at the present time. But though the increase in the amount of work will be considerable, it is expected that the supply of labour will equal if not exceed the demand, as there is a large increase in the number of newcomers arriving in British Columbia this spring over any previous year. The Provincial Government will shortly call for tenders for a large addition to Government buildings in this city, at an estimated cost of $1,000,000. The British Columbia Electric Railway Company is about to commence construction on the extension of its line through the Saanich Peninsula for a distance of about 12 miles, terminating at a saltwater port known as Deep Bay. The new line will pass through one of the finest farming districts on Vancouver Island, and will prove a great convenience to the farming community, as well as bringing considerable business to Victoria merchants.

Local bank clearings for the first three months of the year showed a gain of no less than forty-five per cent. over the same period last year:—

January, 1911	$ 9,013,716
February, 1911	9,078,881
March, 1911	12,358,220
Total	$ 30,450,817

The total receipts at the Victoria customs house for the departmental year ending March 31, 1911, showed an increase of a million and a quarter of dollars over the previous year.

There was a great increase in the amount of Chinese immigration during

the past year. The number of new arrivals was over three times the total of the previous year, over 2,800 new men who paid the head tax of $500 being landed here during the year just closed.

The building permits issued during March amounted to $279,945, compared with $244,760 for the same month last year.

Wholesale and retail trade is reported very good, both being above the average. In the machinists' strike, which was declared last June, most of the men who are in the city have returned to work under the old conditions.

After negotiating for several years, the Songhee Indians have accepted the terms of the Provincial Government, and on April 14 relinquished all their rights to the Reserve occupied by them for the past fifty years, on the following terms: Forty-one heads of families received $10,000 each, total, $410,000; for improvements, (approximate) $24,000; total $434,000. In addition, the tribe received, free of all cost, a new reserve situated on Esquimault harbour, about four miles from the city, comprising 164 acres. The head of each family has promised to erect a house on the new reserve, at a cost of at least $1,000. The old reserve, which comprised 112 acres, situated in the heart of the city of Victoria, will be subdivided into lots and sold, and is expected to realize a large amount.

The British Columbia Government has increased the price of Crown lands from $2.50 an acre for second-class lands to $5, and from $5 an acre for first-class lands to $10.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy seeding, for which the weather conditions have been favourable, although in some quarters, owing to the exceptionally dry spring, rain is needed.

Sealing.—The four or five sealing vessels sailing from this port are due from the ocean sealing grounds. After discharging their seal skins, they will proceed to the North Pacific in search of sea otter.

Lumbering.—All the lumber mills in this vicinity are busy, with orders for some months ahead.

Manufacturing.—The various manufactories in this city are working full time, and have all the work they can handle.

Railway construction.—Work on the Island Division of the Canadian Northern Railway is proceeding, and larger staffs of men are being put on weekly.

Timber and coal licenses.—The Department of Lands reports a total revenue of $403,481 for March.

CONDITION OF PARTICULAR TRADES.

In the building trades all branches report work plentiful at present, with prospects good for the summer. The metal, engineering and shipbuilding trades report work as about the average, with a few idle men. Woodworkers and upholsterers are fully employed, while pattern makers report work as only fair. Business in the several branches of the printing trades is good, with no idle men. Tailors are busy, and garment workers are working to their full capacity. Cigar makers report work as somewhat quiet, with a few idle men. Barbers, waiters and laundry workers are fully employed. There are a large number of labourers employed at present on city work. The City is calling for tenders for 56 miles of asphalt street-pavements, at a cost of over $1,000,000.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The conditions of the labour market in this district have not been as good in some branches of labour, there having been an exceptionally large number of idle men for the time of year; this applies principally to unskilled labour. Wholesale and retail business has been good, with evidence of increasing activity. There have been no changes in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy.

Fishing.—Outside of the local trade there has been no activity among fishermen.

Lumbering.—The saw mills of the district are running steadily. The logging camps are in active operation.

Mining.—There has been a noticeable slackness in the coal trade. The mines of the district, although working steadily, are letting men off, stopping double shifts in some places, and dropping some men in others, it being a slight reaction after the rush of the winter season.

Railway construction is being pushed as fast as practicable on the extension to Alberni and on other lines.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons are active. Carpenters and joiners are very active; the amount of new building in course of erection and proposed is in excess of that known for years in this city and district. Painters and paperhangers are very active. Plumbers are also very active. Builders' labourers have been active during the month. Printers and cigar makers report work as also fair. Teamsters and expressmen have been busy. While there has been a large number of men in this city, there has been a large number of men employed on sewer work and cement sidewalks during the month, as well as on other outside work.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—STATEMENT OF PROCEEDINGS UNDER ACT FOR YEAR ENDING MARCH 31, 1911; ALSO SUMMARY STATEMENT OF PROCEEDINGS, MARCH 1907—MARCH, 1911.

THE Industrial Disputes Investigation Act, 1907, received the Royal assent on March 22, 1907, and had, therefore, been in operation four years at the close of the month of March last.

A table is presented in the present issue of the *Labour Gazette*, showing the proceedings under the Act during the year ending March 31, 1911, as follows: (1) the dates on which the various applications for Boards of Conciliation and Investigation were received; (2) the names of the parties concerned; (3) the name of the party making the application; (4) the locality affected; (5) the number of persons affected; (6) the nature of the dispute; (7) the names of the members of Boards in cases where Boards have been established; (8) the dates of the establishment of Boards; (9) the dates of the receipt of Board's report; and (10) the result of the reference under the Act.

In all twenty-four applications under the Act were received during the year ending March 31, 1911, as a result of which eighteen Boards were established. In the six remaining cases the matters in dispute were adjusted by mutual agreement whilst communications were passing with the Department in respect of the establishment of a Board. In addition to the twenty-four cases above mentioned, proceedings under the Act during the past year occurred also in connection with seven applications which were received prior to April 1, 1910. Correspondence was also exchanged between the Department and persons concerned in various disputes in which, however, the circumstances did not call for any formal procedure under the Act.

Industries Represented.

The disputes dealt with under the Act during the year were distributed among the different industries as follows, namely:—

Coal mining	4
Metal mining	1
*Railways	18
Street railways	3
Longshoremen	1
Shipliners	1
Deckhands	1
Commercial telegraphers	2
	31

*Among the classes of labour concerned in these eighteen disputes were the following: conductors, baggagemen, brakemen, train dispatchers, maintenance-of-way employés, station employés, yardmen, firemen, hostlers, telegraphers, blacksmiths, blacksmiths' helpers, machinists, machinists' helpers, moulders, steamfitters, carmen, boilermakers, boilermakers' helpers, and brassworkers.

The number of employés concerned in the thirty-one applications received under the Act during the year was 25,630.

In connection with each of the thirty-one disputes above mentioned sworn statements were furnished to the Minister of Labour to prove that, failing an adjustment of the differences or a reference of the same under the Industrial Disputes Investigation Act, a strike or lockout, as the case might be, would be declared.

During the fiscal year ending March 31, 1911, there were only four cases in which strikes were not either averted or ended. One of these disputes was in the metal mining industry and grew out of a demand on the part of the employés for closed shop conditions; two were in the railway industry, the disputes in each of these cases arising out of the employés' demand for increased wages and improved conditions of employment; the other dispute occurred in the street railway industry and was entirely concerned with the question of alleged discrimination by the Company against officials of the employés Union. In the case of a dispute btween the North Atlantic Collieries Company, Limited, of Port Morien, N.S., and its employés operations in the Company's mines had been discontinued at the time of the investigation, the Company itself having gone into liquidation. In each of the remaining disputes referred under the Act the investigation before the Board resulted either in a direct agreement between the parties, or in affecting such an improvement in their relations that no cessation of work occurred. It may be said also that in cases where members of Boards disagreed in their findings, or where one of the parties stood apart from the inquiry as far as voluntary action was concerned, inquiry has none the less resulted in a clearer understanding of conditions on the one side or the other, and a change of attitude which has been effective in averting the threatened trouble.

It will be noticed from the table of proceedings for the year ending March 31, 1911, that only three strikes are mentioned, the fourth having occurred in connection with an application which had been received during the previous fiscal year, and has not, therefore, been included in the table above mentioned.

Notable Successes under Act.

In a number of the disputes referred for investigation under the Act during the year interests of very considerable importance were affected, not only to the employers and employés directly concerned but to the public at large. One of the first cases dealt with under the Act during the year was a dispute between the Shipping Companies of Montreal and the Syndicated Longshoremen of that Port to the number of 1,800. In this case the outcome of the Board's efforts was not only a settlement of the points in dispute relative to wages and conditions of employment but also a signed agreement between the parties concerned effective for a period of five years, in connection with which a Permanent Board of Conciliation was established for the adjustment of any differences which might subsequently arise. A sum of $2,000 was also deposited with the Royal Trust Company by the Shipping Companies of Montreal on the one hand and the Syndicated Longshoremen of Montreal on the other hand as a guarantee for the observance of the agreement. The Board of Conciliation was subsequently constituted as follows: Mr. Farquhar Robertson, ex-president of the Montreal Board of Trade, Chairman; Mr. John H. Lauer, Secretary and Treasurer of the Montreal Builders' Exchange, representing the Shipping Companies; and Mr. G. R. Brunet, of the Montreal Typographical Union, representing the Syndicated Longshoremen of Montreal. This agreement is one which promises relief from the unsatisfactory conditions which have long existed between the Shipping Companies and the longshoremen at Montreal.

In a letter addressed to the Department of Labour by Mr. Geo. S. Montgomery, General Manager of the Alberta Coal Mining Company, in relation to the settlement of a dispute between that Company and its miners at Cardiff, Alta., which was achieved through the efforts of a Board of Conciliation and Investigation. Mr. Montgomery said "We are pleased to be able to refer differences to such a Board as is established under the law, for without this recourse there would have been either a strike or a lockout and

the mine would have been idle during the busy portion of the year."

The dispute between the Canadian Pacific Railway Company and its conductors, baggagemen, brakemen and yardmen to the number of 4,360 employés, during the summer of 1910. The award of the Board of Conciliation and Investigation which inquired into the matters in dispute was accepted by the Company but was not concurred in by the Committee of employés concerned. As a result, negotiations were resumed between the parties in Montreal which resulted in the signing, on July 21, of an agreement which was understood to be in a large measure based upon the terms of settlement proposed by the Board, and which corresponded approximately as to rates of wages and rules, to the "standard" rates and rules adopted on a number of the principal railway systems in the Eastern States.

An agreement was subsequently signed between the Toronto, Hamilton and Buffalo Railway Company and its employés in train and yard service to the number of 101, which was along substantially similar lines to the foregoing.

The dispute between the Toronto Railway Company and its employés was one which threatened an interruption of the Street Railway service of Toronto in August last, at a time when the city is usually filled with visitors to the annual Industrial Exhibition. In this case the points at issue relative to the terms of a new working agreement were some of them matters of extreme difficulty, and it was the opinion of the Board that the final acceptance of the award was due to the large concessions made in the interest of the party by the officers of the Railway Company on the one side and by the employés on the other.

In a letter under date of August 22, the Mayor of Toronto expressed to His Honour Judge Barron, Chairman of the Board, the thanks of the people of Toronto for the settlement of this dispute. Mayor Geary's letter in question was in the following terms:

"His Honour Judge Barron, Stratford,

"Dear Judge Barron,—The People of the City of Toronto were so vitally interested in the question of strike or no strike on the Toronto Railway Company's system that the news of the settlement of the difficulty in that regard was more than gratifying to the citizens and the municipal corporation. May I express my warm appreciation of your splendid efforts in these difficult negotiations, and may I compliment you on the success which attended those efforts. I am sure that I only voice the feelings of all the citizens when I say that we feel greatly indebted to you and your colleagues on the Conciliation Board. You have rendered services which have destroyed the possibility of a state of affairs arising which would threaten the prosperity of the city and the comfort of the citizens, and at this particular moment the success of the Exhibition.

"Again with thanks and every assurance of appreciation, I am, dear sir, yours very truly,

G. R. GEARY,
Mayor."

Three other important references under the Act related to the demand for increased rates of pay and improved conditions of employment on the part of the Maintenance-of-Way employés of the Canadian Pacific Railway System to the number of 4000, the Maintenance-of-Way employés of the Canadian Northern Railway System to the number of 1800, and the Maintenance-of-Way Employés of the Grand Trunk Pacific Railway System to the number of 1000. In each of these cases the report of the Board was accompanied by a minority report, signed by the member appointed on behalf of the Company concerned. In the case of the Canadian Pacific Railway Company the Board findings were accepted by both the Company and its employés and an agreement concluded accordingly. In the case of the Canadian Northern Railway Company an agreement was reached based on the Board's award. It was understood that negotiations for an adjustment of the dispute between the Grand Trunk Pacific Railway Company and its Maintenance-of-Way employés were in progress in Winnipeg at the end of the fiscal year.

A dispute in which interests were

concerned of very great importance to the whole Dominion was that which occurred during the past summer between the Canadian Pacific Railway Company and its commercial telegraphers to the number of 600, of whom 500 were males and 100 females. Through the efforts of the Board a satisfactory settlement was concluded on July 23 of all points at issue, which was embodied in a schedule of rules and rates of pay, and signed by representatives of the Company and of the telegraphers respectively. The agreement in question was made effective for a period of one year, and subject to cancellation thereafter on thirty days' notice from either party.

On March 3, 1911, an application for a Board was received from the employés of the Great North Western Telegraph Company of Canada, arising out of a dispute concerning wages and conditions of employment. The number of employés concerned in this matter was 200 directly and 1100 indirectly. A Board was established by the Minister of Labour on March 30, proceedings in connection with which have not as yet been concluded.

Four Strikes during Year.

The cases in which strikes were not either averted or ended were as follows:—

1. A dispute between the British Columbia Copper Company, of Greenwood, B.C., and its employés, to the number of about 350. The cessation of work in this instance was caused by the unwillingness of the employés concerned to accept the findings of the Board of Conciliation and Investigation to which the matters in dispute between them and the Company had been referred for adjustment in the month of January preceding. The dispute in question related to the demand of the employés, members of the Greenwood Miners' Union, Western Federation of Miners, that none but members of that union should be employed by the Company. A strike was declared on April 19 and continued until May 11. It was understood that the strike in question was not sanctioned by the headquarters of the Federation of Miners; also that the employés concerned returned to work on the terms of the recommendation by the Board in its report.

2. A dispute between the Canadian Northern Railway and certain of its carmen to the number of about 500. In this case the employés concerned were unwilling to accept the terms proposed by the Board of Conciliation and Investtigation for a settlement of the dispute. A strike was accordingly declared on July 7, which continued until September 27 following. On this date the strike was called off and the men returned to work on the terms of the Board's award.

3. A dispute between the Grand Trunk Railway Company and its employés in train and yard service to the number of 3,017. The terms of the report of the Board of Conciliation and Investigation were communicated to the parties concerned on June 22, 1910; also the terms of the minority report by Mr. Wallace Nesbitt, K.C. Following the receipt of the foregoing, negotiations for a settlement were renewed between the Company and the employés' Committee in Montreal. As the result of failure to arrive at a mutually satisfactory conclusion a strike of the employés in train and yard service was declared on July 18, which continued until August 2 following, when a settlement was reached as the result of Government intervention by which the employés concerned resumed work on that date.

4. A dispute between the Winnipeg Electric Railway Company and its motormen and conductors to the number of 603, which grow out of the dismissal of four employés for alleged breach of the Company's rules. The employés maintained, however, that the Company had shown discrimination in these dismissals against the employés' Union. In its report the Board found that the employés had broken the Company's rules and that the latter was justified in their dismissal. The minority report by Mr. L. L. Peltier recommended that the men should withdraw the charge of discrimination and that the Company should re-instate the dismissed employés. The employés ceased work on December

18 and remained out until December 31, when the strike was terminated through the intervention of a committee of citizens, a considerable number of the strikers being re-employed by the Company. It was understood that the Company maintained its unwillingness to re-employ the individuals who had previously been dismissed from its service.

At the close of the period a report had not as yet been received in the case of the dispute between the Great NorthWestern Telegraph Company of Canada and its commercial telegraphers, to the number of 200 directly, and 1,100 indirectly.

Four Years' Proceedings Under Act.

During the four years which elapsed between the enactment, in March 1907, of the Industrial Disputes Investigation Act, and the end of March, 1911, one hundred and six applications were received for the establishment of Boards of Conciliation and Investigation, as a result of which ninety-four Boards were established. In the twelve remaining cases the matters in dispute were adjusted by mutual agreement whilst communications were passing with the Department in respect of the establishment of a Board. In eighty-three, out of the ninety-four cases referred for investigation, the inquiry resulted either in a direct agreement between the parties, or in such an improvement of relations as led to the settlement of the dispute.

In the case of a dispute between the North Atlantic Collieries Company, Limited, of Port Morien, N.S., and its employés, operations in the Company's mines had been discontinued at the time of the investigation, the Company itself having gone into liquidation.

There have been in all ten instances during the four years in which strikes have occurred after the reference of disputes under the terms of the Act. Three of these ten disputes concerned the railway industry, six related to the mining industry, and the other one related to the street railway industry. In six cases these disputes had to do in whole or in part with the question of alleged discrimination against or the recognition of certain labour unions.

The ten cases in question are as follows: (1) Cumberland Railway & Coal Company of Springhill, N.S., and its employés; (2) Canadian Pacific Railway Company and its mechanical employés; (3) Nicola Valley Coal & Coke Company of Middlesboro, B.C., and its employés; (4) British Columbia Copper Company of Greenwood, B.C., and its employés; (5) Dominion Coal Company of Glace Bay, C.B., and its employés; (6) Cumberland Railway & Coal Company of Springhill, N.S., and its employés; (7) British Columbia Copper Company of Greenwood, B.C., and its employés; (8) Canadian Northern Railway Company and its carmen and steamfitters; (9) Grand Trunk Railway Company and its employés in train and yard service; and (10) Winnipeg Electric Railway Company and its employés. In No. 1, the strike lasted from August 1, 1907, to August 31, 1907, when the employés returned to work on the conditions recommended in the report of the Board. In No. 2, the strike lasted from August 5, 1908, to October 5, 1908, when the employés returned to work on the conditions recommended in the report of the Board. In No. 3, the employés went on strike on April 28, during the process of establishing a Board, and returned to work early in June, on lines recommended by the Board. In No. 4, the strike lasted from June 28 to July 24; in this case several reports were put in by the members of the Board, and the settlement was on the lines substantially of the Chairman's recommendations. In No. 5, the strike lasted from July 6, 1909, to April 28, 1910, when the employés returned to work on the lines recommended in the report of the Board, with such modifications as had been made in the same by an agreement subsequently effected. In No. 6, the strike was declared on August 9, 1909, and still continued at the time of writing; it should be noted that the parties concerned in Nos. 1 and 6 are identical. In No. 7, the strike lasted from April 19 to May 11, when the employés returned to work on the conditions recommended in

the report of the Board. Nos. 4 and 7 are also identical. In No. 8, the strike lasted from July 7 to September 27, when the employés returned to work on the conditions recommended in the report of the Board. In No. 9, the strike lasted from July 18 to August 2, when a settlement was effected through Government intervention. In No. 10, the strike lasted from December 16 to December 31, when the strike was terminated through the efforts of a committee of citizens.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

TABLE SHOWING PROCEEDINGS UNDER ACT FROM MARCH 31, 1910, TO MARCH 31, 1911.

	Applications concerning disputes in mines and public utilities. 31[1]								Total applications under Act. 31
	Concerning mines and smelters. 5		Concerning transportation and communication. 26						31
	Coal mines	Metalliferous mines	Railways	Street railways	Longshore men	Shipbuilders	Deckhands	Commercial Telegraphers	
[2] and [3] Strikes averted or ended	3	1	16	2	1	1	1	2	27
Strikes not averted or ended...	0	0	2	1	0	0	0	0	3

[1]The proceedings under the Act during this year included seven cases in which certain proceedings had taken place also during the preceding year, *viz.*: (1) A dispute between the Alberta Coal Mining Company, of Cardiff, Alta., and employés; (2) a dispute between the Toronto, Hamilton & Buffalo Railway Company and conductors, baggagemen, brakemen and yardmen; (3) a dispute between the Canadian Pacific Railway Company and conductors, baggagemen, brakemen and yardmen; (4) a dispute between the Grand Trunk Railway Company and conductors, baggagemen, brakemen and yardmen; (5) a dispute between various Steamship Companies navigating to Montreal and the Syndicated Longshoremen of the Port of Montreal; (6) a dispute between the Grand Trunk Pacific Railway Company and telegraphers and station employés: and (7) a dispute between the Dominion Atlantic Railway Company and employés.

[2]In the case of a dispute between the North Atlantic Collieries Company, Limited, of Port Morien, N.S., and its employés, operations in the Company's mines had been discontinued at the time of the investigation, the Company itself having gone into liquidation.

[3]At the close of the financial year results were still pending in connection with the application made on behalf of the commercial telegraphers employed by the Great North Western Telegraph Company of Canada.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907—PROCEEDINGS, 1910-1911.

Statement of Applications for Boards of Conciliation and Investigation and Proceedings thereunder from March 31, 1910, to March 31, 1911.

A.—MINES, AGENCIES OF TRANSPORTATION AND COMMUNICATION, AND OTHER PUBLIC SERVICE UTILITIES.

[1] Appointed by the Minister, under Sec. 8, sub-sec. 1, of the I.D.I. Act, on recommendation from party concerned.
[2] Appointed by the Minister, under sec. 8, sub-sec. 2, of the I.D.I. Act, in the absence of a recommendation from party concerned.
[3] Appointed by the Minister, under sec. 8, sub-sec. 3, of the I.D.I. Act, on the joint recommendation of the two members first appointed.
[4] Appointed by the Minister, under sec. 8, sub-sec. 4, of the I.D.I. Act, in the absence of a joint recommendation by the two members first appointed.

I.—MINING AND SMELTING INDUSTRY.

1. Coal Mines.

Date of receipt of application.	Parties to Dispute.	Party making Application.	Locality.	No. of persons affected	Nature of Dispute.	Names of Members of Board: (C) Chairman; (E) Employer; (M) Men.	Date on which Board was constituted	Date of receipt of Report of Board.	Result of Reference.
1910 Jan. 5	Alberta Coal Mining Company and employés	Employer	Cardiff, Alta.	35 dir. 25 indir.	Concerning wages and conditions of employment.	R. G. Duggan (C)[3] J. O. Hannah (E)[1] Clement Stubbs(M)[1]	Jan. 17	Apr. 2	A unanimous report was presented by the Board making certain recommendations for the settlement of the dispute, which were understood to have been accepted by both parties concerned; a strike being thereby averted.
Apr. 18	Canadian-American Coal & Coke Company and employés, members of Frank Local No. 1263, U.M.W.A.	Employer	Frank, Alta.	262	Concerning making of new agreement and recognition of U.M.W.A.	I. S. G. VanWart(C)[4] Colin MacLeod (E)[1] Clement Stubbs (M)[1]	Apr. 29	June 4	Settlement arrived at by Chairman without Board being formally convened; settlement effective to March 31, 1911.
Oct. 26	Crow's Nest Pass Coal Company, Limited, and employés, members of District No. 18, U.M.W.A.	Employés	Fernie, B.C.	3,000	Concerning alleged breach of agreement and increased charge for special train.	I.S.G. VanWart(C)[4] W. S. Lane (E)[1] Clement Stubbs(M)[1]	Nov. 18	1911 Feb. 18	Board effected settlement which was understood to be acceptable to both parties concerned, a strike being thereby averted.
1911 Jan. 16	North Atlantic Collieries Company, Limited, and employés, members of Local Union, No. 2173, District No. 26, U.M.W.A.	Employés	Port Morien, N.S.	110 dir 150 indir.	Concerning reduction in wages and conditions of employment.	Prof. Robt. Magill (C)[4]. Duncan G. MacDonald (E)[2]. Alexander McKinnon (M)[1].	1911 Mar. 9	Mar. 23	During proceedings for establishment of Board, Company went into liquidation and mines were accordingly closed down.

2. METAL MINES.

1911 Jan. 7	The Wettlaufer Silver Mining Company, Limited, and certain employés.	Employés	South Lorrain, Ont.	35 dir 30 indir.	Concerning reduction in wages.	George Ritchie(C)[4] R. F. Taylor (E)[1]. Chas. H. Lowthian, (M)[1].	1911 Feb. 20	1911 Feb. 28	A unanimous report was presented by the Board making certain recommendations for settlement of dispute. No cessation of work occurred.

II.—TRANSPORTATION AND COMMUNICATION.

1. RAILWAYS.

1910 Mar. 17	Toronto, Hamilton and Buffalo Railway Company and its conductors, baggagemen, brakemen and yardmen.	Employés	All lines of T. H. & B. Railway.	101	Concerning employés demand for increased compensation and improved conditions.	J. E. Atkinson (C)[4] F. H. McGuigan(E)[1] J. G. O'Donoghue (M)[1].	Apr. 6	.....	Agreement was reached between parties concerned without Board having been convened. The terms of settlement of this dispute were understood to correspond closely to the terms of settlement of a similar dispute between the C.P.R. and its employés in train and yard service.
Mar. 17	Canadian Pacific Railway Company and its conductors, baggagemen, brakemen and yardmen.	Employés	All lines of C. P. Railway.	4,360	Concerning employés demand for increased compensation and improved conditions.	J. E. Atkinson(C)[4]. Wallace Nesbitt(E)[1]. J. G. O'Donoghue (M)[1].	Mar. 31	June 22	Report of Board was accompanied by a minority report signed by Mr. J. G. O'Donoghue, member appointed on the recommendation of the employés. Upon receipt of these reports negotiations were resumed between the Company and the employés concerned which resulted, on July 21, in an agreement to continue in force until terminated by thirty days' notice in writing. The agreement was understood to be in some respects similar to, but in other particulars different from the terms of settlement proposed by the Board, and was said to correspond closely both in respect of rates of wages and rules to "standard" rates and rules existing on a number of the principal railway systems in the Eastern States.

1. RAILWAYS—*Continued.*

Date of receipt of Application.	Parties to Dispute.	Party making Application.	Locality.	No. of persons affected.	Nature of Dispute.	Names of Members of Board: (*C*) Chairman; (*E*) Employer; (*M*) Men.	Date on which Board was constituted.	Date of receipt of Report of Board.	Result of Reference.
1910									
Mar. 17	Grand Trunk Railway Company and its conductors, baggagemen, brakemen and yardmen.	Employés...	All lines of G.T.R. System.	3,017	Concerning employés demand for increased compensation and improved conditions.	J. E. Atkinson (*C*)[4]. Wallace Nesbitt(*E*)[1]. J. G. O'Donoghue (*M*)[1].	Apr. 6	June 22	Report of Board was accompanied by a minority report signed by Mr. Wallace Nesbitt, K.C., member appointed on the recommendation of the Company. Upon receipt of these reports negotiations were resumed between the Company and the employés concerned for settlement of the differences in question. These negotiations were continued up till July 18, when a strike was declared of the employés concerned. Strike continued up till August 2, when it was announced that a settlement had been arrived at through Government intervention, the strike being declared off.
Mar. 19	Grand Trunk Pacific Railway Company and telegraph and station employés.	Employés...	G. T. P. Lines.....	75	Concerning rules and rates of pay.	His Honour Judge D McGibbon (*C*)[3]. Donald Ross (*E*)[2]. W. T. J. Lee (*M*)[1].	Apr. 22	July 7	A unanimous report was presented by the Board which made certain recommendations for the settlement of the dispute. No cessation of work occurred.
Mar. 22	Dominion Atlantic Railway Company and employés.	Employés...	Kentville, N.S.....	4 dir. 25 indir.	Concerning terms of employment and dismissal of certain employés.	Honourable John N. Armstrong (*C*)[4]. McCallum Grant(*E*)[2] Aaron A. R. Mosher, (*M*)[1].	Apr. 29	May 12	Report of Board was accompanied by a minority report signed by Mr. Aaron A. R. Mosher, member appointed on behalf of the employés which was accepted by them. The Department was informed by the Company that there would be no discrimination on its part between union and non-union men. No cessation of work occurred.
May 2	Canadian Northern Railway Company and its blacksmiths, members of Blacksmiths' Railway Union, No. 147.	Employés...	Winnipeg, Man.....	30	Concerning demand for new working agreement, increased wages and shorter hours.	.....	.....	.....	No Board established, settlement having been arrived at between the parties concerned.
May 2	Canadian Northern Railway Company and its blacksmiths' helpers, members of Blacksmiths Helpers' Lodge, No. 335.	Employés...	Winnipeg, Man.....	Betw'n 30 and 40	Concerning demand for new working agreement, increased wages and shorter hours.	.....	.....	.....	No Board established, settlement having been arrived at between the parties concerned.

May 2	Canadian Northern Railway Company and its machinists, members of Fort Garry Lodge, No. 189, International Association of Machinists.	Employés...	Winnipeg, Man.....	325	Concerning demand for new working agreement and increased wages.	.....	.....	.....	No Board established, settlement having been arrived at between the parties concerned.
May 2	Canadian Northern Railway Company and its machinists' helpers, members of Federal Union, No. 4.	Employés...	Winnipeg, Man.....	57	Concerning demand for new working agreement, increased wages and shorter hours.	.....	.....	.....	No Board established, settlement having been arrived at between the parties concerned.
May 2	Canadian Northern Railway Company and its moulders, members of Moulders' Union, No. 174	Employés...	Winnipeg, Man.....	13	Concerning demand for new working agreement, increased wages and shorter hours.	.....	.....	.....	No Board established, settlement having been arrived at between the parties concerned.
May 2	Canadian Northern Railway Company and certain employés, members of Brotherhood of Railway Carmen, Northern Star No. 371, and Plumbers, Gas and Steamfitters' Union, No. 479.	Employés...	Winnipeg, Man.....	432	Concerning demand for new working agreement, increased wages and shorter hours.	Wm. Elliott Macara (*C*)[3]. David H. Cooper (*E*)[1]. Philip C. Locke (*M*)[1].	May 23	June 28	Board presented a unanimous report making certain recommendations for a settlement. Award was not accepted by employés concerned, some of whom declared strike on July 7. Strike continued until September 27, when the men returned to work on the terms of the Board's award.
May 2	Canadian Northern Railway Company and its boilermakers, boilermakers' specialists and boilermakers' helpers, members of Boilermakers and Iron Ship Builders of America, Fort Garry, No. 451, and Boilermakers, Iron Builders and Helpers, No. 212.	Employés...	Winnipeg, Man.....	170	Concerning demand for new working agreement, increased wages and shorter hours.	David H. Cooper (*E*)[1].	.....	.....	Pending establishment of Board a settlement was arrived at between parties concerned.
June 21	Intercolonial & Prince Edward Island Railways and telegraphers, train despatchers and station agents, members of Order of Railroad Telegraphers.	Employés...	Canadian Government Railway System.	490	Concerning proposed amendments to schedule and alleged mistreatment of certain employés.	His Honour Judge John A. Barron (*C*)[3] J. H. Gilmour (*E*)[1]. J. G. O'Donoghue (*M*)[1].	1911 Jan. 4	1911 Feb. 20	Establishment of Board was postponed owing to arrangements being made for a conference between the Government Railways Managing Board and representatives of the employés concerned. A request was received from the employés on November 14, 1910, for a Board, no settlement having been arrived at. A unanimous report was received, making certain recommendations for the settlement of the dispute, which were accepted by the Government Railways Managing Board and by the employés.

[1] In the case of a dispute between the North Atlantic Collieries Company, Limited, of Port Morien, N.S., and its employés, operations in the Company's mines had been discontinued at the time of the investigation, the Company itself having gone into liquidation.

[2] At the close of the financial year results were still pending in connection with the application made on behalf of the commercial telegraphers employed by the Great North Western Telegraph Company of Canada.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF APRIL, 1911.

DURING the month of April two applications for the establishment of Boards of Conciliation and Investigation were received in the Department as follows:—

1. On behalf of certain employés of the following firms: The John Ritchie Company, Limited, The William A. Marsh Company, Limited, Gale Brothers and Mr. J. M. Stobo, boot and shoe manufacturers of the City of Quebec. The number of employés affected was stated to be sixty-eight directly and 875 indirectly.

2. On behalf of the employés, members of District No. 18, United Mine Workers of America, of the Coal Mining Companies comprising the Western Coal Operators' Association. The number of employés affected was stated to be 6,000 directly, and an indefinite number indirectly.

Other Proceedings under the Act.

Four applications were received in the Department on April 3 for the establishment of Boards of Conciliation and Investigation to adjust matters in dispute between the following firms and certain employés: The John Ritchie Company, Limited, The William A. Marsh Company, Limited, Gale Brothers, and Mr. J. M. Stobo, boot and shoe manufacturers of the City of Quebec. As the boot and shoe making industry does not fall under the class of public utilities the consent of both employers and employés had to be obtained for the establishment of a Board of Conciliation and Investigation. (See section 63 of the Industrial Disputes Investigation Act.) This was accordingly done, and at the same time the respective parties agreed to refer the differences to a joint Board. In

each of the applications above mentioned the matters in dispute related to the question of wages. The total number of employés affected by these disputes was said to be sixty-eight directly and 875 indirectly.

A Board of Conciliation and Investigation was established by the Minister of Labour on April 15, and was constituted as follows: Mr. Felix Marois, Quebec, Que., member appointed on the recommendation of the employing Companies; Mr. Joseph Alphonse Langlois, Quebec, Que., member appointed on the recommendation of the employés concerned; and Dr. G. W. Jolicœur, Quebec, Que., Chairman, appointed on the joint recommendation of the foregoing members of the Board.

On April 13 a telegram was received in the Department asking for the establishment of a Board of Conciliation and Investigation to deal with matters in dispute between the Coal Mining Companies comprising the Western Coal Operators' Association and employés, members of District No. 18, United Mine Workers of America. This was followed by the customary form of application on April 21. In this application it was stated that the matters in dispute related to the making of a new agreement to replace one expiring on March 31, 1911. The number of employés affected was given as 6,000 directly and an indefinite number indirectly.

A Board of Conciliation and Investigation was established by the Minister of Labour on April 13, and was constituted as follows: Mr. Colin Macleod, Macleod, Alta., member appointed on the recommendation of the employing Companies; Mr. A. J. Carter, Fernie, B.C., member appointed on the recommendation of the employés concerned; and Rev. C. W. Gordon, D.D., Winnipeg, Man., Chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board.

The Department was informed that the first meeting of the Board would be held on April 25 at Lethbridge, Alta.

Outline of Events prior to Establishment of Board.

The above dispute between the Coal Mining Companies comprising the Western Coal Operators' Association and their employés resulted from a failure of the miners' and mine owners' committees to agree upon any arrangement to take the place of a two years' agreement which was expiring on March 31, 1911. Joint conferences for the purpose of negotiating a new agreement were held in Calgary during the month of March, and terminated on March 24 without any settlement being reached. In anticipation of the matters in dispute not being adjusted by conference, the Minister of Labour instructed Mr. J. D. McNiven, of the staff of the Department of Labour, to proceed to Fernie for the purpose of lending the good offices of the Dominion Government in any way which might be found of service, also to facilitate and expedite the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act in the event of the parties concerned being unable of themselves to arrive at an understanding.

On being apprised of the possibility of the employés in question ceasing work on April 1, the Minister of Labour addressed a telegram to the President, Vice-President and Secretary of the District Union of the United Mine Workers of America, to which the employés concerned were understood to belong, with the object of preventing, if possible, the interruption of operations in the coal mining districts concerned. The message in question was in part as follows:—

"The Government is prepared to do all in its power to secure to the miners of British Columbia and Alberta fair play and justice in the consideration of any of their demands, and to facilitate in every way possible the means necessary to this end, and in the public interest, not less than the interest of the miners, it is hoped that those in positions of responsibility and authority will co-operate with the Government in its endeavour to prevent any step being taken which might prove of serious injury to

the general public as well as prejudicially affect the cause of either of the parties."

Notwithstanding the efforts which were put forth to secure a continuance of mining operations pending the investigation of the dispute by a Board established under the Industrial Disputes Investigation Act, the employés concerned, to the number of 6,000, ceased work on April 1. The mines were accordingly closed down and remained closed during the month of April.

Kingston and Pembroke Railway dispute settled.

The Minister of Labour was informed on March 14 that a settlement had been effected of certain differences existing between the Kingston and Pembroke Railway Company and its firemen and hostlers, members of the Brotherhood of Locomotive Firemen and Enginemen; in connection with which an application had been made on February 19 for the establishment of a Board of Conciliation and Investigation to which the matters in dispute might be referred for adjustment. The points at issue related to a demand on the part of the employés for an increase of wages and for alterations in the rules governing their employment. The number of employés concerned was eleven directly and twenty indirectly. The establishment of the Board was delayed pending further negotiations between the parties for an amicable settlement.

The following letters were received in the Department from the Company and employés concerned in connection with the adjustment of the above dispute.

"The Canadian Pacific Railway Company
Law Department.

MONTREAL, 13th March, 1911

"F. A. ACLAND, Esq.,
Deputy Min. of Labour and Registrar of Boards of Conciliation and Investigation,
Ottawa, Ont.

"SIR:

"Re Industrial Disputes Act, Kingston & Pembroke Ry. and its firemen and hostlers.

"I am instructed by the Vice-President and General Manager of the Kingston & Pembroke Railway Company to inform you that settlement has been effected of the differences existing between it and its firemen and hostlers.

"I have the honour to be,
Sir,
Your obedient servant,

(Signed) E. W. BEATTY,
General Solicitor."

"Brotherhood of Locomotive Firemen and Enginemen.

KINGSTON, March 11th, 1911.

"Mr. F. A. ACLAND,
Deputy Minister of Labour,
Ottawa, Ontario.

"DEAR SIR:—Under date of February 9th, a Committee and I, on behalf of the firemen and hostlers employed on the Kingston & Pembroke Railway, made application to the Department for a Board of Conciliation and Investigation to inquire into certain disputes then existing between the officials of the Kingston and Pembroke Railway Company and above mentioned employés regarding rules and wages governing their employment.

"Under date of February 25th, I was advised by the Department that the Acting General Superintendent of the Kingston & Pembroke Railway had been instructed to take up the matters in dispute with the employés having in view the reaching of an amicable settlement.

"The wishes of the Kingston and Pembroke Railway Officers being granted, I am now in a position to inform you that on this date a satisfactory agreement has been made and signed, effective March 1st, therefore the services of a Board of Conciliation and Investigation on this question is not required.

"Thanking you for prompt action on this question and your earnest desire to settle this dispute,

I remain,
Sincerely yours,

E. A. BALL,
1st Vice-President B. of L.F.& E.

AGREEMENT BETWEEN CANADIAN NORTHERN RAILWAY COMPANY AND MAINTENANCE-OF-WAY EMPLOYEES.

Reference has been made in the April number of the *Labour Gazette* to a dispute between the Canadian Northern Railway Company and its maintenance-of-way employés. On April 28 the Minister of Labour received a telegram from the Superintendent of the above mentioned Company to the effect that a satisfactory settlement of all matters in dispute had been arrived at between that Company and the employés concerned.

The text of the agreement between the Canadian Northern Railway Company and its maintenance-of-way employés in the above matter, under date of April 28 is as follows:—

Section 1. By permanent maintenance-of-way employés is meant men employed in the track, bridge and building department, signalmen, pumpmen and pump repairers on such parts of the line that are open for traffic, and who have been in the maintenance-of-way service continuously for one year or more, or who have had one year's cumulative service during the three years immediately preceding, and the same will hereafter be referred to as employés. Labourers in extra gangs, unless practically engaged the year round, will not be ranked as permanent employés.

Section 2. Ten hours shall constitute a day's work. When required to work in excess of ten hours, time and a half will be allowed for such excess and for work done on Sundays and Christmas Day.

(*a*) The hours of track and bridge watchmen and signalmen will be twelve hours in each twenty-four. Twelve hours either continuously or intermittently, will constitute a day, but they shall receive at least eight hours' rest in each twenty-four.

(*b*) At regular pumping stations, where the amount of work is such that it is necessary for pumpmen to work continuously for twelve hours in order to keep the supply up, overtime, if worked, will be paid for pro rata up to 24K, and between 24K and 7K at rate of time and a half.

(*c*) In cases of emergencies employés will not be required to work more than twenty-four hours continuously without a rest of eight hours.

(*d*) Section foremen and sectionmen travelling on orders of the Company to and from work after regular working hours will be allowed straight time. Members of bridge and building gangs travelling on orders of the Company to and from work after their regular hours will be allowed straight time, except when provided with boarding and sleeping cars to carry them to and from work. Members of regular bridge and building gangs travelling in boarding cars at the request of the Company on Sundays, between 7K and 18K will be allowed straight time.

(*e*) Foremen, provided they remain on duty, will be allowed straight time for wet days.

Section 3. Employés taken off their regular sections temporarily to work on snow or tie trains or other work, will be compensated for the boarding and lodging expenses incurred.

(*a*) Bridge and building employés taken from their places of residence or boarding outfits over night will be compensated for the extra expense they necessarily incur, such expense not to exceed 75 cents per day.

Section 4. Employés required to attend to and light semaphore or switch lamps before or after regular working hours will receive therefor $4 per month for six or less lamps, and 50 cents per lamp per month for those in excess of six. When lamps are located beyond the yard limits they will be attended to during regular working hours.

Section 5. Employés will be promoted hereafter on their respective Superintendent's division in order of seniority, provided they are qualified. The several senior qualified employés shall be advised of all vacancies in the position of foreman, and their applications, if presented within five days after being notified, will be considered. Employés may be transferred from one division to anoth-

er for extra gang work, or on opening of new lines, or when the necessary qualified men for maintenance-of-way work are not obtainable on the division.

(*a*) In promoting employés to the position of Roadmaster or Bridge and Building Master, men may be taken from any point on the system, according to seniority, if competent.

(*b*) Employés refusing promotion will become junior to those accepting such promotion.

(*c*) An employé who is transferred to another Department, or from the Bridge and Building Department to the Track Department, or vice versa, at his own request, will lose his seniority standing.

(*d*) Employés unable to read or write English need not be promoted.

(*e*) A list of all employés will be prepared for each Superintendent's Division, and such lists will show the seniority standing of each employé. The lists will be revised from time to time to agree with the length of service and promotions made, and a copy will be furnished to employés' representative, which will be open for inspection and correction on proper representation.

(*f*) In event of a reduction in the number of men employed, those longest in the service shall be given preference of employment.

(*g*) Employés leaving the service of the Company when their services are required, in the event of re-employment will rank as new men.

(*h*) The position of track and bridge watchman and signalman is not one subfect to the general rules of promotion, being intended to take care of men in any department who become unfitted for other service.

Section 6. Leave of absence and free transportation will be granted to members of duly appointed Committees for the adjustment of matters in dispute between the Company and employés, so far as is consistent with good service, within ten (10) days after request in writing has been made on the proper officers.

Section 7. Employés suspended or dismissed, who consider they have been unjustly treated, will receive full and impartial hearing, and will be advised of decisions reached within fifteen days after the time of their suspension or dismissal. Should the investigation show that the suspension or dismissal was unjust, time will be allowed and employé reinstated. Appeals from decisions must be made in writing by the employé through his Roadmaster or Bridge and Building Master within fifteen (15) days after being advised of such decision.

(*a*) Permanent employés leaving service of the Company from any cause whatever will be furnished with service letter if requested.

Section 8. Employés will be granted leave of absence four times a year. Free transportation will not extend beyond their Superintendent's Division, and the leave of absence will not exceed two days, and then only when consistent with good service, and provided the Company is not put to any additional expense.

Section 9. Permanent employés will be granted once per year transportation to any point on system in favour of themselves and members of their families dependent upon them for support.

Section 10. The Company will keep all section houses in good repair, the cost of repairs, other than ordinary wear and tear, to be charged to occupants.

Section 11. Where water is transported for use of section gangs, good water will be provided.

Section 12. A member of the household of permanent employés will be furnished with free transportation once a month to and from points where reasonable prices prevail, for the purpose of purchasing supplies. Such transportation may be used by a member of the family only.

Section 13. Free transportation will be granted to nurses when their services are required by employés in isolated districts, from points where they are obtainable, on presentation of a certificate from attending physicians.

Section 14. Bridge and building gangs shall be composed of:—

1. Foremen.
2. Carpenters, who shall be skilled mechanics in house and bench work, and have a proper kit of carpenters' tools.

3. Bridgemen, who shall be rough carpenters, expert saw, axe and hammermen, and have a general experience in bridge work.

(*a*) The rates of pay of bridge and building employés will be increased 15 cents per day each year until the maximum rate is reached, and after five years continuous service they will receive the maximum rate for their class of service.

RATES OF PAY

Trackmen:	Per day.
Section foremen at Port Arthur, Winnipeg, Brandon, St. Boniface and Edmonton	$3.20
Section foremen at Atikokan, Rainy River, Portage la Prairie Dauphin, Kamsack, Humbolt, North Battleford, Vermillion, Emerson, Belmont, Swan River, Prince Albert, Saskatoon, Neepawa, Morris, Fort Frances, Morinville, Kipling and Beaudette	3.00
At all other points	2.90
Sectionmen or permanent labourers in all first and second-class yards	2.05
At all other points	2.00
Assistant foremen in yards	2.90
Foremen of extra gangs	$2.85 to 3.85
First assistant foreman on extra gang	2.90
Second assistant foreman on extra gang	2.80
Snow plow foreman in charge of snow plow or flanger, 45 cents per hour.	
Section foreman or men working in snow plow or flanger when called for duty, 37 cents per hour, and expenses	
	Per month
Signalmen at level crossings	53.50
Signalmen at interlocking crossings, 13 levers or under	57.00
Signalmen at interlocking crossings, 13 levers and under 24	62.00
Signalmen at interlocking crossings, 24 levers or over	77.00
Signal repairmen or maintainers	65.00

Bridge and Building men:	Per day.
Yard foremen and shop foremen	$4.15
Road foremen	4.00
Carpenters	$3.25 to 3.50
Bridgemen	2.50 " 3.25
Bridge and building labourers	2.15
Bridge watchmen, per month	60.00
Pump repairers (Expenses while away from headquarters not to exceed $1 per day West of Winnipeg, and 75 cents per day East of Winnipeg	$93.00
	Per month
Pumpmen (one pump)	56.50
Pumpmen (two pumps)	62.50
Pumpmen (three pumps)	72.50
Single pump where two men are employed	61.50

These rules will not take away any privileges that are now in effect with employés. They will become effective April 28, 1911, and will remain in force until either party, desiring a change, gives the other party sixty (60) days' notice.

For Maintenance-of-Way Employés

(*Sgd.*) F. H. FLJOZDAL,
General Chairman.

For the Canadian Northern Railway Company,

(*Sgd.*) J. R. CAMERON,
General Superintendent.

WINNIPEG, April 28, 1911.

New rates in this schedule effective March 1, 1911.

General Superintendent.

A BUREAU OF LABOUR ESTABLISHED IN SASKATCHEWAN.

UNDER date of March 23, 1911, an Act "Respecting the Bureau of Labour" was passed by the Saskatchewan Legislature. The aims and objects of the Bill are defined in the Act, the text of which is as follows:—

1. There shall be attached to the Department of Agriculture a bureau to be styled "The Bureau of Labour."

2. The Lieutenant Governor in Council may appoint a secretary of the said Bureau and may also appoint such other

officers as may be necessary for the proper conduct of the Bureau.

3. It shall be the object of the Bureau to collect, assort, systematise and publish information and statistics relating to:–

(*a*) Employment, wages and hours of labour throughout the province;

(*b*) Strikes or other labour difficulties;

(*c*) Co-operation, trades unions, labour organisations;

(*d*) The relations between capital and labour and other subjects of interest to workingmen;

(*e*) The commercial, industrial and sanitary conditions surrounding workingmen; and

(*f*) Such other matters as relate to the permanent prosperity of the industries of the province.

Immediately that the Bill, which passed the House without division or amendment, became law, an Order-in-Council was passed appointing Mr. Thomas M. Molloy Secretary of the Bureau.

WAGES AND COST OF LIVING IN THE UNITED STATES.—COMPARISON WITH CONDITIONS IN THE UNITED KINGDOM.

SIX years ago an extended series of investigations was begun by the Board of Trade of Great Britain into the cost of living for the urban working class in the principal industrial countries of the world. The investigation was designed to cover the United Kingdom, Germany, France, Belgium, and the United States of America. The results of the investigation have been published from time to time in special reports dealing with the several countries above mentioned in the order in which they are named. The last of these volumes, viz., that dealing with conditions in the United States, has been issued under date of April, 1911. Its contents are of special interest to workpeople in this country, in view of the close commercial and industrial relations subsisting between Canada and the United States, and the general similarity of standards and habits of living, other conditions being equal, in the two countries.

Scope of the Investigation.

The investigation was conducted in twenty-eight cities of varying population, all but two lying east of the Mississippi river, and being in the states in which industrial and urban development have been chiefly concentrated. These cities had in 1910 an aggregate population of 15,488,140. As the investigation in most cases covered portions of surrounding territory the statistics are probably representative of a still larger population.

The subjects primarily investigated were, wages and hours of labour, rents and housing conditions, retail prices of food, and the expenditures of working-class families on food. The statistical data all had reference to February, 1909.

The introductory chapter of the report, which outlines the character and purpose of the investigation, contains a valuable analysis of the industrial life of the United States and the effect thereon of geographical and climatic conditions, race variations, immigration, &c.

Wages and Hours of Labour.

Separate returns were obtained from about 1,300 representative employers. The following table compares the range of weekly wages in certain occupations in England and Wales, and in the United States.—

OCCUPATION.	Predominant Range of Weekly Wages.	
	England and Wales. (October, 1905).	United States. (February, 1909).
Building trades—		
Bricklayers	37s. 6d. to 40s. 6d.	110s. to 125s.
Stonemasons	37s. 2d. to 39s. 4d.	96s. 3d. to 110s.
Carpenters, Joiners	36s. 2d. to 39s. 4d.	68s. 9d. to 90s.
Plasterers	36s. 6d. to 41s. 8d.	100s. to 119s. 2d.
Plumbers	35s. 4d. to 39s. 9d.	87s. 6d. to 112s. 6d.
Painters	31s. 6d. to 37s. 6d.	65s. to 85s.
Hod Carriers and Bricklayers' Labourers	24s. 4d. to 27s.	50s. to 68s. 9d.
Engineering Trades:—		
Fitters	32s. to 36s.	63s. 4d. to 74s. 6d.
Turners	32s. to 36s.	
Smiths	32s. to 36s.	67s. 8d. to 85s. 4d.
Patternmakers	34s. to 38s.	74s 6d. to 91s. 8d.
Labourers	18s. to 22s.	37s. 6d. to 43s. 9d.
Printing Trades:—		
Hand Compositors (Job Work)	28s. to 33s.	68s. 9d. to 81s. 3d.

Roughly, the above table shows that wages in the United States are about two and one-third times as high as in England.

The average hours of labour in the United States was shown by the investigation to be about four per cent. shorter than in England and Wales, hours being about eleven per cent. shorter in the building trades, seven per cent. shorter in the printing trades, and six per cent. longer in the engineering trades.

Housing and Rents.

The report contained a very interesting description of housing conditions in the United States, and of the main points in which they differ from the conditions prevailing in England. The predominant rents for three, four, five, and six roomed houses in England and Wales, and in the United States respectively, are shown below:—

NUMBER OF ROOMS PER DWELLING.	Predominant Range of Weekly Rents.	
	England and Wales.	United States.
Three rooms	3s. 9d. to 4s. 6d.	6s. 9d. to 9s. 7d.
Four rooms	4s. 6d. to 5s. 6d.	8s. 6d. to 12s.
Five rooms	5s. 6d. to 6s. 6d.	11s. 6d. to 14s. 11d
Six rooms	6s. 6d. to 7s. 9d.	13s. to 17s. 4d.

As a result of a careful calculation, the conclusion is arrived at that the United States workman pays on the whole twice as much as the English workman for the same amount of house accommodation.

Retail Prices.

The following table shows the retail prices in England and Wales and in the United States, at the dates of the respective investigations, of those articles of food for which comparative prices can be given:—

COMMODITY.	Predominant Range of Retail Prices.	
	England and Wales (October, 1905).	United States (February, 1909).
Sugar, per lb.	2d.	2½d. to 3 d.
Cheese, per lb.	7d.	10d.
Butter, per lb.	1s. to 1s. 1d. 1s. 2d.	1s. 4d. to 1s. 5½d.
Potatoes, per 7 lb.	2½d. to 3½d.	5¾d. to 8¼d.
Flour, per 7 lb.	8d. to 10d.	11½d. to 1s. 1½d.
Bread, per 4 lb.	4½d. to 5½d.	10¾d. to 11½d.
Milk, per quart.	3d. to 4d.	4¼d. to 4¾d.
Beef, per lb.	7½d. to 8½d. 5d. to 6d.	6d. to 8d.
Mutton, per lb.	7½d. to 9d. 4d. to 5d.	6½d. to 8½d.
Pork, per lb.	7½d. to 8½d.	5¾d. to 7½d.
Bacon, per lb.	7d. to 9d.	8½d. to 10d.

On the basis that an English workman with an average family would maintain under conditions in the United States the same standard of expenditure on food as in Great Britain, the finding of the report is that retail prices of food are about thirty-eight per cent. higher in the United States than in Great Britain.

Summing up, it is deduced that an English workman coming to the United States would have his wages increased about 130 per cent., with slightly shorter hours, and his expenditure on food and rent increased by about fifty-two per cent. Such a comparison is necessarily subject to several qualifications, and these are discussed at length in the report.

A very interesting section of the report is that which records in full detail the results of the investigation into family budgets among the American working classes.

The major portion of the volume is given up to a series of reports on the several towns included in the investigation. These reports contain in each case a minute analysis of working and living conditions, the publication of which should assist materially in the study of industrial and social problems on this continent and in the movement for the betterment of living conditions among the working classes.

REVIEW OF PARLIAMENTARY PROCEEDINGS AFFECTING LABOUR DURING APRIL, 1911.

THE debate on the second reading of the Bill entitled *An Act Respecting Hours of Labour on Public Works*, to which reference has been made in previous numbers of the *Labour Gazette*, was continued in the Senate on April 19, 20, 26 and 27, second reading being given to the Bill on the last mentioned date. Those participating in the debate were Honourable Messrs. Ellis, Cloran, Beique, Legris, Campbell, Costigan, Ross (Halifax), Wilson, Poirier, Sir Richard Scott, and Sir Mackenzie Bowell.

On May 4 the Bill was referred to a Special Committee to be composed of the Honourable Messrs. Power, Lougheed, Sir Mackenzie Bowell, Casgrain, Watson, Ellis, Thompson, Baird, McMullen, Beique, Sir George W. Ross, Legris, and Campbell.

On April 28 the House of Commons concurred in the amendments which had been made by the Senate to Bill No. 97 of the Minister of Labour to prohibit the improper use of opium and other drugs. Reference has been made in the April number of the *Labour Gazette* to these amendments, which do not affect the principles of the Bill, the most important change being the addition of certain substances to the schedule of the measure. The Bill in its amended form is designed to regulate the sale and use of opium; morphine, its salts and compounds thereof; cocaine, its salts and compounds thereof; and eucaine, its salts and compounds thereof.

THE LONDON SICK AND ACCIDENT BENEFIT ASSOCIATION.

ON March 21, the London Sick and Accident Benefit Association was incorporated, with headquarters at London, Ont. The following particulars with reference to the Association are taken from its by-laws, and from a circular which was issued by it.

Objects of the Association.

The objects of the Association are stated to be:—

1. (*a*) To unite all persons of sound bodily and mental health, and of good moral character, and who are of the age of sixteen and under sixty.

(*b*) To give all moral and material aid in its power to its members and those dependent upon them.

2. To establish a fund for the relief of sick and distressed members.

3. To allow members in good standing weekly benefits, in event of loss of time on account of sickness or accident, and free medical attendance.

4. To secure for its members such other advantages as are from time designated by the constitution and by-laws of the Association.

Membership of the Association.

The members of the Association must be employés of the following firms: The McCormick Manufacturing Company, Limited; E. Leonard & Sons; D. S. Perrin & Company, Limited; Dennis Wire & Iron Works Company, Limited; George White & Sons Company, Limited; London Brass Works Company, Limited; Jose Caste Company; The Sherlock-Manning Piano & Organ Company; McLeod, Nolan & Company; Lawson & Jones, Limited; Globe Casket Company; Forest City Laundry & Carpet Cleaning Works; London Foundry Company, Limited; Rex Cigar Company; Battle Creek Toasted Corn Flake Company, Limited; Somerville Paper Box & Printing Company, Limited; Carling Brewing & Malting Company, Limited; London Printing & Lithographing Company, Limited; Empire Manufacturing Company, Limited; Cook-Fitzgerald Company, Limited; D. H. Gillies & Son; Wortman & Ward Company.

Anyone wishing to become a member must forward an application worded as follows:—

LONDON, ONT., — 191–

To the Officers and Members of
The London Sick and Accident Benefit Association,

LONDON, ONT.

GENTLEMEN,—I desire to become a member of The London Sick and Accident Benefit Association, and declare that I am an employé in the factory of..... that I am in good health, and of good moral character, and that I was....years of age on the.....day of.....191..

I enclose the sum of one dollar for first fee, and I hereby agree to pay such $.... monthly for assessment, and to abide by all the rules and regulations and by-laws of the Association which are now, or which may from time to time be in force.

....
Witness. *Applicant.*

.....
Address.

Applications for membership are laid before the Managing Committee, which has the power of accepting or rejecting them.

Form of Organization.

At the annual meeting of the Association, which is to be held in the month of January, the Managing Committee will be elected for the ensuing year. The members of each factory elect one of their number as their representative on the committee. Immediately after their election, the Managing Committee will meet, and choose from among themselves a president, first vice-president, second

vice-president, secretary, assistant secretary and treasurer.

The Managing Committee is also authorized to appoint at its first meeting an Executive Committee consisting of the president, the two vice-presidents and not less than two or more than four other members of the Managing Committee, who shall hold office for one year. The duties of the Executive Committee shall be to pass on and pay all claims for sick benefits and the ordinary expenses of the Association, and when the Managing Committee is not in session, to supervise and control the operations and superintend the business of the Association generally. The Executive Committee shall meet every two weeks, or at the call of the President, on the request of any member of the Managing Committee. The minutes of the proceedings of the Executive Committee shall always be open to the inspection of any member of the Managing Committee. A meeting of the Managing Committee may be called at any time by request of three of the Committee.

Conduct of Business.

Employés who are members of the Association, who are receiving wages of $1.25 per day and upwards, are required to pay the sum of 50 cents per month, and those receiving smaller wages shall pay 25 cents per month. The weekly benefits shall be $5 for members paying 50 cents per month, and $2.50 for those paying 25 cents. No member shall be entitled to full benefits for a shorter time than six days, or for a longer period than fifteen weeks, and ten weeks at half benefits, in any one year. One month's dues must be paid before a member is entitled to receive benefits, except in case of accident.

Physicians shall be elected annually, whose duty it shall be to attend to all sick members, and to provide them with proper and sufficient medicines during their illness. A certificate signed by the physician, specifying the nature of the affliction must be forwarded to the Secretary of the Association, as a notice that benefits are required, and a physician's certificate must be furnished every week so long as the sickness lasts, and immediately on recovery a declaring off certificate must be sent, reporting the recovery.

Should a sick member be able to walk out for exercise, he or she shall then report to a member of the Committee at least twice a week, and shall not remain out later than 7 p.m., from November 1 to May 1, and 9 p.m., from May 1 to November 1, and if leaving the city, sanction of the Committee must be previously obtained. No member when in receipt of sick pay shall be allowed to follow any employment, nor frequent gambling or public houses, nor get intoxicated, nor by any wilful act or misconduct delay or prevent their recovery. In urgent cases the Committee shall have power to employ a nurse, if absolutely necessary.

All funds in excess of $500 at the end of each quarter, may be placed to the credit of a special incidental fund, to be used for cases of urgent need not covered by the by-laws, and voted at any regular meeting of the Committee.

THE MODEL HOMES ASSOCIATION, OTTAWA.—COMPETITION FOR DESIGNS OF SMALL HOUSES.

AN Association has been organized in Ottawa, known as the Model Homes Association, to interest architects and draughtsmen throughout Canada in the designing of model homes for workingmen, suitable to the climatic conditions of Ottawa, and at the same time to place at the disposal of intending home-builders, free of charge, the assistance of the best architectural talent of the Dominion in this respect, to the end that houses costing from $1,000 to $2,500 may be made at once as comfortable, as healthful and as attractive as possible. The Association, it should be explained, is not one with anything to sell. It is not itself going into the house-building business. Its purpose rather is to help others to help themselves, with advantage not only to the individual but to the com-

munity as a whole. It is hoped that if the movement meets with success in Ottawa it may be taken up also in other cities with good results.

The first step taken by the Association has been the inauguration of a competition for designs of small houses. This competition is under the patronage of His Excellency Earl Grey, Governor-General; Honourable W. L. Mackenzie King, Minister of Labour; Mr. R. L. Borden, M.P.; and the Honourable Clifford Sifton, M.P., Chairman of the Commission of Conservation. The Committee which will adjudicate upon the designs is composed of Mr. Colborne P. Meredith, Architect, and member of the Ottawa Improvement Commission; Mr. L. Fennings Taylor, Architect; Mr. Noulan Cauchon, Consulting Engineer; and Dr. P. H. Bryce, Chief Medical Inspector of the Immigration Branch, Department of the Interior.

In an outline of the aims of the movement accompanying the published conditions of the competition it is stated:—

"A great many small houses are springing up in and around Ottawa, many being built by workingmen in their spare time, others by workingmen on a speculative basis. It is the aim of the Association, by education, and by the scheme of designs, outlined below, to raise these dwellings above the class of shacks, and to demonstrate to their owners that simplicity does not necessarily imply crudeness, that form and line can be successfully obtained in the smallest mass by a proper disposition of material, and that a carefully planned and economical house can be built which is much more suited to their needs than the present series of box-like rooms.

"This class of work, owing to lack of means on the part of the builders has heretofore not come under architectural influence.

"The Committee, in inviting designs, feels that the public spirit of the profession, draughtsmen and sanitarians throughout Canada should respond, not for the sake of any financial gain to be obtained thereby, but in an honest endeavour to do something for the public benefit.

"The architects are asked to submit schemes on a non-competitive basis, while the large number of prizes offered to the draughtsmen and students should offer some inducement to compete, especially as the problem, though fascinating, is not a large one.

"When a selection has been made it is the intention of the Committee to supply blue prints of any particular design to the prospective house-builder at a nominal sum to cover the cost of reproduction.

"The subject is one which should be of universal interest, and it is not the intention of the Committee to restrict the circulation of the designs to Ottawa, as persons resident in other places will be quite at liberty to avail themselves of the scheme. The Model Homes Association is not a philanthropic association, but it aims purely and simply at helping the small home-builder to help himself."

The conditions of the competition above referred to are as follows:—

Conditions.

CLASSIFICATION OF DESIGNS.

Designs are required for houses suitable for the needs of a workingman's family, at prices as follows:—

1. *Single houses with pitch roof.*

Class	1,	to cost	$1,000.00
"	2,	"	1,200.00
"	3,	"	1,400.00
"	4,	"	1,600.00
"	5,	"	1,800.00
"	6,	"	2,000.00
"	7,	"	2,500.00

2. *Pair of houses with pitch roof.*

Class	8,	to cost	$1,500.00 the pair.
"	9,	"	2,000.00 "
"	10,	"	2,500.00 "

3. *Single house with flat roof.*

Class	11,	to cost	$1,000.00
"	12,	"	1,200.00
"	13,	"	1,400.00
"	14,	"	1,600.00
"	15,	"	1,800.00

4. *Pair of houses with flat roof.*

Class	16,	to cost	$1,500.00 the pair.
"	17,	"	2,000.00 "
"	18,	"	2,500.00 "

PRIZES.

Prizes will be awarded in each class as follows:—

To design placed first....$15.00
" " " second. 10.00
" " " third... 5.00

The Committee reserves the right to withhold prizes in any class should the entries be deemed of insufficient merit.

Competitors may enter designs in any or all classes, and their designs should be clearly numbered to indicate in which class they are entered.

SIZE OF LOT AND ACCOMMODATION.

The customary sizes of lots in Ottawa are 66 feet frontage by 99 feet deep, and 50 feet frontage by 100 feet deep. The majority of such houses are built on half lots, 33 feet by 99 feet, or 25 feet by 100 feet, the latter being the more common size in the newer sections of the city.

The character of the accommodation and the disposal on the lot is left to the discretion of the competitor, as it is hoped that by this competition some original schemes will be evolved for the solution of the problem. All designs, however, should include bath-room and inside w. c., and wherever practicable, an open fireplace.

BASEMENT.

Wherever the design lends itself to such treatment, the competitor should dot on the basement plan the position of piers should the builder wish to proceed without a basement at the outset, with a view to constructing it later. (This is a condition likely to be frequently met with.)

CLEARNESS ESSENTIAL.

It should be clearly understood that elaboration of drawings is not required; competitors should bear in mind the fact that the probable builders will not be well versed in the reading of plans, hence simplicity is essential, especially in regard to figuring.

FLAT-ROOFED HOUSES.

Special attention is directed to the competitions for flat-roofed houses. These are at present the especial abomination in this class of property, but the Association, while not wishing to perpetuate this type among the builders, recognises that the flat roof is the result of economic conditions which have to be met. It is therefore hoped that some satisfactory schemes will be forthcoming to solve this problem.

DRAWINGS.

Drawings required for each house are as follows:—

Floor-plans of each floor.
Four elevations.
Roof plan.
Outline section.

A small sketch to give the builder a clear idea of the general appearance of the house.

SCALE.

All drawings must be made to a scale of 8 feet to 1 inch. Drawings shall be in ink on tracing linen, 30 inches by 22 inches, if possible.

SPECIFICATIONS.

Competitors are required to submit with their designs brief typewritten specifications of materials and construction.

FIGURING.

Drawings shall be clearly figured.

MATERIALS.

The choice of materials is left to the competitor. This class of building is at present chiefly brick veneered, clapboarded or shingled. A schedule of current prices on building material is appended. Competitors should bear in mind that important economies can be effected by using standard lengths of lumber and stock material.

DELIVERY OF DESIGNS, ETC.

Designs shall not be signed, nor have any mark of identification thereon, but shall be accompanied by a sealed envelope containing the competitor's name and address. On receipt by the Association, the designs and envelopes will be similarly numbered, and the envelope will not be opened until the designs have been adjudicated upon.

"This condition does not apply to architects submitting non-competitive designs. All drawings subsequently used will have the designer's name and address printed thereon.

"All designs submitted must be received on or before Saturday, May 20, 1911, addressed to Mr. A. J. Hazelgrove, Honorary Secretary, Model Homes Association, 126 Sparks street, Ottawa.

"Drawings should be rolled, not folded.

DISPUTE AFFECTING PLASTERERS AND PLASTERERS' LABOURERS AT CALGARY, ALTA. REFERRED TO ARBITRATION.—TEXT OF THE AWARD.

DURING the month of April a strike of plasterers and plasterers' labourers occurred at Calgary, Alta., the cause of the strike being a demand on the part of the former for an increase in wages from 68¾ cents to 75 cents per hour, and on the part of the latter for an increase in wages from $3.50 to $4 per day of eight hours. The strike, after continuing for some days, was settled by the parties agreeing to submit their differences to arbitration. Representatives of each party were chosen, with Superintendent R. B. Deane, of the Royal Northwest Mounted Police to act as chairman. The award of the chairman, which was given out on April 25, was unfavourable to the claims of the men. The full text is as follows:—

Text of the Award.

"As the Builders' Exchange has made the following concessions, the same become part of my award, and go into effect forthwith, to remain in effect during the ensuing year, dating from April 3, namely:—

1. Eight hours to comprise a day's work, from 8 a.m. to 12 noon, and from 1 p.m. to 5 p.m., excepting on Saturdays, when four hours shall comprise a day's work.

2. On such work as can readily be completed on a Saturday afternoon, not extending over more than two additional hours, the standard rate of pay is to take effect.

3. No work is to be done on Sundays, legal holidays nor on Labour Day.

4. Any work extending over the hours laid down in clauses 1 and 2 is to be paid for at the rate of time and one half.

The builders take exception to any increase in the present wage scale, as asked for by the Plasterers' union, being an increase from 68¼ cents to 75 cents per hour.

They point out that plasterers are paid at the rate of 60 cents per hour in Winnipeg, Regina and Saskatoon, whereas 65 cents is the rate in Edmonton.

They claim that living in Calgary is no more expensive than in the before mentioned cities, and that, even if it could be shown to be so, the difference is more than covered by the 8¼ cents preference which the Calgary plasterer enjoys over his Winnipeg, Regina and Saskatoon brethren, and by the 3¼ cents advantage which he has over his Edmonton brother.

I have myself lived in one or other of the provinces of Saskatchewan and Alberta since July, 1883, on a fixed salary, and am unable to find any adequate reason for the advantage given to the Calgary plasterer, unless it is to be accounted for by the undue inflation of values of real estate in this city, which must ere long find their true level.

The plasterers advance as a reason for their demand that they have received no increase in wages for four years, but it seems to me that they on that account hold themselves to be anything but men made in the image of their Creator.

Why should the pursuit of an honourable calling, which only a man can follow, lead to the loss of self respect in a competent mechanic?

The broad question, as it seems to me, is this: Is the trade of a plasterer subject to greater risk of life and health, to more bodily discomfort and mental abasement, and to greater uncertainty in the way of employment, than the other trades in the building industry?

I cannot answer this question without consulting representatives of the other trades, but to my mind, it is a very material question. If such a condition is recognized by the building industry generally, that might be a reason for the conceding to the plasterers generally a higher scale of wages than is paid to bricklayers, carpenters and the like, but I have insufficient evidence before me to warrant me drawing such an inference.

For the reasons which I have briefly outlined I am constrained to say that I cannot make the award which the plasterers ask for.

The Hod Carriers and Plasterers' labourers ask for an advance from 43¾ cents to 50 cents an hour, basing their claim on the restricted season in which the plasterers' work is possible, the laborious and dirty nature of the work, and the liability to catching cold when running out of a warm house into the cold air several times a day.

They also quote prices which are in vogue in Vancouver, $4 a day, and in San Francisco, $5 a day.

They mention further the increase in the cost of living in Calgary.

As to the restricted season for work, and the nature of that work, what I have said as to the plasterers applies equally to the plasterers' labourers.

They choose that work as a means of livelihood and the fact that in spite of all its alleged disadvantages, they still stick to the trade, argues inferentially that it has, after all, some compensations —and one very material compensation in that the plasterers' hod carrier receives per hour 6¾ cents more pay than the bricklayers' labourer.

We are not concerned with prices on the Pacific coast—the conditions of trade in the prairie provinces are our best guide.

It would gratify me greatly if I could please all the parties to this dispute, but it has never yet been found possible to "run with the hare and hunt with the hounds," and, as I find myself placed in a position wherein I am called upon to deal with other people's money, I have, as I consider, no choice but to give my

award in favour of the Builders' Exchange.

Given at Calgary, this twenty-fourth day of April, 1911.

(*Sgd.*) R. BURTON DEANE,
Superintendent,
Royal Northwest Mounted Police.

Arbitrator Revises Award.

Two members of the board of arbitration which was dealing with the dispute between the Builders' Exchange and the local Plasterers' Union called upon Superintendent Deane of the Royal North-West Mounted Police and arranged with him to have the clause in his award relating to Saturday afternoon work struck out.

They explained that this particular part of the award was at variance with the constitution of the Union, and that by mutual agreement it had always been understood that matters affecting the constitution of the Union should not be submitted to arbitration.

Superintendent Deane agreed to the clause being struck out, as both the representatives of the exchange and the Union so desired.

With this amendment the award was accepted by the men.

REPORT OF FIFTH ANNUAL CONVENTION OF THE CANADIAN NATIONAL ASSOCIATION BUILDERS' EXCHANGES HELD AT WINNIPEG, MAN.

THE fifth annual convention of the Canadian National Association of Builders' Exchanges was recently held at Winnipeg, Man., the printed official report having been received at the Department during the past month.

Subjects Discussed at Convention.

In the address of the President reference was made to the growth of the Association, which two years ago was composed of only two exchanges and at the present time numbers 12 exchanges with a membership of 1,200. Among the subjects which were proposed for discussion by the President were: Employers' Liability Legislation, Technical Education, the Industrial Disputes Investigation Act, Relations with Architects, the Mechanics' Lien Law, and Uniform Contracts. In the report of the Secretary-Treasurer reference was made to the Bill providing for an eight-hour day on public works which is at the present time before Parliament. It was stated that a resolution opposing this measure had been adopted at the last convention of the Association and forwarded to Ottawa, asking that hearing be granted to the representatives of the Builders. The President and Secretary-Treasurer had appeared twice before the Special Committee of the House to which the Bill was referred. The fundamental objection which they had alleged against this Bill was that any arbitrary limitation of work in the building trades was opposed to the natural climatic conditions of Canada.

Industrial Disputes Investigation Act.

The Secretary-Treasurer reported that he had had interviews and correspondence with the Minister of Labour, urging the extension of the scope of the Industrial Disputes Investigation Act, 1907, to the building trades. He stated that the Act had proved conclusively that compulsory investigation by a disinterested tribunal into the causes of trade disputes had averted projected strikes in a large proportion of cases, strikes being "industrial civil war" and benefiting neither employer nor employed. In accordance with the recommendation of the Secretary-Treasurer a resolution was subsequently passed by the Convention, to the effect "that this convention again respectfully urge action, as already submitted by the convention of 1910, by the Honourable the Minister of Labour, to include the building trades within the scope of the Industrial Disputes Investigation Act of 1907, and that this action be taken during the present session of Parliament." The mover of this resolution explained that in view of the success which had at-

tended the operation of the Industrial Disputes Investigation Act, it was thought advisable that it should be applied to the building trades. It had saved a great deal of loss wherever it had been applied, and its operation had now been so far demonstrated as to win the commendation of many other countries.

Other Resolutions Passed.

Among the other resolutions passed at this convention were the following:—

"Resolved that while the National Association advocates the general principle of 'open shop', it recognizes that under certain local conditions the enforcing of the 'open shop' may not be practicable, and therefore declines to interfere with the autonomy of any constituent exchange to deal with its labour problems as it deems advisable."

"Resolved that each exchange be instructed to study without delay the existing lien laws of each province with a view to effecting amendments for the better protection of contractors and supply firms."

"Resolved that the convention go on record as favouring the principle of the 'Daylight Saving Bill,' from the conviction that our workmen are justly entitled to some hours of leisure and recreation during the summer months, which can be effected without loss to either side by commencing work from May 1 to September 1, at 6 a.m., and closing down Saturday at noon.

RECENT INDUSTRIAL AGREEMENTS.

THE following agreement between Local Union No. 170 of the International Union of the United Brewery Workmen of America and the brewers of Berlin and Waterloo, Ont., went into effect on March 17,1911.

1. SUBJECT to the provisions hereinafter contained only members of the above Union shall be employed by the parties of the Second Part after the signing of this Agreement.

2. THE SECRETARY of the Local Union No. 170 shall keep a list of all unemployed members of the said Union which shall be furnished to any brewer on application, and in case any one party of the Second Part is in need of a man, such shall be selected from said list by the party of the Second Part, if a man satisfactory to the party of the Second Part can be procured from said list. But it is agreed that in case any one of the brewers desires to employ a man in every respect competent to perform the work for which a man is required, and such man is not a member of said Union, then the parties of the Second Part may employ such a man and the parties of the First Part shall accept and allow such person to become a member of the Union.

3. CAUSES FOR DISCHARGE shall consist of neglect of duty, incompetency, drunkenness when on duty, and dishonesty. No man shall be considered discharged unless such discharge is issued by the manager or superintendent.

4. SICKNESS OR DISABILITY resulting from an accident while engaged in the employer's work shall not be sufficient cause for discharge; upon recovery the man shall receive his former position provided that his sickness has not lasted longer than six months, and that he is capable of performing his work.

5. DRIVERS shall keep their horses, wagons and harness in proper condition at all times with the exception of Sunday, when the drivers shall be compelled to put their horses in proper condition.

6. ALL GRIEVANCES concerning violations of this agreement shall be adjusted by an arbitration committee, consisting of two to be chosen by the employer and two by the Union, and in case these four cannot agree they shall select a fifth disinterested party, the decision of the majority of whom shall be final and binding on both parties to the agreement. Either party to this agreement shall appoint their arbitrators within one week after notice has been received of the appointment of arbitrators by the other party, and the award shall be made within one month after the four arbitrators have been appointed.

No strike or lockout shall occur until a board of arbitrators has been appointed and their award made.

7. FIFTY-EIGHT HOURS to constitute a week's work, that is to say, ten hours for the first five days and eight hours for Saturday for the months from April to September, both inclusive, and fifty-

two hours, that is nine hours for the first five days with seven hours for Saturday for the months from October to March both inclusive.

All time worked in excess of said hours to be paid at the rate of time and one-half, except firemen, who shall receive single time for overtime.

SCHEDULE OF WAGES.

	Per Week.
Wash-house	$12.50
Bottlers, machine operators	12.00
Other bottlers	10.50
Drivers	13.00
Drivers' helpers	11.00
Single drivers	12.00
Cellar men	14.00
Fermenting room	14.00
Kettle men	13.00
Engineers	20.00 of 7 days, 10 hrs. p.d.
Firemen	15.00 " "
Malsters	12.50 " "

9. Watchman, Coopers, Carpenters, and first men in a department charged with the responsibility of looking after other employés in that department shall be entitled to a proportionate increase the same as other employés.

10. Pay day shall be weekly.

11. This agreement shall remain in force from the date of signing until March 1st, 1913.

12. Notice of the intention of either party desiring any change to be made in this agreement shall be given by the party desiring the change to be made to the other party at least one month before the expiration of this contract, and in case no notice is given by either party, then the agreement is to continue from year to year until such notice is given.

IMMIGRATION AND COLONIZATION.

The official statements given below with regard to recent immigrant arrivals in Canada, number of homestead entries made, land patents issued, etc., are published, except where otherwise stated, by courtesy of the Department of the Interior, Canada.

THE heavy influx of immigrants into Canada continued during April; it was estimated that 10,000 a week were passing through Montreal. On one of the trans-Atlantic lines it was reported that first and second class accommodation had been filled up a month ahead. There was also a large immigration from the United States, including many French-Canadians from the New England States, of whom it was reported that 5,000 were returning to take up homesteads in Alberta and Saskatchewan. The latest official returns of the movement are as follows:—

British Emigration to Canada.

During the month ending March 31, 1911, compared with March, 1910, the number of passengers leaving the United Kingdom for British North America, according to official returns of the British Board of Trade, was as follows:—

NATIONALITY.

	English.		Welsh.		Scottish.		Irish.		British Colonial		Total British Subjects.		Foreign.		Total.	
	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910
March	18,111	10,422	255	310	4,225	3,718	822	780	348	418	23,811	16,148	2,886	3,291	26,697	19,439

The total immigration above mentioned during the three months ended March 31, 1911 and 1910 was as follows:—

	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910	1911	1910
January-March	25,672	16,189	396	457	5,995	5,160	1019	955	650	587	33,732	23,348	4,584	6,510	38,316	29,858

The sale of farm lands by the Hudson's Bay Company for the quarter ended March 31, 1911, amounted to 167,900 acres for £470,700, as compared with 34,100 acres for £92,500, and sales of town lots to £26,900, as compared with £38,100 for the corresponding period of 1910. The receipts are £386,700, as against £109,000 in 1910. The sales for the twelve months to March 31, 1911, were 267,000 acres for £770,000, and town lots were sold for £80,000, as compared with sales of farm lands of 104,300 acres for £266,500, and town lots for £46,200 for the corresponding period of 1910. The total receipts for the twelve months ended March 31, 1910, amounted to £635,400, as compared with £308,400 for the previous year.

Homestead Entries During the Fiscal Years 1910-1911 AND 1909-10.

A statement of the homestead entries made each month during the past two fiscal years is as follows:—

MONTH.	Manitoba.		Saskatchewan.		Alberta.		British Columbia	
	1910–11	1909–10	1910–11	1909–10	1910–11	1909–10	1910–11	1909–10

Totals	2,280	354,322.83	2,037	332,061.10

In March, 1910, the number of patents issued was 2,037, covering an area of 332,061.10 acres, showing an increase for the month of March, 1911, of 243 in the number of patents issued, and of 22,261.73 acres in the area patented.

Notes.

In order to meet the general demand on the part of railroad contractors for construction labourers in Canada during the present season, the regulations with reference to money qualifications and "continuous journey" have been relaxed from April 15 to September 30. The text of the notice to this effect is as follows:—

Office of the Superintendent of Immigration.

OTTAWA, March 1st, 1911.

In order to meet the demand for railroad labourers in Canada last year the regulations relating to money qualifications and "continuous journey" were relaxed for a certain period.

This year railroad labourers going to assured permanent employment at construction will be admitted to Canada from the 1st of May until the 30th of September, both dates inclusive, irrespective of money qualification or continuous journey, provided they are natives or citizens of the countries, or some one of the countries, in which Immigration effort is made by Canada, *i.e.*, Great Britain, Ireland, France, Belgium, Holland, Germany, Denmark, Iceland, Norway, Sweden, Switzerland or the United States of America, and provided also, that the immigrants are suited to railroad work and are in all other respects desirable, have sufficient money to carry them to the work for which they have been engaged, and documentary or other sufficient evidence of definite employment to go to.

On the first of October, 1911, this relaxation of the regulations will come to an end, without further notice.

W. D. SCOTT,
Superintendent of Immigration.

NOTE.—It has been decided to put this arrangement into effect from this date.

W. D. SCOTT,
Superintendent of Immigration.

OTTAWA, April 15, 1911.

The annual report of the Ontario Department of Lands, Forests, and Mines shows that the total revenue derived by the Province during that year was $1,835,082. The sale of 17,275 acres of land for mining purposes brought in $425,331, while the sale of 92,560 acres of agricultural land brought in $127,151. The total number of locations of settlers in the North Country last year was 1,379. They took up 194,760 acres. Of the veterans' certificates 11,446 have been redeemed, and 2,547 are still outstanding. For non-fulfillment of the occupation conditions, 261 locations under veterans' grants were cancelled. The report estimates that fully a thousand miles of forest was more or less damaged by fire. By the sale of damaged timber the actual waste was kept down to 50,000,000 feet board measure. The output of pine during that year was 142,000,000 feet greater than the preceding year.

FAIR WAGES SCHEDULE IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF APRIL, 1911.

The following is a list of contracts awarded by the Department of Public Works and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement or orders for supplies given by the Post Office Department is added.

Department of Public Works.

THE general clause for the protection of labour was inserted by the Department in the following contracts awarded during April.

INTERIOR FITTINGS FOR POST OFFICE AT BATTLEFORD, SASK.

Interior fittings for post office at Battleford, Sask.; name of contractor, The Berlin Interior Hardwood Company, Limited, of Berlin, Ont.; date of contract, April 3, 1911; amount of contract, $2,225.

ELECTRIC LIGHT WIRING, ETC., PUBLIC BUILDING AT VERNON, B.C.

Electric light wiring, etc., public building at Vernon, B.C.; name of contractor, The Empire Electric & Manufacturing Company, Limited, Ottawa, Ont.; date of contract, April 4, 1911; amount of contract, $1,893.

TUG BOAT FOR PUBLIC WORKS DEPARTMENT AT NEW WESTMINSTER, B.C.

Tug boat for Public Works Department at New Westminster, B.C.; name of contractor, Wallace Shipyard Limited; date of contract, March 28, 1911; amount of contract, $64,950.

The following is a copy of the clause inserted in the above contracts:—

FAIR WAGE CLAUSE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life and property, or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the person entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such

claim out of the moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the Contractor.

BREAKWATER, PORT BURWELL, ONT.

Breakwater, Port Burwell, Ont.; name of contractor, M. J. Hogan, Montreal, Que.; date of contract, March 30, 1911; amount of contract, $157,500.

LINE OF RAILWAY, PASPEBIAC TO GASPE.*

For a line of railway from Paspebiac to Gaspé, as near the shore as practicable—102 miles. Date of subsidy agreement, August 25, 1910; amount of subsidy, $3,200 per mile, not exceeding $6,400 per mile.; railway company, Atlantic, Quebec & Western Railway Company.

*Omitted from Report of August, 1910.

RATE OF WAGES.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and, if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing to them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim, therefor, is filed in the office of the Minister of

.....

and proof thereof satisfactory to the Minister is furnished the Minister may pay such claim out of any moneys at any time payable by His Majesty under such contract, and the amounts so paid shall be deemed payments to the contractors.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of their employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occurring to 182 individual work people in Canada during the month of April, 1911, were reported to the Department of Labour. Of these, seventy-six were fatal and 106 resulted in serious injuries. In addition sixteen fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before April, 1911.

In the preceding month there were 104 fatal and 218 non-fatal accidents reported, a total of 322, and in April, 1910, there were ninety-four fatal and 246 non-fatal accidents, a total of 340.

The number of fatal accidents reported in April, 1911, was, therefore, twenty-eight less than in the preceding month and eighteen less than in April, 1910. The number of non-fatal accidents reported in April, 1911, was 112 less than in the preceding month, and 140 less than in April 1910. Altogether there were 140 industrial accidents reported in April, 1911 less than in the preceding month, and 158 less than in the same month of the preceding year.

The following is a record of the accidents of the month of April by industries and trades:—

STATEMENT OF ACCIDENTS DURING APRIL 1911, BY INDUSTRIES AND TRADES.

Nature of Fatalities and Accidents.

The disasters of the month involving more than one fatality were: the drowning of six members of the crew of the steamship *Iroquois* off Shell Island, B.C., the drowning of six seal hunters off Magdalen Island; the death of four employés of an explosive factory at Sand Point, Ont.; the death of four miners at Pitt Lake, B.C.; the death of two miners at Rossland, B.C.; the death of two well-diggers near Moosomin, Sask.; and the death of four members of the Royal Northwest Mounted Police, who perished in the Yukon district sometime during the winter.

Wreck of Steamer "Iroquois" off Shell Island, B.C.

On April 10, the steamer *Iroquois*, a small vessel plying between Sydney, B.C., and the islands in the Gulf of Georgia was wrecked in a heavy sea through the shifting of the cargo. Twenty-one lives were reported to have been lost in this disaster, including six members of the steamers' crew. At the coroner's inquest the verdict of "manslaughter" was brought against the Captain of the *Iroquois* who was among the survivors. A commission was appointed by the Dominion Government for the purpose of holding a formal investigation concerning the cause of the wreck.

Explosion at Explosives Factory at Sand Point, Ont.

On April 27 a disastrous explosion took place at Sand Point, Ont., at the drying plant of the Dominion Explosives Company, by which four employés of the Company were killed. No light was thrown at the inquest on the cause of the accident, and an investigation was instituted by the Dominion Government.

Death of Two Well-Diggers near Moosomin, Sask.

On April 10, two well-diggers lost their lives while digging a well on a farm near Moosomin, Sask. The well had been partially dug, and one of the men descended to continue operations. He was overcome by gas when about twenty feet from the surface and dropped to the bottom. His fellow-worker then descended to rescue him and he was also overcome with fatal results.

Death of Two Miners at Rossland, B.C.

On April 7, two miners were killed by a premature explosion at Rossland, B.C.

Death of Four Members of the Royal North-West Mounted Police.

Early in the winter a patrol consisting of four members of the Royal Northwest

Mounted Police left Fort McPherson to make the annual trip to Dawson, a distance of 1,000 miles. The trip is usually made in four or five weeks, and on their non-arrival at the expected time anxiety was felt for their safety. A search was undertaken for them and about the middle of April their bodies were found about 100 miles from Dawson.

Death of Six Seal Hunters.

On April 3 six seal hunters were drowned by the upsetting of a boat off the Magdalen Islands.

Death of Four Miners at Pitt Lake, B.C.

Four miners were reported to have been killed in a blasting accident at Pitt Lake, B.C., on April 13. It was believed that they had gone back to examine a blast which had not gone off, and that the explosion occurred while they were standing over it.

Record by Industries and Trades.

Agriculture.—In this industry there were four fatal, and seventeen non-fatal accidents in April, 1911, compared with seventeen fatal and eighteen non-fatal accidents in March and ten fatal and eighteen non-fatal accidents in the corresponding month of last year. Of the fatal accidents, two were caused by the victims being caught in machinery, and one each by being struck by a log and a bundle of hay. Of the non-fatal accidents, five were due to falls from vehicles; six to live stock; two to machinery, and one each to falling through a trap-door, falling from a scaffold, being cut with an axe, and one by a fall in which a broken arm was extent of injury.

Fishing and hunting.—There were six deaths in April, 1911, compared with two in March, and nine in April, 1910. The six sealers who perished were drowned at the same time.

Lumbering.—During April there were eighteen fatal and seven non-fatal accidents, compared with ten fatal and seventeen non-fatal in March and sixteen fatal and eleven non-fatal in April, 1910. Of the fatalities, five were caused by the upsetting of a boat and the other by a falling tree. The seven non-fatal accidents were caused by machinery.

Mining.—Nine men were killed and seven seriously injured in mines during April, compared with eleven killed and nineteen injured in March, and seven killed and ten injured in April, 1910. Of the fatalities, six were caused by blasting, two by falling coal, and one by machinery. Of the non-fatal accidents, two were caused by machinery, three by falling coal or rock, one man was run over and one was burnt by ignited gas.

Building trades.—In the building trades there were reported six fatalities and seven non-fatal accidents, compared with five fatal and fifteen non-fatal in March, and none killed and seventeen injured in April, 1910. Five of the fatalities were caused by falls from buildings, and scaffolds, and one by a falling house. Of the non-fatal accidents, five were from falls from buildings and scaffolds, and five were struck by falling material.

Metal, engineering, and shipbuilding trades.—During April there were thirteen fatal and twenty non-fatal accidents, compared with eight fatal and fifty-three non-fatal accidents in March, and seven fata and fifty-two non-fatal accidents in April, 1910. Of the fatalities, five were caused by hot metal, three by machinery, two by falls, and one each by electric shock, falling material and by being run over by cars. Of the non-fatal accidents, seven were caused by falling material, three by falls, six by machinery, two by electric shock, one by elevator and one by explosion.

Woodworking trades. — During April there were five non-fatal accidents, compared with thirteen non-fatal accidents in March and one fatal and twenty-eight non-fatal accidents in April, 1910. Three of the accidents were caused by machinery and two by flying material.

Textile trades.—During April there were two non-fatal accidents, compared with one killed and two injured in March, and one killed and four injured in April, 1910. One of the accidents was caused by machinery and the other by hot water.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F., No. 91.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF APRIL, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Kindersley, Sask	April 8	1	Struck by a log.
"	St. Cesaire, Que.	" 6	1	Struck by a bundle of hay.
Cheesemaker	Augusta tp.	" 15	1	Caught in a fly wheel.
Chopping mill owner	Mount Brydges, Ont.	" 13	1	Caught in belting.
Hunting and fishing—				
Seal hunters	Magdalen Islands, Que	" 3	6	Drowned by upsetting of boat.
Lumbering—				
Logger	Port Renfrew, B.C.	" 7	1	Drowned by upsetting of boat.
"	Rimouski River, Que.	" 29	1	Head crushed by falling tree.
Mining—				
Coal miner	Chase River, B.C.	" 2	1	Struck by a cable.
"	Albion Mines, N.S.	" 20	1	Struck by falling coal.
Miners	Rossland, B.C.	" 7	2	Killed by a premature blast.
"	Pitt Lake, B.C.	" 13	4	Killed by a blast.
Miners' helper	Stellarton, N.S.	" 20	1	Crushed by falling coal.
Building trades—				
Contractor	Ottawa, Ont.	" 3	1	Fell from a scaffold.
Carpenter	Montreal, Que.	" 17	1	Fell from a building.
Builders' labourer	Montreal, Que.	"	1	Fell from building, fractured skull.
"	Maisonneuve	" 15	1	Fell from a balcony and broke his neck.
"	Maisonneuve	" 19	1	Fell from a scaffold and broke his neck.
"	Calgary, Alta.	" 22	1	Crushed under a house when moving it.
Metal trades—				
Japanner	Longueuil, Que.	" 8	1	Burnt by contact with red-hot iron.
Electric lineman	Near Newmarket, Ont.	" 19	1	Killed by electric shock.
Electrical worker	Toronto, Ont.	" 6	1	Crushed by a roll of wire.
Electric lineman	Grimsby, Ont.	" 12	1	Fell 25 feet through breaking of cross arm of pole.
Foundry employés	Sorel, Que.	" 4	4	Scalded by molten metal.
Foundry employé	Montreal, Que.	" 1	1	Crushed between cars.
Machinist	Maisonneuve, Que.	" 21	1	Caught in a power cable.
Machinist	Asbestos, Que.	" 18	1	Caught in machinery.
Structural iron worker	Hamilton, Ont.	" 25	1	Fell from a trestle.
Iron and steel worker	Sault Ste Marie, Ont.	" 8	1	Caught in machinery.
Railway service—				
Railway agent	Belle River, Ont.	" 8	1	Struck by an engine.
Brakeman	Midland, Ont.	" 3	1	Fell between cars and was run over.
Brakeman	St. François de Montmagny, Q.	" 16	1	Run over when coupling cars.
Car repairer	Mimico, Ont.	" 6	1	Crushed between cars.
Brakeman	Bellevue, Ont.	" 11	"	Run over when coupling cars.
Freight handler	Toronto, Ont.	" 15	1	Crushed between cars.
Brakeman	Glace Bay, N.S.	" 19	1	Fell off engine and was run over.
Brakeman	Richmond, N.S.	" 24	1	Fell from a car and was run over.
Engineer	Near North Wakefield, Que.	" 14	1	Fatally scalded, train ran into a washout.
Watercarrier for construction gang	Toronto, Ont.	" 26	1	Struck by an engine.
Section foreman	Near Townsend, B.C.	" 3	1	Struck by a train.
Navigation—				
Ship crew	Off British Columbia coast	" 10	6	Drowned by wrecking of vessel.
Oiler on steamer	Quebec, Quebec.	" 15	1	Drowned by falling off ladder.
General transport—				
Stevedore	St. John, N.B.	" 14	1	Struck by a sling of deals and knocked into a hold.
Teamster	Montreal, Que.	" 10	1	Fell from load of hay.
Stableman	Toronto, Ont.	" 11	1	Thrown from cart, horse ran away.
Teamster	Taber, Alta.	" 23	1	Fell from cart and was run over.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F., No. 91.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF APRIL, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Public employés—				
Constable	Winnipeg, Man	April 13	1	Electrocuted while watching premises.
Miscellaneous trades—				
Engineer of powder Co.	Protection Island, Nanaimo, B.C	" 5	1	Explosion of powder magazine.
Paper mill hand	Ottawa, Ont	" 3	1	Crushed between rollers.
Night watchman	Toronto, Ont	" 12	1	Fell down elevator shaft.
Explosives factory emp.	Sand Point, Ont	" 27	4	Killed by an explosion.
Well diggers	Near Moosomin, Sask	" 10	2	Overcome by gas in well.
Unskilled labour—				
Labourer	Vancouver, B.C	" 15	1	Killed by a premature blast.
Labourer	Iroquois, Ont	" 10	1	Drowned in a lock, through collapse of a scaffold.
Labourer	Calgary, Alta	" 26	1	Killed by a cave-in when digging trench.
Construction labourer	Near Alix, Alta	" 17	1	Drowned when taking horses across river.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH BUT ONLY REPORTED TO THE DEPARTMENT IN APRIL, 1911.

Farmer	Near Arthur, Ont	Mar. 31	1	Struck by a falling tree.
Trapper	North Saskatchewan	February	1	Starved to death.
Millwright	Lindsay, Ont	March 31	1	Fell from a building.
Machinist	Toronto, Ont	" 7	1	Skin torn, blood poisoning set in.
N. W. Mounted Police	Yukon District	Jan. or Feb.	4	Found dead on trail.
Engine wiper	Swift Current, Sask	Feb. 26	1	Fell into pit of tender.
Labourer	Brockville, Ont	Jan. 3	1	Thrown off tender.
Brakeman	Muskoka, Ont	March 7	1	Crushed while switching.
Railway fireman	Crow's Nest, B.C	" 8	1	Head crushed and injured internally.
Brakeman	Cartier, Ont	" 15	1	Struck by engine when working switch.
Railway employé	Swift Current, Sask	" 11	1	Run over by switch engine.
Railway employé	Turnbull, Ont	" 27	1	Found with fractured skull.
Brakeman	Welland, Ont	" 21	1	Killed when coupling.

Food and tobacco preparation.—During April there were two injured, compared with one killed and three injured in March and six injured in April, 1910. One person was hurt by machinery and the other by an elevator.

Leather trades.—One person was hurt during April by machinery, compared with two injured in March and none in April 1910.

Railway service.—During April there were eleven fatal and fourteen non-fatal accidents, compared with eighteen fatal and twenty-six non-fatal accidents in March, and sixteen killed and forty injured in April 1910. Of the fatalities, three persons were struck by engines or trains, five were run over, two were crushed between cars, and one was scalded. Of the non-fatal accidents, two fell, two were hurt in collisions, one while coupling cars, three fell and were run over, and one each by getting caught in frog and run over, crushed between cars, struck by crowbar, struck by falling material, burned and scalded.

Navigation.—During April seven were killed and one injured, compared with seven injured in March, and four killed and four injured in April, 1910. Of the fatalities, seven men were drowned, and of the non-fatal accidents, one was caused by falling machinery.

General transport.—During April there were four killed and five injured, compared with four killed and eleven injured in March, and three killed and eight injured in April 1910. Of the fatalities,

three were by falling from vehicles, and one by falling material, and of the non-fatal accidents, five were injured by falling from vehicles.

Civic employés.—During April, one was killed and two injured, compared with two killed and sixteen injured in March, and four killed and thirty injured in April 1910. The fatality was caused by an electric shock, and of the two who were injured, one fell and one was struck by material.

Miscellaneous.—During April there were nine killed and eight injured, compared with five killed and seven injured in March, and eight killed and eleven injured in April, 1910. Of the fatalities, five were caused by explosions, two by gas, and one each by a fall, and machinery, Of the non-fatal accidents, seven were caused by machinery and one by falling.

Unskilled labour.—There were four killed and eight injured during April, compared with thirteen killed and thirteen injured in March, and eight killed and fifteen injured in April, 1910. Of the fatalities, two were caused by drowning, one by a premature blast and one by a cave-in. Of the non-fatal accidents, three were caused by falling material, two by falls, two by explosion, and one by machinery.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR DURING THE SEVEN MONTHS ENDING MARCH 31, 1911.

AN upward trend of wages continued throughout the period of seven months from September, 1910, to March, 1911, inclusive. The principal changes were among railway employés, of whom over 8,000 received increases. Substantial advances were given to employés of eleven municipalities during the first quarter of the present year. There were few changes in hours of labour, the only ones recorded affecting printers at Vancouver, B.C., bookbinders and rubbers at St. John, N.B., carmen of the Grand Trunk Railway, and deck-hands of the Canadian Pacific Steamships at Victoria and Vancouver, B.C. By an amendment to the Quebec Factories Act, the working hours of women and children in that province were reduced from sixty to fifty-eight per week.

Changes by Industries and Groups of Trades.

Agriculture.—Owing to a diminution in the grain yield the exodus of harvesters to the Northwest Provinces was much less severely felt in the general market for labour than in the fall of 1909. Wages ran from $20 to $45 per month with board, or from $2 to $3 per day for exceptionally good men. In the Eastern Provinces favourable returns caused some demand for farm hands, but wages remained about as they were in the previous season.

Building trades.—On September 5, 500 bricklayers and masons at Montreal, Que., after a strike which commenced in the month of July, 1910, received an advance in wages from 40 to 45 cents per hour. On September 11, 275 tinroofers received an increase in wages from $12.50 to $15 per week. On September 17 lathers (twenty-five) in Edmonton, Alta., were granted an increase in wages of from $2.50 to $3 per 1,000 laths; and in October, plasterers (twelve) at Brantford, Ont., received an increase of from 35 to 40 cents per hour.

Metal, engineering and shipbuilding trades.—After a short strike, tin roofers (275) at Montreal, Que., were granted an increase from $12.50 to $15 per week. Metal workers at Calgary, Alta., (fifty) also received an increase from $20.25 to $22.95 per week. In Edmonton, Alta., after a strike commencing on August 23 and ending on September 4, sheet metal workers numbering twenty-six received an increase in wages from 40 to 42½ cents per hour, and dating from January 1, 1911, workers of this class at Ottawa had their wages increased from $16.20 to $18.90 per week. Moulders (thirty-five) at Carleton Place, Ont., received on December 7 an increase of ten per cent. in wages.

Woodworking trades.—During October pattern makers at Brantford, Ont., were granted an increase of five per cent. in wages.

Printing and allied trades.—On November 15, bookbinders and rulers (forty-eight) were granted a decrease of one hour per day without reduction in wage scale. Hand compositors, machine compositors, day and night men, and piece workers at Halifax, N.S., received an increase of wages under a new agreement with their employers; and printers, stereotypers and electrotypers at Vancouver, B.C., under new three-year agreements received an increase of $6 per week in wages. On January 1, increases in wages were granted to printers at Edmonton, Alta., and to foremen, journeymen, machinists and machine operators in printing offices at Prince Rupert, B.C.

Food and tobacco preparation.—By voluntary concession on the part of their employers, 325 male biscuit and confectionery hands at London, Ont., had their working week reduced from fifty-six to fifty-three hours, and female hands (575) in the same group had their working hours reduced from fifty-six to fifty, on September 1, the whole without reduction in wages.

Railway employés.—Engineers on the Canadian portion of the Michigan Central Railway, in September, were granted an increase from $3.75 to $4.15 per 100 miles in the case of passenger trains, and from $3.83 to $4.85 per 100 miles in the case of freight trains. Carmen (400) on the Canadian Northern Railway system between Winnipeg, Man., and Edmonton, Alta., were granted during Septber an increase of wages under the award of a Board of Conciliation and Investigation. At the request of the employés, trainmen (ninety) on the Temiscaming & Northern Ontario Railway system were granted, on October 1, a substantial increase in allowance per 100 miles run. On September 1 an increase of $4 per month was granted to telegraphers, agents and operators, on the Grand Trunk Railway system, under the award of a Committee of Conciliation; and in a similar manner on October 1 telegraphers, train despatchers and station agents employed on Dominion Government Railways (490) received a substantial increase in wages and a decrease from twelve to eight hours per day to operators at certain specified terminal points. On the other hand, during September carmen in the employ of the Grand Trunk Railway system were reduced from $9.60 to $9.12 per week in wages, and from sixty to fifty-four in hours of labour per week. On January 1, locomotive engineers, firemen and hostlers (720) employed on the Dominion Government Railways received an increase in wages. Permanent maintenance-of-way employés of the Grand Trunk Railway, and yardmen and trainmen in the freight service of Dominion Government Railways received a substantial increase in wages. By an award of a Conciliation Board given in March maintenance-of-way men (4,000) of the Canadian Pacific Railway were granted an increase in wages dating back to December 1. On January 1, firemen (500) on the Père Marquette Railway system were increased from $2 to $2.30 per 100 miles, and freight, passenger and yard engineers (500) on the same system also received a raise in wages. Engineers on the Toronto, Hamilton & Buffalo Railway (twenty-five) were granted an increase in wages, on December 1.

Electric and Street Railway Employés.—Employés on the British Columbia Electric Railway system (800) were advanced in wages after negotiations, the men abandoning the Company's profit-sharing scheme. At the request of the men, the employés of the Fort William and Port Arthur Street Railways received an increase from 27½ to 29 cents per hour in maximum wages during November. Motormen and conductors (nine) of the St. Thomas street railway, and motormen and conductors of the Calgary street railway received advances in wages during November. The employés of the Hamilton Cataract Power, Light & Traction Company (204) had their wages increased from December 1.

Municipal and public employés.—During October, trench diggers (800) and electrical workers (twenty) at Calgary, Alta., were granted an increase in wages and in November teamsters and powe[r]

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR

CLASS OF WORKPEOPLE AFFECTED.	LOCALITY.	Approximate Number of Workpeople affected.	Date from which change took effect.	PARTICULARS OF CHANGE.
Building Trades—				
Bricklayers and Masons	Montreal, Que....	500	Sept. 5	Increased from 40c. to 45c. an hour.....
Bricklayers and Masons	Guelph, Ont.....	40	Mar. 1	Increase in wages from 43c. to 48½c. per hour.....
Lathers.....	Edmonton, Alta..	25	Sept. 17	Increase in wages.....
Plasterers.....	Brantford, Ont...	12	Oct. 17	Increase in wages from 35c. to 40c. per hour.....
Painters, Paperhangers and Decorators.....	Victoria, B.C.....	150	Mar. 1	Increase from $3.50 to $4. per eight-hour day.....
Tin roofers.....	Montreal, Que....	275	Sept. 11	Increase in wages.....
Metal, engineering and shipbuilding trades—				
Sheet metal workers...	Edmonton, Alta..	26	Sept. 4	Increase in wages to a minimum of 42½ cents, per hr.
Metal workers.....	Calgary, Alta.....	50	Oct. 1	Increase in wages.....
Moulders.....	Carleton Place, O.	35	Dec. 7	An increase of 10 per cent. in wages.....
Sheet metal workers...	Ottawa, Ont.....	.....	Jan. 1	Increase in wages.....
Woodworking trades—				
Pattern makers.....	Brantford, Ont...	.....	Oct.	Increase of 5 per cent. in wages.....
Printing trades—				
Bookbinders and rulers	St. John, N.B....	48	Nov. 15	Decrease of one hour per day, six days a week. No half holiday during the winter months. Without reduction in wages.....

General labour—				
Women and children in factories	Quebec, Que.		Jan. 1	Decrease in hours of labour from 60 to 58 per week

station employés in the same city also received an advance in their wage scale. Increases in minimum and maximum salary were also granted to forty-two members of the Ontario Provincial Police. At Ottawa, on October 1, the employés of the Public Library (six), of the Isolation Hospital (seven), and the market inspector, toll collectors and weighmasters, fourteen in number, received a substantial increase in wages, while on January 1, police constables were voluntarily granted one day's rest in seven, without reduction in wages; the fire captains (eleven), departmental heads and assistants (eighteen) and clerks (twenty-five) received increases. In December, the incinerator foreman and other incinerator employés, numbering four in all, were granted an increase of $5 per month in salary. On December 16 the London, Ont., fire brigade, composed of forty members, received a substantial advance in salary, and on January 1, the civic employés of Niagara Falls, Ont., (fourteen) were granted an improved scale of salaries. On January 1, the city police force and certain other municipal officers in Toronto, Ont., were granted by voluntary concession an improved scale of wages, as were also city policemen and firemen in Chatham, Ont., and a number of civic employés at South Vancouver, B.C., On January 10, the city police at Windsor, Ont., received an increase in pay; and on March 15, the firemen and policemen of Brantford, Ont., also received advances. At Toronto the city police, firemen, heads of departments and other civic employés received increases, dating from January 1, 1911,

Miscellaneous.—During November, the Bank of Montreal notified its employés of a general increase of $200 per annum and upwards in salary. Paper box makers (125) at London, Ont., on January 19 had their weekly hours reduced from sixty to fifty-five without any reduction in wages.

Navigation.—During November, ship carpenters at Lunenburg, N.S., after a short strike were granted an increase in wages, their wages to be paid monthly as soon as circumstances warranted it. Deck hands (136) in the employ of the Canadian Pacific Steamship Company at Victoria and Vancouver, B.C., received a reduction in hours, and overtime rates of 40 cents per hour for Sundays and holidays, under an award by a Board of Conciliation and Investigation.

Factory labour.—By amendments to the Quebec Factories Acts coming into force on January 1, 1911, a decrease in hours from sixty to fifty-eight per week was granted to all women and children employed in factories.

DURING SEPTEMBER, 1910 TO MARCH, 1911, BOTH INCLUSIVE.—Continued.

TRADE DISPUTES DURING THE MONTH OF APRIL, 1911.

THE most serious dispute during the month of April was a strike of coal miners in Alberta and the eastern part of British Columbia, which lasted throughout the whole of the month. None of the other strikes during the month were of very great magnitude, but a strike of coal miners at Springhill, N.S., which had been in existence since August, 1909, still continued through the month. Some disturbance was caused at Prince Rupert, B.C., during the first week of the month by a strike of labourers which had been going on for a month.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The total number of trade disputes reported to have been in existence in Canada during April was fourteen, the same number as in March, and two less than in April, 1910. About twenty-nine firms and 8,713 employés were involved in these disputes; twenty firms and 360 employés having been involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes during April was approximately 202,275, compared with 33,600 days in March, and 49,110 days in April, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes, and the number of employés in each group of trades:—

Trades.	No. of Disputes.	No. of Employés.
Mining	2	6,470
Building trades	3	291
Woodworking trades	1	19
Miscellaneous	1	50
Total	7	6,830

Localities affected by new disputes.—Two new disputes of the month took place in the Province of Ontario, two in Alberta, and one each in New Brunswick and British Columbia. The remaining dispute took place in the Province of Alberta and the eastern part of British Columbia.

Causes of disputes.—The following were the causes of the new disputes of the month:—

Cause.	No. of Disputes.
For higher wages	4
For higher wages and shorter hours	1
For higher wages and changes in conditions.	2
Total	7

Methods of settlement.—Of the fourteen disputes in existence settlements were effected in six, leaving eight still unsettled at the close of the month. One was settled by arbitration, one by negotiations between the parties concerned. In three, work was resumed, and in one the places of the strikers were filled.

Results of disputes.—Employers were successful in three of the disputes which were terminated; employés in one, and in one case a compromise was effected. The result of one was indefinite, the employer not being concerned.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes which were in existence during April and which began in previous months comprised strikes of coal miners at Springhill, N.S., labourers at Prince Rupert, B.C., billiard table makers and shoe-fitters at Toronto, Ont., cotton spinners at St. Henri, Que., tailors at Ottawa, Ont., and a lockout of carpet weavers at Toronto, Ont.

Strike of Coal Miners at Springhill, N.S.

There was little change in the situation with regard to the strike of coal miners at Springhill, N.S., where about 1,000 men were still out during April. This dispute, which had been in existence since August 11, 1909, was due to the refusal of the employers to recognise the United Mine Workers of America or to grant demands for certain changes in conditions of employment.

Strike of Labourers at Prince Rupert, B.C.

On March 6 a strike of about 250 labourers took place at Prince Rupert, B.C., on account of the refusal of the contractors for road-grading to grant an increase in wages from 37½ cents to 45 cents per hour. The latter rate had been granted to the men by the municipality, candidates for municipal honours having promised the advance before the elections. Several riots took place in the course of this dispute on the contractors attempting to resume work with new hands, and one man was seriously wounded. Fifty-six arrests were made and normal conditions were resumed about April 8, many of the strikers having left the city and their places being filled. The strike was declared off on April 24.

Strike of Billiard Table Makers at Toronto, Ont.

On March 30, about forty-two billiard table makers at Toronto declared a strike on account of the refusal of the employers to grant the demand of woodworkers for an increase of ten per cent. in wages. About thirty other employés then went out in sympathy. Work was resumed on April 6, an increase of 1½ cents per hour having been granted to cabinet-makers and machine hands. The former rate of wages averaged about 27 cents per hour, and the increase represented an advance of about five per cent.

Strike of Shoe-Fitters at Toronto, Ont.

On March 29 a strike of shoe-fitters took place at Toronto, on account of their objection to piece-work prices offered them. About fifteen employés were directly affected and about sixty-five indirectly affected by the dispute. The strike was settled on April 8, when some of the employés were taken back. No changes in prices were made.

Strike of Cotton-Spinners at St. Henri, Que.

On March 31 a strike of twenty-nine cotton-spinners of the Dominion Textile Company's establishment at St. Henri took place. It was stated by the Company that the cause of the dispute was the employment of a non-union worker who was without funds to join the union. Work was resumed on April 8 under conditions prevailing before the strike, the non-union worker having joined the union.

Strike of Journeymen Tailors at Ottawa, Ont.

On March 28 a strike of eight journeymen tailors took place at Ottawa, on account of the discharge of a female em-

ployé. It was claimed by the employer that she was incompetent, but it was alleged by the strikers that she was dismissed because she had joined the Journeymen Tailors' Union. On April 7, the dismissed employé was reinstated, and all the strikers returned to work.

Lock-out of Carpet-Weavers at Toronto, Ont.

No settlement was reported in the case of a lockout of 114 carpet-weavers which took place at Toronto, Ont., on March 26. The dispute arose because the employés had joined the Carpet-Weavers' Union, which was contrary to the rules of the establishment, which was run as a non-union shop. No settlement was reported during the month.

New Disputes.

The new disputes of the month comprised strikes of coal miners in Alberta and the eastern part of British Columbia, plasterers and plasterers' labourers at Calgary, Alta., painters at Port Arthur and Fort William, Ont., pattern-makers at Peterborough, Ont., coal miners at Bankhead, Alta., pulp mill hands at St. George, N.B., and carpenters at Vancouver, B.C.

Strike of Coal Miners in Alberta and Eastern British Columbia.

On April 1, a strike of about 6,000 coal miners in Alberta and the eastern part of British Columbia took place on account of the failure to reach a new agreement with the Western Coal Operators' Association, the old agreement having expired on March 31. About sixteen companies were affected by the dispute. On April 13, application was made to the Department of Labour for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act. The Board was immediately constituted and held its first meeting on April 25. The dispute, however, was still unsettled at the close of the month.*

*A further account of this dispute is given on another page under the article entitled "Proceedings under the Industrial Disputes Investigation Act, 1907."

Strike of Plasterers and Plasterers' Labourers at Calgary, Alta.

On April 3, a strike of plasterers and plasterers' labourers took place at Calgary, Alta., in which about eighty-five men were involved and all the firms in Calgary. The cause of the dispute was the refusal of the employers to grant to plasterers an increase in wages from 68¾ cents to 75 cents per hour, and to plasterers' labourers from 44¼ cents to 50 cents per hour. In the course of negotiations, the Builders' Exchange made an offer of 70 cents, but asked that the men work six hours on Saturday instead of four. This offer was rejected and a strike declared. Joint meetings between committees representing the two parties were then held and after various offers had been made and refused it was agreed that the question of wages should be submitted to arbitration. It was further agreed that the award of the arbitrator should stand for twelve months. The award of the arbitrator was in favour of the employers, and work was resumed on April 10. It was alleged by the men that in their written statement to the arbitrator the Builders' Exchange had added two hours extra work on Saturdays on straight time, and that according to the award a week of forty-six hours was established, instead of forty-four hours.

Strike of Painters at Port Arthur and Fort William, Ont.

On April 17, a strike of painters at Port Arthur and Fort William, Ont., took place, on account of the refusal of the employers to grant the demand for an increase in wages from 35 cents to 40 cents per hour. While no settlement of the dispute was reported during the month, the employers stated they had filled the places of the strikers.

Strike of Pattern-Makers at Peterborough, Ont.

On April 18, about twelve pattern-makers employed in the Canadian General Electric Company's works at Peterborough, Ont., went on strike on account of the failure of the employers to grant their

Miscellaneous trades—												
Pulpmill hands	St. George, N.B.	For an 8-hour day instead of 13 and 11 hours with increase in minimum wages.	1		50				"	26		No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

demand for an increase in wages. No settlement was reported during the month.

Strike of Coal Miners at Bankhead, Alta.

On April 1, a strike of coal miners took place at the Bankhead mines, Alberta. The cause of the dispute was a failure to arrive at a new agreement with the employers to replace one which had expired. About 450 men were directly affected by the dispute, and twenty indirectly. No settlement of the dispute was reported during the month.

Strike of Pulp-Mill Hands, St. George, N.B

On April 26, about fifty pulp-mill hands at St. George, N.B., declared a strike on account of the refusal of their employer to grant a demand for an eight hour day, with a minimum wage of 22 cents per hour, in place of a day of eleven and thirteen hours, with the minimum wages of a fraction over 15 cents per hour. No settlement of the dispute took place during the month.

Strike of Carpenters at Vancouver, B.C.

On April 10, a strike of about 116 carpenters and joiners took place at Vancouver, B.C., on account of the refusal of some employers to grant a demand for an increase in wages from $4.00 to $4.50 per day. No settlement of the dispute was reported during the month, but the desired increase had been granted to nearly 1900 men before the strike.

The table which is published herewith is a compilation of the trade disputes of the Dominion of Canada, which began or were in continuance during the month of April, and which have been reported to the Department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour during April, 1911.

DOMINION REPORTS.

Report of the Department of Railways and Canals; Canal statistics for the season of Navigation, 1910. Ottawa: King's Printer, 1911. Pages, 386. Price, 25 cents.

THE report of Canal Statistics for 1910 shows a substantial increase for volume of traffic through the canals of the Dominion. Freight distributed amounted to 42,990,608 tons as compared with 33,720,748 tons in 1909. The traffic through the Sault Ste. Marie canal amounted to 36,395,387 tons, an increase of 8,534,442 tons over the previous year. Traffic through Welland Canal amounted to 2,326,290 tons, an increase of 300,339 tons over the previous year. Traffic through the St. Lawrence Canal amounted to 2,760,752 tons, an increase of 350,123 tons.

A remarkable growth is shown in business for the past decade as demonstrated in the following table:

1901.	5,665,259	tons.
1902.	7,513,197	"
1903.	9,203,817	"
1904.	8,256,236	"
1905.	9,371,744	"
1906.	10,523,185	"
1907.	20,543,639	"
1908.	17,502,820	"
1909.	33,720,748	"
1910.	42,990,608	"

The volume of wheat which passed through the Sault Ste. Marie in 1896, the first year of operation, amounted to 19,314,234 bushels. In 1909 the wheat of Canadian origin which passed through the Canal amounted to 48,047,833 bushels, and in 1910 this was increased to 51,774,833 bushels.

The capital expenditure on canals of the Dominion to March 31, 1910, including both construction and maintenance amounted to $96,962,415.67.

ONTARIO REPORTS.

Bureau of Labour.

Eleventh report of the Bureau of Labour of the Province of Ontario for the year ending December 31st, 1910, Toronto, 1911, Pages, 285.

The eleventh report of the Bureau of Labour for Ontario for the year 1910 deals with the following subjects: Municipal Statistics, Municipal Public Utilities, Free Employment Bureaus, Labour Organizations including returns by secretaries, Suggestions by the Organizations, Director of Labour Organizations in Ontario, Wages and Hours of Labour, Industrial Statistics, Returns by Manufacturers, Benefits paid by International Organizations, Ontario Labour Laws, Legal Decisions Affecting Labour in Ontario, Trade Disputes in Ontario, British and Foreign Labour News.

The returns from municipalities show 19,102 new buildings erected in 1909 costing $43,355,358. There were expended on permanent improvements $5,495,941, and on sanitation $1,417,781. The returns also show for each locality the industrial establishments started during the previous year, and openings for other industries.

Statistics of public utilities owned and operated by the municipalities show capitalization of over $30,000,000 for the 160 municipalities making returns. The eighteen cities of the Province report assets of this nature of $20,333,292, ninety-two towns $9,975,655, forty-two villages $985,008, and eight townships $73,547. Waterworks represented the sum of $25,022,444; electric lighting, $4,211,989; gas works, $505,214; street railways, $657,978; power plants, $672,533; telephone systems, $277,344; miscellaneous, $20,000.

Out of 679 returns from manufacturers only thirty-seven were incomplete, leaving to be tabulated 642 establishments, employing 49,060 persons, compared with 610 establishments, employing 39,156 in 1908. The product of these establishments was $111,392,169; the wages paid were $21,392,444. The average wages rate per year in 1909 was $452.15, and per day $1.58, as compared with $443.99 and $1.58 in 1908. The average increase in product in all the classes was 16.48 per cent., thirty-nine establishments reported unspecified increases, fourteen unspecified decreases, and 122 the same product as previously.

The five free employment bureaus established at Berlin, Hamilton, London, Ottawa and Brantford, reported a grand total of 1,169 male and eighty-three female applications for work received; 1,491 applications for male help and 212 for female help, and situations filled 874 by males and sixty-two by females.

Bureau of Colonization.

Annual report of the Bureau of Colonization for the Province of Ontario, 1909, King's Printer, Toronto, 1910, pages,

During the year 1909 the Bureau of Colonization for Ontario placed 271 persons on Ontario farms; in addition, 963 were so placed by the Salvation Army. Domestic servants to the number of sixty-six were placed by the Salvation Army, and 258 domestics were given accommodation at the Women's Welcome Hostel. The new illustrated handbook of the Province was published and over 100,000 copies circulated chiefly in Great Britain. The greatest obstacles to the rapid development of the agricultural resources of Northern Ontario are said to be the facts that men with considerable means have many avenues in which to invest their capital and men with little or no means find the opportunity to obtain ready money for their labour to be such that the clearing of the land is neglected. The rich discoveries of valuable minerals also frequently induce the settler to become a prospector. With a view to demonstrating the agricultural possibilities of the land of Northern Ontario a demonstration farm of 640 acres situated thirty-four miles south of Cochrane, the junction point of the Temiskaming and Northern Ontario Railway and the Grand Trunk Pacific Railway, was selected in 1907. This land was covered with timber, about ninety acres had been slashed in 1907 and thirty acres logged in 1908. During 1909 about twelve acres were stumped and were made ready for crop and two acres were sown with fall wheat.

Department of Agriculture.

Report of the Minister of Agriculture for the year ending October 31, 1910. Toronto: King's Printer, 1910. Pages 62.

The report of the Minister of Agriculture of Ontario for 1910 deals with

the following subjects: Ontario Agricultural College, Ontario Veterinary College, Bureau of Industries, Agricultural Societies Branch, Live Stock Branch, Farmers' Institute Branch, Fruit Branch, District Representatives, Colonization and Immigration, Factory Inspection, Stationary Engineers, and Present Status of Agriculture.

In the Ontario Agricultural College courses are conducted in experimental work of various kinds of interest to farmers, in Experimental Union extension work, nature study in public schools, forestry and drainage work. The attendance at the Ontario Agricultural College, including the MacDonald College, during the past year amounted to 1,386, which was eighty-eight over the record of the previous year. During the month of June the College is opened to farmers of the Province who visit in large numbers and spend a day visiting various points of interest in the College and listening to short talks by Professors. The attendance of farmers during last June was upwards of 40,000. In order to equip teachers to teach agriculture in the public schools courses in elementary agriculture and horticulture were arranged for April, May, and June, at which there was an attendance of forty-one teachers, and in July fifty more teachers took nature study at the summer school course, and ten elementary agriculture. Experiments have been conducted by the Department of Forestry in the work of reclaiming waste lands, and the forestry nursery of 1300 acres has been equipped for the purpose of producing trees and seedlings for distribution throughout the Province. On this land there are at present 800,000 forest plants and about 1,500,000 seedlings in seed beds. About 200,000 forest tree seedlings were distributed through the Province and in addition sixty collections of forest tree seedlings were sent to public schools to be planted in school grounds.

BRITISH REPORTS.

Reports of the Chief Registrar of Friendly Societies for the year ending December 31, 1909. Part B, Industrial and Provident Societies, London: Wyman & Sons, Limited, London, 1911. Pages 281.

The report of the Chief Registrar of Friendly Societies on Industrial and Provident Societies for the year 1909 shows the extent of the co-operative movement in Great Britain. It is stated that at the end of that year co-operation in its various phases comprised in the report presented a membership of 2,777,513 with total assets of £60,597,446; or an addition of upwards of two and one quarter millions sterling during the year. For the convenience of classification in the report, the Societies are divided into three groups: (1) Societies for carrying on Industries and Trades; (2) Societies for carrying on Businesses; and (3) Land Societies. Group (1) comprise ordinary co-operative societies, engaged principally in the purchase and sale of food, clothing and everyday necessaries. During the year 1909, 2,331 societies furnished returns. 250 of these were wholly "Productive" in their operation and 901 were wholly "Distributive," while 1,155 were wholly "Productive" and "Distributive." The number of members at the close of the year was 2,613,142. The aggregate sales of goods amounted to 112,414,308, from this, however, about thirty-four millions sterling should be deducted to allow for duplication, owing to the fact that co-operative wholesale societies and certain other productive societies did business almost entirely with the co-operative societies. The expenditure for salaries and wages exceeded nine and one quarter millions sterling. The balance on the trade of the year in 1,794 societies resulted in a profit of £11,085,715, and in 240 societies there was a loss amounting to £31,503. Of the profit, the sum of £88,761 was applied to educational purposes. The value of stock in trade amounted to £12,114,419. Buildings, fixtures and land also in trade amounted to £16,034,406 and investments and other assets to £29,151,275.

Group (2) is subdivided into three classes, Working Men's Clubs; Financial Businesses and a small group of sixty-nine societies with objects of a miscellaneous nature. Returns were made by 343 Working Men's Clubs having a membership of 111,219. Total receipts of these Clubs during the year amounted to £471,414 and expenditure £476,111.

Eighty-five societies engaged in the business of banking and other monetary transactions showed an aggregate membership of 11,509. Receipts amounted to £423,416. Forty-two societies had balance of profit amounting to £9,837; and seventeen societies had losses.

The Land Societies are divided into two groups (*a*) societies comprising the Ordinary Land Purchase Societies; and (*b*) Small Holdings and Allotments Societies; the former comprising Societies purchasing and owning land for re-sale to members, principally for residential purposes, and the latter for the acquisition of land for the promotion of small holdings and allotments, either under the Industrial and Provident Societies Act alone, or in conjunction with the Small Holdings and Allotments Act. In 1909 returns were furnished by 136 ordinary Land Purchase Societies with a membership of 18,819. The total receipts for the year amounted to £898,269. Land purchased was valued at £22,344, and land sold at £20,622. The sum of £154,604 was advanced upon mortgages and re-payments of mortgages. At the close of 1909 returns were made by 146 Small Holdings and Allotments Societies with an aggregate membership of 7,925. The Co-operative Societies have acquired 4,761 acres for the purpose of small holdings. Allotments by these Societies comprise an area of 917 acres at an annual value of £1,963.

Statistics of British Empire.

Statistical abstract for the British Empire in each year from 1895 to 1909, Seventh number, Wyman & Sons, Limited. London: pages 289, price 1s., 3d.

The Report of the Statistical Abstract of the British Empire in each year from 1895 to 1909 gives the area and population of each part of the Empire according to the last three decennial censuses and as estimated at the end of 1909, with the population of the large cities and towns within the Empire at the same periods. Statements of the trade of the British Empire show the annual trade of the Empire as a whole with the principal foreign countries from 1898 to 1909; the trade of each part of the Empire with these countries in 1898 and 1909; the trade of each part of the empire with all foreign countries from 1895 to 1909. Similar statistics are given for the trade in certain staple articles. There are tables showing the total trade of the United Kingdom with each other part of the British Empire and the trade of the United Kingdom with other parts in certain staple articles, also, statistics with regard to Intercolonial trade. A number of tables are given illustrating the shipping of the British Empire which show the net tonnage of vessels built from 1901 to 1909; tonnage of vessels on the Register in each part of the Empire and the tonnage of vessels entered and cleared at each port of the Empire from 1902 to 1909. Further statistics of the production and consumption of staple articles within the Empire for each year from 1895 to 1909, and statistics of British Protectorates showing the area, population and trade are given in appendices.

UNITED STATES REPORT.

Industrial Statistics of Maryland.

Nineteenth annual report of the Bureau of Statistics and Information of Maryland. Baltimore, Maryland, 1910. Pages 357.

Among the subjects discussed in the Nineteenth Annual Report of the Bureau of Statistics and Information of Maryland are child labour, factory inspection, strikes and lockouts, prices and cost of living, acreage, production and value of farm products, average prices and value of farm animals, current prices of grain, State mine inspection, mineral products, immigration, convict labour, new incorporations.

Special attention has been paid in Maryland to child labour. The law prohibiting the employment of children under 16 years of age for more than ten hours in any one day was amended at the last Session of the General Assembly, by imposing a fine for violation and investing the power to enforce the law in the Bureau of Statistics and Information. During the year 22,950 places were inspected, an effort being made to inspect every place in which children were employed. Only two arrests for violation of the Child Labour Law com-

pared with four in 1909, nine in 1908 and forty-two in 1907. The Law prohibiting the employment of children under 16 years in singing, playing on musical instruments, etc. was also enforced by the Bureau, there being three arrests made for its violation. At the last Session, a Law prohibiting the employment of children by telegraph, telephone and messenger companies was passed. Efforts were made by the Bureau to lessen the number of workrooms in tenements and dwellings, with the result that only five per cent. of the 65,031 men, women and children engaged in the manufacture of clothing are employed at their homes. The increased demand for labour, both skilled and unskilled, reduced the work of free employment bureaus and during 1910 there were only 151 applications for positions compared with 255 in 1909.. The number of employers applying for help was seventy in 1910 and fifty in the previous year. The Bureau was not called upon during the year to act as mediator or arbitrator between employer and employé, as no strikes or lockouts of sufficient importance took place.

OTHER REPORTS RECEIVED.

Canada.—Report of the Department of Trade and Commerce for the fiscal year ending March 31, 1910. Part VI, Subsidized Steamship Services. Part VII Trade of Foreign Countries and Treaties and Conventions.

Department of Mines, Chrysotile-Asbestos, its occurrence, exploitation, milling, and uses, by Fritz Cirkel, M.E.

Department of the Interior, Forest Fires and Railways, by R. H. Campbell; Annual Report of the Topographical Surveys Branch, 1909-1910.

Fourth Annual Convention of the Western Canada Irrigation Association, Kamloops, B.C., August 3, 4 and 5, 1910.

Ontario.—Appendix to Annual Report of the Agricultural Societies of the Province of Ontario, 1910.

Sixth Annual Report of the Ontario Vegetable Growers' Association, 1910.

Forty-first Annual Report of the Inspector of Prisons and Public Charities, etc., 1910.

Feeble-minded in Ontario, Fifth Report for the year 1910.

Ninth Annual Report of the Temiskaming and Northern Ontario Railway Commission, for year ended 31st. October, 1910.

Report on the operation of the Liquor License Acts, Ontario, for the year 1910.

Annual Report of the Bureau of Industries for the Province of Ontario, 1909, Part III, Municipal Statistics.

British Columbia.—Public Accounts for the fiscal year ended 31st March, 1910.

Great Britain.—Royal Commission on the Poor Laws and Relief of Distress, appendix volume XI. Miscellaneous.

Australia.—Bureau of Census and Statistics: Trade, Shipping, Migration, and Finance of the Commonwealth of Australia, for the month of October, 1910, Bulletin No. 46; and for the month of November, 1910, Bulletin No. 47. Population and Vital Statistics, for the quarter ended September 30th, 1910, Bulletin No. 23.

United States.—Commonwealth of Massachusetts: Third Annual Report on Changes in Rates of Wages and Hours of Labour, 1909. Tenth Annual Report on Strikes and Lockouts, 1909.

Belgium.—Annuaire de la Législation du Travail, 13e Année, 1909.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting abour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

ONTARIO CASES.

Master and Servant.—Restraint of Employment.

UPON an appeal by the defendant from the judgement of a Divisional Court (reported in the March number of the *Labour Gazette*) reversing the judgement of Chief Justice Mulock at the trial, and directing judgement to be entered for the plaintiffs in an action based upon an alleged breach of the covenant in restraint of trade, the Court of Appeal allowed the appeal from the Divisional Court and restored the judgement at the

trial dismissing the action, with costs throughout.

The judgement of the Court was delivered by Chief Justice Moss, who said that the only substantial question argued was whether the agreement in question offends the rules respecting agreements in restraint of trade. It is limited as to time, but as regards space it extends to the whole and every part of the Dominion of Canada. In this sense, it falls within the category of a general as distinguished from a particular or partial restraint. The prohibition extends to every kind of business carried on by plaintiffs under their corporate powers and to the limits of the Dominion of Canada. It contains no words which would render the covenant divisible or capable of being construed so as to refer to one branch of the business only. Indeed, the argument of the plaintiffs is, that the branches are not severable or to be severed, because, in the manufacture of whitewear, resort must be had to laundering processes, and that the defendant could not manufacture whitewear without carrying on the business of a laundry. It follows that to restrain the defendant from carrying on or being concerned in a laundry business shuts him out of the manufacture of whitewear as well. The case is, therefore, to be dealt with as upon an agreement whereby the defendant is restrained from taking any part in any business of a similar kind to either branch of the plaintiff's business, not only in or within a named radius from the city of Toronto, where the plaintiffs' factory and laundry are situate, but in any of the provinces or territories within the limits of the Dominion. The question is, whether this extensive and far reaching restraint upon the prima facie privilege of a citizen of the Dominion to engage himself in that occupation with which he is best acquainted, and upon which he chiefly, if not wholly, relies as a means of livelihood, was or is reasonably necessary for the plaintiffs' protection in their business. In considering this question, the salutary rule, so frequently invoked in cases like this, as to maintaining and if need be enforcing contracts deliberately entered into by persons of full age is, of course, not to be overlooked. Nor, on the other hand, are the circumstances that the defendant was, at the time of entering into agreement, a new-comer, unfamiliar with the country and its extent and with the manners and ways of its people, or that the agreement was prepared by the plaintiffs, or their legal advisers, and that, by its terms, the defendant was in great degree placed in the plaintiffs' power. They alone had power to terminate by notice, and it was possible for them, by the exercise of that right, within a few months from the date of the agreement, to have rendered the defendant subject for three years to all the restraints placed upon him by the agreement.

Restraints, which may fairly be regarded as entirely reasonable when imposed in connection with the sale of a business or goodwill, or with any transfer of patent rights, or of a trade secret, or with the dissolution of a partnership, should not be accepted in all cases as necessarily or even approximately applicable to restraints imposed upon employés to whom the only consideration for their covenant is employment and receipt of wages or remuneration for a more or less certain number of years. Such persons are ordinarily not on the same plane with one who has disposed of a very extensive business, which, by its very nature, embraces world-wide interests and connections, and involves dealings and transactions with most of the nations of the globe, and has received thereto a very large sum by way of purchase money.

Can it be said that a restriction which practically drives the defendant, who is not now a young man, out of the only occupation in which he is at all adept, unless he quits the Dominion of Canada, is reasonably necessary for the protection of the plaintiff's business? No other or lesser area is prescribed, and the covenant or agreement is not capable of divisibility. Only the one area is included, and, having regard to that, to the testimony, and to the principles recognized in the cases, the proper conclusion should be that the area is larger than is reasonably required for the protection of the

plaintiffs' business, and that the covenant or agreement is oppressive and therefore unreasonable and not valid in law.

The appeal should be allowed and the judgement at the trial dismissing the action be restored, with costs throughout.

(Allen Manufacturing Co., v. Murphy, 2. O.W.N. 877.)

Alien Labour Appeal.

This was an application to quash the conviction made on the 3rd January, 1911, by his Honour, Judge Fitch, whereby, upon the information of Knute Olson and Ed. Olson, he convicted the defendants, Johnson & Carey Company Limited, under the Alien Labour Act, R.S.C., ch. 97, Sec. 5, of having unlawfully imported into Canada alien labourers, contrary to the said Act, and imposed a fine of $500.

Among a number of objections taken to the conviction is the following:

5. That no written consent to the prosecution of the defendants was procured or filed as required by Sec. 5 of the said Alien Labour Act.

Upon the argument it was not contended that "no written consent" had been procured, but that the one given was not sufficient. This alleged consent is in the following words, "I hereby consent to proceedings being taken against Johnson & Carey Co., Ltd., for breach of the Alien Labour Act in hiring K. Olson and Ed. Olson against the terms of said Act," Dec. 20th, 1910, (signed) C. R. Fitch, District Judge." This alleged consent is written below a typewritten notice in the following words, "In the District Court of the District of Rainy River, in the matter of the Alien Labour Act, and in the matter of Johnson & Carey Company, Limited. Take notice that an application will be made on behalf of Knute Olson and Ed. Olson, on Tuesday the twentieth day of December, A.D. 1910, at the hour of ten o'clock in the forenoon, before his Honour Judge Fitch, at his Chambers in the Court House, Fort Frances, for an order directing a prosecution of the above named Johnson and Carey Company, Limited, for breaches of the above Act. Dated at Fort Frances this sixteenth day of December A.D. 1910. H. A. Tibbetts, Solicitor for applicants."

It is contended on behalf of the applicant that such a consent is insufficient under the terms of the Act upon the authority of Rex vs. Breckenridge, 10, O.L.R., 459, in that the time when and the place where the offence under the Act is alleged to have been committed are not set out at all in the consent, nor is the particular offence intended to be charged. In the report of said case at page 461, Meredith, C. J., in delivering the judgement of the Divisional Court, over which he was presiding, says, "The written consent should, in my opinion at the least contain a general statement of the offence alleged to have been committed, not necessarily in the technical form which would be required in an information or conviction, but mentioning the name of the person in respect of whom the offence is alleged to have been committed and the time and place with sufficient certainty to identify the particular offence intended to be charged."

The consent in the present case contains no mention of the time when, or place where any offence under the Act is alleged to have been committed, and the nature of the offence is very indefinitely set forth in the words, "in hiring K. Olson and Ed. Olson against the terms of said Act."

I think the case cited is in point and the conviction must be quashed, upon the ground that no sufficient consent was given to proceedings being taken under the Act.

Having come to this conclusion, I do not think it necessary to deal with the other grounds raised in the Notice of Motion. The conviction will, therefore, be quashed with costs.

The money paid into the Court by way of fine and as security for costs on the appeal, will be paid out to the applicant.

Ontario Companies Act, 1907, Section 88. Recovery of Wages as Mineralogist.

Plaintiff brought action to recover $2,500 for personal services rendered defendants as a mineralogist. Defen-

dants denied any knowledeg of any contract of hiring or of services rendered, and moved before the Master in Chambers for particulars of statement of claim before putting in statement of defence. The Master held (16 O.W.R. 947, 2 O.W. N. 46), that defendants were entitled to particulars as to the contract of hiring, but that particulars as to services rendered could be had on examination of plaintiff for discovery. Subsequently, on the trial of the action before Mr. Justice Sutherland, he decided that, at a certain meeting of defendant's directors held on January 7, 1909, plaintiff had been appointed to a position at the head of the defendant Company at the salary named ($2,500); that such appointment was ratified and confirmed; that his employment was not intended to cover the technical duties of a mineralogist, but that he was to do any work he was called upon to do for the Company; that the officers of the Company knew that he was constantly in attendance at the head office of the Company, and that he was doing work in connection with the Company; that the resolution appointing him stood unchallenged and unaltered during the whole of the year for which he claimed salary; and that other officials appointed by similar resolution and at larger salaries were being paid by the Company. The plaintiff, therefore, was entitled to judgement for $2,500 with interest, and with costs of suit.

(Bartlett v. Bartlett Mines Limited, 18 O.W.R. 865.)

Damages Recoverable by Teamster.

In an action tried by Chief Justice Falconbridge to recover $1,245 for teaming done by the plaintiff for the defendants, the plaintiff claimed $5 per day, or 50 cents an hour for each man and team, while the defendants alleged that the price to be paid was $4 per day, or 40 cents an hour, and paid $1,000 into Court. The Chief Justice said that the plaintiff had failed to establish a contract by telephone to pay $5 a day, or 50 cents an hour. The plaintiff swore that he said twice that the charge would be at that rate, and he was corroborated as to that, but he did not swear that this was assented to, and the person who was speaking to him, on behalf of the defendants, denied that he assented. The other teamsters hired by the defendants were getting only $4 a day. And, as to a *quantum meruit*, the plaintiff failed to satisfy the onus of proof that the rate ought to be $5 a day. The money paid into Court was sufficient to satisfy the plaintiff's claim. Judgement for that amount, without costs to either party, and order for payment out of Court to the plaintiff of the $1,000.

(Montgomery v. Cockshutt Plough Co., 2 O.W.N. 924.)

Master and Servant.—Inconsistent Findings of Jury.

In an action tried by Mr. Justice Latchford and a jury, the plaintiffs claimed for damages for the death of Frederick Miller, the father of the plaintiffs, while working in the defendant's sawmill, by reason of the negligence of the defendant, as alleged. The jury found, in answer to questions: (1) That the death of Miller was the result of an accident which occurred in the defendant's factory on July 12, 1910; (2) that the accident was caused by the piece of wood exhibited, while in the hands of Miller, coming into contact with the saw exhibited and flying back and striking him on the abdomen and causing death; (3) that the saw which Miller was using was a dangerous part of the machinery of the defendant's factory; (4) that the saw was not, as far as practicable, securely guarded; (5) that the saw would not have been securely guarded, so as to prevent the accident, if Miller had used the guard or divider with which the defendant had furnished him; (6) that Miller could, by the exercise of reasonable care and diligence, have avoided the accident; (7) that his want of reasonable care and diligence consisted in his not using the appliance provided as a guard; (8) that the plaintiffs were entitled to $1,500 damages, less $150 already received.

The trial judge said that it seemed impossible to reconcile the fifth finding with the sixth and seventh. In attempting to explain the inconsistent answers, the foreman, pointing to the divider, said that the jury did not consider it a guard which would prevent a piece of wood from falling on the saw, and that Millers' negligence was "a matter of a little bit of carelessness in dropping this wood." In

other words, the appliance, if in place, would not have been effective in preventing what actually occurred, and Miller's negligence consisted in letting fall the board that he was trimming and not, as stated in the seventh finding, in not using the appliance provided as a guard. The result is a miscarriage, or at least a postponement, of justice. There can be no possible doubt that it is an abuse of language to call the divider a guard. It was not used and could not be used when the saw was cross-cutting, but only when the saw was ripping or edging, and then its function was to act as a wedge to widen the saw-kerf, and thus prevent binding, especially by hard or knotty woods. It is properly a splitter or divider. Its crescent-shaped end, rising near and slightly over the back of the saw, does indeed afford some protection; but the whole front and much of the upper edge of the saw—and it was the contact of this upper edge with the board in Miller's hand that caused his death—was absolutely unguarded. It was painful to hear the defendant and several of his employés describe, upon oath, the splitter as a guard; and, while the action should be dismissed, the dismissal should be without costs.

(Miller v. Kaufman, 2 O.W.N. 925.)

Damages for Negligence.—Improvident Release.

Upon an appeal to a Divisional Court by the defendants from the judgement of Teetzel, J., it appeared that the plaintiffs, Alice Gissing and her husband, Albert A. Gissing, brought action against the T. Eaton Co. to recover $5,000 damages for injuries alleged to have been inflicted on the plaintiff, Alice Gissing, by rolls of oilcloth that were standing in the defendant's store toppling over and falling on her. At the trial judgment was given Alice Gissing for $750 and costs. Defendants set up a release for $50 signed by the plaintiff, in answer to the claim, and the trial judge tried that question first, before submitting the main issue to the jury. He allowed the plaintiff at the trial to amend her reply, setting up that the ease or alleged statement was improvident and inadequate, and not such as should be allowed to stand in answer to her claim.

The judgement of the majority of the Court was delivered by Chancellor Boyd who said that there had been a double trial, first on the question of the release, by the trial judge, and then by the jury on the question of injuries to the plaintiff and damages. The trial judge decided that the alleged settlement did not furnish an answer to the plaintiff's claim. The verdict for $750 shows the estimate which the twelve men composing the jury placed upon the plaintiff's injuries. It is true that in the beginning, Mrs. Gissing was willing to release the Eaton Company from all liability on payment to her of $200, and if that demand had been acceded to, it might have been a fair settlement and this case would never have been here. But $50 was grossly inadequate, and was not commensurate with the injuries sutained by plaintiff, who suffered a serious injury and is entitled to substantial damages. It cannot be said that the parties were dealing on equal terms. The woman was in bed; her leg was benumbed; she had that day suffered from a fainting spell caused by the pain from her injury; she was worried about the health of her husband, who was suffering from heart failure, and who was in a state of trepidation. Black, the claims agent of the defendants, who negotiated with her, was an astute, alert man, who thoroughly understood the business in hand and its consequences. The trial judge credits what the woman says of the matter. He also says in his judgement; "Black had alleged that they were prepared to prove by witnesses that she had not got hurt in the way she claimed at all, which, together with the fact that she had lost or forgotten the address of the only witness whom she had in mind to prove her case, would be circumstances which, in her then condition, would probably unduly influence her in accepting any proposed compromise." Looking at all the circumstances I am not able to say that the judgement should be disturbed. The appeal should be dismissed with costs. Mr. Justice Middleton dissented.

(Gissing v. Eaton Co., 2 O.W.N. 1021.)

Appeal in Accident Case Dismissed.

The Court of Appeal has dismissed the appeal of the Grand Trunk Railway Company from the decision of Mr. Justice Middleton at the trial at which the railway was mulcted for $2,000 for the death of James A. Griffith, a labourer at the Hamilton Steel and Iron Company's works. Mr. Justice Meredith thought that there should be a new trial. Griffith, who lived at Rockwood Park, was killed at the Kenilworth crossing on December 29, 1909, while he was going home from work at 6 o'clock. Just at the point of the accident the high fence of the Hamilton Jockey Club hid the view of the track.

Fined for Smuggling Aliens.

For assisting aliens to evade the Canadian immigration officers, Daniel Surtig, a Michigan Central section foreman, has been fined $50 and costs by the police magistrate at Windsor. Surtig had a system devised for bringing the aliens over the line, using his job with the railway company as a means of procuring time-tables which were given the newcomers, with a set of instructions to pose as railroaders. Immigration Officer Brien detected the scheme and made the arrests, including that of Surtig.

QUEBEC CASE.

Violation of Factories' Act.

"What are the Inspectors doing and where are they?" This was the query of Mr. Recorder Dupuis after he had heard the evidence in the case of Jos. Savard, a foreman at the Hochelaga Cotton Mills, charged with having struck a boy employed in the factory, George Prevost, under fourteen years of age. "It is a shame," said the Recorder, "to see parents becoming the accomplices of the manufacturer in breaking the law. Fathers, mothers or guardians will swear falsely that a child is above fourteen. Scores of boys and girls under the legal age are employed by the manufacturers of this city, and the inspectors see nothing. Even if they did see, documents prepared by those interested would likely cover the guilty parties unless some one prosecuted the parents for perjury. The Inspectors paid by the Government should report the manufacturers who thus violate law, but where are they and what are they doing?"

Savard was fined $5 and costs, the case being one of simple assault.

MANITOBA CASES.

Fined for Deserting His Employment.

An interesting light was thrown in the Winnipeg Police Court on the progress of affairs in the Manitoba Iron Works moulding shop since the strike of the moulders last fall, when the piece system was introduced with the object of antagonizing the union. Fred H. Hilkins was charged by the company with deserting his employment. It appeared that he had been brought from Montreal, and had been advanced the price of his ticket. He signed a contract with the Manitoba Iron Works at a scale of 32½ cents an hour. If he remained in their employ for six months the fare advanced him would not be deducted, but during this six months it would be deducted from his salary in weekly instalments.

T. R. Deacon, the general manager of the iron works, stated that the man had reported to work but had immediately left the premises without giving any reason. He also said that during the past year he had sent fares to various points of the Dominion for no less than 100 men. He argued that Hilkins had broken his contract. Hilkins set up the defence that the iron works was not an open shop, as had been represented in Montreal, and that it was a closed shop, no union man being permitted to work there. This argument did not appeal to Magistrate Daly, who said that it was not a matter of union or non-union, it was whether the defendant had broken his contract or not. He found that he had done so and fined him $20.

The defendant having stated that his conscience would not allow him to work in the shop any longer when he found its character, the solicitor for the company asked permission to read a letter which the firm had previously received from him, in which he had stated that he had no sympathy with the unions and that he had helped to smash a strike once before.

APPENDIX II.

DIRECTORY OF LABOUR ORGANIZATIONS IN CANADA—Continued.

Locality.	Name and Number of Organization.	Secretary.	Secretary's Address.
	TRADE UNIONS.

THE

LABOUR GAZETTE

JUNE, 1911.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF MAY, 1911.

I.—GENERAL SUMMARY.

A marked improvement in the general tone of industry, and a corresponding increase in the activity of general labour took place in the second half of May. This was largely the result of favourable weather conditions which brought on the growing crops with exceptional rapidity and left the agricultural outlook at the close of the month in a condition which compares satisfactorily with that of any previous year. On the commercial life of the community the effect had been felt at the close of the month in an increasing buoyancy of orders. The outlook in the manufacturing industry has also been affected in a similar degree. A feature of the month was the rapid absorption of the supply of general labour in view of extensive railway construction, building and civic improvement work that has been planned for the present summer season, the outlook being on June 1, that in each of these branches the year will see an exceptionally large amount of work completed. This absorption has taken place notwithstanding the heavy proportions of the immigration movement, which provided a continuous increase in the supply at the larger points of distribution. The lumbering and mining industries also reported a good month, though market conditions were somewhat dull in the former. Fishing has been quiet. Summing up, it may be said that the general market for labour was buoyant on June 1, and that the outlook was for a prosperous summer season in the leading branches of employment.

Changes in Wages and Hours of Labour.

The following is a statement, by industries and groups of trades, of the more important changes in wages and hours of labour, information concerning which was received at the Department of Labour during May, 1911.

Lumbering.—Axemen and boomsmen (140) at Sillery, Que., received an advance from $1.60 and $1.80 to $2.00 and $2.20 per day.

Building trades.—Carpenters and joiners (250) at St. John, N.B., received an advance from $2.50 to $3.00 per day. Plumbers, roofers and tinsmiths (sixty-four) at Quebec, Que., received an advance of one cent an hour, from 20 to 27½ cents to from 21 to 28½ cents an hour. Builders' labourers (225) at Ottawa received an advance from 25 to 28 cents per hour, and a reduction from 50 to 44 hours per week. Painters and paperhangers (100) at Ottawa received an advance of three cents an hour on a scale ranging from 25 to 33 cents per hour, the advance dating from April 1. Masons and bricklayers (400) at Ottawa, received an advance from 50 to 52 cents per hour, and a reduction in hours from nine to eight per day. Stonecutters (400) at Toronto, made an agreement for an increase from 50 to 52½ cents

The LABOUR GAZETTE, in its accounts of proceedings, abstracts of reports, legal decisions, quotations, or other records of matters of concern to labour, is not to be regarded as necessarily endorsing any of the views or opinions which may be expressed therein.—Ed.

per hour for the season of 1912. Bricklayers (1,500) at Toronto reached an agreement providing for an increase from 50 to 52½ cents per hour in the years 1911 and 1912, and 55 cents per hour in 1913. Plumbers and steamfitters (sixty) at Hamilton, Ont., received an advance from $16.50 to $17.60 per week. Carpenters at Welland, Ont., received an increase of minimum scale from 30 to 35 cents per hour. Plumbers and tinsmiths and steamfitters (thirty-one) at St. Catharines, Ont., received an increase from 30 to 35 cents per hour, assistants, from 15 to 25 cents per hour. Bricklayers and masons (100) at Berlin, Ont., received a reduction in hours from 54 to 48 according to an agreement of last year. Builders' labourers (150) at Berlin, Ont., received an increase of two cents per hour and a reduction in hours from nine to eight. Bricklayers (seventy-eight) at Brantford, Ont., received an advance from 45 to 48 cents per hour. Carpenters at Brandon, Man., (thirty-eight) received an increase from 35 to 40 cents per hour. Stonecutters (130) at Calgary, Alta., received an increase from $27.50 to $28.60 per week. Plumbers and steamfitters (twenty-five) received an increase in wages from $24.20 to $25.30 to date from July 1, and to $26.40 to date from July 1, 1912. Bricklayers (300) at Vancouver, B.C., received an advance from $5.00 to $6.00 per day. Plumbers, steamfitters and gasfitters (sixty) at Victoria, B.C., received an advance from $4.50 to $5.00 per day. Plasterers (fifty) at Victoria, B.C., received an increase from $5.00 to $5.50 per day from May 15 to August 15, and $6.00 per day after that date. Carpenters, (800) at Victoria, B.C., received an increase from $4.00 to $4.25 per day from May 16 to July 31 and $4.50 per day from that date.

Metal trades. — Electrical workers (twenty-five) at Halifax, N.S., received an increase from 25 to 27 cents per hour from May 25 to July 1, and to 30 cents per hour after that date. Sheet metal workers (seventy) at Ottawa, Ont., received an advance from 30 to 35 cents per hour minimum wages, dating from January 1. Iron moulders (thirty) at Ottawa, Ont., received an advance from $2.50 to $2.75 per day dating back to January 1. Iron moulders and coremakers (267) at Toronto, Ont., received an advance amounting to from $15.00 to $16.75 for coremakers and from $16.75 to $17.25 for moulders. Electric linemen (400), at Toronto, Ont., were granted increases from 31 to 33½ cents, from 28 to 30½ cents and from 25 to 27½ cents per hour. Electrical workers (sixty-five) at Hamilton, Ont., received an advance of five cents per hour, from $16.20 to $18.90 per week. Electric furnace tenders (twenty) at Niagara Falls, Ont., received an increase from 25 to 27½ cents per hour, with a reduction of men from three to two per furnace. Iron moulders (thirty) at Guelph, Ont. accepted a reduction in piece work prices. Employés in car department, Canadian Northern Railway (600) at Winnipeg received an advance of an additional two cents an hour from June 1. Electrical linemen at Calgary (eighteen) received an advance amounting to from $22.95 to $27.00 per week. Electrical workers employed by the Alberta Government received increases as follows: linemen, from $3.00 to $3.75 per day of nine hours; exchange foremen and cablemen, from $3.75 to $4.50 per day; foremen in charge of plants in cities, from $100 to $110 per month; troublemen, from $80 per month with no extras for overtime to $3.00 to $3.50 per day and extra for overtime and incidentals. Moulders (fifteen) and machinists (five) at Calgary, Alta., received an increase from $20.70 to $23.60 per week dating from April 1, and a reduction in hours from 59 to 55 per week.

Woodworking trades. — Patternmakers (six) at Peterborough, Ont., received an advance amounting to from $16.50 to $17.87½ per week, dating back from April 18, and fifteen patternmakers at Peterborough received an increase from $16.50 to $17.32½ per week. Woodworkers (42) at Toronto received an advance of 5 per cent., their average wages having been 27 cents per hour. Carpenters and machine hands of planing mill (forty) at Berlin, Ont., received an increase of 10 cents per day, equivalent

to an increase in the maximum from $13.27 to $13.86 per week.

Printing trades.—A slight increase was granted to some printers at Fort William and Port Arthur.

Railway service.—Employés in the car department of the Canadian Northern Railway (600) at Winnipeg, Man., received an increase of 2 cents an hour, with an additional 2 cents from June 1. Maintenance of way employés (200) of the Canadian Pacific Railway received an advance dating back to December 1, amounting to 15 cents per day for trackmen and bridgemen, and $5 per month for pumpmen and signal men.

General transport.—Teamsters (225) at Victoria, B.C., received an advance from $2.50 and $2.75 to $2.75 and $3.00 per day. Teamsters (fifteen) at Hamilton, Ont., received an increase from 40 to 45 cents per hour. Teamsters (100) at Lethbridge, Alta., received an increase amounting to from $60 and $65 to $70 and $75 per month. Street railway employés (2,500) at Montreal, received an increase in wages from 19, 20 and 21 cents per hour to 20, 21 and 22 cents per hour, to date from July 1.

Miscellaneous trades.—Paper makers (forty-five) at Ottawa, were granted a reduction in hours from 11 and 13 to 8 per day, to date from June 1, the wages being correspondingly reduced.

Unskilled labour.—Corporation labourers (sixty) at Berlin, Ont. received an advance of 20 cents per day amounting to from $9.44, $10.62 and $11.80 to $10.62, $11.80 and $12.98 per week. Corporation labourers at Calgary, Alta., received an advance, making their wages 28 cents an hour.

Interruptions to Industry.

Among industrial establishments, etc., destroyed by fire or through other causes during April, as reported in the press of the Dominion, the following may be mentioned:—

Nova Scotia.—Sixteen buildings at Aylesford, loss, $20,350; warehouse at Halifax, loss, $4,000; college at Halifax, loss, $3,000; houses and woods at Hubbards, loss, $2,000; bush fires at Martin's River, loss, $10,000; barns at North Sydney, loss, $10,000.

New Brunswick.—Hennery near Dalhousie, loss over $1,000; foundry at Fredericton, loss, $30,000; house and barns at Grand Falls; church and property over four miles of territory at Highfield; lumber mill at Lepreau, loss $10,000; church at Nerepis; blacksmith shop and six barns at Sheffield.

Prince Edward Island.—Three buildings and standing timber at Brackley Point, loss $2,000; station at Mount Stewart, loss $2,000.

Quebec.—Stables and residence at Actonvale, loss, $6,000; hotel at Ahuntsic, loss $40,000; hotel at Back River, loss, $42,000; 3,000 to 4,000 cords of pulpwood at Beauce Junction, loss, $20,000; seven buildings at Beaurivage, loss $30,000; power plant and dwellings at Bedford, loss, $75,000; shop, restaurant and other buildings at Buckingham, loss, $125,000; estimated loss of $40,000 to $50,000 on Chaudiere river from floods; sawmill at Hetley, loss many thousands; sawmill at Les Eboulements, loss $7,000; seven houses at Longue Pointe, loss $16,000; grocery store and six houses at Montreal, loss, $20,000; machine factory at Montreal, loss, $100,000; business block at Montreal; coal shed and gear shanty with apparatus at Montreal, loss $10,000; corset factory at Quebec; rink, two factories and other buildings at Quebec, loss, $250,000; railway station at Richmond, loss, $5,000; church, house and convent at St. Cecile de Masham, loss, $50,000; eleven buildings at St. Johns, loss, $75,000; farms and woods near St. Sauveur des Monts, loss over $3,000; houses, barns and sheds at Stanbridge East.

Ontario.—Farmhouse and barns near Acacia; laundry, shoe shop, and carriage making shop at Brockville, loss, $10,000; hotel at Essex, loss, $12,000; sawmill and cheese-box factory at Holville; storehouse at Hamilton; general store at Keene, loss, $8,500; cheese-box factory and saw-mill at Kemptville; contents of grocery shop at Kingston, loss $6,000; village of Lake St. Peter; hardware store at Lanark, loss, $5,000; lumber yard at Lindsay, loss, $8,000; hotel at North Bay, loss $15,000; house, barns and stock near North Gower, loss $10,000; slaughter house at Owen Sound, loss $2,000; military buildings at Petawawa, loss $25,000; mill, rink, twenty-five boat-houses and two loaded freight cars at Peterborough, loss $30,000; saw-mill and machinery at Porcupine Power Plant, Metagami river, loss $25,000; school, residences, offices and stores in Porcupine District, loss $353,000; livery stable at Rainy River, loss $4,000; charcoal plant at Steelton; factory at Toronto, loss $3,500; hotel at Trout Mills, loss $15,000; wire fence factory at Walkerville, loss, $3,000; barn, live stock and hay at Welland, loss $2,500; barns, cattle, wagons and grain at Welland, loss $5,900.

Manitoba.—Homesteads in prairie fire; bush fires in Northern Manitoba and Saskatchewan, timber, homesteads, and railway bridges burnt; flour mills, elevator with flour house and engine room at Gilbert Plains; tent and mattress factory at Winnipeg, loss $15,000; garage, automobiles and gasoline at Winnipeg, loss, $250,000.

British Columbia.—Lumber mill at Burrard Inlet, loss, $20,000; mine at Michel.

Conditions in the Industries and Trades.

Conditions of employment during May in the several industries and groups of trades throughout Canada, as indicated by reports of correspondents to *The Labour Gazette*, and by information received by the Department of Labour from other sources, may be briefly summarized as follows:—

Agriculture.

From almost every section of the Dominion very favourable reports were

TABLE SHOWING STATE OF EMPLOYMENT IN

This table is based largely on the reports of the correspondents of *The Gazette* as published in the present issue several trades and industries throughout the Dominion. The table has reference only to the amount of employment headings in *The Gazette*. In tabulating the information in question, the terms employed are divided into two groups, active, very active; (2) quiet and very quiet.

received as to the condition of the crops. The cold and backward weather which prevailed during April was followed during the second week in May by a period of warmth with frequent showers. Growth, which up to that time had been slow, was exceptionally rapid throughout the second half of the month. Grain crops, vegetables, and fruits promised exceptionally well in the closing days of the month. Especially favourable were the reports received from western Canada, in many sections of which conditions were said never to have been more favourable at the corresponding season of the year. It is estimated that the total western wheat area will approach 10,000,000 acres.

Reports received from the Department of Agriculture of Ontario are to the effect that winter crops have on the whole come through well, though fall wheat and clover are variable. An unusually large amount of alfalfa has been sown this year.

The maple sugar season in the Eastern Townships, Quebec, has been pronounced the best in several years.

The second crop bulletin of the Saskatchewan Government shows a general increase in the acreage under wheat, oats, and flax; crop conditions throughout the Province are indicated as very satisfactory.

The Census and Statistics bulletin of the Department of Agriculture, Canada, for May, reports as follows:—

Fall wheat, which is grown chiefly in Ontario and Alberta, showed an average condition of eighty-two per cent. at the end of April, being eighty-nine per cent. in Alberta and eighty-one per cent. in Ontario. In Ontario, however, the April frosts were destructive in some regions; and from twelve to thirty-four per cent. of the area shown has been reported as winter-killed. The central counties, north of Lake Ontario, suffered worst, the average loss as reported being thirty-four per cent. In the western counties twenty-seven per cent. of the area in crop has been destroyed. In the southern counties, north of Lake Erie, the loss is ten per cent.; in the northern counties and districts 12·6 per cent.; and in the eastern counties, between the St. Lawrence and Ottawa rivers, fifteen per cent. For the whole of Canada the area winter-killed is reported to be twenty-one per cent., and the per cent. condition of the growing crop is eighty-two.

About 12·5 per cent. of the clover was heaved out by the spring frosts, and the average condition of hay and clover at the end of April was eighty-nine per cent. Alberta shows better than any other part of Canada, its average being 94·5 per cent. Nova Scotia comes next, with 93·75 per cent.; and in Quebec, British Columbia and Saskatchewan the condition is over ninety per cent. In Ontario it is eighty-six and in Manitoba eighty-five per cent.

The percentage of total seeding completed at the end of April was 21·35 in Quebec, forty-four in Ontario, forty-seven in Manitoba, 47·30 in Saskatchewan, 66·81 in Alberta and 76·90 in British Columbia. Manitoba and Saskatchewan had seventy per cent. of the proposed area of spring wheat sown at the end of April, and Alberta and British Columbia eighty per cent. The Maritime provinces had scarcely made a beginning of seeding operations at the end of April, and in Quebec barely one-fourth of the spring wheat, oats and barley were sown. In Ontario fifty-one per cent. of the spring wheat was in the ground, forty-four per cent. of the oats and 42·5 per cent. of the barley.

The report on the condition of live stock is good for all the provinces,—being ninety-five for horses, 92·43 for milch cows, 90·56 for other cattle, 93·32 for sheep and 94·51 for swine. Alberta is below ninety for horses, Manitoba, Saskatchewan and Alberta for milch cows, Manitoba, Saskatchewan, Alberta and British Columbia for other cattle, and Alberta and British Columbia for sheep; but generally the condition ranges about ninety per cent.

The opening report of the Fruit Division of the Department of Agriculture, Canada states as follows:—

No losses in Eastern Canada have been reported from winter-killing, except in the case of strawberries, and then only from limited areas. The losses reported have been less than for several years. For a number of winters, even when the conditions did not appear to be unfavourable, fairly serious losses from winter-killing have been reported. This was accounted for by the injuries which the trees received during cold series of winters from 1899 to 1904. Apparently normal conditions have been restored, and Canadian orchards are again strong and vigorous. The snow-fall was not excessive anywhere, and the orchards have escaped the ordinary sleet storms that nearly always prevail in one section or another.

The spring of 1911 is reported somewhat backward, but not excessively so; and in most cases the fruit growers report that this tardiness has been a positive advantage as it is likely to prevent losses from late frosts. Fairly heavy frosts were prevalent the first week in May, but no serious damage was reported. The latest reports indicate that rain is now needed in Eastern Canada. In British Columbia serious damage to the peach and cherry crop is reported as the result of frost.

Under date of May 23, the Commissioner of Immigration at Winnipeg reported as follows as to conditions in Western Canada:—

It is officially announced that the acreage in Province of Alberta under spring wheat will show an increase this year of thirty-three per cent. over last year, while the increase in acreage of winter wheat will be forty per cent. greater this year than last. Estimated acreage spring wheat last year 450,493 acres and this year 600,000 acres, winter wheat last year 142,467 acres, this year 225,000 acres. Grand Trunk Pacific Railway Company have commenced foundation of a new hotel near Fort Garry Station, Winnipeg, while the Canadian Northern Railway Company to-day announces intention to erect a palatial hotel on site of old Manitoba Hotel, Winnipeg, burned fifteen years ago. Crop outlook for this year is more promising than for some years past at this time of year; plentiful rainfall and sunshine causing rapid growth. Notwithstanding constantly increasing immigration, there is always scarcity of men for railway labour and farming operations. Canadian Pacific Railway Company start, on June 4, a new train direct Toronto to

Vancouver, and new train direct Winnipeg to Edmonton *via* Saskatoon. Latter will do journey in thirty hours.

Fishing.

Unfavourable weather interfered with fishing operations in the Maritime Provinces, and catches in some localities suffered in consequence. The lobster season opened on April 20, but the catches so far have been light, though the supply of lobsters is generally reported as more abundant than last year. Coastwise arrivals of fish in the closing days of the month were becoming heavier at Nova Scotia ports. Normal conditions prevailed on the Great Lakes. In British Columbia, the run of salmon has been usually light.

An order in council has been passed rescinding the fisheries regulations established in 1907 for the province of Manitoba and the district of Keewatin, and bringing into force a new set of regulations based on the recommendation of the royal committee appointed last year to consider the question of conservation of Manitoba fisheries.

The trapping season in northern Saskatchewan and Alberta is reported to have been a poor one.

Lumbering.

The dry weather which prevailed up to the middle of May has interfered with the drives in northern New Brunswick. Although conditions in this respect improved later in the month, it was feared that a considerable number of logs would be held back. Elsewhere conditions were more favourable. The mills were running steadily. Throughout western Canada conditions showed little change from the preceding month, the industry being characterized by activity, with prices firm.

Mining.

Extreme activity characterized the coal trade of Nova Scotia, full time with full staffs being worked in nearly all the collieries, the situation being more favourable from the standpoint of labour than for some time past. The shipping season, though late in opening, promises to be very heavy. The asbestos, mica, and metalliferous camps of Ontario and Quebec had resumed full activity. Production has been steady in the Cobalt camp and development work very active in the Porcupine district. In British Columbia, activity characterized operations in the metalliferous camps of the interior, but there was a falling off in coal production due to labour disturbances in the mountain section, and to a falling off in trade on Vancouver Island.

Manufacturing.

As in the previous months of the year, conditions in the manufacturing industry were very active in nearly every branch, and in nearly all localities. Industrial establishments were working to their full capacity, and in several cases additional workmen would have found employment. At several points extensions to factory buildings and equipment were under way.

At the first annual meeting of the Dominion Steel Corporations, Limited, the position and prospects of affairs were reported to be satisfactory. It was stated that the erection of a sixth blast furnace at Sydney was going forward at once.

The annual report of the Dominion Textile Company showed earnings for the year of $989,710, which is regarded as satisfactory by the Company, considering the high price of raw cotton during the past year. Sales amounted to $9,470,270, an increase of $726,563. The Company now has in operation 900 looms, 427,000 spindles, and employs 6,500 hands. The amount paid out in mill wages amounted last year to $1,875,000.

Railway Construction.

Conditions were very active. A steady increase in activity was reported in connection with the extensive operations under way throughout Canada. Construction camps have absorbed large numbers of common labour during the past month, especially in western Canada,

and men were in demand at several points. On the whole, however, the labour supply was better met than a year ago.

Orders have been placed for 107,200 tons of steel rails by the Canadian Pacific Railway Company, and for 115,000 tons by Mackenzie and Company, while the Grand Trunk Pacific Railway has orders for 80,000 tons for use on branch lines, and the National Transcontinental Railway for 60,000 tons. The Grand Trunk Railway Company has orders amounting to 37,500 tons outstanding.

Tenders for the erection of several stations and other buildings will be received by the National Transcontinental Railway Commissioners up to June 14.

General Transport.

Railway traffic has been well maintained, as evidenced by the increased earnings of all the important railway companies. Navigation was late in opening but has been characterized by unusual activity since. Longshoremen and canal employés have had a busy month.

The half-yearly statement of the Grand Trunk Railway Company shows an increase of nearly 2 per cent. in gross receipts and a somewhat smaller increase in working expenses.

Electric Railway Companies have had a busy month, earnings showing an advance over the corresponding period of 1910.

The following statement, prepared by the Grain Inspector, Fort William, Ont., shows the bushels of grain shipped by vessels from Fort William and Port Arthur, of the 1910 crop, from the close of navigation, 1910, to April 30, the last two figures in each column representing lbs:—

Destination.	Wheat.	Oats	Barley.
Canadian ports:			
Goderich	308,706'50	130,000'00	.....
Kingston	417,000'00	336,481'20	.....
Montreal	688,523'50	293,126'26	12,818'12
Owen Sound	75,000'00	.....	.....

Depot Harbour	113,108'40	.....	.....
	5,686,011'10	759,608'12	12,818'12

A policy of extensive development of the Intercolonial Railway System, is involved in the acquisition of the branch lines, plans of which were recently announced by the Honourable the Minister of Railways. Twelve branch lines in New Brunswick, Nova Scotia and Quebec are to be taken over under the terms and conditions of the act of last session respecting such leases. The railways are to be taken over under terms and conditions approved by the Managing Board, the value to be fixed by the Judge of the Exchequer Court upon the report of the Chief Engineer.

The total surplus of the Intercolonial Railway for the past year was $272,712. The total income for the year was $9,863,783, from which was deducted $600,000 for equipment account; $25,000 for revenue account on equipment; $76,000 to cover the cost of replacing the shops destroyed by fire at Campbellton; $5,000 per month expenditure on new fire account, in addition to all the general operating expenditures.

The following letter with regard to trespassing on railway rights of way was sent out during May by the secretary of the Railway Commission, to the attorneys-general of the Canadian Provinces:

"During the year ending March 31, 1911, one hundred and forty persons were killed and sixty-nine were injured while trespassing on railway property. The companies have been doing their utmost to prevent this unnecessary killing, but when they prosecute, many magistrates look upon the matter as so trivial that it is found most difficult to obtain convictions.

"Unless the offenders are punished, it will be impossible to lessen this death rate. It is regarded by this board as highly important that magistrates should appreciate the importance of this matter, not only as it affects the companies themselves, but also from the public point of view.

"In England the law is rigorously enforced against trespassers on railway lands.

"We are endeavouring to reduce the toll upon human life from railway operation, and it is discouraging to find 209 trespassers killed and injured in one year. Cannot steps be taken to bring to all magistrates the view that the laws should be enforced in all proper cases?"

A consolidation of the Richelieu & Ontario Navigation Company, with the Inland, the Northern, and Furness-Withy interests, was consummated during

May, when an agreement was signed by the representatives of the interests concerned.

The Trades.

Building.—The month just past has been a very active one for all branches of the building trades, except in a few localities. In nearly all of the points from which reports were received at the Department, the number of building permits issued to June 1 considerably exceeded those isssued to the corresponding date in 1910, while the value of the proposed buildings was very largely in excess of those of the preceding year. A scarcity of material hampered operation in a few localities, and labour disturbances in others; on the whole, however, the month compared favourably with the corresponding period in previous years.

Metal and woodworking.—Employés in these trades had a good month's employment, establishments in nearly all branches working to full capacity. Additional labour was in demand in several localities; examples will be seen in the reports of local correspondents elsewhere. As a further example, a communication from the Sudbury Construction and Machine Company of Sudbury, Ont., dated May 23, stated that the Company had difficulty at times in obtainnig the class of labour required, viz., machinists, boilermakers, patternmakers and moulders.

Printing and allied trades.—Printers and pressmen and allied trades had an active month.

Clothing.—Journeymen tailors, garment workers, hat and cap makers, boot and shoe workers, etc., reported favourable conditions of employment generally prevailing.

Textile.—Cotton and woollen mills were running steadily, with heavy orders ahead and full staffs employed.

Leather.—Tanners and curriers had a good month, and leather workers generally were active. Trade conditions were buoyant, with prices unchanged but firm.

Food and tobacco preparation.—Normal seasonal conditions prevailed among bakers and confectioners. Conditions were generally favourable in the tobacco trades, with cigar makers and tobacco workers active.

Miscellaneous.—Hotel and restaurant employés, retail clerks, etc., had a good month.

Unskilled labour.—This class of labour was in heavy demand throughout Canada in view of the extensive building, civic improvement and railway construction operations under way. Notwithstanding the heavy influx of immigration, the supply was fully absorbed in most localities, while in some districts a scarcity already prevailed. Wages were on or about the same level as at the corresponding period of 1910.

Canadian Trade and Revenue.

Foreign and Imperial trade.—During April, 1911, the total value of imports entered for consumption in the Dominion of Canada was $32,544,187, compared with $30,866,987 in April, 1910. The total value of domestic exports during April was $10,943,233, compared with $14-507,681 in April, 1910. During April there was an increase in exports of animals and their products. There were decreases in the products of mines, fisheries, forests, agriculture, manufactures and miscellaneous. The grand total of Canadian trade for April ,1911 was $44,421,827 compared with $45,-983,894 in April, 1910. In the reports of the Canadian Trade Commissioners an account is given of the lumbering market in Newfoundland as affecting Canadian forest products. It is stated that Canadian birch is used for shipbuilding and millwright purposes; trade in birch and maple flooring is springing up as local forests supply nothing suitable. The Canadian apple trade was reported to be unsatisfactory, but there was a growing demand for Canadian pears. There was a good market in Britain for spruce shooks for the textile trade. The Canadian trade in Cuba is reported to be rapidly increasing.

Domestic trade.—The general trade movement was not equal in volume to the previous year, but retail trade, however, was comparatively satisfactory.

Clearing House returns continued to increase in volume. The bank statement for April showed an increase in circulation, deposits, call loans, and current loans. The circulation of notes amounted to $89,796,521, compared with $85,779,-995 in March; bank deposits, $847,787,-299, compared with $831,204,258 in March and $768,273,252 in April, 1910; the current loans amounted to $712,032,-758, compared with $710,604,072 in the previous month.

The annual report of the Sterling Bank shows net profits of $96,825, compared with $92,832 in the previous year. The Imperial Bank, whose year ends at the close of April, has increased its capital and reserve during the past year, while circulation and deposits also show an advance; profits were the largest in the bank's history.

Notes.

The thirteenth annual convention of the United Commercial Travellers was held at Victoria, B.C.

The Civil Service Co-operative Supply Association of Ottawa, Ont., opened a store on the corner of Slater and O'Connor Streets, Ottawa.

At a meeting held at the Monument National in Quebec, the holding of a Child's Welfare Exhibition was discussed and approved, committees being appointed to deal with the details of the work.

The annual convention of the Ontario Labour Educational Association was held at Guelph, Ont., on May 24, with 120 delegates in attendance. Presidents of Ontario Trades and Labour Councils numbering over twenty were present. The formation of a Provincial Federation of Labour was discussed, and a resolution passed recommending the same to the Trades and Labour Congress of Canada. Officers for the year were elected as follows:—President, H. Palford, Hamilton; Vice-Presidents, W. J. Driscoll, Kingston; J. D. Jacobs, London; H. Robinson, Peterboro; T. Hall, Guelph; A. Plummer, Berlin; Secretary-Treasurer, J. C. Coles, Brantford; Editor, Jos. T. Marks, London.

The fifth annual report of the Dominion Steel Workers Mutual Benefit Society of Sydney for the year ending April 30, 1911, gives the following details as to the work of the Society during the past year. The number of claims for sick benefits presented during the year was 676; of these 370 were paid weekly benefits; twenty-one were outstanding at the close of the year, and the remainder involved no outlay. Fourteen members died during the year as a result of natural causes. The amount paid to members and their representatives for sick and mortuary benefits was $8,366.68. Cases of accidental injury to members during the year numbered 1,659; of these 890 were paid benefits, and the others involved no expenditure beyond surgical treatment. It is regrettable that eight members lost their lives as a result of accidental injury during the year. The direct outlay on account of accidents amounted to $13,928.49, a considerable increase over last year's expenditure. Outlay for Surgeons' fees was $5,420.22, and for hospital treatment of injured members $2,426.72. In all 1,260 claims were paid. The amount paid directly to members or their representatives and for surgical and hospital treatment was $30,142.11, a large increase over last year's expenditure. This was an average of $23.92 per claim paid.

In connection with the application of eleven rural telephone companies to the Board of Railway Commissioners for Canada for an order directing the Bell Telephone Company to provide them with long distance connection, an understanding was arrived at whereby a provisional arrangement will be entered into as an experiment between nine of the companies and the The Bell Telephone Company for the next twelve months.

The Federation of the Chambers of Commerce of Quebec held a meeting in that city on May 19.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

All branches of industry were active during May and all classes of labour were well employed. Prospects point to a busy season. The steel and coal industries continued active and much stimulated since navigation opened. The different foundries and factories of Sydney were active, and a fair start on what will no doubt be one of the busiest seasons of this district has been made. The tar and chemical works were very busy, as were also the cement works. All branches of the Sydney steel works were busy. Three furnaces have been running continuously and a fourth will be blown in about the first of June. This will largely add to the steel output. The foundations of a general office, costing $150,000, are being put in. Work is also progressing on the foundation for a new machine shop in the vicinity of McQuarrie's Crossing. The contract for the fertilizer plant has been let. It has been discovered that the basic slag from the open hearth furnace contains valuable fertilizing constituents, and this slag will be used in the plant under construction. Large quantities of machinery were brought in and unloaded during the winter and will be placed in position as soon as the foundation of the mills and other necessary work is completed.

The Sydney Mines steel plant continued active throughout the month and satisfactory results were obtained from the furnaces.

The coal industry was very busy and all the collieries worked full time. Preparations were made during the winter for large outputs and this may be a record year both in the Glace Bay and Sydney Mines districts.

The navigation season opened on the second of May, when westerly winds drove the drift ice from the coast. Since that time the coal and ore boats, fishing vessels and crafts of all kinds, have been coming into the harbours making the shipping brisk. Railway freights, however, continued heavy owing to the abundance of lumber and other material lying along the railways ready for loading when an available supply of cars could be procured.

The building trades and other outdoor workers were active. Carpenters will have a busy season but the supply of men at the present time is fully adequate to the work to be done. The wholesale and retail trades had a good month and a large volume of business was tranasacted. The labour unrest has almost disappeared from this district.

During the early months of the year, the employés of the Nova Scotia Steel & Coal Company working in the steel department at Sydney Mines formed what is known as the Sydney Mines Employés' Relief Fund of the Nova Scotia Steel & Coal Company, Limited. The fund is supported by a monthly contribution of the employés and amounts contributed by the Company. Weekly indemnity is paid to members for disability, sickness and injury, and at the death of a member a cash payment is made to the family of the deceased member. A weekly allowance is also provided for the widows and children of deceased members.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—If the shipping season was one month later this year, the growing season seems to be about two weeks earlier. The weather was dry and cold most of the month but it gave farmers a splendid chance to get their crops in under the best conditions. Much seeding and planting was done and farm work was generally well advanced.

Fishing.—Severe wind storms swept the coasts of Cape Breton during the early part of the month, which prevented fishing to any extent until the

latter part of May. Lobsters are plentiful.

Railway construction and employment. Work was resumed on the extension of the Intercolonial Railway by the way of Little Bras d'Or to Sydney Mines, and this part of the railway will be completed by the end of the year.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active and unskilled labour well employed.

WESTVILLE, N.S., AND DISTRICT.

Mr. Tom Hale, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions throughout this district were very brisk. Shipments for the month of April from the collieries of the district showed a fair increase over the corresponding month of 1910. There was a demand for men in nearly all departments in the mines. All the collieries were said to be short of men. The other industries throughout the district were fully employed, and in most cases on the lookout for men.

Large brick buildings are being built at the Allen shafts to replace the wooden ones erected in the early period. The Company also contemplates installing an electric plant and modern machinery.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy seeding. The weather has been exceptionally dry, attended with forest fires in different parts of the county, causing heavy losses in timber in many places.

Lumbering.—The firms were engaged shipping deal and other dimension timber to the various markets, and shipping ports throughout the Province.

Manufacturing.—The several industries throughout the district were in general fully employed.

Mining.—This industry was very active, the collieries working full time. Water shipments have started. The Drummond colliery has one steamer chartered for the St. Lawrence trade, this, added to the present land trade will no doubt make the district very busy during the shipping season.

Railway construction, and employment.—Large freights are being handled on the main lines. It is reported that there will be considerable railway construction work throughout different parts of the province in the near future.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were actively employed. Unskilled labour was active and in demand.

HALIFAX, N.S., AND DISTRICT.

Mr. A. J. Smith, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The industrial situation has not changed much since last month. There has been an increase in the number of building permits issued as compared with last month, but not at all sufficient to cause marked activity in the building trades. Of the few big contracts in hand, work on the new Young Men's Christian Association building is being pushed forward. Work along the water front has fallen off, but this is somewhat balanced by the increased staff employed on city sewer-building and street-cleaning work. As to future prospects there are indications of improvement in several lines. The new Intercolonial Railway piers, it is understood, are to be commenced just as soon as the preliminaries are concluded. There are four piers to be concluded under the Dominion Government's supervision. Each of them is to be approximately 800 feet long and 250 feet wide, and built of cement. There is also to be a temporary shed, 650 feet long, to relieve accumulated freight, etc., while the piers are being constructed. Work on the contemplated Halifax and Eastern Railway will soon be started. The company having failed to begin the building of this road, the work has been taken over by the Dominion Government, which will complete the seventy miles from Halifax to

Guysborough as a branch of the Intercolonial Railway. It is understood that the $50,000 deposited with the Provincial Government by the Company will be refunded and the plans already prepared by the Company will be availed of, so as to expedite immediate operations.

The electrical workers of the city have received an increase of wages. Early in May the local union demanded 30 cents per hour after May 17. The old rate was 25 cents per hour, nine hours per day. After several conferences and various offers had been made and refused the men went out and a settlement was finally effected May 25, when the men returned to work. The new agreement is for 27 cents per hour, beginning at once, until July 1, when the rate originally requested, 30 cents per hour, will go into force. The union numbers about twenty-five, and the new weekly scale until July 1 will be $14.58; after that date $16.20. The new contract will be for two years.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Recent wholesale quotations are:

Flour: Royal Household and Rainbow, $6.15–$6.20; Ontario Blends, $5.10–$5.20.
Butter: creamery prints, 27 cents; creamery boxes 25–26 cents; creamery 30-lb. tubs 26 cents; dairy, ordinary, 19–21 cents; dairy, rolls, 21–22 cents; dairy, prints, 23–24 cents.
Cheese, new, 13½ cents; twins, new, 14 cents.
Eggs, fresh, 20–21 cents.
Beef, forequarter, 7–8½ cents; hindquarter, 8–10 cents.
Mutton, 7–9 cents.
Lamb, cold storage, 13 cents.
Veal, 6–7½ cents.
Ham, smoked, 15–17 cents; fresh, 16 cents.
Bacon, roll, 12 cents; side, 18 cents.
Poultry, turkey, 16–18 cents, per lb.; geese, 16 cents, per lb.; ducks, 17 cents, per lb.; fowl, 12½ –16 cents, per lb.
Potatoes, P.E.I., bag, $2.50; N.B., $2.50; turnips, 150-lb. bag, $2.00.

Fishing.—Local fishermen had but poor catches, dry salt cod was scarce; salmon (fresh) was retailing in local markets from 30 to 35 cents per pound.

Manufacturing and *mining* were about normal.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers, plasterers and plumbers were quiet. Painters and decorators were fairly busy. Gas and steam fitters, stone cutters and builders' labourers were dull. Electrical workers were fairly well employed. Boilermakers had average employment. Horseshoers, shipwrights and caulkers were quiet. Other lines were about normal. Printers, pressmen and bookbinders had a good month. Tailors showed an improvement over April, but business in the custom line was not as brisk as usual, owing to chilly weather. Butchers and meat cutters were busy. Miscellaneous employments had average activity. Railroad men had a fair month. Longshoremen had a falling off as compared with April. Street railway men were busy. Unskilled labour was more active than in the previous month.

AMHERST, N.S., AND DISTRICT.

Mr. A. D. Ross, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour in all lines has been well employed during the past month. Building operations were in full progress, giving employment to a large number of carpenters, bricklayers and stone masons. A new school, which will cost when completed over $40,000, has been begun, and many residences are in course of construction. The Canada Car Company's shops, which were visited by a disastrous fire in April, are to be rebuilt in cement reinforced by steel. The work has already been begun. The Rhodes-Curry Company promises to be more than unusually active. Contracts for over $200,000 have been closed this month, including the extension of the Intercolonial Railway offices in Moncton and a fertilizing plant in Sydney. Taken all round, the general condition of the labour market is more than favourable. There are of course a large number of car workers out of their usual employment, due to the fire referred to. All manufacturing plants were working at their full capacity. Wholesale and retail traders report business well up to the average.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy seeding. The season so far has been cold and backward, but exceedingly dry and well adapted for putting in crops. Farm produce has a good home market with the exception of hay, much of last year's crop has been carried over to this year.

Fishing.—The lobster season opened on April 20 but it was ten days later before lines could be run owing to the ice on the coast, and the catch this season, so far, has been below the average.

Lumbering.—Large shipments of lumber are now ready for the European market, but complaints are made that steamers are scarce and freight high, which of course means a reduction in the profits.

Manufacturing.—All manufacturing industries were busily employed. Pay rolls were larger than ever in their history.

Mining.—The Springhill strike has been settled. It lasted from August 10, 1909, to May, 27 1911. The men accepted a reduction of ten per cent. and waived the right of recognition. The Company promises to reinstate as rapidly as possible, and it is expected that all the men will be taken back to work within forty-five days. Nearly 1,000 men and boys will resume work shortly. Other mines were working steadily with a normal output.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were well employed. Carpenters and joiners were busily engaged. Lathers and plasterers were active, stone cutters busy, builders' labourers active. Iron moulders were well employed. Iron workers and helpers, coremakers and machinists were busy. Electrical workers were active, and boiler makers busy. Wood workers were active. Carriage and waggon makers were busy. Car builders were not so well employed. Pattern makers were active. Printers were well employed. Pressmen had steady work. Journeymen tailors were well employed. Garment workers and shoemakers were very busy. Bakers and confectioners were busy. Butchers and meat cutters were active. Trunk and bag makers, and unskilled labour were well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during May was an improvement over that of April. The month found outdoor operations in full progress, with the activity common to the season of the year. The principal works under construction included the building of the Elmira Branch Railway, the Tracadie breakwater and several other public works. The announcement that about a quarter of a million dollars had been placed in the Dominion estimates for public works here, was heard with satisfaction by the labouring classes in this community. The letting of the contract for the new Zion Church and the preliminary work of preparing the ground for that structure, the starting of the construction of the new jail, were features in building circles during the month. There was a fair amount of shipping done and the wholesale and retail merchants report trade conditions normal.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The month was one of the busiest of the year for the farmer, and its closing finds tillage operations in full progress throughout the province. A long period of dry, cool weather, while not favourable for growth, enabled work to be done under favourable conditions, and no time was lost.

Fishing.—Lobster fishing, which is the main local industry, was prosecuted with the usual vigour. The catch on the north side was in excess of last year, but there was a falling off in other sections. The season on the south side from Cape Tormentine westward opened on the twenty-fifth.

Manufacturing.—The few factories were carried on under normal conditions.

Railroad construction and employment. Owing to the extremely dry weather, several stations caught fire and were burned. They will be rebuilt immediately.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, were active. Painters, paper hangers, and decorators were busy. Plumbers, gas and steam fitters, stone cutters and builders' labourers were active. Iron moulders, iron workers and helpers, machinists and engineers were busy. Steam engineers, electrical workers, linemen and sheet metal workers were active. Bicycle workers were busy. Woodworkers and upholsterers, carriage and waggon builders and patternmakers were active. Printers, pressmen and bookbinders, journeymen tailors, garment workers, boot and shoe workers, bakers, confectioners, butchers and tobacco workers, tanners and curriers, leather workers and saddlers were active. Barbers, delivery employés, clerks and stenographers were busy. Railroad conductors, locomotive engineer- and firemen, railroad telegraphers, trainmen, switchmen, trackmen, freight hand, lers, steamboat firemen and longshoremen were active. Teamsters and expressmen were busy. The supply for unskilled labour in its various branches was equal to the demand.

MONCTON, N.B., AND DISTRICT.

Mr. J. C. Graves, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Steady conditions, about up to the usual standard in volume and activity at this season, have prevailed in the various branches of labour, with the possible exception of the building trades and enterprises entailing the employment of unskilled labour, which have scarcely been up to the average. Immediate improvement in both these fields is looked for, particularly in the case of the latter, as contracts have already been let which will require a large amount of help. The City has let a $10,000 contract for permanent sidewalks and one for $5,000 for sewer extension, work upon which will commence at once. Debentures for extending and improving the water system to the amount of $230,000 have been issued, and contracts for supplying 20-inch Canadian pipe to the amount of $58,447 placed. The contract for the excavation of the main pipe line from the Coverdale gas wells to the city, a distance of nine miles, has also been let by the Moncton Tramways, Electricity and Gas Company. The pipe will be 9⅝ inches inside diameter and will cross the Petitcodiac River on the bridge abutments, work to begin at once. The contract for the ell to the General Office Buildings of the Intercolonial Railway here has been awarded to the Rhodes Curry Company of Amherst, to cost $100,000 and be ready for occupation March 31, 1912. The ell will be 139 by 57 feet, three stories and a basement. The assessor's warrant for 1911 calls for the assessment of the sum of $116,143 upon the ratepayers of the city. Customs returns for April show imports $36,648 and duty collected $5,633. Wholesale trade continued active and expansive and retail trade normal. Commencing with the first Saturday in May the Intercolonial Railway shopmen enjoyed the afternoon holdiay to be continued through the summer. The dentists of the city also announced the closing of their offices on Saturday afternoons. A committee of the Trades and Labour Council of Moncton has been appointed to confer with a similar committee of the St. John Trades and Labour Council in reference to the formation of a Provincial Federation of Labour for New Brunswick. No increase in rates of wages was noted and there was no evidence of unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very active throughout the month, and farm help has been in good demand. Owing to continued fine weather seeding operations are well advanced. On account of the scarcity of rain the grass is looking

poor, and forest fires have been very common and considerable damage done. These conditions have been relieved by showers during the last week and the outlook now is favourable. Cheese and butter factories are in active operation.

Lumbering.—The season has proved a bad one for lumber driving and throughout Kings and Albert Counties several small drives have been hung up, while upon the large rivers of the Province many millions are stranded. Upon the Restigouche River 35,000,000 feet, upon the Miramichi River 20,000,000 feet, and upon the Tobique River 7,000,000 feet are the estimates of drives abandoned.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were quiet and the demand small. Carpenters were fairly busy, but the demand was limited. Painters, decorators and paper hangers were active, and the demand was good for experienced men. Plumbers were quiet, also stone cutters. Builders' labourers were quiet, demand being small. Conditions of the various artisans of the metal trades have been steady, the men being busy and in fair demand. Woodworkers were active, upholsterers busy, car builders active, coopers and shingle weavers busy. Printers, press men and bookbinders were very active. Journeymen tailors, garment workers and milliners were active. Bakers and butchers were busy. Tanners and leather workers were quiet. Barbers were active. Clerks and stenographers were steady with the demand limited. Theatre employés were active and laundry workers busy. Railway operating crews were busy and in good demand. Carters, teamsters and expressmen were busy. The demand for unskilled labour was limited, supply being considerably in excess, but conditions were expected to improve at an early date when work upon the various contracts let requiring this grade of labour are under way.

DISTRICT NOTES.

Hillsboro.—Work upon a new Baptist Church to replace the one destroyed by fire last summer was commenced, the contract price being $16,000.

Sackville.—Excavation work for the foundation of a new wharf was begun and about fifteen men employed. The wharf will be 350 by 40 feet. The Sackville Concrete Company, Limited, has let a contract for the erection of buildings to house plant and machinery. Operations in the Firestone quarry have also commenced and shipments were made. Considerable building is being done and much more projected.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

There was an improvement in the labour market during the month of May, the building trades being active. The work of excavating for the new Armoury has been commenced, giving employment to a large number of labourers and teams. The Crosby Molasses Company has commenced work on the warehouse to be erected on the Marsh Road. The building will be 400 x 100 feet. On May 12, Mr. Justice McLeod made an order winding up the A. E. Hamilton Company, Limited, woodworkers and contractors. The estimated value of the property is $38,000, and the liabilities about $28,000. The winter service commenced November 27, 1910, and ended May 10, 1911. One hundred and thirty-five steamers arrived at St. John during the season, of which 112 loaded outward cargoes, made up of Canadian goods valued at $15,322,437, and foreign goods valued at $8,346,636, making a total of $23,669,073.

Bank clearings for the five weeks ending May 25 were $8,352,480, and for the corresponding period last year $7,248,645, being $1,103,835 greater in 1911 than in 1910. The transactions at the Savings Bank for the month of April were: deposits, $68,674.13; withdrawals, $103,387.90. The Carpenters and Joiners' Union, with a membership of 150, inaugurated a $3 a day rate on May 1, and in consequence about twenty-five men went on strike on that

date. Eleven contractors conceded the advance on that day, and the others have done so since. The Hodcarriers and Builders' Labourers advanced their rate to $2 per day on May 1, and a majority of the contractors conceded the demand. About sixteen members went on strike. On May 13, ten men under Foreman Gallagher, who were engaged constructing culverts preparatory to laying the double track on the Intercolonial Railway Company near the One Mile House, struck for higher wages. The men were receiving $1.75 a day and demanded $2. Their demands have not as yet been acceded to. On May 16, fifteen brass moulders and coremakers of T. McAvity & Sons went out on strike for an extra dollar a week. After a few days the men returned to work with the understanding that their grievance would be taken into consideration.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Owing to the scarcity of rain, all the streams and rivers are at low ebb, and several lumber drives will be hung up unless a heavy rain sets in.

Railway construction and employment. The Caraquet Railway Company and Gulf Shore Railway Company have been amalgamated, and are now known as the Caraquet and Gulf Shore Railway Company. The culverts along the Intercolonial Railway between St. John and Coldbrook are being widened and strengthened preparatory to the work of completing the double track system. The Canadian Pacific Railway Company has acquired a valuable gravel pit at South Bay, the price paid being in the vicinity of $5,000. The property contains fifty acres, fronting on the railway line west of South Bay station and on the northern side of the track. Work is progressing on the removal of the buildings on Mill street recently purchased by the Canadian Pacific Railway Company, and the gravel from this pit will be used in filling in the old mill pond and ballasting the tracks.

CONDITION OF PARTICULAR TRADES.

All the building trades were active. Iron moulders, iron workers and helpers, machinists and engineers, steam engineers were active. Electrical workers, linemen and brass workers were busy. Blacksmiths and boilermakers were active. Sheet metal workers were busy. Horseshoers were active. Woodworkers were busy. Shingle weavers were active. Printers, pressmen, bookbinders, journeymen tailors, bakers and confectioners were busy. Cigar makers were active. Brush and broom makers were very busy. Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen, freight handlers, steamboat men and firemen, were busy. Ship labourers were dull. Street railway employés and teamsters were very busy. Unskilled labour was active.

DISTRICT NOTES.

Andover.—A barn belonging to J. M. Stevens was destroyed by fire on April 26. The loss is estimated at $4,000. Insurance, $2,200: $400 on farm implements, $300 on hay, and $1,500 on the barn.

Fairville.—A new post office is to be built. It will be two stories high, and will be of brick and stone, and will cost about $20,000.

NEWCASTLE, N.S., AND DISTRICT.

Mr. James Falconer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market has been remarkably dull for the month of April, there being very little work for either mechanics or labourers. The spring has been cold and dry, adding to the scarcity of work. There has been no rain since fall and the weather being cold the snow went away very slowly. Many of the lumber drives will not be got out and the saw mills will be idle most of the summer, which will be a loss to the labouring class. There is a rush just now on repairs, but little new work at present. The Presbyterian Congregation is to erect a Sunday School which will cost between $6,000 and $7,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were busy getting in their crops. There will be about the same percentage of oats sown as last year, but not quite as much wheat. There will not be quite as many potatoes planted this year as usual, as potatoes are very scarce and are selling at $3 per barrel.

Fishing.—There is no activity yet. The run of shad generally begins about May 24.

Lumbering.—The spring has been very unfavourable for getting out the logs. Some of the drives are left over for the present. If heavy rains come soon they may get them out, but it is expensive work.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were not very busy. Carpenters and joiners were at work but mostly on repairs. Painters and decorators were busy as usual in spring. Plumbers were also busy as there is much more of that work done now than there was a few years ago. Carriage makers had more than the usual amount of work, both in repairs and on new work. Carriage blacksmiths were scarce and wages high.

QUEBEC, QUE., AND DISTRICT.,

Messrs. E. Little and *P. J. Jobin, correspondents*, reported as follows:—

GENERAL CONDITION OF LABOUR.

The month of May showed a marked improvement as compared with the preceding month, and the demand for labour was heavy. The Plumbers, Roofers and Tinsmiths' National Union went on strike May 1, for an increase of five cents an hour. The matter was settled through the Conciliation Committee of the National Trades and Labour Council, the men accepting an increase of ten cents per day, and returning to work on the 15th. The strike, however, did not seriously affect the building trades. About 7,000 immigrants landed in Quebec during the three days from May 13 to May 15, almost all destined for the Prairie Provinces. The Broad and Narrow Axemen and Broomsmen of Sillery, Quebec County, numbering 140, received an increase of wages of 40 cents per day from May 1. There was no change in the hours of labour. One of the caissons built by M. P. & J. T. Davis at Sillery Cove during the past winter for the Quebec Bridge, was successfully lanuched on the 29. Another caisson now under construction will be launched early in June. There is considerable activity about the Quebec Bridge, where the work in general is progressing very favourably. The steamer *Saint-Irénée*, of the Richelieu & Ontario Navigation Company's line, arrived in port May 2 with passengers and cargo, being the first passenger steamer to arrive from Montreal this season. The *Quebec*, of the same line, arrived here on April 15 last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busily engaged in sowing their crops, the weather being favourable.

Lumbering.—The lack of rain during the month has caused some delays in getting the lumber drives down the rivers, on account of the water not being nearly as high as usual.

Railway construction.—The spur line opened last fall from Maple Avenue to Sillery Parish, by the Quebec County Railway, is being ballasted and finished up. The contractor for the spur line from Beauport to Kent House is making rapid progress with the work, having from 350 to 400 men at work between Beauport and Montmorency. The line will be about three and a half miles long.

CONDITION OF PARTICULAR TRADES.

The building trades were busy with the exception of plumbers and steam and gas fitters, who were quiet. The metal and engineering trades were busy, and the printing and allied trades active. Journeymen tailors and garment workers were busy. Glove makers and boot and shoe workers were quiet. Bakers and confectioners, butchers and meat

cutters were quiet. Ice cutters and drivers were busy. Cigar makers and tobacco workers had a quiet month. Tanners and curriers were dull. Leather workers, saddlers and trunk and bag makers were quiet. The miscellaneous trades were active, with the exception of hotel, restaurant and theatre employés, who were quiet. Railroad and steamboat men were busy, as well as street railway employés. Ship labourers and longshoremen were quiet. Cab drivers, hackmen, carters and draymen were quiet, while teamsters and expressmen were busy. The supply of unskilled labour was equal to the demand.

SHERBROOKE, QUE., AND DISTRICT

Mr. H. Logie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour, skilled and unskilled, was well employed during the month of May. The open weather allowed work to be proceeded with on the various buildings that are being erected, and also on the extension of the street railway system. As many as 150 men were employed on the last mentioned work. In addition to this the city water works department had a large force of men employed in connection with the new reservoir. The supply of unskilled labour has not been equal to the demand. While all outside trades were very busy, the various machine shops, factories and other industries have been fully employed, and all have been running full time with orders ahead to keep this condition of affairs going for some time. The E. & T. Fairbanks Company has in the course of erection a large addition to the premises it erected two or three years ago. When this is completed employment will be given to a large number of extra help. There was considerable activity in transportation, both as regards freight and passenger returns. Wholesalers report business good, while retail merchants say business was very good for May. The Protestant School Commissioners have awarded the contract for a new school in the South ward, as the present accommodation is inadequate. This work will cost about $10,000. The City Council also decided to build a new fire station in the East ward.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm work was well advanced during May. Many complaints were heard as to the scarcity of labour.

Lumbering. — Lumbering operations were over, but many men were employed in getting the log drives down the various rivers.

Manufacturing.—Manufacturing concerns were busy.

Mining.—Mining operations started up to full capacity during the month.

Railway construction and employment.—Street railway construction was busy.

Other industries.—All other industries reported a good month.

CONDITION OF PARTICULAR TRADES.

All branches of the building trades were busy, and the work now under contract will mean a busy season. Machine shops and iron workers, electrical workers and linemen were busy. The woodworking trades were active. The printing and allied trades were busy. Journeymen tailors and garment workers were active. Bakers, confectioners, ice cutters and drivers were busy, while butchers were active. All the miscellaneous trades were busy. Railway employés were active, while street railway employés were busy. Unskilled labour was busy.

THREE RIVERS, QUE., AND DISTRICT.

Mr. Joseph J. Ryan, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions generally were active during May. Factories, foundries and building trades were very busy and the season gives promise of greater activity

than in several years. The Wyagamack Pulp & Paper Company is rushing the construction of the several buildings for its new pulp and paper mills on Baptist's Island. The contractors have also resumed work on the City boulevard and expect to have it done, together with the approaches, &c., before July 1. The harbour has been exceptionally active this May with ocean steamers coming in with full cargoes of sulphur, pig iron, &c., and going out with lumber cargoes. Several steamers came in also with bituminous coal. There were no changes in rates of wages or hours of labour and the best of understanding prevailed between employers and employés.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The end of May found seeding and planting completed throughout the district, the weather having been exceptionally fine the whole month.

Fishing.—There was little fishing done in this section during the month, although there were a few good catches of shad.

Lumbering.—Lumber firms were active stretching their booms in the river St. Maurice to hold their logs, and they have been preparing all machinery in their mills expecting to begin sawing early in June.

Manufacturing.—All manufacturing industries were actively employed, every plant in town working to its full capacity.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, and all others in the building trades were fairly active. Iron moulders, iron workers and helpers were active. Coremakers, machinists, and engineers were busy. Electrical workers and linemen were very active. Blacksmiths, bicycle workers and horseshoers were very well employed. Woodworkers, upholsterers, varnishers and polishers, carriage and waggon makers and pattern makers were very active. Printers, pressmen and bookbinders were busy. Journeymen tailors, garment workers, glove makers and boot and shoe workers report a good month. Bakers and confectioners, butchers and meat cutters, ice drivers, cigar makers and tobacco workers were all busy. Tanners and curriers were rather quiet, but leather workers were active. Barbers, clerks, stenographers, delivery employés, furriers, hotel, restaurant and theatre employés and laundry workers were busy. All transportation companies were exceptionally busy. Cab drivers, hackmen, carters, teamsters and expressmen were well employed. There was a good demand for unskilled labour and the supply was about equal to the demand.

DISTRICT NOTES.

Business has been good in May throughout the district. Grand'mère is getting new factories, and Shawinigan Falls also, and all the old plants are running full time.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Victor Phaneuf, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during May was fair, especially for outdoor trades. Building was more active than during the preceding month, but the month was not more active than the corresponding one last year. There is enough supply to meet the demand. Sash and door factories were active, there being orders numerous enough to keep their whole staffs at work. Boot and shoe factories had a quiet month, as well as the leather industry. The Penman Manufacturing Company had a good month, having to employ night and day shifts in several departments. The iron industry was also well employed. The other industries had a good month. Good progress was made on the improvements being made at the Ames, Holden, McCready Company's plant. O. Chalifoux & Son have started work on their new factory. The Girouard street convent is to be considerably enlarged. Louis Côté & Frère have sold their flour

mill and the water power connected with the same, for $50,000. Plans are ready for a large granite building, costing $90,000, which will be used as a Normal School for girls. The Board of Trade has taken up the question of the abolition of toll gates within the city limits and promises to bring a favourable solution of the problem. The Board also wants the Petit Rang road macadamized and asks for assistance from the City Council. There was much activity in the retail trade since the middle of the month; wholesale business was also active. Banks had a good month with collections easy. There was no change in rates of wages or hours of labour, and relations between employers and employés were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Favourable weather conditions gave the farmers all the time they needed for seeding. Hay is looking very well and a crop above the average, both in quantity and quality, is expected. Farm products sold well and at good prices. Dairy products were in good demand. Employment on the farm was active and good prices were paid for farm labourers, but the supply was equal to the demand.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and decorators had a good month. Plumbers, steamfitters, stone cutters and builders' labourers were very busy. Iron moulders, iron workers and helpers, machinists, engineers, electrical workers, blacksmiths, boilermakers and horseshoers had a good month. Woodworkers, upholsterers, polishers and varnishers, wood carvers, carriage and wagon makers and pattern makers were active. The printing trades were well employed. Journeymen tailors and garment workers were busy. Boot and shoe workers had a quiet month. Bakers and confectioners, butchers and meat cutters, ice cutters and handlers had steady employment. Tanners and curriers and leather workers were quiet. Barbers, clerks, delivery employés and hotel, restaurant and laundry employés had a good month. Railway conductors, engineers, firemen and telegraphers, trainmen, switchmen, maintenance-of-way men and freight handlers were active. Cab drivers hackmen, draymen, teamsters and expressmen were well employed. Unskilled labour had a good month, nobody was idle, but the supply meets the demand.

ST. JOHNS AND IBERVILLE, QUE., AND DISTRICT.

Mr. A. D. Pepin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The outdoor labour market was very active, at somewhat increased wages. The City Corporation is doing considerable macadamizing, and is building cement sidewalks on new streets. The dredging of the Richelieu river is about suspended for the summer, only one dredge being left to take care of the wharves. Carpenters and joiners were in good demand and their wages were increased. Navigation showed very little activity since the opening, owing, it is said, to the repair work being done on the Whitehall canal, which may delay the opening of that canal as late as June 15. Business wholesale and retail, was very active. Banks reported business satisfactory.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have made good progress in their work. Weather conditions were favourable. Seeding operations were completed. Farm help was in demand. Farmers have been paying from $150 to $175 for six months, and as much as $2 a day with board.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators, plumbers, steamfitters, stone cutters and builders' labourers were all well employed. Iron moulders, iron workers and helpers, coremakers, machinists and engineers, electrical workers

and linemen and blacksmiths had a good month. Shipbuilders, ship carpenters and caulkers were quiet. Tinsmiths, tool sharpeners, horse-shoers and jewellers were active. Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and waggon makers, car builders, pattern makers and gilders were well employed. The printing, clothing, food and tobacco preparation, leather, miscellaneous and transport trades were active. Unskilled labour was very active.

SOREL, QUE., AND DISTRICT.

Mr. J. A. Chênevert, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Trade in general was active, except for carpenters, who had little work, owing to the fact that there are no new buildings under way and only a little repair work to do. In the Government shops and shipyards the same number of men were employed as in the previous month, between 800 and 900; this condition will last all summer. Dry goods merchants, grocers and provisions dealers were satisfied with the month's business. The prospect for the summer were good except in the building trades. There will be very little building operations, here, as the population instead of increasing is decreasing, a number of families moving to larger centres where wages are higher.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have about completed seeding. Pastures are good and there is an abundant supply of milk, so that much cheese and butter has already been made. Hay has a fine appearance, as well as vegetables. The price of farm products has come down somewhat. Eggs sell for 20 cents instead of 25 cents. Fresh butter is 23 to 25 cents per pound, instead of from 27 to 30 cents. The price of meat has also come down 2 or 3 cents per pound.

Manufacturing.—Manufactures were in full operation and had orders for several months in advance.

CONDITION OF PARTICULAR TRADES.

Painters, decorators and paperhangers were very busy. Moulders, iron and cement workers, electrical workers, plumbers, blacksmiths and boiler makers had steady employment. Journeymen tailors, confectioners, butchers, ice handlers and barbers were busy. All branches of railway and steamboat men were very active. Brass workers, jewellers and silversmiths had a good month.

MAISONNEUVE, QUE., AND DISTRICT.

Mr. J. F. Girard, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Compared with the preceding month, May was much more active, and although the supply of labour amply covered the demand, the month may be considered a busy one in most trades. The present year promises to be exceptionally active in the building trades. Certain trades, such as barbers, bakers, cooks, clerks, garment makers, carters and painters, were in demand. There has been no increase in wages in any class, except among street railway employés, whose rates were increased one cent per hour, starting on July 1. There were no signs of unrest in any of the industries.

CONDITION OF PARTICULAR TRADES.

Painters, carpenters and joiners were very active. Bricklayers and masons were active, lathers quiet and plasterers fair. Plumbers, steam and gas fitters, stone cutters and builders' labourers were active. Stove mounters and horseshoers were in demand; the other metal trades had a good month. Upholsterers and carriage and waggon makers were in demand; car builders were active. All the printing trades were active, with pressmen in demand. Journey-

men tailors, garment makers and bakers were in demand. Butchers, meat cutters, cigarmakers and tobacco workers and leather workers were active. Barbers were in good demand, as well as clerks and delivery employés. The transport trades were all very active. Unskilled labour was rather quiet, but the opening of municipal work will make this class busy.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Montreal was very active during May as far as building operations and all branches of trades and business were concerned. Carpenters were in great demand, particularly good finishers. Very large works are at present under way, such as the Canadian Pacific Railway Company's Windsor station, which will cost over three million dollars when finished; excavations for the Canadian Pacific Railway Company's office building, and the Dominion Express Company's offices. Within a few days work will be started on the new central Post Office building and the Sulpicians' Library and over 100 apartment and other buildings, costing from $40,000 to $150,000 have been commenced since the first of May. Bricklayers reported a good month although brick was scarce in the early part of the month, and painters, plumbers steam and gas fitters, plasterers and iron frame builders were very active. Steamboat men, such as engineers and firemen, deckhands, and longshoremen have started work after a long period of idleness. Business, wholesale and retail, was very active. The income of the Montreal Post Office for April was $100,275.41, or $8,230.78 more than for the corresponding month of 1910.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Work was started in that line, and labour was getting scarce.

Manufacturing.—All manufacturing establishments were active, especially sash and door factories.

Railway construction. — Considerable repair work was being done on both the Canadian Pacific and the Grand Trunk Railway Companies' lines.

CONDITION OF PARTICULAR TRADES.

All the skilled trades were active, as well as unskilled labour.

HULL, QUE., AND DISTRICT.

Mr. E. E. Cinq-Mars, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Active conditions in all branches of industry continued throughout the month of May, with plenty of employment, especially for skilled labour. The building trade was very brisk. The lumber mills all started, and operated without interruption from high water. The City will start considerable work as soon as its debentures are negotiated. It will be hard to get labourers to do the work, as there are but very few now available in the city and district for other general work, and they demand $1.75 per day. The demand for employés in the various mills, in the city and district, exceeds the supply. The scarcity of labourers is caused by the departure of some local men who have chosen to go farming in Western Canada. General tradesmen have gone to Winnipeg and other western cities where the wages are better and work permanent. There was much activity in the shipping business, especially on the Ottawa river. The Ottawa Forwarding Company has increased its fleet by some half a dozen barges. The mica industry is creeping up, but slowly. No changes were reported in wages. The same scales prevail in the lumber mills.

Recent rains have done much good to the farmers. A good crop of hay, oats, and vegetables is anticipated.

OTTAWA, ONT., AND DISTRICT.

Mr. W. Gilchrist, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The demand for skilled and common labour was very active during May. The saw mills ran without interruption from floods. Building was brisk, both on the interior finishing of large structures and the starting of new houses, the latter giving much employment to common labour. The civic corporation has nearly 1,000 men employed on sewers, sidewalks, streets, &c., the wages for unskilled men being $1.98 per day. A "shopping week" held in Ottawa during the first week of May stimulated trade among the merchants. Otherwise business was normal, but showed a little improvement on the previous month. The bank clearings of April amounted to $16,603,756 or a million less than the corresponding month of 1910. The bank clearings for the first four weeks of May totaled $16,143,730, compared with $15,482,713 for the corresponding weeks of May last year. The building permits of April, 1911, amounted to $221,875, compared with $340,675 in April, 1910. One of the May permits provides for a $50,000 building to be used as the second exchange office of the Bell Telephone Company. The international unions appointed an organizer to work among trades who are not up to the desired standard in organization, with the result that many of the unions have become stronger. A new organization, the Lathers' Union No. 60, was formed, with a membership of fifty.

A strike of half a day's duration was the only labour trouble during the month. Some 225 building labourers made a demand on May 13 for an increase in wages from 25 to 28 cents per hour. Most of the large contractors were affected. Hod carriers and mortar men will be paid the higher wage, while concrete men and excavators remain at 25 cents an hour. Owing to the shortening of the working day by one hour the weekly income of the men who received increases will not be materially affected. J. R. Booth signed an agreement on May 26 with representatives of the papermakers' union agreeing to three eight-hour shifts in his paper mill, instead of two shifts, one of eleven hours and one of thirteen hours. As a result, the staff affected will be increased by fifty per cent. The wages for the shorter hours will be the same as regularly paid for these hours. The men will not be reduced in pay unless where extra allowances had been made for long hours. About fifty men are affected at the beginning, and it is understood the short hours will have a wider application later. The men have undertaken to show that it will be more profitable to the employer to operate under the new conditions. The plant will work seven hours a week longer.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Heavy rains in the latter part of May were a boon to farmers. Crops did not progress well during the first half of the month on account of the drought. Garden produce was offered in abundance on the local market, at these prices per bunch: Rhubarb, 25 cents per dozen; Lettuce, 25 cents per dozen; Green onions, 25 cents per two dozen. Potatoes are quoted by the load at $1.10 per bag. Veal became more plentiful and sold at 5 cents for fronts and 8 cents for hinds. Pork is steady at $8.50 to $9.50. Cheese factories opened at the usual time. The first sale of the season in Ottawa brought 11 3-16 per pound, which is high enough to insure a continuance of current retail prices. Butter is very plentiful, farmers trading it with country merchants at 18 cents per pound in pail lots. In the same way eggs sell at 16 cents per dozen.

Manufacturing.—Spring floods destroyed a coffer dam on the Upper Ottawa, but the lumber and paper industries escaped any serious interference from high water. Mills are running under normal conditions, with prospects of a regular supply of logs.

CONDITION OF PARTICULAR TRADES.

A brisk demand prevailed for bricklayers, stonemasons, carpenters, plumbers and builders' labourers, in fact it is

stated no men were idle in any of the building trades. As bricklayers and stonemasons and their helpers are working an hour a day less than last year some contractors have made additions to their crews. The interior work on the Grand Trunk Railway hotel and station is giving work to many lathers, in addition to the demand for lathers and plasterers on smaller buildings. Stove mounters and furnace builders were busy. Sheet metal workers were in demand. Electrical workers were fairly well occupied. Two severe electrical storms necessitated much repairing. Woodworking trades, especially in sash and door factories, were busy. Printing and allied trades continued well employed. Coat makers were scarce. Butchers and ice drivers were doing brisk business. The leather trades were quiet. A new broom factory is giving work to many in that industry. Grocery clerks were in demand. Steamboat and railway employés were busy. Unskilled labour and domestic help were much in demand. Prospects are bright for the employment of many rock men, a contract having been let for a $200,000 sewer in the west end of the city.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

With the exception of the building trades, activity was the dominant characteristic of all branches of labour in Kingston during the month of May. A difference as to jurisdiction created a schism between the stone-cutters and masons. This, coupled with a demand for an increase of wages made by the masons' helpers, had the effect of completely paralyzing the building operations in Kingston and district. Notwithstanding some efforts at conciliation, the difficulty which began on the first of the month, was still in existence at time of writing. In the meantime, public and private work is seriously impeded, and many mechanics have left, and are leaving for other places. Apart from this regrettable state of affairs, the opportunities for employment were abundant. For instance, a number of Englishmen coming here from India by way of England, arriving on the early morning train, were all enabled to secure employment before noon; some of them were at work within two hours of their arrival.

In the supplementary estimates tabled by the Dominion Government on May 8 the following items appeared for Kingston and district: Athens, public building, $10,000; Eganville, public building, $2,000; Kemptville, public library, $5,000; Kingston, Customs house repairs, $2,000; Royal Military College, dormitory accommodation, $45,000; Brighton, wharf, $12,000; Brockville, extension of Tunnel Bay dock, $15,000; Kingston, harbour improvements, $50,000. Already a joint committee of the City Council and Board of Trade are making preparations for extensive improvements to the Kingston harbour. A by-law is also being prepared for the purchase by the municipality of the old Cataracqui bridge, which it is proposed to replace by a modern structure suitable to present and future requirements. The regular vote for the Royal Military College, $135,000, is $8,000 more than that of a year ago. This increase is due to an expected increase of cadets in attendance, the establishment of a riding school, &c.

The Kingston Shipbuilding Company has been awarded the contract for the building of the new government steamer *Dollard.* It is understood that the contract price is in the neighbourhood of $160,000. Great activity prevails at this dock, and in the other ship-yards here.

The new wing to the Orphans' Home was completed and opened to the public by His Worship the Mayor, during the month.

Toward the end of the month a meeting of the stockholders of the Canadian Locomotive works was held to consider an offer made by an English company to purchase the works. As a result, it is likely that the capacity of the works, which are to remain here, will be very largely increased.

There were no definite changes in the rates of wages or hours of labour reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers throughout this district were delighted over the conditions under which they were able to perform their work during the month, and at the rapid growth already attained along all lines. Prospects for a good crop are excellent.

Fishing was active during the month, with good catches reported.

Lumbering and *manufacturing* were also active.

The feldspar and other *mines* in this district reported an active month, with a great demand for their output.

Railway construction and improvement was very active.

CONDITION OF PARTICULAR TRADES.

With the probable exception of painters, the various building trades reported a quiet month, as the result of the difficulties already mentioned. Manufacturers, woodworkers, &c., reported an active month. Printers, clothiers, bakers, butchers, ice cutters and drivers, cigar makers, tanners, barbers, broom-makers, delivery employés, furriers, hotel, restaurant, laundry, theatre employés, unskilled labour and all branches of the transport business reported an active month.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. J. Arthur Sharp, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of labour during May has been active, showing a marked improvement over April, also over the same period last year. The advent of settled weather gave an impetus to all outdoor enterprises, furnishing work for a large number of the various classes. Building was very active, and there is every indication of it continuing. Employment of skilled and unskilled labour was more general than has been for some time. Some of the employers complain that many of their skilled mechanics are leaving for the West; their places are being filled by new arrivals from Great Britain. The Campbell Milling Company of West Toronto has purchased the Central Milling Company mills, These mills have been in liquidation for some time. There will be no change in the staff, and the mills will be run to their fullest capacity. The Model Foundry & Pump Works were opened on May 1. They will manufacture all kinds of pumps and gasoline engines. At the first meeting of the local cheese board for this season, 1,255 boxes of cheese were boarded and all sold for 10 5-8 cents. The Grand Trunk Railway trackmen have received an increase in wages of 10 cents per day, from May 1; and the pattern makers have been successful in getting an increase in wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather has been most favourable for the growing crops. There is still a large demand for good farm hands.

Lumbering.—The saw mills have commenced their season's cutting some two weeks earlier than usual. There is plenty of water and the drives are now on their way.

Manufacturing.—The manufacturers in all lines were very busy, some of them working overtime.

CONDITION OF PARTICULAR TRADES.

The building trades were very busy, plumbers especially being in demand. Iron moulders and core makers had a good month. Machinists and engineers were active. Electrical workers were very busy. Linemen were in demand. Metal polishers, buffers and brass workers were active. Woodworkers were busy. Printers, pressmen, electrotypers and bookbinders had a busy month. Journeymen tailors and garment workers were very busy. Bakers and confectioners, butchers and meat cutters, and ice cutter sand drivers were active. Cigar makers were quiet. Leather workers were busy. Barbers were well employed. Railway and street railway employés were active. Carters and expressmen were very busy. Unskilled labour was in good demand.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent. reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was generally well employed during the month. Some unrest was caused by strikes and labour disputes, but owing to prevalent activity the effects were not as seriously felt as would sometimes have been the case. In addition to the continuous influx of immigration from Britain, there have latterly been numerous arrivals of skilled mechanics from the United States, owing to the stagnation which prevails there, especially in the iron trade. Building permits to the number of 912 were issued in April, representing an approximate value of $3,272,818, as compared with 950 permits representing $2,522,058 in April, 1910. The total number of permits issued during the four months ending with April of the current year was 1,802, representing an approximate value of $6,911,758, as against 1,460 permits, representing a value of $5,647,748, for the corresponding period of 1910.

The Dominion Railway Commission has ordered the construction of an overhead bridge at the Sunnyside crossing of the Grand Trunk Railway tracks on the Lake Shore road, in place of the subway decided on by the City Council. The cost, including land damages, will amount to about $417,000. The expenditure on the bridge itself is estimated at about $175,000. The bridge will have an approach of about 1,500 feet, and will be 80 feet long and 66 feet wide.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy, the weather during the month having generally been favourable, and vegetation well advanced. The crops were, as a rule, looking well, with the exception of fall wheat, which in some localities has been a failure, a large area having been plowed up and resown. Pasturage is in good condition, with every prospect of a large hay crop.

Manufacturing.—In most lines of manufacturing, trade was good, but the iron and steel industry was rather quiet, there being few large contracts on hand. The Massey-Harris Company proposes to enlarge its plant on King street east considerably and to increase its staff by from 500 to 700 men. The Company is asking permission from the City to build two additional overhead bridges across Strachan avenue, and to construct three tunnels underneath King street to enable it to carry out its plans. The Canada Foundry Company has been awarded contracts by the City for 3,000 feet of iron pipe with joints and intake mouth for the new waterworks intake, amounting to $73,000. The factory of the Gilbert Manufacturing Company on Duchess and Britain streets is approaching completion, and will, in a few weeks, begin the manufacture of copper and brass goods. The Toronto Carpet Company is erecting a five-story factory on Mowat avenue, at a cost of $90,000.

Railway construction.—Good progress is being made in the laying of new street car lines in the city. The Harbord street line has been completed, and service will shortly be commenced. The elevation of the Grand Trunk Railway line between Sunnyside and the Humber river is being rapidly proceeded with, employing a large number of men.

CONDITION OF PARTICULAR TRADES.

The building trades are busy and many new contracts are being given out. The Bridge & Structural Iron Workers' Union, whose members were largely engaged in the erection of structural steel frames for large buildings, went out on strike May 1, to the number of 250, the employers having refused to increase wages from 35 cents to 40 cents per hour. This interfered to a certain extent with the work of carpenters, bricklayers and others, by the stoppage of operations, but the latter had no trouble in finding jobs elsewhere. The strike is still on. A number of strike-breakers from Montreal have been taken on. The International Stone-Cutters' Union has signed a two-year's agreement with their em-

ployers under which they will receive wages of 50 cents per hour for the first year and 50½ cents for the second. The iron moulders and core makers, numbering about 150, went out on strike on May 4, demanding an increase of wages. A settlement was arrived at on the thirteenth, by which the scale of pay for moulders was advanced from $2.90 to $3.10 per day, and that for core makers from $2.65 to $3, and the men returned to work. Machinists had a fair month. Blacksmiths, boilermakers, sheet metal workers, electrical workers and brass workers had steady work. A strike of the linemen employed by the City's electrical department, which had been threatened for some time, was averted by an amicable settlement, under which the pay of first-class linemen was raised from 31 cents to 33⅓ cents per hour; second-class linemen from 28 cents to 30⅓ cents; and helpers from 25 cents to 27⅓ cents. The woodworking trades were active. Printers and bookbinders had a fair month. Custom tailors were busy. Garment workers, boot and shoe workers and hat and cap workers were steadily employed. Bakers, confectioners, butchers, brewery workers and cigar makers had a good month. Harness and leather workers were active. Hotel and restaurant employés, barbers and laundry workers were active, especially during the latter part of the month. Railway and street railway men, expressmen and teamsters were active, and sailors, engineers, longshoremen and others connected with navigation were generally well employed towards the close of the month. Unskilled labour was active.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Hewlett Green, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Employment was good and prospects bright during May. Supply and demand in the labour market seemed to be well balanced. New local industrial concerns incorporated included the Ontario Electro-Chemical Company, capital $40,000, and the Central Lead Pipe Company, capital $100,000. Thirty acres of land were purchased to enlarge the driving park, and new stables to cost $6,000 will be erected. The contract was let for the new nurses' home at the general hospital, and for improvements to the building of the Niagara Falls Club. Many more dwellings were commenced. Good progress was made on the armoury. A planing mill was enlarged. Among tenders invited were those for the enlargement of a church and a school and the erection of a garage. Transportation was active, and commercial conditions satisfactory. Immigration officials were very active along the Niagara frontier, and many undesirable immigrants were refused admission to Canada. Enforcement of severe penalties for infractions of the law were found necessary in many cases.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy seeding, and the earliest garden produce was marketed. Weather conditions were very favourable to the fruit crops, but too dry for hay and wheat. In Pelham township flowers will be grown on a large scale for city markets.

Manufacturing concerns of all sorts were busy. The Canadian Shredded Wheat Company commenced serving free dinners to its female employés, while the male employés get a meal for 10 cents.

Railway construction and employment.—Railways were busy. Freight traffic was good for the time of year and summer travel started early.

Other industries.—The Ontario Power Company had a large force of men engaged in completing the new section of its works and in restoring the park areas disturbed by the works of the past two years.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were the dullest of the building trades. Carpenters were generally well employed. Lathers, plasterers, painters and plumbers were busy. Stone cutters were more active than for some time past. Builders'

labourers were quiet. Employés of iron-working concerns were busy. Electrical workers were pretty well employed. Linemen were busy. Journeymen tailors were active, hat makers and haberdashery makers busy. Bakers and butchers were more active, shredded wheat workers busy. A new fruit and vegetable cannery of very large capacity will be erected at Ridgeville, and a plant at St. David's is being enlarged. Barbers were busy, office and salespeople more active, hotel, restaurant and laundry employés were commencing their busy season. Railway train- and yard-men of all classes were active. Steam navigation opened the season actively, but the outlook was said to be dull. Electric railway trainmen were busy, teamsters very busy. Unskilled labour was very well employed.

DISTRICT NOTES.

Port Colborne.—The rush of grain from the head of the lakes to tidewater at the opening of navigation soon proved the inadequacy of the storage capacity of the Government elevator here. Though the shipping concerns made efforts to relieve the congestion, some cargoes billed here had to be sent to other ports.

Welland.—Additional contracts were let and work went forward rapidly on new factory buildings. The Canadian Steel Foundries Company expects to increase its staff from 500 to 750, this summer. Dominion Metals, Limited, of Toronto, will build a smelter here. Work was started on the street railway, and contract was let for the new turbine and pump for the town waterworks.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. James A. Wiley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

General activity prevailed in all branches of industry, with rush conditions in the building trades. Although fifty building permits have been issued this year to date, which greatly exceeds records of other years, there is still a great demand for houses for working men, to rent at a reasonable rental. This class of houses is so much needed that the manufacturers held a meeting to devise means to relieve the situation. The Board of Trade has also taken up the question, as it is felt that the expansion of the manufacturing interests requiring more help will be handicapped unless they can house their help. The building trades are doing all they can to meet the demand, but find they cannot overtake the work with the present limited help. The Steel & Radiation Company, Limited, which has secured thirty-two acres of land from the City for a site, has absorbed the King Radiator Company, of Montreal, the Expanded Metal & Fireproofing Company, of Toronto, and the Dominion Radiator Company, and similar plants in the Maritime provinces, thus forming a merger of these industries. The Company contemplates concentrating several of its plants here. The capitalization of the consolidated companies is $5,000,000. The Garden City Paper Mills Company has been incorporated, with capitalization of $100,000, and will manufacture paper at the site of old town Lincoln Paper Mills in this city. Provisional directors have been elected. The Simcoe canning factory is building a large addition to its plant, costing $20,000. The public school board has adopted the following new schedule of salaries for the teachers employed.: Minimum salary to be $400 for those having two to four years' experience; over four years, $450, with an annual increase of $50 until $600 is reached for second-class, and $650 for first-class certificates. That maximum for first-class certificates be $700, for second-class certificates, $650, with an annual increase of $25 from the present maximum of $600 and $650. The additional salaries for mistresses remains as they are, $25 and $50.

The horseshoers of St. Catharines, Niagara Falls, Thorold, Merritton, Homer and St. David's formed an association, May 3, for mutual benefit, with headquarters in this city. Chas. Cassidy, president, George Brunet, secretary. The local is affiliated with the Master Horseshoers' Protective Association of Ontario.

The local plumbers received an increase in their scale of wages, May 2; the old scale was 30 cents per hour, improvers, 15 cents per hour; the new scale will be 35 cents per hour, improvers, 25 cents per hour. Twenty-five plumbers and six improvers are affected.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers are busy with the spring planting and other work.

Manufacturing.—All mills and factories were active to busy. Canning factories have begun the season's operations.

CONDITION OF PARTICULAR TRADES.

The building trades were rushed. The metal and engineering trades were active to busy. All lines of the woodworking and furnishing trades were active. The allied printing trades were all busy. Journeymen tailors and boot and shoe workers were busy. All trades engaged in the preparation of food and tobacco were active to busy. Tanners and curriers, leather workers and saddlers, trunk and bag makers were busy. Barbers, clerks, stenographers, delivery employés, furriers, hotel, and restaurant employés and laundry workers were active. All lines of transport were busy. Unskilled labour was active to busy.

DISTRICT NOTES.

Thorold.—The labour market was active. Conditions of employment were favourable.

Merritton.—All mills and factories were running full time. A new tissue paper mill will take the place of the present McLain lumber mill, operations to begin at once.

Port Dalhousie.—Labour was well employed for the month, being active to busy.

Vineland.—A new canning company to be known as the Pelham Canning Company, Limited, of Vineland, will be established, at a capitalization of $60,000.

HAMILTON, ONT., AND DISTRICT.

Mr. Wm. T. Cooper, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions during May were for the most part satisfactory and compared favourably with the corresponding month last year, with the exception of the building trades, which were considerably hampered by strikes. Contracts for the various works in connection with the building of the new Carnegie Library have all been awarded to Hamilton firms, and work on the building will be started at once. The Standard Sanitary Manufacturing Company, of Pittsburg, has decided to erect a large three-story brick and concrete warehouse and office building on Jackson street, at a cost of $40,000. The Mills Hardware Company, of Barton street, has purchased a site on King street east, and will erect a costly retail store, 38 x 137 feet. Contracts have been awarded for the building of an Independent Order of Oddfellows' temple, on Gore street. Members of the First Congregational Church have decided to erect a new edifice on Main street, at a cost of $30,000. The Zimmerman Manufacturing Company will build a large addition to its factory. The extension will be 126 feet to the west of the present building, and will enable the Company to add about 120 more hands to its already large staff. The Tallman Brass Company will also extend its plant. Six stores and twelve apartments will be erected on King street, during the summer, at a cost of $35,000. The Canadian Westinghouse Company has taken out a permit for a $65,000 addition to its plant. The Oliver Plow Works Company has awarded contracts for two more large buildings: one, the paint building, 64 x 390 feet, three stories high, at a cost of $100,000; and an office building to cost $30,000. As soon as these buildings are up, two foundry buildings, an immense warehouse and a forge shop will be built. Customs collections for Hamilton during the month of April amounted to $180,305.70, an increase of $14,109.22 over the same

month last year. The City assessors have started out on the assessment for 1911, and it is expected that some large increases will be made throughout the city, in view of the advanced prices at which real estate has been sold during the past few months. Bank clearings for the four weeks ending May 6, 13, 20 and 27, as compared with those of the same weeks last year were:—

1911.	1910.
$2,901,193	$2,078,379
2,325,421	1,753,759
2,532,290	1,620,684
2,073,332	1,932,580

It is estimated that building permits to the value of four million dollars will be issued during the present year. Those issued for the month of May have exceeded half a million dollars, which is away ahead of the same month in any previous year. The National Machinery & Supply Company of this city has been incorporated; the capitalization is $60,000. The E. C. Atkins Saw Company has been authorized by supplementary license to increase the capital it may use in Ontario from $40,000 to $200,000. The Kenmore Park Company and the Goldmack Realty Company have been incorporated. The Homeside, Limited, a company which will carry on a land and building business, has been incorporated with a capital of $40,000. The prices on both hard and soft coal have dropped 25 cents per ton.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in this locality are well pleased with the condition of the fall wheat, although spring grain would have been in better shape at present had there been more spring rains. Indications are that the season's yield will be heavy and of good quality. Fruit growers in the district are well pleased with the crop prospects. All kinds of tree crops and berry crops have blossomed well. Spraying has been very general this year, and large yields are expected. The Wentworth Fruit Growers' Association has been incorporated under a Provincial charter, with a share capital, for the handling, marketing and preserving of fruit.

Manufacturing.—Local factories have been well employed during the month. Orders for seasonable goods have been coming in fast enough to keep all the factories working full time, and some departments have been working overtime at the Deering Harvester Company's plant. The Oliver Chilled Plow Company made its first shipment of Hamilton-made plows during the month. The new Company has a large army of men at work and has orders ahead for hundreds of carloads of plows, from the West.

Railway construction.—The Canadian Pacific Railway Company is hurrying along the work of building the Hamilton and Guelph Junction line. The construction work will be commenced at the Guelph Junction end and will be rushed along as quickly as possible. The Toronto, Hamilton & Buffalo Railway Company is extending a spur line into the Westinghouse Company's yards.

Navigation.—Navigation around Hamilton is now in full swing and indications are for a very busy season. The passenger and freight lines are for the most part, running as per schedule and with full loads.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, lathers and plasterers have been held back to a considerable extent during the month, owing to the carpenters' and structural iron workers' strikes. Plumbers and steamfitters have received an increase in wages from 35 cents to 40 cents per hour. Iron moulders have decided to ask their employers for a nine hour day. Electrical workers have received an increase in wages from 30 cents to 35 cents per hour. Blacksmiths and horseshoers have been well employed. Carriage and waggon makers have had a busy month. Pattern makers found trade fair. Printers, pressmen and bookbinders have had steady employment. Journeymen tailors, garment workers and boot and shoe workers found trade brisk. Bakers, confectioners and tobacco workers were well employed. Barbers and broom makers had plenty of work. Railway employés and freight handlers were fairly well employed. Unskilled labour was well employed.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

All classes of labour were well employed during the past month, which compared favourably with the corresponding month of last year, and was better than the month preceding. The building trades were particularly busy, and there will likely be a record number of residences erected this year. Vacant houses are very scarce and rents are rising in consequence of an increasing demand. The iron trades also were very busy, and in the fabric mills overtime has been worked. Factory additions were numerous, and trade prospects are bright. Bricklayers received an increase in wages of 3 cents per hour, the minimum rate being now 48 cents per hour. The change comes into effect May 1.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists were very busy. Weather has been exceptionally favourable.

Manufacturing.—Manufacturers continued to be very busy. Considerable overtime has been worked during the month.

Railway construction and employment.—The local street railway company is laying about a mile of new track into one of the factory districts.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, joiners, lathers, plasterers, painters, decorators and paperhangers, plumbers and gas and steamfitters were very busy. Iron moulders, coremakers, machinists, engineers, electrical workers, linemen, metal polishers, buffers, platers, blacksmiths, boilermakers and sheet metal workers were very busy, stove mounters and horse-shoers were active. Woodworkers were very busy, as also were carriage and waggon makers and pattern makers. Coopers were busy. The printing and allied trades were busy. Tailors and tailoresses were very busy. Shoe workers were busy. Bakers and confectioners were busy. Cigar makers and tobacco workers were active. Leather workers and saddlers were busy. Barbers, clerks, delivery employés, hotel and restaurant employés were steadily employed. Laundry workers were busy. Railroad trackmen, freight handlers, teamsters and draymen were very busy. Street railway employés were steadily engaged. Cab drivers, hackmen and expressmen were from active to busy. Unskilled labour was fully employed.

DISTRICT NOTES.

Paris.—Labour was well employed. Fabric mills and factories were all busy.

GUELPH, ONT., AND DISTRICT.

Mr. Wm. Drever, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour generally was very active during May. Building operations were brisk, a number of large contracts having been let and work commenced thereon. All the local factories and manufacturing concerns were in full operation. The City Council has granted a fixed assessment of $1,000 a year exclusive of school rates and local improvements rates, for a term of ten years to the Colonial Whitewear Company on condition that the Company erect a new factory 160 by 60 feet, three storeys high, at a cost of $20,000. The building is to be completed this fall and will employ 300 hands by the beginning of the year.

A by-law to loan the Independent Tire Company $25,000, of which $20,000 will be lent by the City and $5,000 by Mr. J. W. Lyon, was submitted to and endorsed by the ratepayers. The Company will erect a $50,000 building and employ from fifty to 100 skilled workmen the first year.

The contract for the laying of the track for the St. Patrick ward extension

of the street railway has been let and work will be commenced immediately.

The Ontario Educational Labour Association held their annual convention here, about 120 delegates being in attendance from all parts of the Province. After the routine business several live questions were discussed, among them being the formation of an Ontario Federation, which was very favourably received. The Trades and Labour Congress of Canada was asked to assist this movement as far as possible.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons report a good month, the demand for this class of labour being greater than the supply. Carpenters, lathers and plasterers had an active month, also painters and decorators. Plumbers, gas and steam fitters were fair, also iron moulders and coremakers and helpers. Tube mill workers had a very active month. Machinists were busy, also electrical workers and linemen. Piano and organ workers were well employed, also carriage makers, pattern makers and coopers. Sash and door and interior wood workers had an active month, some large contracts having been secured by the Robert Stewart Company in the west. The printing and allied trades were fair. Journeymen tailors and garment workers were busy. Carters, draymen and teamsters were very active. Unskilled labour was well employed, the supply being hardly equal to the demand.

DISTRICT NOTES.

Elora.—The ratepayers voted on two by-laws, one to assist the Elora Furniture Company with a loan of $3,500, for the purpose of extending its factory, the other to give a fixed assessment to the Bissell Company, with certain exemptions for a period of ten years, the Company's intention being to extend its present business. Both by-laws carried.

BERLIN, ONT., AND DISTRICT.

Mr. R. F. Gofton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

During April all classes of labour were busy and fully employed. There was a demand for unskilled labour and good progress was made in new buildings under construction. During the month thirty-four building permits were issued, valued at $98,050. Among these, were additions to the factories of the Kaufman Rubber Company, the Western Shoe Company and the Dominion Sugar Company. Wholesale and retail trades were active, especially in the leather industry. The employés of the T. Kaufman planing mill were granted an increase in wages of 10 cents a day of ten hours, and corporation labourers also received an advance of 20 cents per day of ten hours. The builders' labourers declared a strike on May 12 for an increase in wages of 3½ cents per hour. The employers offered them an advance of 2 cents per hour for an eight-hour day, the former wages having been 28 cents per hour for a nine-hour day. After being out for a week, the labourers accepted the offer of the employers and returned to work. Bricklayers and masons received an increase of 2 cents per hour, making their wages 45 cents per hour for an eight-hour day from May 1.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers had a busy month seeding and planting. There was little change in the prices of their market products. There were indications of plenty of fruit this season, as blossoms were plentiful.

Lumbering.—Sawmills had finished sawing, but the dealers were shipping much lumber.

Manufacturing.—All the manufacturing establishments were busy during the month and several of them were working overtime.

Railway construction.—The construction of the People's Railroad was at a standstill.

CONDITION OF PARTICULAR TRADES.

All the building trades were busy, with the exception that builders' labourers were idle for one week during the strike. Iron moulders, iron workers and helpers, coremakers, machinists, steam engineers, electrical workers and linemen were busy. Metal polishers, buffers, platers and brass workers, stove mounters blacksmiths and boilermakers, sheet metal workers were fairly busy. Bicycle workers, tool sharpeners and horseshoers, woodworkers, upholsterers, carriage and waggon makers, car builders and shingle weavers were all busy during the month. Journeymen tailors, garment workers, hat and glove makers, boot and shoe workers enjoyed a busy month. Bakers and confectioners, butchers and meat cutters, ice drivers and tobacco workers were also active. Tanners and curriers, leather workers, saddlers, trunk and bag makers were very busy. Active conditions prevailed among barbers, broom makers, hotel and restaurant employés. Railway employés and freight handlers and street railway employés were busy. Drivers of hacks, drays, delivery vehicles and express waggons were busy. Among the unskilled, conditions were very active and there was a demand for this kind of labour.

WOODSTOCK, ONT., AND DISTRICT.

Mr. J. Markey, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Reports of industrial and commercial conditions continued favourable. There was practically no complaint of either lack of business or want of work. Most of the factory managers say that conditions are quite satisfactory for this season of the year, in many cases showing an improvement over the same period last year. The outlook is encouraging.

Reports from the various factories indicate that labour, especially skilled labour, is becoming increasingly scarce. This is accounted for by the fact that the West continues to attract skilled men, while the opening up of the building trades and of farming operations is drawing off many of the unskilled class. The scarcity of skilled labour would be a serious problem with some of the factories were it not for the approach of the slack season. There is considerable activity in the building trades, not that there is, so far, any great show of new buildings; but there is a good deal of work on repairs and improvements.

Reports from the furniture manufacturers, the waggon manufacturers, the piano and organ manufacturers, are that business is good, and promises to remain good. Reports from the stove foundry and other iron working establishments are of a similar character. There is a demand for painters, cabinet makers and moulders, and a more or less constant demand for mechanics accustomed to metal work.

CONDITION OF PARTICULAR TRADES.

There is considerable activity in the building trades, but nothing unusual for the season. Bricklayers and masons, carpenters and joiners, painters, plumbers and stone cutters are regularly employed. There is a demand for painters and stripers in the factories. There is also some scarcity of moulders. The Stewart Company is in need of men for stove and furnace work. Good mechanics, skilled in metal work, could find employment with the Tobin Arms Company. Woodworkers, upholsterers, varnishers, polishers, carvers, carriage and waggon makers are all busy. There is a demand for cabinet makers for the furniture and the waggon factories. The printing trade is reported normal, with no present demand for printers. Tailors and garment workers, bakers, butchers, and cigar makers are steadily employed. The tanning business is steady. Barbers are well employed. All available unskilled labour finds ready employment.

STRATFORD, ONT., AND DISTRICT.

Mr. J. T. Carlin, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during the month was very encouraging. The chief activity prevailed in the building trades and outdoor employment. A number of men and teams were engaged on the river bed dredging and widening the river, and grading and beautifying the river bank. Reports from the different factories continued favourable. All establishments report better conditions than at the corresponding month of last year. Several granolithic walks which are being laid give employment. Wholesale and retail merchants report business active. No change in the rate of wages or hours of labour, and no trouble in the labour market was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished seeding and are busy putting in the root crop. They report fall wheat looking good, and very fine prospects for a good yield. Market prices are:—

Eggs, 18–20 cents, per dozen.
Butter, 18–20 cents, per lb.
Potatoes, 90 cents, per bag.
Chickens, 75 cents, each.
Hay, $10, per ton.
Wheat, 83 cents, per bushel.
Oats, 35 cents, per bushel.
Barley, 48 cents, per bushel.
Peas, 65–70 cents, per bushel.
Live hogs, $6 –$6.15, per cwt.

Manufacturing.—Manufacturers were very busy, with plenty of orders ahead.

CONDITION OF PARTICULAR TRADES.

Bricklayers, masons, carpenters, lathers and plasterers were busy. Painters, paper hangers and plumbers were active. Gas fitters, stone cutters and builders' labourers were busy. Iron moulders, workers and helpers were active. Machinists, electrical workers and blacksmiths were busy. Boilermakers were active. Woodworkers, upholsterers, carriage and waggon makers were very busy. Coopers had a good trade. All engaged in the printing trade were fully employed. Journeymen tailors and garment workers and all factory workers were busy. Bakers, confectioners and butchers did a good trade. Ice handlers and cigar makers were busy. Harness makers were active. Barbers were very busy. The price of hair-cutting has been raised from 20 to 25 cents. Clerks, delivery employés, hotel, restaurant and laundry workers were active. Railroad conductors, engineers, firemen, trainmen, trackmen and freight handlers were very busy. Cab drivers, draymen and teamsters were active. Unskilled labour had plenty of work.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Conditions have greatly improved in this district as to the amount of work being done, which greatly exceeds last year's mark. All the factories were well supplied with work, and skilled help of all kinds was in demand. In the building trades business had picked up, and at the present time everybody is working; it is expected several large contracts will be let shortly. The London Concrete Machinery Company is building a large new two-storey work shop, and the McClary Company two new storehouses, while a large number of residences are going up. The Masonic Fraternity is to build a new temple, to cost about $60,000. On the railroads, business was not quite as good as last month, but the men were satisfied with the amount they were getting. A couple of the largest cigar factories, though working the same number of hours as formerly, are working on the daylight plan during the summer months, commencing work at 7 a.m. and quitting about 4 p.m. Both the city and street railway have a large force of men at work in the business quarter, and the streets are being covered with a fresh coat of asphalt.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The outlook for the crops in this district was never better, especially in the fruit line, as weather conditions could not be improved upon. Farmers continue to complain of the lack of help, and are looking to the British isles for the supply wanted.

Railroad construction.—The Canadian Pacific Railway Company commenced extensive improvements in its system in this locality, and has the foundation in for its new 100 engine round house; it also has workmen along the line from here to Windsor ballasting and otherwise fixing the track, with a work train also helping.

CONDITION OF PARTICULAR TRADES.

Bricklayers were all working. Carpenters were busy, as were also lathers and plasterers. Painters were very busy, and in demand, with paperhangers exceptionally busy. Iron moulders and iron workers were very busy. Electrical workers and linemen were exceptionally busy. Metal polishers, brass workers and stove mounters were busy. Carriage and wagon workers were very busy. Car builders were busy. Coopers were rushed. Printers were busy and in demand. Pressmen were busy and press feeders very scarce and in demand. Journeymen tailors were all busy. Garment workers report trade improved since last month. Boot and shoe workers were very busy. Bakers and confectioners report trade fair. Cigar makers were busy on 10-cent goods. Tanners were very busy. Broommakers report trade good. Cardboard box makers were busy. Teamsters were very busy, as were also draymen. The supply of unskilled labour was equal to the demand, and new arrivals continued to pour in from Great Britain.

DISTRICT NOTES.

Ingersoll.—The Morrow Screw Company is building a $100,000 addition to its factory.

ST. THOMAS, ONT., AND DISTRICT

Mr. J. A. Killingsworth, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The general condition of the labour market during May was satisfactory. Work in the building trades continued brisk, and skilled and unskilled labour was well employed. The heretofore peaceful conditions were disturbed by the sectionmen employed on the Michigan Central Railway going out on strike because of reduction in wages. Fifteen or twenty men were affected at St. Thomas. The Michigan Central Railway Company made another reduction in the working staff of the shops, some thirty men being affected, and curtailments were made in other departments with a view to economy. It is expected that the men laid off will be restored to their former positions within a short period. In the Michigan Central Railway Company's traffic department, business has been quiet. The Wabash and Pere Marquette Railways have been busy, and the men report being ahead of the preceding month. Local industries were well employed. The local street railway company had a very successful month. The Hydro-Electric system is giving satisfaction, the city being well lighted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crops in this district are doing well. The weather has been unreasonably warm, but there has been sufficient moisture to keep the ground in good condition. Local markets have been well atended.

Manufacturing.—The Nursery Shoe Company has been very busy, and it is rumored that additional building space is contemplated. The Monarch Knitting Company is fast installing machinery, preparatory to beginning operations. When put in operation, there will be a big demand for female help.

CONDITION OF PARTICULAR TRADES.

All employés in the building trades were well employed. Metal workers in the railway shops and other industries were well employed. Printers had a busy month. Clothing trades were active. Railway employés, with the ex-

ception of the Michigan Central Railway Company's men were busy. A considerable number of cars were handled by the Michigan Central Railway Company, but the fine weather, together with the large engines, enabled the Company to handle very large trains, thus reducing the number of crews. Unskilled labour was well employed.

CHATHAM, ONT., AND DISTRICT.

Mr. A. Gregory, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

General conditions during May have been very active, owing largely to the activity in the building trades. The large contractors were unable to secure sufficient men and teams to carry on the work of excavation on the numerous contracts which have started, and were compelled to purchase teams to carry on their work. May has been the best month for a number of years.

The Canadian Pacific Railway Company has a large number of men graveling the road west of the city. Factories of all kinds were asking for skilled mechanics, and labourers were in great demand.

CONDITION OF LOCAL INDUSTRIES.

Farmers were very active planting corn, sugar beets and tobacco. Owing to the very dry weather, many acres of beets will be ploughed up and replanted with corn. Live hogs are bringing from $3.50 to $4 per hundred less than during the corresponding month in 1910. The prospects for fruit of all varieties are good. Fall wheat is looking well, but the hay will be short. Good horses are in demand and are ranging in price from $250.00 to $550.

CONDITION OF PARTICULAR TRADES.

Bricklayers, carpenters and joiners, painters and paper hangers and plumbers were in great demand. Builders' labourers were very busy. Machinists and engineers, electrical workers and linemen were very busy. Brass workers were exceedingly busy. Blacksmiths, boilermakers and sheet metal workers reported a very fair month. Horseshoers were quiet. Wood workers, upholsterers, carriage and waggon makers were very busy. The printing and allied trades were busy. Tailors and garment workers reported a fair month. Boot and shoe workers were busy. Bakers and confectioners, butchers and meat cutters and cigar workers were active. Barbers, clerks, delivery employés and hotel and restaurant employés had steady work. Laundry workers were busy. Railroad trackmen were very busy. Street railway employés had steady work. Teamsters and draymen were very active. Unskilled labour was very active. Steamboat men were active. Cabdrivers and hackmen were active. Unskilled labour was in great demand.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The condition of the labour market during the past month has been exceedingly active, both for skilled and unskilled labour. There is a demand for all classes of labour. The building trades are booming and the lumber yards and planing mills are away behind with orders, as it is impossible to secure help to get out the work. There were forty-one building permits issued, with a total valuation of $85,750, as compared with ten permits issued during the corresponding month last year, with a valuation of $18,850, showing an increase of 355 per cent. For the four months of this year 110 building permits were issued, with a valuation of $199,375, while last year only forty permits were issued during the four corresponding months, with a valuation of $56,825. Manufacturers are rushed with orders and cannot get help. Unskilled labour is in demand. Wholesale and retail merchants report trade very active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are very busy seeding and gardening. They report they never saw such grand weather as we have had in the past month. They are looking for big crops and an abundance of fruit.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. F. A. Denman, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during the month, the various manufacturing plants working full time on orders well ahead. The retort plant of the Standard Chemical Company was destroyed by fire, loss about $3,000, fully covered by insurance. About fifty men were temporarily thrown out of employment. The company intends to rebuild immediately. The Algoma Steel Company commenced operating the second half of its coke plant of 110 ovens, making a total capacity of 1,000 tons of coke per day. The Lake Superior Paper Company has started extensive alterations and improvements to its pulp mills. Work was commenced on a contract of over five miles of cement walks. Tenders are being asked on over three miles of sewers to be laid this summer..

According to the Assessor the town shows an increased assessment during the year of nearly $900,000, with an increase of population of about 1,600, making a total assessment of nearly $6,000,000.

Prices on the farmers' market the last Friday in the month were

Eggs, 25 cents, per dozen.
Butter, 25–28 cents, per lb.
Potatoes, old, $1.10, per bag.
Radishes, 5 cents, per bunch.
Lettuce, 10 cents per bunch.
Rhubard, 3 bunches for 10 cents.
Parsnips, 20 cents per peck.
Onions, 5 cents, per bunch.
Chicken, 30 cents, per lb.
Buttermilk, 5 cents, per quart.

CONDITION OF PARTICULAR TRADES.

The various skilled trades were well employed. Business was good in nearly all lines. The building trades were very busy.

PORT ARTHUR AND FORT WILLIAM, ONT., AND DISTRICT.

Mr. F. Urry, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Work in this district has been very quiet and there are more than enough workers to supply the demand. Compared with the same period of last year, the promise for the summer is not bright. The Western Dry Docks at Port Arthur are busy and employing several hundred men. Wholesale and retail trade is quiet.

The typographical union has come to an amicable agreement with the Associated Press of the two cities, whereby some of the men get a slight increase, other conditions remaining the same: an eight-hour day for six days in the week; the agreement has been signed for two years. The sheet metal workers had their agreement signed on May 1, for one year, with an increase of 5 cents an hour. The electrical workers were not so fortunate in reaching a settlement, and as most of them are employed on public utilities in the two cities they have applied for a board of investigation under the Industrial Disputes Investigation Act.

The coal handlers of the Longshoremen's Union have also applied for a board of investigation under the same Act, in Port Arthur.

The painters and decorators of the two cities have been on strike since April; they are asking a five cent raise and recognition of the Union. Several of the master painters have signed the schedule and the men are given a certificate to work by the strike committee. All disputes have been conducted in a quiet manner.

Men who have farms have been busy this month, and as the weather conditions have been almost perfect for agriculture good hopes are entertained of a plentiful crop of hay and roots. The last two years the hay crop has been poor, owing to dry springs. All other industries are quiet.

CONDITION OF PARTICULAR TRADES.

The building trade in these cities has had a discouraging start, only smal

house property is being built, and hundreds of building mechanics have gone west to secure work. Bricklayers, masons, carpenters and joiners, and, in fact all the building trades, are very quiet, and many men have been looking for work during the month. There is not much prospect for the future at present, as no big works are starting up. In the shipbuilding trades, repair work is going forward at the dry docks, and a large number of men are employed. The printing and allied trades are quiet. Journeymen tailors and garment workers are quiet in both cities. Clerks, stenographers and delivery employés are fairly busy, but there is no rush, the summer trade has not yet set in. Navigation is not very brisk and consequently the docks are not as busy as usual for this time of the year. Unskilled labour is in no great demand, and the supply is greater than the need. Some city work in both cities is being undertaken and this is absorbing some of the labourers. A little later, no doubt, more work will be going forward.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

With the exception of one or two of the skilled classes, the demand during the present month has been very pressing. Weather conditions interfered with outdoor work to an unusual extent and this in a measure relieved employers, and in the meantime an additional supply of labour accumulated. The supply of labour for the city itself is abundant, as a large proportion of the men not working are desirous to stay in the city.

Prospects of a big harvest as a result of the abundant rains throughout the west, will stimulate trade and industrial activity, which is likely to accentuate the demand for workmen of various classes.

During May, the bank clearings have continued to increase and in volume are approximately forty per cent. greater than for the corresponding month of last year. This abnormal increase during the present month is due in some measure to the deliveries of grain on May contracts and also to exceptional activity in real estate. Aside from these particular causes, there is a substantial increase in general business, which in itself would account for a considerable gain in the volume of bank clearings.

It is understood that an agreement has been arrived at between the employés of the car department of the Canadian Northern Railway Company and the Company, which provides for an advance in wages of 2 cents per hour immediately, and an additional 1 cent a year from June 1, or approximately that date. The number of employés affected is about 600. The members of the Marble Cutters' Union went out on strike May 1, and were out two weeks when they returned to work unconditionally. On May 1, the members of the Structural Ironworkers' Union, to the number of 120, went out on strike and still contend that the strike is in effect. Members of the Union claim that most of those on strike are at work in other trades and are contributing to the strike fund.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The continuance of dull and wet weather has interfered with the seeding of barley and oats. Towards the end of the month, the weather was still unfavourable. Generally speaking, however, the precipitation is favourable to wheat growth, with the exception of low-lying districts and districts where the land is heavy and has a clay subsoil. In the districts where the soil is sandy and light, the conditions are extremely favourable.

Building.—Building has been more active during the month, and permits taken out have brought the total for the year to date to approximately $6,000,000. The *Free Press* will commence a new building of seven stories at once; the Sterling Bank has decided to erect an eight storey office building, the Union Trust Company one of ten stories, and the Hudson's Bay Company will very soon commence the erection of a mammoth new store. These are amongst the larger buildings upon which work will very soon commence.

There is a keen demand for new dwellings, and an unusually large number of permits are being taken out for these. To provide them with modern conveniences, there is a demand for the expenditure of more money by the City upon the construction of sewers and the extension of water mains. The Street Railway Company has also intimated to the City Council that it will proceed to extend its gas and electric light services and will ignore the conditions which the City attach to the permits that are now being issued to the Company. This will result in extensive work along that line, as the Company finds the demands for its services are very great.

Railway construction.—Employment agencies state that they have orders on their books for all the men they can get. The demand from the far western camps is very heavy.

BRANDON, MAN., AND DISTRICT.

Mr. E. Fulcher, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour was well employed during the past month, and prospects are good for a busy season, especially in the building trades. A larger amount of construction work is under way than at the corresponding period of last year. However, there is no shortage of labour, owing to the heavy immigration from the East and Europe.

The stonework of the new asylum is completed and work commenced on the brick superstructure. The concrete work on the Canadian Northern Railway hotel has reached the third story. Work on the East ward school is progressing, the first story brickwork is nearly completed. Contractor Bullock has secured the contract for a new school for the Souris school board, and the Brandon Construction Company has secured the contract for a $55,000 school at Nutana.

The City Council has decided on asphalt block paving for the streets in the business section. The cost is estimated at $110,000. Rails will be laid for the street car system at the same time.

The school board has purchased a block of land next the site for the new normal school, for the purpose of erecting a collegiate in the near future. It is expected that the present colleigate will be used for a technical school. The school board has appointed a domestic science teacher, and advertisements have appeared in local papers for a manual training instructor.

Retail trade has been somewhat dull up to the present, but is showing signs of rapid improvement. The carpenters and joiners have secured an increase in their minimum scale from 35 to 40 cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop prospects are exceptionally good, reports from all districts being that prospects were never better. Up to the present, May has had rather an exceptional rainfall, which, in view of last season's drouth, was all that could be desired.

Manufacturing.—The Hanbury Manufacturing Company, the McDiarmid & Clark Company, and the Manitoba Windmill & Pump Company were all very busy.

Railway construction.—A surveying party is surveying east of the city for a branch from the Grand Trunk Pacific Railway main line to Brandon. The Canadian Pacific Railway Company is putting in an industrial spur between Rosser and Pacific avenues.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were busy, with carpenters and joiners, lathers and plasterers very busy, painters active, and plumbers, steam fitters and builders' labourers busy. Moulders and machinists were busy. The allied printing trades were busy. Journeymen tailors and cigar makers were active. Railway transport was very busy. Unskilled labour also was busy.

REGINA, SASK., AND DISTRICT.

Mr. W. B. McNeil, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour in all its branches has had a very active month, there being little or no change over the previous month. In comparing the month of May with the same period of last year, little can be said, owing to the fact that the building trades were on strike; the effect of which was much felt. Though there is an exceptionally large programme of building construction prevailing, there is by no means a shortage of labour, more noticeable in unskilled labour. Wholesale and retail trade report business very active. On May 1, the structural iron workers employed on the Donohue block struck for an increase in wages. The contract for the iron work was let to a Manitoba firm and it refused to accede to the men's demands; whereupon the owner of the block, desiring completion as soon as possible, approached the men in reference to the trouble. On May 2, the iron workers returned to work, having the guarantee from the owner of the block that they would receive 50 cents per hour, ten hours a day; hitherto they had received 40 cents per hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Ideal weather conditions have prevailed for some time past, which tend to have a good effect on this year's crops. Seeding in this district is a thing of the past, and reports from all points go to show that the grain is already 9 to 12 inches high. In some districts a shortage of farm labour is experienced; but generally speaking the supply meets the demand.

CONDITION OF PARTICULAR TRADES.

The conditions of the bricklayers and masons have not been all that is expected for this time of the year; although there is so much building going on, still there have been many idle bricklayers and masons during the month, owing to a shortage of material. Carpenters and joiners were very active, the supply always being equal to the demand. Lathers and plasterers were active, also painters and paperhangers, plumbers and steam fitters. Stone cutters were busy, while builders' labourers were well employed. Iron workers, machinists and engineers were active, as were electrical workers, bicycle workers and horseshoers. All branches of the printing trades were active, with a demand for bookbinders. Journeymen tailors and garment workers were active. Bakers and confectioners were busy. Butchers had a good month. Barbers were well employed and in demand, as well as clerks and stenographers. Delivery employés were busy. Hotel, restaurant and laundry workers were very active. Freight handlers were active, as was evidenced by the increasing of the staff. Hackmen, draymen, teamsters and expressmen had a very busy month. Although the scope for unskilled labour has increased largely, the supply meets the demand.

CALGARY, ALTA., AND DISTRICT.

Mr. George Howell, correspondent, reported as follows:—

GENERAL CONIDTION OF LABOUR.

The general condition of the labour market has been active, but the supply of labour still exceeds the demand in several of the trades and unskilled labour; this being due to the large influx of immigrants. The general outlook for the summer, however, is excellent. A shortage of brick and cement is hampering building operations. The Bank of Montreal is about to extend its present premises. Plans are completed for Senator Loughead's hotel and theatre, which will cost between $200,000 and $300,000. The excavations for the Hudson's Bay Company's new departmental store are nearing completion. The excavations for the west wing of the Canadian Pacific Railway Company's station are about to commence. The new Dominion Bank, Irrigation and Colonization Company's buildings are making rapid progress. Four by-laws are being voted on, involving an expenditure of $190,000 for sewers, paving, storehouse, workshops, etc. E. W. Davies, consulting mechanical and electrical engineer for the Calgary Nail Company, Limited, which is capitalized

at $150,000, states they will have a factory erected and in operation by December.

Mr. M. Rosenthal of this city has left for the East to purchase the necessary machinery to establish a hat factory in this city. Wholesalers and retailers report trade much better than at the corresponding period of 1910. Plumbers and steamfitters have signed a two-year agreement for an increase of wages, viz:—2½ cents per hour from July 1, 1911, and 2½ cents per hour from July 1, 1912, to July 1, 1913. The electric linemen have received an increase of wages from 25 to 75 cents per day from May 1, 1911. The carpenters have signed an agreement for twelve months from July 1, that rates of wages will be 50 cents per hour.

The Structural Iron Workers are on strike for an increase from 40 to 50 cents per hour.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons were fairly well employed. Carpenters, lathers, plasterers, painters and decorators had a good month. Moulders, iron workers and helpers, coremakers, machinists, engineers, blacksmiths, boilermakers, sheet metal workers and horseshoers were active, and electrical workers and linemen very busy. Woodworkers and upholsterers were fairly well employed. The printing trades and tailors were busy. Butchers and bakers had a good month. Leather workers were well employed and builders' labourers fairly well employed. Miscellaneous trades report conditions improving. Transportation employés, on the whole, had a good month. Unskilled labour is improving but a surplus remains.

EDMONTON, ALTA., AND DISTRICT.

Mr. P. C. Foley, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The labour market has remained about the same as in the previous month. Skilled mechanics were well employed. With the exception of work on street railway extensions, the municipality has not commenced any of this season's work. The following figures show the returns for the month of April, as compared with the corresponding month of 1910.

	April, 1910	April, 1911	Increase
Customs	$ 27,513	$ 50,780	84½%
Building permits	252,196	359,027	42 %
Bank clearings	5,370,145	8,836,426	64½%
Post Office (stamps only)	6,712	7,988	19%
Street railway passengers carried	261,670	452,959	73 %
Revenue	11,345	19,014	68 %
Homestead entries	509	866	71 %

Nine of the fourteen chartered banks doing business in the City, and three loan companies are to-day possessed of real estate holdings in the heart of the business district of a valuation based on the assessment roll of the present year of $899,630, or nearly two and one-half per cent. of the City's total land assessment. Bank buildings already erected and edifices of the Credit Foncier, the Canada Permanent Loan and Mortgage Corporation and the National Trust Company have involved the expenditure of $552,000 in their construction, bringing the investment in real property and in buildings to a total not far short of $1,500,000. Of the fourteen chartered Banks now established in the city, the majority have opened their branches in the last decade, and the latest of these, the Bank of British North America, commenced business in temporary premises during the month. This bank and the Royal Bank which has recently purchased a site will build in the near future. The table below gives the values of sites and buildings of Edmonton Banks and Loan Companies. The site values are based on this year's assessment roll.

Bank.	Site.	Bldg.	Total.
Commerce	$ 75,000	$30,000	$ 105,000
Dominion	56,100	55,000	111,100
Imperial	82,500	100,000	182,500
Merchants	82,500	65,000	147,500
Molsons	60,000	50,000	110,000
Montreal	82,500	35,000	117,500
Union	75,000	60,000	135,000
Credit Foncier	79,730	35,000	114,730
National Trust	52,500	52,000	104,500
Canada Permanent	28,800	70,000	98,800
Royal	75,000	.....	.....
British North American	150,000	.....	.....
	$899,630	$552,000	$1,441,63

By an agreement entered into by the International Brotherhood of Electrical Workers and the Provincial Government the following schedule of wages went into effect on May 1. Exchange linemen will receive an increase from $3 to $3.75 per day of nine hours. Exchange foremen and cable men from $3.75 to $4.50. For foremen in charge of plants in the cities the minimum is fixed at $110 per month. Under the former agreement the minimum was $100 per month. Trouble men will receive $3 to $3.50 per day and all to be paid extra for overtime, together with necessary expenses incident to their work. They formerly received $80 per month with no additional allowance for overtime. The lowest wages now paid for labourers on the ground is $2.50 per day.

The electricians employed by the municipality having failed to come to an agreement with the City Commissioners regarding a wage scale, have applied to the Department of Labour for the appointment of a Board of Conciliation and Investigation. On May 1, the carpenters' new schedule of wages went into effect. The increase is from 43⅔ cents to 45 cents per hour. All classes of labour were well employed, except unskilled labour, of which the supply greatly exceeded the demand.

CONDITION OF LOCAL INDUSTRIES.

Agricultural conditions are reported as exceedingly satisfactory. The season is somewhat backward; but the work of seeding has been proceeding under entirely satisfactory conditions, and the winter wheat promises exceptionally well.

Lumbering.—The mills are gradually getting into running order and in a very few days will be working at full capacity turning out about 100,000 feet per day. The booms along the river at the various mills are filled with logs which are being converted into lumber rapidly, and more material is on its way down stream from the timber berths. The Edmonton Lumber Company is operating an entirely new plant this year, with a capacity of between 30,000 and 40,000 feet per day. It is expected that this mill will turn out approximately 3,500,000 feet of lumber this season.

Railway construction and employment.—Railway construction is being prosecuted vigorously. It is understood that contracts have been awarded for the first section of the Canadian Northern Railway Company's branch, northwesterly from Onaway, towards the Grande Prairie country and the Grand Trunk Pacific Railway Company has parties engaged locating a line from Edson to give access to a section of the Peace River Country. No difficulty is experienced in obtaining labour for this class of work.

LETHBRIDGE, ALTA., AND DISTRICT.

Mr. J. M. Ritchie, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour during May has been very little better employed than in April. In the city it has been a dull month for the time of year. The supply of labour has been greater than the demand and men in all branches have been idle. The district around Lethbridge has provided more work than the city. The extensive farming operations have provided work for a great many, who otherwise would have remained idle. The coal mines were idle and new comers placed many idle men in this district. A branch of the Gordon nail factory of St. John's, N.B., is going to be established here. They will employ about fifty men. Cheap fuel was the item that decided them in coming to Lethbridge. A new theatre was started, but, owing to some disagreement with the city building by-law the work has been stopped. Work on a large warehouse has also been stopped for the present. Men are here to start work on an overhead traffic bridge to connect South Lethbridge with North Lethbridge, the railway yard sidings coming in between the north and south. Transportation remained steady. There was no coal trade. The increase in bank clearings for week ending May 25 was $47,648.95; $547,388.39 to $499,739.42 the week before. With the ex-

ception of some increases in wages for teamsters, the rates remained the same. There is at present no unrest in labour circles.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The conditions in farming were never better in this district. Everyone in that line is fully occupied. There is every prospect of an abundant crop. Farm implement dealers are doing a good trade, and the area of cultivation is extending every day.

Railway construction and employment.—There is no railway construction in the vicinity of Lethbridge, but the local employment agency is sending numbers of men out to various points.

Other industries.—The local iron works and foundry are extending buildings in order to handle more work as the season comes along; the latter part of the summer being the busy time. The local brewery is also going to extend its buildings. There is no activity in the wood working lines, building operations being very quiet.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons have had a very dull month; very few have found employment. Carpenters and joiners have been dull, and numbers have left the city for smaller places. Lathers and plasterers were very dull. Painters have had a very fair month, mostly repainting houses that were already built. Plumbers were fairly busy with no men idle during the month. Gas and steamfitters and builders' labourers were very dull. Iron workers and helpers, electrical workers and sheet metal workers were well employed.

NELSON, B.C., AND DISTRICT.

Mr. A. B. Docksteader, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

The building permits issued by the city engineer in April, represented a total value of $46,980. The total value of the permits issued during the four months ending with April, 1911, was $70,790, as against $56,035 for the same period last year, or an increase of twenty-six per cent. The Kootenay Gold Mines, Limited, have just paid the last instalment of $10,000 on the Granite-Poorman Mine, near Nelson, a gold producing property which they propose to develop on a large scale. The summit group has been acquired by a syndicate, the price paid being $50,000. The Royal Canadian group, containing six claims, and the McAllister group, consisting of four claims, have also changed hands. All these mines, which are rich in ore, will be worked to their full capacity, which means employment for a number of men. Seventy acres of the Annable ranch, containing forty acres of orchard, most of it in bearing, and ten acres of rich pasture, have been sold to a syndicate for $28,500, a record price in Kootenay. The customs returns for the port of Nelson for the month of April show an increase of over $3,000 over those of April, 1910, the figures being $10,065.75 and $6,755.64 respectively. The inland revenue returns for April were about equal to those of the same month last year, or a total of $2,860.37. Tenders have been called by the Canadian Pacific Railway Company for a line from Three Forks to the Lucky Jim mine, and it is expected the contract will be let and work started very shortly. The members of the Nelson Retail Merchants' Association have decided to close their stores on Wednesday afternoons during the months of June, July and August.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. J. P. McMurphy, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Compared with May, 1910, and with the preceding months of this year, the present month shows a steady and substantial improvement. All over the city and outlying districts great activity is evidenced in the laying out of new

roads, the improvement of old thoroughfares, the construction of buildings and laying of sidewalks. In the city proper the street work, sewer work and cement sidewalk laying are making a gradual headway. A steady increase in land values is reported, and this is not by reason of any booming, but simply on account of the demands of our increasing population. Railway building and the electric tramline services are doing much to increase settlement, and are stimulating production by bringing the producer into closer touch with the market. The land registry returns for the past month show a slight decrease from the figures registered in March, which touched a record. On May 20 alone there were seventy-nine applications producing fees to the amount of $625.71.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Word was received from the Delta that the warm rains of late have had a wonderful effect on the growth of gardens, fields and orchards. In the Upper Fraser Valley the crop prospects are of the best, the rains having brought along the meadows, and spring-sown grain. There will be a big hay crop, and the hop vines are showing strong and healthy.

Fishing.—The salmon run which is still abnormally small has sustained only a slight improvement. There is also on the market a fairly large quantity of sturgeon. Halibut is plentiful now and there is to be noticed a fair number of rock cod.

OTHER INDUSTRIES.

Mr. W. Owen, M.E., of London, England, officially announced the location of a street plant at Pill Meadows. The site will consist of 200 acres on the Pill river, with a frontage of 2,000 feet on the east bank. It is the intention of the Company to install blast furnaces, open hearth steel furnaces, and erect rolling mills. The capacity will be 1,000 tons a day, with an estimated annual output of 250,000 tons of finished product. A charter has been secured for the Fraser Valley Tile & Cement Company. The company is capitalized at $200,000 and will immediately proceed to erect a $100,000 cement block in this city. It is their intention to erect plants for the manufacture of cement blocks and tiles at Ladner, Eburne and Sapperton.

CONDITION OF PARTICULAR TRADES.

The different departments of the building trades are active. Iron moulders are quiet with machinists fairly active. Electrical workers, blacksmiths, horseshoers, sheet metal workers, tool sharpeners and jewellers are active. Shipbuilders, shipwrights and caulkers are fairly active. In the woodworking and furnishing trades all are fairly active. Printers, pressmen and electrotypers and tailors are active. Boot and shoe workers are busy. Bakers, butchers and cigarmakers are all active. Barbers, clerks, stenographers, delivery employés are very busy, with hotel employés and laundry workers very active. Transportation employés are all very active. Activity prevailed among unskilled labourers.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartlett, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Up to May 27 there were twenty-three working days. Rain prevented outside work during nineteen days; consequently the building trades and trench workers had a poor month. The labour market in general was very unsettled. A threatened general strike is scheduled to take place on June 5, over the question of "closed shop" versus "open shop". There is an exceptionally large amount of building in hand and in contemplation. The city is crowded with idle men, mostly on account of the big number of immigrants arriving from the old country and eastern Canada. A special meeting of the City Council is called for the twenty-ninth instant, to consider means whereby the universal shut down of the industries may be prevented.

On May 24, Empire Day, some 340 carpenters put up the new building for the "Made-in-Canada" fair, which takes place on June 14 to 22. The structure is 60 by 250 feet in size; the labour on which was donated by the union of carpenters.

The matter of having a Government inspector of bake shops appointed is being agitated for by the unions. The Provincial Act provides for one. The strike of the machinists started on June 1, 1910, is still in effect. The building permits for the two following cities for the months of January, February, March and April is herewith given:—

Vancouver	Seattle
$5,793,650	$2,636,890

H. H. Ramage will erect a three-storey brick apartment house, 573 Hornby street, costing $8,500. The contract has been let for the drydock, costing some $1,500,000. The location is near Roche Point. M. P. Cotton secured the contract for development work for the Canadian Pacific Railway Company, at Shaughnessy Height, the new fashionable residential district of Vancouver. Mr. Chas. Fee will erect a six-storey block at 1172 to 1176 Granville street, to cost $100,000. Also Mr. Geo. H. Dawson will build an eight-storey structure, costing between $175,000 and $200,000, at the corner of Hastings and Main streets. The Pacific Northwest Branch of the International Alliance Theatrical Stage Employés Union held its annual convention here May 9-10-11. In the face of a lightening money market the flow of wholesale business in the city continued to increase. Outward shipments in hardware, builders' materials and provisions were heavier this spring than ever before. Particularly for northern inland points, the demand for supplies was heavy. Prices in all lines were very steady. A shipment of Australian apples arrived. They were fresh-picked from the season's crop and arrived at a time when last year's local crop is about depleted, thus proving the serviceableness of opposite seasons.

Business property is still advancing. The sale of seventy-five feet frontage on Seymour street was reported at $160,000. Two years ago it was purchased for $55,000. Alderman Rogers will erect a ten-storey building, at the corner of Pender and Granville streets, one block from the post-office, to cost $500,000. Up to May 23 there were a total of $1,111,577 building permits issued for May.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There was a big month experienced in halibut fishing, and, owing to an over supply of fresh fish, fishing boats discharged at Ketchican.

Mining.—Several prospectors left for Steamboat Mountain, via Hope, on the Canadian Pacific Railway, where the quartz is reported above the average.

Lumbering was active.

Railway construction.—Tenders were awarded for the construction of the Canadian Northern Railway Company's line between Hope and Kamloops. The work was awarded in four sections, and aggregated the expenditure of $15,000,000. In some parts the work will cost $200,000 a mile.

CONDITION OF PARTICULAR TRADES.

In the building trades, the separate branches reported the state of trade very unsettled and conditions bad, owing to the weather and differences with employers. Ship building was active. Work has been quiet in the printing business. Cigar makers report trade very quiet. Barbers report a surplus of men. Clerks and stenographers were very quiet.

VICTORIA, B.C., AND DISTRICT.

Mr. J. Chrow, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour conditions during May may be said to be satisfactory in almost all industries, and a larger number of men were employed than at any previous time in the history of the city. All industries were working full time, keeping

regular help constantly employed. The opening of navigation on the northern rivers has taken a number away who follow different lines of business in the north, and who usually make Victoria their headquarters during the winter months. Marked activity prevails in the building trades, a number of business blocks and many private residences are in course of construction, and now that all labour disputes as to wages, &c., have been adjusted, the prospects in this line are very bright. For the month of April, eighty-six building permits were issued, compared with seventy-nine in April, 1910. The aggregate value of the permits issued was $280,110 for April, this year, compared with $192,-440 for the same period a year ago. The bank clearings for April, 1911, were $11,693,804, as compared with $7,239,-383 in April, 1910. The customs revenue for April, 1910, amounted to $338,161, being an increase of more than $50,000 over the same month a year ago. The head tax on Chinese amounted to $193,045, which establishes a new record. Wholesale and retail trade continued brisk, with prospects bright for the future. The retail section of the city is growing steadily, several substantial blocks being under construction. The City Council recently awarded contracts for 600,000 yards of asphalt paving, at an approximate cost of more than $1,500,000, which will give employment to a large number of men for some time. The Canadian Pacific Railway Company is about to largely increase its wharfage facilities in this city by extending its present wharf 240 feet, making a total length of over 600 feet. The total revenue from the timber branch of the Provincial Lands Department for the month of April was $71, 675. During the first four months of the present year, the British Columbia Electric Railway Company carried 2,229,074 passengers over the lines of its Victoria system, an increase over the same period last year of 660,479. The city assessor has completed the assessment roll for 1911. The assessable value of land alone is $46,001,442, compared with $37,915,310, the total for land and improvements a year ago. At the municipal elections in January last the ratepayers decided by a referendum vote to do away with the tax on improvements, and it is very probable that in the future taxes will be levied on land values only. The congregation of St. John's Church (Anglican) is calling for tenders for the erection of a new church at a cost of $80,000. The School Board is about to commence the erection of a new High School, at an estimated cost (including land and building) of $200,000. On May 22 the electors of the city voted favourably on the following money by-laws: $350,000 for sewers and surface drains; $150,000 for school additions and extensions; $25,000 for new headquarters for the police.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers of this district have finished planting their crops, and present indications point to an abundant harvest. The fruit crop, especially strawberries, for which this district is famous, promises to be a bumper crop.

Fishing.—The owners of the salmon traps which are located in the Straits of Fuca have completed the building of their traps and are looking forward to a successful season.

Lumbering.—The lumber industry is in a flourishing condition, all mills are working to their full capacity. A new shingle mill is in course of construction, the only one in Victoria.

Manufacturing.—The various manufacturing industries report business as active, and all are working to their full capacity. The shipbuilding industries are unusually busy with more than the usual amount of work in sight.

Railroad construction.—Work is progressing rapidly on the Canadian Northern Railway, the working force having been largely increased recently.

CONDITION OF PARTICULAR TRADES.

All the various trades in this city and district report work as plentiful, with prospects bright for the immediate future, at least.

NANAIMO, B. C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reported as follows:—

GENERAL CONDITION OF LABOUR.

Labour in general has been better employed during the month, although there is still a surplus of men in the district. The building trades have been exceptionally active, owing to the large amount of new buildings going up in the city and district. Commercial activity has been in evidence, especially in passenger traffic, which has shown a very large increase. Merchants report business as very good, both wholesale and retail. There have been no changes in wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been active finishing their spring sowing.

Lumbering.—The sawmills of the district have been busy, some of them working double shifts. The logging camps are actively at work.

Mining.—The coal mines of the district have not been as busy this month as they were last month, although they have not lost very many days' work.

Railway construction and employment.—Railway construction work on the extension to the Eastern and Nanaimo Railway to Alberni is nearly finished, and track laying is being pushed ahead. There are a number of parties of surveyors on different parts of the Island, locating new railroad and extensions which are expected in the near future.

There is a large amount of land clearing going on in the different parts of the district by the Canadan Pacific Railway Company, and also by other parties for farming and building purposes.

The sandstone quarry is working, though not to a very great extent.

CONDITION OF PARTICULAR TRADES.

Bricklayers and masons, carpenters and joiners have been very actively employed, there being a large amount of new buildings going up and projected. Lathers and plasterers have been active. Painters and paperhangers have been very active. Plumbers report work as good. Builders' labourers have been well employed. Blacksmiths and carriage makers report work as good. Printers have been active. Cigar makers report work normal. Teamsters and expressmen have been active. Unskilled labour has been fairly well employed, there having been a large amount of the usual city spring work, as well as sewerage connections and cement sidewalks in course of construction in the city. There has also been considerable activity in the other towns in the district.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS UNDER THE ACT DURING THE MONTH OF MAY, 1911.

DURING the month of May two applications for the establishment of Boards of Conciliation and Investigation were received in the Department as follows:—

1. On behalf of certain employés, members of the Coal Handlers' Union, of the Canadian Northern Coal and Ore Dock Company, Limited, of Port Arthur, Ont. The number of employés affected by this dispute was said to be 150 directly, and 200 indirectly.

2. On behalf of the employés, members of Gowganda Miners' Union, No. 154, Western Federation of Miners, of the Hudson Bay Mining Company, Limited, of Gowganda, Ont. The number of employés affected by this dispute was said to be thirty.

Other Proceedings Under the Act.

In the application for the establishment of a Board of Conciliation and Investigation to adjust certain matters in dispute between the Canadian Northern Coal and Ore Dock Company, Limited, of Port Arthur, Ont., and its employés,

members of the Coal Handlers' Union, it was stated that the dispute related to a demand on the part of the employés concerned for increased wages, and increased compensation for overtime, also that members of the Union should not be discriminated against, and that when an agreement was concluded between the parties it should remain in force for a period of one year. The number of employés affected by this dispute was estimated at 150 directly and 200 indirectly.

A Board of Conciliation and Investigation was established by the Minister of Labour in this matter on May 19, Mr. George F. Horrigan, of Port Arthur, Ont., being appointed a member of the Board on the recommendation of the employing Company, and Mr. Arthur Boyd, of Port Arthur, Ont., appointed on the recommendation of the employés concerned. At the close of the month the Board had not been completed by the appointment of a third member.

In the application for the establishment of a Board of Conciliation and Investigation to adjust certain matters in dispute between the Hudson Bay Mining Company, Limited, of Gowganda, Ont., and its employés, members of Gowganda Miners' Union, No. 154, Western Federation of Miners, it was stated that the differences in question related to an alleged reduction by the Hudson Bay Mining Company of wages to the extent of fifty cents per shift and to an increase of fifteen cents in the price for board. The employés complained that only seven days' notice had been given by the Company, and demanded that the schedule of wages should be continued which had previously existed. The number of employés affected by this dispute was given as thirty.

A Board of Conciliation and Investigation was established by the Minister of Labour on May 31, Mr. Duncan J. McDonell, of Gowganda, Ont., being appointed member of the Board on the recommendation of the employés concerned. At the close of the month the Board had not been completed.

DISPUTE BETWEEN MICHIGAN CENTRAL RAILROAD COMPANY AND MAINTENANCE-OF-WAY EMPLOYEES—SETTLEMENT REACHED THROUGH THE GOOD OFFICES OF THE DEPARTMENT OF LABOUR.

ON MAY 3, the Department of Labour was informed that as a result of orders issued on April 28, by the Michigan Central Railroad Company, directing a reduction of ten cents per day in the wages of its Maintenance-of-Way Employés, a number of the sectionmen affected on the Company's lines in Canada, refused to accept the lower rates of remuneration and had ceased work. On May 20, application was made to the Department of Labour on behalf of the sectionmen concerned, for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, to which the matters at issue between the Company and its employés should be referred for adjustment. It was claimed on behalf of the employés that the reduction of wages had been made without proper notice, and in violation of the provisions of the Industrial Disputes Investigation Act in this respect. The application was not entirely in form and whilst communications were proceeding between the Department and the employés on these points, Mr. E. H. Williams, an official of the Department, was instructed to proceed to St. Thomas, Ont., to confer with the parties concerned and to report on the circumstances of the dispute for the Minister's information.

As a result of interviews which Mr. Williams had with the officials of the Michigan Central Railroad Company, it was stated by the latter that the railway management had not been previously aware of the requirements of Section 57, of the Industrial Disputes Investigation Act concerning proposed changes in conditions of employment as to wages and hours. Later, it was announced by the Company, as a result of the information placed before them by the Department, that the rates of wages paid sectionmen before the change should be restored and

the former employés reinstated if they so desired. The rates of wages restored by the Company's orders were $1.65 per day, for yard sectionmen and $1.60 for sectionmen along the line. The scale of wages in question is that which had prevailed on the Michigan Central lines in Canada between May 1, 1910 and April 30, 1911. The number of employés concerned was understood to be between 1,200 and 1,400.

On May 27, a resolution in the following terms was adopted at a meeting of Michigan Central Maintenance-of-Way Employés in St. Thomas: "Resolved, that we, the sectionmen employed on the Canadian lines of the Michigan Central Railroad, in meeting assembled, desire to place on record our approval of the Industrial Disputes' Investigation Act, 1907 as a means of satisfactory settlement of disputes without strike or lockout, and desire, further, to thank the Department of Labour for its prompt action in sending so capable an officer of the Department to aid in restoring the very pleasant relationship existing previous to May 1, between the above Company and its sectionmen.

(*Sgd.*) JACOB MORS, *Chairman*,
(*Sgd.*) F. CHINN, *Secretary*.

AN ACT TO PROHIBIT THE IMPROPER USE OF OPIUM AND OTHER DRUGS.

ON May 19, a Bill of the Dominion Parliament to Prohibit the Improper use of Opium and Other Drugs was assented to by His Honour the Deputy Governor, in His Majesty's name, and thereupon became law. Reference has already been made in the February number of the *Labour Gazette* to the circumstances which prompted the introduction of this legislation, and to the purpose it was intended to serve. The measure, as originally drawn, was designed to prohibit the importation, manufacture, sale, or use of opium for other than scientific or medicinal purposes. As a result of further investigation by the Minister, the scope of this Bill was subsequently enlarged, so as to comprehend the prohibition of the improper use of Opium, Morphine and Cocaine.

Upon the advice of the Director-General of Public Health and the Medical Adviser of the Commission of Conservation, the schedule of drugs to which the proposed enactment should apply was still further enlarged whilst the Bill was before Parliament. The drugs to which the law accordingly applies are as follows:

Cocaine, or any salts or compounds thereof.

Morphine, or any salts or compounds thereof.

Opium, Eucaine, or any salts or compounds thereof.

It is also provided that the Governor-in-Council may, from time to time, add to the schedule any alkaloids, derivatives, or preparations of the drugs above named, the addition of which may be deemed necessary in the public interest, such orders to take effect at the expiration of thirty days from the time of publication in the *Canada Gazette*.

Terms of the Statute.

The Opium and Drug Act, as assented to by His Honour the Deputy Governor, is in the following terms:

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

1. This Act may be cited as The Opium and Drug Act.

2. In this Act, unless the context otherwise requires,—

(*a*) "drug" means and includes any substance mentioned in the Schedule to this Act; or which may be added thereto under the authority of this Act;

(*b*) "opium" means and includes crude opium, powdered opium, and opium prepared for smoking, or in any stage of such preparation;

(*c*) "imports" or "imported" means and includes the bringing or conveying, or the causing to be brought or conveyed, into Canada of any drug;

(*d*) "export" or "exporting" means and includes the taking or conveying,

or causing to be taken or conveyed, out of Canada of any drug;

(*e*) "magistrate" means and includes any judge of the sessions of the peace, recorder, police magistrate, stipendiary magistrate, two justices of the peace, or any magistrate having the power or authority of two or more justices of the peace.

3. Every person who, without lawful or reasonable excuse, imports, manufactures, sells, offers for sale, has in his possession, or takes or carries or causes to be taken or carried from any place in Canada to any other place in Canada, any drug for other than scientific or medicinal purposes, shall be guilty of a criminal offence and shall be liable, upon summary conviction, to a fine not exceeding five hundred dollars and costs, or to imprisonment for a term not exceeding one year, or to both fine and imprisonment.

4. Every person who smokes opium, or who, without lawful or reasonable excuse, has in his possession opium prepared or being prepared for smoking, shall be guilty of a criminal offence and shall be liable, on summary conviction, to a fine not exceeding fifty dollars and costs, or to imprisonment for a term not exceeding three months, or to both fine and imprisonment.

(2) Any person who, without lawful and reasonable excuse, is found in any house, room or place to which persons resort for the purpose of smoking or inhaling opium, shall be guilty of a criminal offence and shall be liable, upon summary conviction, to a fine not exceeding one hundred dollars and costs, or to imprisonment for a term not exceeding one month, or to both fine and imprisonment.

5. Any person who deals in any drug, who gives, sells or furnishes any drug to any person other than a duly authorized and practising physician, veterinary surgeon or dentist, or to a *bona fide* wholesale druggist or to a druggist carrying on business in a *bona fide* drug store, or who neglects to make or preserve a proper record in a suitable book of the name and address of the physician, veterinary surgeon, dentist or druggist to whom he gives, sells or furnishes any drug, and the date of such sale; and any druggist who gives, sells or furnishes any drug except upon a written order or prescription signed by a duly authorized and practising physician, veterinary surgeon or dentist, or who, without the authority of the prescribing physician, veterinary surgeon or dentist, uses any prescription to sell any drug on more than one occasion, or who neglects to make or preserve a proper record in a suitable book of the name of the physician, veterinary surgeon or dentist signing such order or prescription, the date of filling the order or prescription, and in the case of a prescription the name of the person for whose use the prescription was granted, or who refuses to allow such record to be examined by any police officer shall be guilty of a criminal offence and shall be liable, upon summary conviction, to a fine not exceeding two hundred dollars and costs, or to imprisonment for a term not exceeding three months, or to both fine and imprisonment.

(2) Any physician who signs any prescription or order for the filling of which any drug is required, unless such drug is required for medicinal purposes or is prescribed for the medical treatment of a person who is under professional treatment by such physician, and any dentist or veterinary surgeon who signs any order for any drug, unless such drug is required for medicinal purposes in connection with his practice as a dentist or veterinary surgeon shall be guilty of a criminal offence and shall, upon summary conviction, be liable to a fine not exceeding two hundred dollars and costs, or to imprisonment for a term not exceeding three months, or to both fine and imprisonment.

6. Any person without lawful or reasonable excuse exporting or attempting to export any drug to any country which prohibits the entry of such drug, shall be guilty of a criminal offence and shall be liable, upon summary conviction, to a fine not exceeding five hundred dollars and costs, or to imprisonment for a term not exceeding six months, or to both fine and imprisonment.

7. If it be proved upon oath before any magistrate that there is reasonable cause

to suspect that any drug is kept or concealed for any purpose contrary to this Act in any dwelling-house, store, shop, warehouse, outhouse, garden, yard, vessel or other place such magistrate may grant a warrant to search by day or night any such place for such drug, and if such drug is there found, to bring it before him.

8. When any person is convicted of an offence against this Act, the convicting magistrate may adjudge and order, in addition to any other penalty or punishment, that the drug in respect of which the offence was committed, or which has been seized under the search warrant as aforesaid, and all receptacles of any kind whatsoever found containing the same, be forfeited and destroyed, and such order shall thereupon be carried out by the constable or peace officer who executed the said search warrant, or by such other person as may be thereunto authorized by the said convicting magistrate.

9. Any drug now in the custody of any court, and any drug that may be seized for the violation of any law, shall be destroyed, unless such drug is claimed within three months after the passing of this Act, or after such seizure as the case may be, and it is established to the satisfaction of the court that no offence has been committed in connection therewith, or unless the court otherwise orders, provided however, that the provisions of the Customs' Act shall apply to any drug unlawfully imported into Canada.

10. If any person charged with an offence against this Act pleads or alleges that he imported, manufactured, sold or offered for sale, or had in his possession, any drug in respect of which the offence is charged, for scientific or medicinal purposes, the burden of proof thereof shall be upon the person so charged.

11. One half of any fine recovered from any person convicted of an offence against this Act may be paid to the person giving information leading to such conviction, if so directed by the magistrate.

12. No conviction, judgement or order in respect of an offence against this Act shall be removed by certiorari into any of His Majesty's courts of record.

13. The Governor-in-Council may make such orders and regulations as are deemed necessary or expedient for carrying out the intention of this Act; for the seizure of any drug that there is reason to believe is liable to forfeiture under this Act; and for the use or sale of any drug for scientific purposes.

14. The Governor-in-Council may, from time to time, add to the Schedule to this Act any alkaloids, derivatives or preparations of the drugs named in the said Schedule, the addition of which is by him deemed necessary in the public interest, and every order in council in that behalf shall be published in the *Canada Gazette*, and shall take effect at the expiration of thirty days from the date of such publication.

15. Chapter 50 of the statutes of 1908 is hereby repealed.

16. Section 4 of this Act shall not come into force until the first day of July, one thousand nine hundred and eleven.

SCHEDULE.

Cocaine, or any salts or compounds thereof.

Morphine, or any salts or compounds thereof.

Opium.

Eucaine or any salts or compounds thereof.

VISIT OF CANADIAN ROYAL COMMISSION ON INDUSTRIAL TRAINING AND TECHNICAL EDUCATION TO UNITED KINGDOM.

MUCH interest is being taken in the Mother Country in the visit of the members of the Canadian Royal Commission on Industrial Training and Technical Education, and every possible facility and assistance has been accorded the Commissioners, to the end that their inquiry into the methods of industrial training and technical education in the United Kingdom may be as complete as possible. The Commissioners have also received in London, and in other

centres which they have visited, many courtesies, social and otherwise. After visiting London, Liverpool, Manchester, Leeds, Glasgow and Edinburgh, they proceeded on May 19 to Germany, where arrangements have been made through the British Foreign Office and Colonial Office by which they will be permitted to visit the technical and trade schools of that country, and to inspect many of the leading industrial establishments. In Berlin, which the Commissioners reached on May 22, they had the advantage of the company of an English Inspector of Schools who visited Germany, and made a special report for Great Britain on Continuation Classes in Germany.

Immediately upon arrival in Berlin, the Commissioners visited a number of the Continuation Classes in that City—one for girls from 14 to 17, which was attended voluntarily, and one for boys 14 to 17, at which the attendance was compulsory. In the former, instruction was given in dressmaking, tailoring, and housekeeping, particular attention being given to housekeeping accounts. In the boys' school, instruction was given in the following trades: shoemaking, harness making, silversmithing and goldsmithing.

Dr. J. W. Robertson, Chairman of the Commission, in the letter to the Department mentioned that the officials of these schools had been found very courteous and willing to explain fully the methods of instruction which prevailed, and the success attending the same.

From Germany, the Commission, continuing its investigation of educational and industrial institutions, expects to reach Switzerland early in June, and to proceed to France. It is expected that the Commissioners will remain about two months on the continent.

During their stay in London, the Commissioners attended the meetings of the Imperial Educational Conference, which was summoned by His Majesty's Government, and was attended by leading educationalists from the Mother Country, as well as delegates from all parts of the Empire. The Commissioners were received by Lord Strathcona, Canadian High Commissioner, and by the Right Honourable Mr. Harcourt, Secretary of State for the Colonies, who evinced the utmost interest in their visit and offered the Commissioners anything that his Department could do to facilitate their inquiries. The Commissioners had the advantage in London of the advice of Sir John Struthers, Head of the Scottish Educational Department, and of Mr. R. Blair, Chief Educational Officer of the London County Council, on the subject of their inquiry. The work of the Commission also received widespread attention in the British press.

At Manchester, the Commission visited the Municipal School of Technology, the Municipal School of Commerce, and a number of branch Technical Schools also morning, afternoon, and evening classes for technical education. The Commission was received by the Lord Mayor of Manchester during its stay in that City, waiting on the Lord Mayor by invitation.

At Leeds, the Commission visited Elementary Schools with supplementary classes, including two schools called Trade Schools, where boys from fourteen to sixteen received extended training in the use of ordinary hand tools. The time spent at these schools is included by manufacturers in the apprenticeship term. Special attention was paid in Leeds also to secondary classes, and to the Leeds School of Art, which last institution is described as having a specific and striking effect upon the craft and industry of the City. The Boot and Shoe School and the School for Printers and Lithography at Leeds were closely investigated; these institutions are described as having greatly improved and extended the trades to which they relate. At Leeds the members of the Commission spent an entire evening in company with the leading educational officers and members of the School Board.

The Commission visited Glasgow and Edinburgh, securing much useful information. Dr. Robertson's view is that

more value attached to what the Commission learned in Edinburgh than from any other single place, school authorities, employés, workmen and parents all seeming to co-operate in a friendly and enthusiastic manner.

THE HOUSING QUESTION IN CANADA.

AN address on Unsanitary Housing delivered at the second annual meeting of the Commission of Conservation held at Quebec, January 17, 1911, by Dr. Chas. A. Hodgetts, Medical Advisor to the Committee on Public Health of the Commission, has been issued by the Commission in a small volume, which contains also an address on Agricultural Work in Ontario, delivered on the same occasion by Mr. C. C. James, Deputy Minister of Agriculture for the Province of Ontario. The address by Dr. Hodgetts is illustrated with a number of pictures, which show clearly that slum conditions have already begun to arise in various parts of the country. An account of these conditions is followed by a brief synopsis of the laws and regulations in force in the various provinces with regard to housing, and an account of the methods adopted in other countries to deal with this problem.

Slum Conditions.

With regard to the Province of Quebec, Dr. Elzear Pelletier, Secretary of the Quebec Board of Health, is quoted as saying: "As the population of our cities increase, the dwellings are huddled together, without any care being given to their orientation in order to secure sunshine and light for the apartments, and without reserving enough free space to allow air to circulate around the dwellings. The height of the buildings constructed is out of proportion to the width of the streets, which will look, in time, like mere lanes. Wings are built precisely in the places where they will intercept the sun's rays most directly. Some so-called improved dwellings are constructed in which half of the rooms are lighted from closed yards, which consequently contain only stagnant air. Moreover, some of these yards are only wells, styled light-wells, but where the sun can never penetrate. Rooms are made without any window whatever. And lastly, dwellings, healthy until now, are transformed into absolutely unhealthy dwellings, and tenants are always found for them."

With regard to the effects of slum conditions, Mr. J. J. Kelso, Superintendent of the Department of Neglected Children, speaks as follows: "Bad housing conditions inevitably tend to drunkeness in parents; to delinquency in children; to disorderly conduct; to wife and family desertion by men who get tired of it all; to immorality in the growing generation, owing to the lack of privacy and the consequent loss of modesty; to the spread of typhoid fever, diptheria, scarlet fever, and the ravages of the great white plague."

With reference to overcrowding in Winnipeg, Dr. A. J. Douglas, Medical Officer of Health of Winnipeg, reports: "Overcrowding notices totalled 1,852, an increase over last year, but most of these were not extreme cases, but merely verbal warnings of the inspector, whose special duty this is, that the number of beds must be reduced; for it requires ceaseless vigilance to keep within bounds the temptation of certain classes to eke out a slender living by taking in boarders, regardless of the size of their rooms or families."

The slum conditions in Canada are largely due to the arrival of poor immigrants from Europe and Asia, and they are found not only in the heart of large cities but in new suburbs, commonly known as "shack towns," where the poor are housed in dwellings little better than sheds, which are all they are able to afford.

The following reference is made to an Italian colony near Sault Ste. Marie, taken from the report of the Provincial Board of Health of Ontario, 1906, which describes this type of slum: "This colony is crowded into a lot of miserable

shacks, filthy both outside and inside; no cellars, no drainage, closets on the surface of the ground, vile beyond description; water from shallow wells, which were dirty and unfit for use, and most of them located within a few feet of the closets."

These immigrants frequently rent small houses and take in a large number of boarders, causing overcrowding. Three cases in Winnipeg are cited. In one, a foreigner accommodated forty-three occupants in five rooms; another had twenty-four in one room, and a husband and wife living in two rooms took in five roomers; and another man and wife, with six children, had from fifteen to twenty boarders in four rooms. The census of 1901 shows there were 46,154 one-room houses; 74,715 two-room houses; 97,674 three-room houses.

Canadian Health Laws.

It is stated that the present laws and regulations in force in Canada do not deal efficiently with the slum problem. These laws and regulations are, in the main, either (*a*) health measures of the Public Health Act, or regulations thereunder; or (*b*) provisions of the Municipal Code. In most provinces, the medical officer of health is authorized to inspect lands and buildings, with the object of preventing an accumulation of filth, dirt and rubbish, and has power to adopt the necessary measures for the removal of the same. Upon complaint of the existence of a nuisance, if investigation proves that the complaint is well founded, the removal or abatement of the nuisance is ordered by the medical health officer, local board of health, mayor or reeve. In some provinces, health officers are empowered to enter into or upon any premises in the daytime as often as they think necessary.

In British Columbia, it is provided that: No person shall let, or occupy, or suffer to be occupied, as a dwelling or lodging, any room which (*a*) does not contain at all times at least 384 cubic feet of air space for each person occupying the same; or (*b*) has not a window to open in the manner approved by the local board; or (*c*) has not appurtenant to it the use of water-closet, or earth-closet constructed in accordance with these regulations. If the local board is satisfied that any room or building within its jurisdiction, occupied as a dwelling-place, is unfit for such purposes, it may issue notice to the occupants requiring the premises to be put in proper sanitary condition, or may require the occupants to quit the premises. If the persons so notified, or any of them, neglect or refuse to comply with the terms of the notice, every person so offending shall be liable to the penalties imposed for infraction of these regulations, and the Board may cause the premises to be properly cleansed at the expense of the owners or occupants, or may remove the occupants forcibly and close up the premises, and the same shall not again be occupied as a dwelling-place until put into proper sanitary condition, or the Board may cause such premises to be destroyed, with the consent of two Justices of the Peace.

The Municipal Code of British Columbia also contains the following provisions with regard to Town Planning: "All future surveys into building lots of property within a city, or of property which is contiguous to the boundaries of a city, by owners or others, shall be subject to the approval of the City Engineer and the Mayor when the city has a City Engineer, or the approval of the Mayor when the city has not a City Engineer; and no plan of such survey shall be registered unless it bears a certificate of such approval, but such approval shall not be unreasonably withheld."

"The City Engineer, where the city has such an officer, or the Mayor, where the city has not a City Engineer, may sanction the subdivision of any property already subdivided into lots, and every plan of subdivision of such lots shall be certified by the City Engineer, or by the Mayor when the City has not a City Engineer, as having been approved before registration thereof."

In Alberta, it is provided that if the nuisance or unhealthy condition arises from some defect in the conformation or construction of the land or building or

if the same is unoccupied, the notice prescribed shall be given to the proprietor.

In Saskatchewan, it is provided that when regulations of the Bureau of Public Health are in force they override and supersede any municipal by-laws. The regulations issued on January 29, 1910, provide that, where a tenement is erected it shall occupy not more than 80 per cent. of the total area of the lot. But if such building is bounded on three sides by streets or lanes, ninety per cent. may be built on. The minimum height of rooms used as sleeping apartments is placed at eight feet, with provision for a minimum air space of 500 cubic feet for each occupant. Windows must open to the external air and their area shall not be less than twelve square feet. Any building or part of any building used as a dwelling place which in the judgement of the medical health officer or commissioner, has become unfit for human habitation, shall be so declared and placarded as "unsanitary and unfit for habitation." Such placard shall not be removed without the consent of the medical health officer or commissioner, and not until the place has been made fit for habitation. Any damp cellar, basement, or house shall be deemed as a nuisance. It is reported by the Commissioner of Public Health, that the placarding of premises has been done, with the result that the changes necessary to render the building sanitary have been duly carried out.

In Manitoba, it is provided that, when any officer acting under the Health Act, or any municipal by-law, removes any dirt, filth, refuse, debris, or other thing likely to endanger the public health or become a nuisance, this dirt, filth, refuse, or other thing shall be subject to the disposition of the officer removing the same, and the owner shall have no claim in respect thereof.

In 1909 an amendment to the charter of the City of Winnipeg was passed by the Legislature conferring upon the City powers to enact by-laws, defining, regulating, governing, and controlling all matters connected with air space, the ventilation, the fireproof character, the sanitation, the size of the rooms, the position of public corridors, the position, number, character of all urinals, lavatories or water closets of ordinary apartment or tenement houses; the portion of any lot to be occupied by such apartment or tenement house, and to do all things and prescribe all rules and regulations necessary from time to time respecting the health and welfare of persons occupying any apartment or tenement house. Under this Act, a by-law has been passed prohibiting the erection of wooden tenements, two storeys in height, and relating to the occupation of basements in tenement places.

In a publication entitled "General Information Regarding Public Health," the Provincial Board of Health of Manitoba, says: "Dwelling houses should never be built upon a wet site. Dryness can be obtained by thorough draining. A wet site is an important factor in the production of many diseases, such as consumption and rheumatism. A dwelling house should never be built upon a lot which was low, but has been filled up with manure and other refuse. Such made-up ground simply requires merely the introduction of the germs of infectious diseases to become a hot bed for their propagation. Young children in such houses suffer from cholera infantum during the summer months."

In Ontario, no person is allowed to store any rags, bones, or other refuse in any building used as a dwelling, or upon any premises within the municipality, unless the same are kept or stored in a suitable building, approved by the Medical Health Officer. The Medical Health Officer or any Sanitary Inspector acting under instructions, may at any time of the day or night, as often as he thinks necessary, enter into a lodging house, tenement where rooms are rented, or a laundry where the owner or employés reside upon the premises, and other buildings where such officer has reason to suspect that the same are overcrowded, or occupied by more persons than is reasonably safe for the health of such occupants, and that the sleeping rooms containing less than 400 cubic feet of air for each adult occupant shall

be deemed to be overcrowded, and the health officer should take such steps as are necessary to remedy the evil. The medical health officer is empowered to order the owner or occupant of any premises that are in a filthy state, either to remove the inmates, or remove the cause of the filth, and place the premises in a condition fit for human habitation. Penalties are provided for failure to obey the orders of the medical health Officer.

In Quebec, where a house or other habitation is ascertained to be unhealthy, the municipal sanitary authority may cause the persons inhabiting it to leave it and forbid their return until the same has been rendered healthy in the manner prescribed by law. Under the Municipal Code, the Municipal Council has power to authorize its officers to visit and examine all property, houses, or buildings, to ascertain whether the by-laws of the Council are carried out, and to oblige the owner or occupants of such properties to receive the officers and to answer truly all questions put to them relative to the carrying out of the by-laws.

In New Brunswick, the Provincial Board of Health makes regulations requiring the local Boards of Health in all cases where malignant diseases are discovered to exist within any dwelling in an unhealthy locality, or in a filthy condition, to compel the occupants of such house to remove therefrom, and to place them under sheds or tents, or other good shelter, in some more healthy situation, until the house has been cleansed or disinfected.

In Nova Scotia, when any tenement used as a dwelling is so unfit as to endanger the public health, the local Board may order it to be vacated within a reasonable time. In case of disobedience of the order, or the re-occupation of the dwelling without a permit, the local Board may direct a warrant to the sheriff or constable to enforce compliance with the order. If any house, building, cellar or lot is in a state likely to endanger the public health, the local Board shall cause notice to be given to the owner or occupant, requiring them to remove cause of complaint. In case of neglect the local Board shall cause the same to be removed.

Town Planning in Foreign Countries.

A brief statement is given of the work in other countries, with reference to Town Planning and the abolition of slums. In Germany, efforts have been directed along the following lines: (*a*) town planning; (*b*) the construction of model tenements; (*c*) the encouragement of private builders and of co-operative building societies: (*d*) the demolition of slums, either by the destruction of old tenements and their replacement by new model ones, or by business offices and parks; (*e*) the repair of existing dwellings so as to make them sanitary.

At the same time, German cities are establishing the "Zone System" of town planning, whereby the industrial buildings are grouped in the centre, and the dwelling houses are placed in suburbs. In Cologne, the height of buildings, in the centre of the city, is limited to five storeys, with a mansard roof, while in other portions of the municipality, no building shall be over three storeys or occupy more than forty per cent. of the lot. In 1900, these regulations were made compulsory for all towns in Saxony. In Belgium, the chief feature of housing is the existence of villages scattered throughout the country, which has been made possible by the development of a complete system of cheap workmen's trains, by which a round trip ticket for a six mile ride, each way, may be purchased for less than 25 cents per week, while for a man living twelve miles from work the cost is 30 cents, and for thirty miles, fifty cents per week.

In Great Britain, the movement is in the line of decentralization, as contrasted with the German methods to centralize all industries and population. The earliest legislation was "The Housing of Working Classes Act," of 1890. Part I. of this Act applies to urban districts dependent upon official representation by local authority for the wholesale clearance of slums and the erection of model municipal dwellings in other places. Part II makes it com-

pulsory upon the owner to set in order unfit habitations and provides for the demolition of houses where the owner refuses to act; while Part III gives to local authorities the power to buy land, erect houses and lay out open spaces for parks, playgrounds, and gardens.

The latest legislation is "The Housing and Town Planning Act" of 1909. This Act gives freedom to local authorities, and more particularly, rural district authorities, to exercise the powers granted by the Housing Act, which formerly have been granted to urban authorities. Obstacles in the matter of procedure are removed, the period is restricted for which loans may be left outstanding; and increased facilities are afforded for the acquisition of land. A new branch of the Local Government Board was created for the better administration of both the "Housing and Working Classes Act," and "The Town Planning Act." It provides for every County Council appointing a Medical Health Officer, who shall devote the whole of his time to the duties of his office. It is made imperative upon every county council to establish a public health and housing committee, and it is made their duty to promote the formation and extension of building societies, by making grants or advances to them.

The Local Government Board requires streets intended for carriage ways to be not less than 36 feet wide, and that every street more than 100 feet in length must be constructed as a carriage way.

No domestic building can be erected unless it has in front of it an open space of 24 feet; measured from the external face of any wall or building it shall front, and at the rear of such building there must be an area of 150 square feet, without any building thereon.

REPORT OF THE DOMINION SHAD FISHING COMMISSION, 1908-1910.

ON June 4, 1908, a commission, composed of Professor Edward E. Prince, as Chairman, and Mr. Simon Melanson and Mr. Samuel F. Morrison as commissioners, was appointed by the Honourable L. P. Brodeur, Minister of Marine and Fisheries, for the purpose of investigating the shad fishing industry of Nova Scotia with a view to ascertaining the cause of its decline and means of reviving it. The Commission was appointed in response to a memorial presented by a number of members of the Legislative Council and House of Assembly of Nova Scotia.

The report of the Commission, which has recently appeared, contains much valuable information on the fishing industry. It is shown in a table that the value of the shad fisheries has declined from $57,960 in 1878, to $5,980 in 1908, and in that period the number of barrels filled declined from 7,245 to 598. The causes for the decline are said to be the destruction of spawning shad by nets, the obstruction of rivers, by dams, etc., destruction of fish by stake nets, and the pollution of rivers by sawdust.

Among the recommendations for the re-establishment of this industry are the following: That shad nets be confined to tidal waters only; that the use of nets for shad or salmon be prohibited from August 15 to July 1, for three consecutive years; that salmon nets with a mesh of not less than 6½ inches be used from March 1 to August 15; that all brush weirs in the Bay of Fundy be provided with gates; that everyone engaging in shad or salmon drifting shall annually obtain a permit from the local overseer, and at the end of the season shall make returns to him of his catch; that reserves be established on the following rivers: the Annapolis and Nictau; the Gaspereau, the Avon, the Shubenacadie, the Stewiacke, and the Petitcodiac; that the fishing patrol be increased, and new hatcheries be established for shad, and that dams and obstructions of rubbish in the numerous streams resorted to by spawning shad, etc. be removed by the local fisheries officers.

MANITOBA LEGISLATION AFFECTING LABOUR, 1911.

THE first session of the thirteenth Legislature of the Province of Manitoba convened on February 9 and prorogued on March 24, seventy-four acts being passed during the session. A review of the acts of the session of importance to industry and labour is presented in the following article.

Employment and Adoption of Children.

An Act was passed amending "The Childrens' Protection Act" of Manitoba, making it unlawful to employ habitually any child under the age of twelve years, between the hours of 9 o'clock p.m. and 6 o'clock a.m., and also making it unlawful to employ any child under the age of sixteen years in any occupation likely to be injurious to his life, limbs, health, education or morals.

It is further provided that newspaper and magazine publishers in Manitoba receiving and publishing any advertisement dealing with the adoption, boarding out or care of any infant under the age of thirteen months, must procure from the advertiser in writing his or her name, address, and occupation, and must forward these particulars to the Superintendent of Neglected Children, immediately after the first publication of the advertisement.[1]

Licensing of Chauffeurs.

An Act was passed amending "The Motor Vehicle Act," which among other matters contains new provisions for the licensing of chauffeurs. Applications for a license to operate motor vehicles as a chauffeur must be made to the municipal commissioner upon blank forms prepared by him, and must be accompanied by a fee of $5. Applicants must pass an examination as to qualifications, and the municipal commissioner is required to appoint examiners and to cause such examinations to be held at convenient points throughout the province, as often as may be necessary. Licensed chauffeurs are required to wear, while in charge of a motor vehicle, a badge provided by the municipal commissioner, with the words "Manitoba Licensed Chauffeur" on it, and the number assigned to the wearer. Licenses shall remain in force for one year from April 1. No chauffeur's license shall be issued to any person under eighteen years of age, and no chauffeur or other person shall operate any motor vehicle upon any public highway in the absence of the owner, or without his consent.[2]

Payment for Employes in Hospitals.

An Act was passed to amend "The Charities' Aid Act" which provides that if there is admitted to any hospital as a patient an employé of any person, firm, or company whose practice is to charge or deduct from the salary or wages of their employés a fee for medical attendance, and if any municipality or the municipal commissioner pays for his or her maintenance there, the amount so paid may be recovered from the employer.[3]

Building Permits and Plumbing Inspectors.

An Act was passed to amend "The Municipal Act," requiring among other things that permits to erect and repair buildings within a municipality must be obtained from the building inspector or other duly authorized officer, and on application for such permit a copy of the plans and specifications of such buildings must be filed, such plans to include provisions for compliance with "The Municipal Act," "The Public Health Act," and the by-laws of the municipality with regard to sanitary and other matters. It also provides for the appointing of one or more plumbing inspectors, who shall have the right to enter on the premises of persons, firms, or corporations at all reasonable times, and for prescribing a fee for inspection.[4]

Amendment to "Threshers' Lien Act."

An act was passed to amend "The Threshers' Lien Act" requiring owners of

[1]Chapter 6. [2]Chapter 28. [3]Chapter 5. [4]Chapter 31.

threshing machines to make returns to the Department of Agriculture and Immigration on the seventh day of each month during the threshing season, of the quantities and kinds of grain threshed during the preceding calendar month. A penalty not to exceed $25 is imposed for failure to make such returns.[5]

Miscellaneous.

Among the Acts passed during the session were two relating to the "Licensing of Extra Provincial Corporations," and others to amend "The Manitoba Insurance Act," to amend "The Liquor License Act," to regulate moving picture exhibitions, to amend "The Shop Regulations Act," to incorporate "The Public Live Stock Markets Board," and to amend "The Steam Engineers' Act".

Bills were introduced for the protection of persons employed in the construction of buildings; to regulate the art of embalming, and to incorporate the Winnipeg Motor Trades Association. These, however, did not become law.

[5]Chapter 69.

PROFIT SHARING ARRANGEMENT OF W. J. GAGE AND COMPANY.

A PROFIT-SHARING scheme in force in the establishment of Messrs. W. J. Gage & Company, manufacturing stationers and publishers of Toronto, Ont., is stated by the firm to be not only greatly appreciated by the staff but to be of real service to business. An account of this system of profit-sharing has been kindly supplied to the Department by the Company.

For the purposes of profit-sharing, the staff is divided into two classes, viz.: heads of departments and employés. A block of the capital stock of the Company was transferred to the president, who in turn allotted to each of the heads of the departments a certain amount of stock, the amount varying with the experience and length of service of the beneficiary. The transfer was made under an agreement between the president and each individual concerned, by which the first charge on the dividend declared on the stock is that of reasonable interest on the stock remaining unpaid. The remaining portion of the dividend, after paying this interest, is then applied on the purchase of the stock, together with such further sums as the beneficiary may desire to apply. If in any year no dividend is declared by the Company, no interest shall be charged, and if in any year the dividend falls below the rate fixed for interest the dividend shall be regarded as paying interest in full. The agreements are for a term of ten years, at the end of which time the entire stock, or such as has been fully paid for, becomes the property of the beneficiary. Should the beneficiary die or leave the service of the Company, it is then the president's privilege to buy back the stock, paying for it the full amount paid in by the beneficiary.

For the benefit of the employés who are not provided for by the above arrangement, it has been the custom of the firm for a number of years to distribute among those who have been continually in their employ for at least twelve months a percentage of the profits earned. This distribution is based on the wage or salary of each employé.

MEASURES ADOPTED BY PUBLIC BODIES IN CANADA TO ENSURE TO WORKMEN PAYMENT OF FAIR OR CURRENT RATES OF WAGES AND PROTECTION IN THEIR HOURS OF LABOUR AND OTHER CONDITIONS OF EMPLOYMENT.

UNDER instructions from the Minister of Labour an effort has been made by the Department of Labour to ascertain the nature and extent of measures which have been adopted by public bodies throughout Canada to ensure the workmen employed in the excution of public works the payment of fair or current rates of wages and protection in the matter of their hours of labour

and other conditions of employment. To this end a circular letter was addressed by the Deputy Minister of Labour in the fall of 1910, to the Deputy Provincial Secretaries of the several Provinces, also to mayors and clerks of municipalities throughout Canada having a population of 4,000 and upwards as shown in the last census return, and to the clerks of school boards in the above mentioned communities. The circular letter in question was accompanied by blank forms containing twelve questions to which answers were desired.

The purpose of the present article is to make known to all interested the steps which have been taken by the Dominion Government and by various provincial, municipal and school authorities in this regard.

Fair Wages Resolution of House of Commons.

On March 12, 1900, a resolution in the following terms was introduced in the House of Commons of Canada, upon motion of Honourable William Mulock, Postmaster General:—

> "That it be resolved, that all Government contracts should contain such conditions as will prevent abuses, which may arise from the sub-letting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen in the district where the work is carried out, and that this House cordially concurs in such policy, and deems it the duty of the Government to take immediate steps to give effect thereto.
>
> "It is hereby declared that the work to which the foregoing policy shall apply includes not only work undertaken by the Government itself, but also all works aided by grant of Dominion public funds."

The resolution in question was adopted on July 17 following, and was at once accepted by the Dominion Government as the basis of a Fair Wages policy which has since been applied to works of construction carried out under the authority of the Dominion Government, also to the manufacture of certain classes of supplies for the use of the Government service and to works aided by grant of Dominion public funds.

An Order-in-Council was also adopted on August 30, 1907, by which it is required that:—

> "1. Contractors shall post in a conspicuous place on the public works under construction, the schedule of wages inserted in their contracts, for the protection of the workmen employed. 2. Contractors shall keep a record of payments made to workmen in their employ, the books or documents containing such record shall be open for inspection by the Fair Wages Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected."

In the revision of the Railway Act in 1903, additional force was given to the Fair Wages Resolution by the insertion of a section (No. 205) requiring the payment of current rates of wages to workmen engaged in the construction of any line of railway towards which the Parliament of Canada has voted financial aid by way of subsidy or guarantee, the section in question being as follows:—

> "In every case in which the Parliament of Canada votes financial aid by way of a subsidy or guarantee towards the cost of railway construction, all mechanics, labourers or other persons who perform labour in such construction shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed; and if there is no current rate in such district, then a fair and reasonable rate; and in the event of a dispute arising as to what is the current or a fair and reasonable rate, it shall be determined by the Minister, whose decision shall be final.—3 Edward VII, c. 58, s. 205."

Following the example which was set by the Dominion Government, a number of the Provinces have adopted

similar provisions for the protection of workmen employed in connection with Provincial public works, and a like policy has also been inaugurated by various municipalities throughout the Dominion.

I.—FAIR WAGES POLICY OF DOMINION GOVERNMENT.

THE operation of the Fair Wages policy of the Dominion Government may be considered under three headings:

(1) The preparation of schedules of current rates of wages for insertion in Government contracts. (2) The examination by the Fair Wages Officers of schedules of rates of wages paid by contractors in connection with the manufacture of certain classes of supplies for the use of the Government. (3) The investigation of complaints as to non-payment of current rates of wages or non-conformance by contractors to other labour conditions contained in their contract.

The total number of Fair Wages Schedules which have been prepared by the Dominion Government since the inception of the above policy is 1900, of which

855 were prepared for the Department of Railways and Canals.
822 for the Department of Public Works.
155 for the Department of Marine and Fisheries.
68 for other Departments.

The number of Fair Wages Schedules prepared during the year ending March 31, 1911, is as follows:

190 for the Department of Public Works.
48 for the Department of Railways and Canals.
14 for the Department of Marine and Fisheries.
23 for other Departments.

The works to which these Schedules applied have included the construction of public works of many different kinds in all parts of Canada, among them public buildings, various works along the lines of the Government Railway System, canal works, harbour and river works, &c.; also the construction of lines of railway in different parts of the country aided by grant of Dominion public funds.

In most of the contracts to which the Fair Wages policy of the Dominion Government applies, the rates of wages which must be paid to the various classes of labour to be employed are specified in the contract. In other cases where no established rates exist in the district for the classes of labour required, a general clause is inserted to ensure that all mechanics, labourers, or other persons performing labour in connection therewith "shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages or what are the current hours fixed by the custom of the trade it shall be determined by the Minister of Labour, whose decision shall be final. These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys owing to them as if such moneys were payable to them in respect of wages."

Method of Preparing Fair Wages Schedules.

The plan which is adopted in the preparation of Fair Wages Schedules is as follows: The Department of the Government which is about to invite tenders for a contract, in which it is intended to insert the Fair Wages Schedule, sends a request to the Department of Labour to have such Schedule prepared. In the event of the necessary information not being otherwise available one of the Fair Wages Officers is thereupon sent to the

locality in which the work is to be performed, to ascertain what are the rates of wages and hours of labour current in such locality for workingmen belonging to each of the several classes likely to be engaged in the construction of the work for which tenders are being sought. The Officer prepares a schedule, on the facts ascertained by investigation in the locality, setting forth what may be considered a fair basis of minimum wage payment to be made to the several classes of labour. This schedule is transmitted to the Department concerned for incorporation in the terms and conditions of the proposed contract, and therefrom tenderers know in advance the rates of wages which they will be required to pay the workmen. On the execution of the contract the schedule is published in the *Labour Gazette*.

The form used by the Department of Labour in the transmission of Fair Wages Schedules to other Departments is as follows:

Department of Labour, Canada.

Schedule of current wages and working day hours for the several classes of labour to be employed in connection with the.....
at.....to be inserted in a contract to be awarded by the Department of.....

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages, Not less than:

Labour Conditions in Dominion Contracts.

The forms of contract employed by different Departments of the Government differ from one another in certain respects, having regard to the nature of the work to be performed. On this account also the labour conditions are somewhat different in the case of works of construction from those employed in contracts for Departmental supplies.

The form of contract in use by the Department of Public Works for works of construction provides that in case any labour is required on the works for which no rate has been fixed in the Fair Wages Schedule, the Engineer, or other officer authorized by him, may fix the minimum rate of wages payable in respect thereof, "which shall not be less than the rate of wages generally accepted as current for competent workmen in the same or similar trades or classes of labour in the district where the work is being carried on."

It is stipulated that the contractor shall post and keep posted in a conspicuous place on the works under construction, the Fair Wages Schedule for the protection of the workmen employed, and also keep a proper record of all payments made to workmen in his employ, and that the books and documents containing such record shall be open for inspection by the Fair Wages Officers at any time that it may be expedient for the Minister of Labour to have the same inspected. It is also provided that no labourers who are not citizens or residents of Canada shall be employed about the works without the consent of the Minister of Public Works.

Contractors before being entitled to payment for work performed are required to furnish statements showing the rates of wages paid to the various classes of labour employed and for the hire of teams and also showing any amounts remaining unpaid in respect of such wages or hire, and should any contractor, after notice from the engineer, fail to pay such wages or for such hire of teams, the Minister of the Department concerned may himself make such payments, deducting the same from the amounts then or thereafter due to the contractor. The contractor must also, at his own expense, make adequate arrangements with respect to sanitation and the preservation of health on the works. It is stipulated that no portion of the work shall be done by piece-work. It is further stipulated that no subcontract shall be recognized by His Majesty, the contractor being held responsible for the proper performance of the work as a whole.

Fair Wage Conditions in Transcontinental Railway Contracts.

In the standard form of contract in use in connection with the construction of the National Transcontinental Railway it is specified that:

"All mechanics, labourers, or other persons who perform labour for the purposes of the construction of the works hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and, in the event of a dispute arising as to what is the current or a fair and reasonable rate, it shall be determined by the Commissioners, whose decision shall be final.

"This Agreement is subject to the regulations now in force or which may at any time hereafter be in force during the construction of the works hereby contracted for, made under the authority of the Department of Labour and which are or shall be applicable to such works."

It is further directed in Transcontinental Railway contracts that:

"All the works carried on under this Agreement shall be subject to the provisions of the Act respecting the Preservation of Health on Public Works and to all regulations made or to be hereafter made pursuant to the said Act, or by any other lawful authority, and applicable to such works, and to any regulations which may be adopted by the Commissioners in reference to sanitation or the preservation of health on public works.

"The contractor shall at his own expense make adequate arrangements for the medical and sanitary supervision of all his employés, and shall for that purpose employ the necessary duly qualified medical practitioners, furnish and provide all necessary medicines, surgical instruments, and hospital accommodation to the satisfaction of the Chief Engineer.

"The duties of the medical staff shall include not only the attendance on sick or injured men, but the inspection of the sanitary arrangements of all camps, dwellings and works, at least once a month, or oftener, if, in the opinion of the Engineer it is necessary."

Permission is given the contractor to make specified deductions from employés' wages as compensation for such medical supervision.

Section 29 of the form of contract also provides as follows:—

"The contractor shall promptly pay for all labour, services and material, in or about the construction of the work and all payments for such purpose shall be made by the contractor at least as often as payments are made by the Commissioners to the contractor, and in the event of failure by the contractor at any time to do so, the Commissioners may retain from any moneys due or to become due to the contractor such amount of money as the Chief Engineer may deem sufficient to make such payments. If the Engineer reports that there is reason to fear that any such payments will not be promptly made by the contractor, the Commissioners may pay for any such labour, services and material from any date to any date and to any amount which may be payable and may charge the same to the contractor, and the contractor covenants with the Commissioners to repay at once all and every sum so paid. Before final settlement is made between the parties hereto for work done and materials furnished under this contract, the contractor shall and will produce and furnish evidence satisfactory to the Commissioners that the said work and any other property of the Commissioners upon which said work may have been constructed and all structures are free and clear from all liens for labour, workmanship, materials or otherwise

and that no claim then exists in respect of which a lien upon the said work or property of the Commissioners could or might attach. And the contractor shall protect and hold harmless the Commissioners and all their property from any and all kinds of liens accruing from labour and services performed and material furnished or otherwise and any of the same in and about the said work."

Grand Trunk Pacific Fair Wages Clause.

Provisions are also inserted in contracts for the protection of the labour employed on the western division of the Transcontinental Railway, which is now under construction by the Grand Trunk Pacific Railway Company.

The Fair Wages Clause which has been embodied in contracts of the Grand Trunk Pacific Railway Company is as follows:—

"All mechanics, labourers or other persons who perform labour in the construction of the works hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and, in the event of a dispute arising as to what is the current or a fair and reasonable rate, it shall be determined by the Minister of Labour, whose decision shall be final."

Conditions for Avoidance of Sweating.

The Post Office Department was the first Department of the Dominion Government to insert in its contracts clauses for the avoidance of the sweating system. Stipulations to this end were, in fact, inserted by that Department before the passing of the Fair Wages Resolution by the House of Commons in 1900. In 1901, steps were taken by the then Postmaster-General to ensure that not only in work performed under contract for that department, but in all classes of supplies furnished, care should be taken to ensure that the persons furnishing these supplies paid their employés fair wages and had their work performed under fair conditions.

Since the inception of this policy, supplies to an amount of $1,008,694.73 have been furnished to the Post Office Department by contract or by purchase, subject to conditions for protection of the labour which has been employed thereon. The value of such supplies during the year ending March 31, 1911, was $133,864.98. In all such contracts, contractors are required to furnish to the Post Office Department statements of the rates of wages paid the workmen employed in connection with it, the same being subsequently submitted to the Fair Wages officers of the Department of Labour for examination.

With a view to the avoidance of the sweating system, and securing payment to the workmen of fair wages, and the performance of the work under proper sanitary conditions, contracts for military clothing and other military supplies have also been made subject to specified regulations, which it is believed have been of substantial value to the workmen concerned.

Investigation of Complaints.

The practice adopted in connection with complaints as to violations of Fair Wages conditions of any contract is as follows: Where a complaint has first been received by the Department of Labour, the Department of the Government affected is informed of the nature of the complaint, and if the circumstances require, the Department of Labour, at the request of the Department concerned, causes a special investigation to be made. In such case, one of the Fair Wages Officers has to be sent to the locality from which the complaints came, and there conduct an inquiry. His report is then submitted to the Minister of Labour, and subsequently transferred, along with the recommendation of the Department, to the Department of the Government by which the contract was awarded, the latter then taking such

action as the circumstances require. Tables have been published in the Annual Reports of the Department of Labour, showing the nature of the more important investigations made by the Fair Wages Officers in successive years, the nature of the claims presented to them, and the disposition of the same.

II.—PROVINCIAL FAIR WAGES REGULATIONS.

It was ascertained through the special inquiry above referred to that the following Provinces of the Dominion have adopted Fair Wages regulations, namely, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

Nova Scotia.

In Nova Scotia, whilst no specific regulations have been adopted in regard to wages and hours, the prevailing rates of wages in the particular locality are paid for day labour employed on public works. A provision is inserted in all Government contracts that if the contractor does not pay the amount due by him for wages or supplies the Government may pay and charge the payment against the contractor.

Prince Edward Island.

In Prince Edward Island it was found that there are no specific regulations in respect of either rates of wages or hours of labour to be adhered to in the execution of public works, whether by day labour or by contract.

New Brunswick.

In New Brunswick, under an Act of the Assembly and directions from the Government, authority is derived for the insertion in contracts of a general clause in the following terms:—

> "Wages to be paid to workers engaged in the work shall be wages as are generally accepted as the current wages in each trade for competent workmen in the district where the work is carried on. And, further, the contractor agrees to fix in some public place near where the work is carried on, a sheet of paper on which shall be written the wages paid for the different kinds of work."

These provisions are applicable also to work carried on by day labour.

Quebec.

In Quebec a resolution was adopted by the Legislative Assembly on April 14, 1908, on motion of Honourable L. A. Taschereau, Minister of Public Works and Labour, in the following terms:—

> "That all Government contracts should contain the necessary conditions for preventing abuses that might occur in sub-contracts and that every possible effort should be made to pay workmen the wages current in the locality where the work is done, as paid to competent workmen, and this House heartily concurs in such policy and considers it the Government's duty to give immediate effect to this resolution."

Under the procedure followed by the Provincial authorities for the observance of the foregoing regulations the Factory Inspectors of the Province are instructed to report to the Department concerned any shortage in payment of wages by contractors. It is also open to workmen employed by contractors on public works to make complaint of any violation of the Fair Wages regulations which may have occurred in the execution of any contract.

The Fair Wages clause which is inserted in public works contracts is in the following terms:—

> "In the execution of his contract, the contractor shall pay to all persons employed by him in the execution

of the said works reasonable wages, and shall conform in all points to the resolution concerning the wages of workmen adopted by the Legislative Assembly in the session of 1908."

Ontario.

In Ontario an Act was passed in 1896, which provided for the payment of wages for labour performed in the construction of public works by employés of contractors or sub-contractors out of securities held by the Crown. A list of employés is to be furnished by the contractors when required. The Government may retain a portion of any subsidy granted towards the construction of any railway or other work and may pay wages thereout. All Acts representing subsidies to railways since have included sections providing for the payment of current rates of wages, against the overcharging of workmen for board and accommodation, and for the observance of proper sanitary regulations in construction camps. On April 4, 1900, a Fair Wages Resolution, similar to that of the House of Commons of March 12, 1900, was passed by the Legislature of Ontario. In public works of the Province of Ontario, whether performed by contract or day labour, provision is made for the payment of the union rate of wages to the workmen employed. In the case of contracts, a general clause is inserted in the following terms:—

"The contractor or contractors to whom this contract is awarded are required to pay the men employed on the work the union rate of wages."

Temiskaming and Northern Ontario Railway Commission.

The Temiskaming and Northern Ontario Railway Act contains the following clause in respect of the rates of wages to be paid to workmen by the Temiskaming and Northern Ontario Railway Commission:—

"The workmen, labourers and servants employed in or about the construction and operation of the said railway and works shall be paid such rates of wages as may be concurrently payable to workmen, labourers and servants engaged in similar occupations in the District in which such railway and works are constructed and operated."

In accordance therewith, a general clause is inserted in all contracts entered into by the Temiskaming and Northern Ontario Railway Commission as follows:—

"The contractor shall not at any time, in connection with the said work, or any matter arising out of or connected with this contract, employ any person or persons in contravention of the Alien Labour Act or the provisions of the Railway Act of Ontario respecting employment of alien labour, and shall pay to all workmen, labourers and servants employed in or about the work such rates of wages as shall or may be concurrently payable to workmen, labourers and servants engaged in similar occupations in the District in which the said work shall be performed, and shall be responsible for the observance by all sub-contractors on their part of the provisions of this clause, and in the event of the Commission, who shall be the sole, absolute and final judge of these matters, being satisfied at any time that the contractor or any sub-contractor has been guilty of any violation of any of the provisions of this clause, the Commission shall have the right from time to time, and as often as it shall be satisfied that any such violation has taken place to withhold all payments from the contractor until such violation of any of the provisions of this clause shall in the opinion of the Commission have ceased, and until such amends as the Commission shall require shall have been made for all such violation, and on being notified by the Commission of any such violation it shall be the duty of the Engineer to withhold all certificates from the contractor until the Commission shall be satisfied that such violation has ceased, and until amends shall have

been made to the satisfaction of the Commission as aforesaid."

Manitoba.

In Manitoba a Fair Wages Resolution was adopted by the Provincial Legislature in February, 1907. Under the authority of the foregoing, provisions have been inserted in all Government contracts of every description for the protection of the labour to be employed. A schedule is inserted in all contracts providing for specified minimum rates of wages which must be paid to the various classes of labour to be employed and the maximum number of hours per day. The schedule is intended to include all classes of labour required for the performance of the work, but if any labour is required which is not provided for in the schedule, the Minister or officer appointed by him is empowered to fix a minimum rate of wages payable in respect of any such labour, "which minimum rate shall not be less than the rate of wages generally accepted as current in each trade or class of labour for competent workmen in the district where the work is being carried out." Provision is made also that no portion of the work is to be done by piece work; that all workmen employed shall be residents of Canada, unless the Minister is of opinion that Canadian labour is not available or other special circumstances exist which would render adherence to this policy contrary to the public interest; that whenever the Fair Wages Officer is not satisfied as to the wages paid he shall have the power to examine the time sheets and pay rolls; that a schedule of wages paid to the different classes of labour employed shall be posted in a conspicuous place; that the contractor shall, at least once a week, furnish a statement showing particulars of any wages remaining unpaid; and that if any person employed on the work is paid at a less rate than that specified in the schedule the Minister shall be entitled to deduct such shortage from the monies due the contractor and either retain the same for the Department's use or pay the money over to the workman. A Fair Wages Officer is employed by the Government of Manitoba under the authority of the Public Works Department to ensure the observance of Fair Wage and other conditions for the protection of the labour employed.

Saskatchewan.

In Saskatchewan all work under the authority of the Department of Public Works is carried on by contract, and work under the authority of the Department of Railways and Telephones is generally carried on by day labour. All contracts call for the established rate of wages in the district where the work is being carried on, and in some instances the hours of labour are similarly regulated, the same provisions being applicable to day labour. This policy was adopted in 1905, on the order of the Honourable Walter Scott, Premier and Minister of Public Works, and was afterwards inserted in other contracts on the order of the Ministers in charge of the various Departments carrying on public works. It applies to such works as public buildings, roads, bridges and construction of telephone lines. The general clause which is inserted in contracts is in the following terms:—

> "The contractor shall employ none but skilful experienced workmen and their apprentices and shall not pay less than the established rate of wages paid in the locality where the work is being done. As far as possible, none but Canadian workmen are to be employed on the works."

A clause is also inserted in all Government contracts giving the Minister power to pay any claims filed by workmen for wages due, the amounts so paid to be deemed a payment to the contractor. In contracts governing the construction of bridges a clause appears fixing a minimum rate of 20 cents per hour for labourers and 40 cents per hour for teams. A Fair Wages Officer is employed by the Provincial Government to enforce observance of the Fair Wages Clause.

Alberta.

In Alberta since 1906 departmental regulations have provided for the protection of workmen in contract work and day labour in respect of the rates of wages to be paid, the hours of labour being governed by local labour union rules. This applies to buildings and telephone construction. No schedule of the rates of wages and the hours of labour to apply to the various trades or classes of labour employed is inserted in Government contracts but a general clause is instead employed in the following terms:—

> "It is distinctly understood that the contractors have accepted this contract upon the understanding that they will pay the labourers, workmen and mechanics employed by them the current rate of wages of such labourers, workmen and mechanics in the locality where they are employed."

British Columbia.

In British Columbia a resolution was adopted by the Legislative Assembly in 1900, in the following terms:—

> "That in the opinion of the House, all Government contracts should contain such conditions as will prevent abuses which may arise from the subletting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen and for labourers in the district where the work is carried out; and it is hereby resolved that the work to which the foregoing policy shall apply includes not only work undertaken by the Government itself, but also all work aided by a grant of Provincial public funds and all works carried on under franchise granted by the Government, and that the aforesaid policy shall be forthwith applied to every department of the public service and to all parties now performing services for the Government.
>
> "Also that in all contracts, leases and concessions, of whatsoever kind entered into or made by the Government, provision be made that no Chinese or Japanese shall be employed in connection therewith."

In 1903 the Legislature adopted the following resolution regarding the hours of labour:—

> "That hereafter, not exceeding nine hours' work shall constitute a day's work for all foremen, workmen or labourers employed directly by the Government on roads, streets, wharves or bridges."

These provisions are applicable to all kinds of work, whether carried on under contract or by day labour, the regulation regarding hours of labour being used whenever possible.

In accordance with the first mentioned resolution a clause is inserted in all contracts, in the following terms:—

> "The contractor shall pay all persons employed by him upon the works not less than the wages current (at the date of his tender) in the district in which the work is being carried on for competent workmen and labourers; and shall pay such wages in cash, during the progress of the works, on or before the fifteenth of each calendar month, and all balances on or before the expiration of one calendar month after the completion of the contract.
>
> "Should the contractor fail to pay such wages as aforesaid, the Minister of Public Works may pay the same to such persons and deduct such sum or sums from any moneys due, or to become due, to the contractor. And such payments shall be regarded as payments made to the contractor, and shall operate as a discharge pro tanto of any moneys due, or to become due, to the contractor.

If it is reported to the Provincial Government that the purport of these resolutions has been violated, inquiries are at once made and if the reports are confirmed the matter is rectified.

III.—MUNICIPAL FAIR WAGES REGULATIONS.

Halifax.

In 1908, the City Council of Halifax fixed the present minimum rate of wages for work performed by day labour in connection with all construction and maintenance work, the hours of labour (nine) having been fixed by that body in 1895. No provision is made in contracts for the protection of the labour to be employed, as all work, except buildings, is carried on by day labour.

Sydney.

A resolution was adopted by the City Council of Sydney on July 2, 1909, in the following terms:—

"In all contracts hereafter entered into by the City in the performance of which labour shall necessarily be employed in the city, there shall be inserted the following provisos:—

"1. A Fair Wage Schedule arranged annually on or before the fifteenth day of July in each year by a special committee of Council and a committee of the Trades and Labour Council;

"2. A provision against sub-letting on the part of the contractor without the City's consent, and in the event of sub-letting that all the terms of the contract be binding upon the sub-contractor;

"3. That preference be given in the employment of labourers to residents of the city of Sydney;

"4. Such other provisions as in the opinion of the committee having charge of the matter are essential to the effective accomplishment of the objects sought herein."

These regulations are applicable to all work done under contract, such as new buildings, sewer extensions, and concrete and gutter sidewalks.

In accordance with the above resolution a schedule specifying rates of wages and hours of labour is inserted in contracts, as well as other labour conditions, of which the following is given as an example:—

"The following conditions are incorporated in and shall form part of this specification:—

"1. The contractor shall not assign or sublet this contract or any part or parts thereof for the execution of all or any portion of the work included in this contract without the consent of the City Council, and if such sub-letting is consented to by the City Council all the terms of the contract shall be binding upon the sub-contractors.

"2. All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of the city of Sydney, unless the Board of Works is of opinion that local labour is not available or that emergencies or other special circumstances exist which would render it contrary to the interest of the public to enforce the foregoing condition in respect of the employment of resident labour.

"3. No workman employed upon the said work shall at any time be paid less than the minimum rate of wages set forth in the Fair Wages Schedule following."

At this point a list of the classes of labour to be employed, the minimum rates of wages to be paid, and the maximum number of hours to be worked is inserted.

A violation of the Fair Wages Schedule is regarded as a breach of contract. The workmen concerned complain to the Trades and Labour Council when necessary.

Truro.

All work in Truro is carried on by day labour by special resolution of the Council at such times as conditions and requirements arise. As far as possible, ratepayers of the town are employed, the rates of wages being fixed by the Town Engineer. It is stated that the rate of wages and hours of labour on municipal works are those prevailing in the district.

Fredericton.

There are no regulations in respect of the rates of wages or hours of labour of workmen employed by the City of Fredericton, either under contract or by day labour. Contractors are, however, usually required to give resident labour preference and to pay current rates of wages.

St. John.

In 1905, by vote of Common Council, the rate of wages was fixed for day labour employed by the City of St. John in connection with water and sewerage, streets, ferries and wharves. No provision is made in contracts regarding rates of wages or hours of labour.

Charlottetown.

All work under the authority of the City of Charlottetown is carried on by day labour. Resolutions are passed annually in Council fixing the rates of wages to be paid to all workmen employed by the City in connection with all general repairs and maintenance of property, concrete sidewalks, and macadam streets.

Montreal.

In April, 1910, a resolution was adopted by the City Council of Montreal, providing that fair wage conditions should be inserted in all contracts awarded by the City. These conditions are in part as follows:—

"No workman employed on said works shall, under any circumstances, be paid a less rate of wages, or work a greater number of hours than is provided in the following list of fair wages:—

FAIR WAGE SCHEDULE.

Trades.	List of Wages, Per Day of 10 Hours, Not less than:

"The above list of fair wages must include all kinds of work required for the carrying out of any contract, but in case any work not included in the preceding list should have to be done, the Board of Commissioners, or any of their officials may as often as may be necessary, fix the figure on the minimum rate of wages to be paid for such work, said rate not to be below the current scale of wages in each trade or classified work for skilled labourers, in the city of Montreal."

The number of hours to be worked is also provided for as follows:—

"The number of working hours per day, or per week, shall be ruled by the trade routine in the city of Montreal, for each of the classes of men employed on said works.

"The workmen on said works shall not be held to work more hours than is provided in said contract, except in case of urgency for the protection of citizens or of property or in any other case of urgency."

These conditions also stipulate that the contractor shall not have the right to sell or transfer the contract or any part thereof, and that any such transfer or sub-contract shall not be considered as affecting in any way any of the conditions of the contract; that all workmen employed on the work shall be residents of the city of Montreal, unless the Board of Commissioners should decide that the workmen of Montreal are insufficient or that it would not be in the public interest on account of urgency, or owing to special circumstances, to enforce this condition; that before final payment is made to the contractor he must deposit with the Commissioners a detailed statement giving the names, the list of wages, the amounts paid in or still due and unpaid (as the case may be) for wages and services rendered in the execution of said works; that the contractor shall furnish at least once a week, or more often, if required, to the Board of Commissioners or to any other party appointed for said purpose, a detailed statement showing the names of the men, the amount of wages, the accounts paid, and the balance due (if any) to any foreman, workman, labourer or teamster in connection with the execution of said works, separate books to be kept for employés engaged in connection

with the execution of municipal works; that in case the contractor fails to pay the indemnity due to a foreman, workman or labourer on said works and a satisfactory claim is sent by them to the Commissioners, the City of Montreal shall pay such sums and shall charge the amounts against the contractor; that in case the foreman, the workman or the labourer shall be employed on part of the works covered by the said contract at a lower rate of wages than that specified in the schedule, the City shall have the right at all times to deduct the sums due or to become due to the contractor, or to collect from the said contractor a sum equal to the difference of the salary due to such foreman, workman or labourer under his contract with the contractor and the wages fully due to him if the contractor had complied with the rules prescribed in the above mentioned schedule, and the City shall have the option of retaining the said money so deducted or to recover the same on its own account, or indemnify the workman as aforesaid; that no piece work shall be allowed; that the above conditions shall apply to sums of money payable to parties leasing horses and teams, and that they shall have the right to recover said sums as if they were salaried; that the Board of Commissioners when dissatisfied with the wages paid shall have the right to examine the specifications and the pay-lists of the contractor; that the list of fair wages and working hours shall be posted in a conspicuous place on or near the works being executed; that the Board of Commissioners may at any time appoint a fair wages officer; that any contract entered into by the contractor and any of his workmen by which the latter is to receive lower wages than those mentioned in the schedule shall be null and void; and that the City of Montreal shall in all its understandings given by tenders comply with the terms of said list of fair wages in every respect.

A Fair Wage Officer is employed by the City to enforce observance of the above conditions.

The same conditions in respect of wages and hours apply to work performed by day labour.

Westmount.

In work performed either by contract or by day labour, the prevailing rates of wages are paid, a clause being inserted in all contracts with the City of Westmount, as follows:—

"The contractor shall pay or cause to be paid to all mechanics, workmen and labourers employed by him or by any sub-contractor under him in the execution of this contract, the prevailing rate of wages for such work as the said mechanics, workmen and labourers may be engaged upon, and being the rate of wages prevailing at the date of the specifications for this contract, and which shall remain at the said rate until the completion thereof.

"The decision of the City Surveyor in case of dispute as to the rate of wages to be paid under this contract, or as to the amount to be paid to any mechanic, workman or labourer, shall be final and binding upon all parties.

"In case the contractor fails to pay any mechanic, workman or labourer employed by him in the execution of this contract, the Corporation may pay any balance necessary to make up the amount and charge it to the contractor.

"No allowance or extension of time will be allowed the contractor on account of strikes due to any demand for increased pay on the part of his or their employés, unless it can be shown to the satisfaction of the City Surveyor that all skilled labour making demand is receiving prevailing rate of wages and common labour, 17½ cents per hour."

The rate for common labour is the only rate specified. The city surveyor has authority to see that contract conditions are observed.

Valleyfield.

All work performed by the City of Valleyfield is done by day labour, which is paid for at the rate of $1.50 per day. Each by-law granting bonuses, exempt-

ion from taxation, &c., binds employers to give a fixed monthly wage to a fixed number of men. When an affidavit of a complaint is filed a special member of the City Council is charged to make a full investigation.

Sorel.

The Municipal Board of Sorel fixes wages and hours of labour for day labour. There is a by-law concerning masters and servants respecting mutual duties and rates of pay. This applies to all kinds of work, subject to mutual agreement between both parties.

Ottawa.

On September 21, 1908, By-law No. 2,802, was passed by the City Council of Ottawa, providing for the protection of all workmen employed by the City in respect of the rates of wages, hours of labour, and other conditions of employment. This by-law was amended by By-law No. 2,923, which was passed on July 19, 1909. The labour conditions prescribed by these by-laws provide for the insertion of a minimum scale of wages in all civic contracts; that the contractor shall not assign or sub-let the contract or any part or parts thereof; that all workmen employed upon the work shall be residents of Ottawa, unless the Board of Control is of opinion that Ottawa labour is not available or that emergencies or other special circumstances exist which render it contrary to the public interest to enforce this condition; that the schedule is intended to include all the classes of labour required for the performance of the work, but if any labour is required which is not provided for, the Board of Control shall have the power to fix the minimum rate of wages payable for such labour; that the contractor shall not be entitled to the payment of any money unless and until he shall have filed in the office of the Secretary of the Board of Control a statement showing the names, rate of wages, amounts paid and amounts (if any) due and unpaid for wages, for work and labour done by any foreman, workman, labourer or team employed upon the said work, such statement to be attested by the statutory declaration of the contractor, or whomsoever the Board of Control may require; that in the event of default being made in the payment of any money owing in respect of wages of any foreman, workman or labourer employed on the work, and if a claim therefor is filed in the office of the Secretary of the Board of Control and proof thereof is furnished, the Board may order the payment of such claim and the amounts so paid shall be deemed payments to the contractor; that no portion of the work shall be done by piece-work; that the number of working hours in the day or week shall be determined by the custom of the trade in the City of Ottawa; that the workmen employed shall not be required to work for longer hours than those fixed by the custom of the trade except for the protection of life or property, or in the case of other emergencies; that these conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable in respect of wages; and that the contractor must furnish a sworn statement that all goods and materials supplied for the work in the execution of the contract have been paid for, otherwise the Board may pay any claims and charge same to the contractor.

The conditions above mentioned are also adhered to in all civic works carried on by day labour.

A general clause is inserted in all contracts in the following terms:

> "And the said contractors do hereby further covenant and agree with the said City that upon the construction of the said works they will employ residents of the said City of Ottawa, in preference to persons not residing therein; that nine hours' labour shall constitute a day's work for any person employed by them on the said works; that they will pay not less than twenty cents per hour to all persons employed by them on the works, and in the event of any person so employed by them on the said works being paid

less than twenty cents per hour the said City shall have the right to pay such person the difference between the amount paid him by the said contractors while employed upon the said works and what he ought to have been paid while so employed at the said rate of twenty cents per hour, and to deduct the amount so paid from any moneys payable by the said City to the said contractors on any account whatever."

Civic officials are required to take all necessary steps to secure compliance with the By-laws above mentioned.

Toronto.

On December 18, 1893, By-law No. 3,206 was passed by the City Council of Toronto, providing: (1) for payment by civic contractors to their workmen of the union or prevailing rate of wages at the date of the specification accompanying the tender, such rate to remain in force until the completion of the said contract; (2) that the decision of the City Engineer in case of any dispute as to the rate of wages to be paid under the by-law shall be final and binding upon all parties; and, (3) that in case the contractor fails to pay any workman the wages due him the City may pay and charge such amount to the contractor. A report of the Board of Control was adopted on October 30, 1899, which provided for a working day of nine hours. These regulations apply to all works paid for by the Municipality of Toronto.

The general clause which is inserted in all contracts is in the following terms:

"The contractor shall pay or cause to be paid to all mechanics, workmen and labourers employed by him or by any sub-contractor under him in the execution of this contract the union or prevailing rate of wages for such work as the said mechanics, workmen and labourers may be engaged upon, and being the rate of wages prevailing at the date of the specifications for this contract, and which shall remain at the said rate until the completion thereof; and the contractor shall pay or cause to be paid to all workmen employed by him or by any sub-contractor under him in the execution of this contract the minimum wage of eighteen cents per hour.

"The contractor shall not compel or permit the workman he employs to work more than nine hours a day except in cases of emergency, and then only by written permission of the City Engineer. The provisions of this clause shall not, however, apply to any work which is of necessity done outside the City of Toronto."

Hamilton.

In 1895, a resolution in the following terms was adopted by the City Council of Hamilton, applicable to all classes of workmen whether employed by day labour or under contract, and providing for the insertion of a general clause in all civic contracts:

"Resolved, That in every contract hereafter entered into with the City Corporation for the erection of buildings, construction of sewers or other public works, or for any other services in the performance of which workmen are employed, it shall be made a condition of the contract that the workmen employed in the performance of the work or service contracted for shall be paid the current rate of wages, and shall be required to work only during the hours established for the trades in which they are employed, but in no case shall the wages so paid be less than fifteen cents an hour, and the contract shall contain a covenant with the City Corporation on the part of the contractor that such current wages shall be paid to the workmen employed in carrying out the contract, and that such workmen shall be required to work only during the hours so established."

London.

On August 5, 1895, by-law No. 924, was passed by the City Council of London providing for the payment by civic contractors to their workmen of the prevailing union rate of wages, also that the

decision of the City Engineer, in case of dispute as to the rate of wages to be paid under the by-law, shall be final and conclusive upon all parties to the said contracts; and that in case any contractor fails to pay to any mechanic, workman or labourer employed by him in the execution of the said contract the prevailing rate of wages, and a claim is presented to the Corporation of the City of London in writing within thirty days after the completion of the contract the City may pay such claim and deduct the amount from any moneys payable by the Corporation to the contractor.

A clause is accordingly inserted in the general conditions which form part of all contracts with the Corporation of the City of London, as follows:

> "The contractor must pay his labourers an amount equal to at least one dollar and a quarter for a day's work of nine hours, and must conform to the provisions of the City Standard Wages By-law."

It is also stipulated in these conditions that workmen employed on the works must be citizens of London, it being permissible, however, to bring skilled mechanics, foremen, &c., from other places when they are not procurable in the City of London; that the contractor shall not sub-let or under-let any portion of the works, but must construct and carry on the same with his own men and under his own supervision; and that the City Engineer may from time to time pay all wages of agents, foremen, engineers, mechanics and men employed in and about the said works and charge the contractor therewith.

Should the contractor not comply with the foregoing conditions he must give up his contract.

Brantford.

On March 27,1899, by-law No. 620, was passed by the City Council of Brantford, providing for the protection of workmen employed on all classes of works whether by day labour or under contract.

A general clause is accordingly inserted in all civic contracts in the following terms:

> "The contract to be fulfilled under the conditions of By-law No. 620 of the City of Brantford, which provides that the contractor shall pay to all mechanics, workmen or labourers to be employed by him in the execution of the contract the prevailing union rate of wages for such work as the said mechanics, workmen or labourers may be engaged upon, and being the rate of wages prevailing at the date of the specifications accompanying the tender for such work. Residents of Brantford shall be employed for labour as far as possible."

The City Engineer is authorized to enforce the By-law and has power to withhold payment if the contractor violates the regulation.

Guelph.

On April 4, 1910, By-law No. 753, in the following terms was passed by the City Council of Guelph:

> "The minimum rate of wages for labourers employed by the Corporation of the City of Guelph, on City work shall be twenty cents per hour and for ten hours per day."

A general clause is accordingly inserted in all civic contracts as follows:

> "The contractor shall, as far as practicable, employ labourers *bona fide* residents of the City of Guelph, and shall pay not less than the Corporation rate of wages."

Brockville.

There are no regulations in respect of the rates of wages and the hours of labour of workmen employed by the Corporation of the City of Brockville, but all contracts awarded by the City contain a stipulation that the current rate of wages shall be paid to workmen and that nine hours shall constitute a day's work.

Berlin.

The rates of wages to be paid to all workmen employed by the Town of Ber-

lin on sewer work, roadway and cement walk construction, whether by day labour or under contract, are fixed annually by resolution of the Town Council. A general clause is inserted in all contracts in the following terms:

"All unskilled labourers on the work shall be residents of the Town of Berlin, and shall be paid the prevailing rate of wages."

Fort William.

In June, 1906, a set of general conditions was adopted by the City Council of Fort William, and forms part of all contracts with the City Engineer's Department, all city work being handled by that Department, including sewers, sidewalks, paving, waterworks, electric light, telephone, street railway and public buildings of all kinds (except schools). The provisions in respect of wages which are inserted in contracts are applicable also to works carried on by day labour; no provision is, however, made in respect of the hours of labour.

The terms of the general clause which is inserted in contracts are as follows:

"The contractor shall pay or cause to be paid to all mechanics, workmen and labourers employed by him or by any sub-contractor under him in the execution of this contract the union or prevailing rate of wages for such work as the said mechanics, workmen, and labourers may be engaged upon, and being the rate of wages prevailing at the date of the specifications for this contract which shall remain at the said rate until the completion thereof.

"The decision of the Engineer, in case of dispute as to the rate of wages to be paid under this contract, or as to the amount to be paid to any workman, shall be final and binding on all parties.

"In case the contractor fails to pay any mechanic, workman or labourer employed by him in the execution of this contract the rate of wages hereinbefore provided, the Corporation may pay any balance necessary to make up this amount and charge it to the contractor."

Periodical investigations are made by the City Engineer to see that the above conditions are complied with.

Goderich.

A regulation has been adopted providing that workmen should be engaged at $1.75 per day, or seventeen and one-half cents per hour, and teams and teamsters at $3.50 per day or thirty-five cents per hour. This applies to all classes of work performed by Corporation labourers, including sewers, drains, gravelling, repairs of various kinds. There are no provisions inserted in contracts for the protection of workmen in respect of the rates of wages or hours of labour, but it is stipulated that in case any workmen employed by the contractor are unpaid at the completion of the work, or at any time, the Town shall have the right to pay such wages upon the report of the Town Engineer and to charge the same against the contractor.

Hawkesbury.

A motion was passed in Council, over three years ago, requiring payment to anybody doing manual work for the Corporation of, at least, $1.50 per day of ten hours. A general clause is inserted in all contracts stipulating that workmen shall be paid the same rate and work the same number of hours as above mentioned.

Lindsay.

In 1904, a regulation was adopted by the Corporation of Lindsay making provision for the protection of workmen as respects rates of wages and hours of labour. This regulation calls for payment of the current rates of wages.

The general specifications for walks, sewers, and other permanent improvements, which are made part of all contracts, provide as follows:—

"The contractor shall pay or cause to be paid to all mechanics, workmen and labourers employed by him or by any sub-contractor under him in the execution of this contract,

the union or prevailing rate of wages for such work as the said mechanics workmen and labourers may be engaged upon, and being the rate of wages prevailing at the date of specifications for this contract, and which shall remain at the said rate until the completion thereof.

"The contractor shall employ only citizens who have resided in the town for a period of at least six months, or whose families have become residents of the town, and he shall not compel or permit the workmen he employs to work more than ten hours a day, except in cases of emergency, and then only by written permission of the Inspector on the work."

Owen Sound.

In 1910 a resolution was adopted by the Corporation of Owen Sound, fixing the standard rate of wages for day labourers at $2 per day. This applies to labourers in the employ of the Board of Works, Electric Light Plant, Gas Works, Waterworks Department, &c. There is no provision made in civic contracts for the protection of workmen in respect of the rates of wages or the hours of labour.

Petrolea.

A general clause, in the following terms, is inserted in all contracts with the Town of Petrolea:—

"The contractor covenants with the Corporation and agrees he will employ labourers whenever available who are *bona fide* residents of the town of Petrolea at the current rate of wages for such labourers, with the exception of skilled labour, as it shall be necessary for the contractor to employ; and will also employ teams whenever available owned by *bona fide* residents of the said town at the current rate of wages whenever necessary that teams shall be employed in the course of the construction of the work contemplated by this contract."

Port Arthur.

On February 22, 1909, Resolution No. 169 was adopted by the City Council of Port Arthur, providing for the insertion of a Fair Wages Schedule, specifying rates of wages to be paid to workmen employed on all contracts entered into by the City. No provision is made regarding hours of labour, but the working day is understood to consist of ten hours. As respects day labour the minimum wage is 20 cents per hour.

Sarnia.

No regulations have been adopted by the Town of Sarnia respecting the rates of wages to be paid to workmen, or the hours of labour which should constitute a working day. A condition is, however, inserted in all contracts that workmen employed in connection therewith must be residents of Canada, this provision being applicable also to works carried on by day labour.

Sault Ste. Marie.

No regulations have been adopted by the Town of Sault Ste. Marie in respect of the rates of wages and hours of labour of workmen employed by the Town Council. Twenty per cent. of money due for payment of work performed to contractor is held for forty days after completion of the work, in order to satisfy any claims for labour or otherwise.

Winnipeg.

In 1905, the City Council of Winnipeg adopted a Fair Wages Clause to be inserted in all contracts with the City, and in 1908, it was extended by the adoption of the report of a special Committee. The conditions regarding the rates of wages and the hours of labour are in the following terms:—

"No workman employed upon the said work shall at any time be paid less than the minimum rate of wages, nor work more than the specified number of hours set forth in the Fair Wage Schedule following:—

Fair Wage Schedule.

Contract for construction of.....at.....

Trade or Class of Labour.	Rate of Wages, not less than the following per hour.	Not more than the following hours per day.

"The foregoing schedule is intended to include all the classes of labour required for the performance of the work, but if any labour is required for the performance of the work, which is not provided for by any of the items in the above schedule, the Board of Control or some officer appointed by them, whenever and as often as the case arises, shall have power to fix the minimum rate of wages payable in respect of any such labour, which minimum rate shall not be less than the rate of wages generally accepted as current in each trade or class of labour for competent workmen in the City of Winnipeg.

"The number of working hours in the day or week shall be determined by the custom of the trade in the City of Winnipeg, for each of the different classes of labour employed upon the work.

"The workmen employed in the performance of the said contract shall not be required to work for longer hours than those fixed in this contract, except for the protection of life or property or in cases of emergencies."

These conditions also stipulate that the contractor shall not assign or sub-let the contract or any part or parts thereof, and no pretended assignment or sub-contract will be recognized or in any way affect any of the provisions of the contract; that all workmen employed upon the work shall be residents of the City of Winnipeg, unless such residents are not available or that special circumstances render it contrary to the public interest to enforce such provision; that the contractor shall not be entitled to the payment of any money until he shall have filed in the office of the Board of Control a statement showing the name, rate of wages, amounts paid, and amount (if any) due and unpaid for wages for work and labour done by any foreman, workman, labourer or team employed upon the work, such statement to be attested by the statutory declaration of the contractor or of such other person or persons as the Board of Control may deem necessary in order to satisfy them that the conditions have been complied with; that the contractor shall at least once a week furnish the Board of Control or such other person or persons as they may appoint, with a statement showing the name, rate of wages, amounts paid and amounts (if any) due and unpaid for wages and labour done by any foreman, workman, labourer or team employed upon the work; that in the event of default being made in the payment of any money owing, in respect of wages of any foreman, workman or labourer employed upon the work, and if a claim is filed in the office of the Board of Control and proof thereof satisfactory to the Board is furnished the City of Winnipeg may pay such claim, and the amounts so paid shall be deemed a payment to the contractor; that if any foreman, workman or labourer is employed by the contractor to work at a wage less than that specified in the foregoing schedule, the City shall be entitled at any time or times to deduct from the monies due or accruing due to the contractor, or to recover from the contractor a sum equal to the difference between such lesser wages actually earned by such foreman, workman or labourer in accordance with his agreement, and the City may either retain the amount so deducted or pay the same over to the workman; that no portion of the work shall be done by piece-work; that the conditions shall extend and apply to monies payable for the use or hire of horses and teams, and the persons entitled to such payment shall have the like right in respect of monies so owing to them, as if such monies were payable in respect of wages; that whenever the Board of Control or such other persons as the Board of Control may indicate or require are not satisfied as to the wages paid under the foregoing clauses, they shall have the power to examine all time sheets and pay rolls of the contractors; that the schedule of working hours and wages paid in the

different branches of work shall be posted in a conspicuous place, at or near where the work is in progress; that the Board of Control may from time to time depute any person to act in the capacity and perform the duties of Fair Wage Officer; that any agreement made between the contractor and any of the persons employed upon the said work, by which the employé is to accept a lesser wage than that specified, or by which any of the conditions are violated shall be null and void; and that it shall be incumbent on the City of Winnipeg in the performance of any work or works for which tenders have been asked to abide by the terms of the foregoing schedule, both as to rates of wages and as to the number of working hours.

The same conditions in respect of rates of wages and hours of labour apply to work performed by day labour.

In the preparation of Fair Wages Schedules the current rates of wages are obtained from the Provincial Fair Wage Officer. Any complaint of violation is investigated by the proper authorities having jurisdiction over the contract or work in question.

Brandon.

Most of the work performed under the authority of the City of Brandon is done by day labour, the present rate of wages being from $1.75 to $2.00 for a 10-hour day. Whenever a contract is let a Fair Wage Clause is inserted for the protection of the workmen employed thereunder.

Regina.

In 1909, a resolution was adopted by the City Council of Regina, which provided for the insertion in all civic contracts of conditions stipulating that wages should be paid every two weeks, and that all things being equal, preference should be given to residents of Regina and British subjects. These provisions are also applicable to works carried on by day labour. The Fair Wages Officer of the Provincial Government exercises a general supervision.

Prince Albert.

In 1908, a resolution was adopted by the City Council of Prince Albert providing for the insertion in all contracts awarded by the City, in connection with the water works, sewerage, &c., of a general clause respecting the minimum rate of wages to be paid for common labour. The clause in question is in the following terms;—

> "The wages paid by the contractor for common labour on this contract shall not be less than twenty (20) cents per hour."

No provision is made in respect of work carried on by day labour. All work is under the control of the City Engineer.

Saskatoon.

In July, 1909, a resolution was adopted by the City Council of Saskatoon, in the following terms:—

> "That in all future City Contracts a minimum wage clause of 20 cents per hour be inserted."

This applies to all municipal works, including sewerage works, water works, concrete sidewalks and construction of bridges and subways. The terms of the general clause which is inserted in contracts is as follows:—

> "The contractor for labour shall employ labourers *bona fide* residents of the City of Saskatoon as far as practicable, and shall adopt a minimum wage scale for unskilled labour of 20 cents per hour."

Provision is also made in contracts that the contractor must take every precaution to protect his workmen against accident and injury whilst engaged on the work, as well as provisions regarding sanitary conditions of employment.

These provisions are also applicable to works carried on by day labour. Whenever a schedule specifying rates

of wages to be paid is inserted in a contract, the information on which such schedule is based is obtained by comparison with the current rates in neighbouring cities.

Edmonton.

In April, 1908, a report was adopted by the City Council of Edmonton fixing labourers' wages at twenty-five (25) cents per hour for a nine-hour day, and in May, 1909, a resolution was passed adopting a fair wage clause to govern the rates of wages paid to workmen of different trades, the same to be the regular scale of wages paid by the Builders' Exchange.

The general clause is inserted in all City contracts, in the following terms:—

> "The contractor shall pay to all mechanics and workmen the scale of wages at the time being in force in the City of Edmonton, in the respective building trades, and shall pay to all unskilled labourers employed by him in and about the execution of this work or any part thereof wages and wages overtime at a rate of not less than $2.25 per day for a day of nine hours, and shall at any time and from time to time during the continuance of this contract whenever called on so to do by the City Commissioners, produce to them or such officer or officers of the City's as the said Commissioners shall direct, the time and wages book and sheets of the contractor, in order to show to the satisfaction of the Commissioners or such officer whether or not the stipulations contained in this clause have been and are complied with. And should from time to time any workmen in the employment of the contractor be not paid the said rates of wages, the Corporation may pay to any workman or workmen who have been so underpaid, the difference between the amount he or they should have been paid if this stipulation as to wages had been observed, and may deduct from any moneys due or to become due under this contract the amount of the difference so paid to such workman or workmen."

The length of the working day and the rates of wages paid are the same for work performed by day labour as for contract work. The schedule of wages is fixed by comparing with wages paid in other places similarly situated and by taking into consideration the cost of living, rents, &c.

Calgary.

In May, 1906, a resolution was adopted by the City Council of Calgary, in the following terms: "That a fair wage clause be inserted in City contracts similar to that existing in contracts of the Dominion." A general clause is inserted in all municipal contracts, as follows: "The contractor shall pay to all workmen employed upon the work the minimum wage of 25 cents per hour, and if he fails to do so the City may pay the balance necessary to make up this amount, and charge same to the contractor." The foregoing provisions are applicable also to works carried on by day labour.

Lethbridge.

By resolution of the City Council of Lethbridge it was provided that a minimum wage clause should be inserted in all contracts, in the following terms: "That the contractor shall pay a minimum wage for labour of 25 cents per hour, as fixed in schedule of Trades and Labour Council, City of Lethbridge." The above clause is applicable also to works carried on by day labour; and includes all municipal works, such as cement sidewalk construction, grading, water works, sewerage work, power plant operation, and coal mining.

Medicine Hat.

A regulation has been adopted on the recommendation of the Public Works Committee of the City of Medicine Hat, providing for the payment to labourers of 25 cents per hour for nine hours' work. This applies to the construction and care of streets, sewers, water mains, concrete and plank sidewalks, retaining walls, subways, surface sewers and other municipal undertakings in which labour is required. All contracts to date have related only to the supply of materials.

Victoria.

For several years a regulation has been in force by which it is provided that no Asiatics are to be employed on any work undertaken by the City of Victoria, and specifying also that union rates of wages shall be paid for all work under contract and by day labour, except in special cases at the discretion of the city engineer, who is empowered to enforce the above regulation.

Vancouver.

In January, 1910, a resolution was adopted by the City Council of Vancouver providing for the eight-hour day clause which is now inserted in all municipal contracts. A plebiscite was taken at the municipal elections preceding the adoption of the above resolution as to whether the people approved or not of paying city workmen the same rate of pay for eight as for nine hours' work per day. The plebiscite in question was passed. Other clauses in the contract form now used were adopted from time to time, the last revision being made in July, 1910.

The clauses relating to the rates of wages and the hours of labour which are inserted in all contracts entered into by the City, are in the following terms:—

"The contractor shall not employ upon the work or in connection therewith any workman or employé for more than eight hours in any one day of twenty-four hours during the continuance of this contract. The working day shall commence at eight o'clock a.m. and end at five o'clock p.m. The noon-hour may be curtailed by special agreement between the contractor and the majority of the employés, but not in such a manner as to permit more than eight hours' work in any one day of the twenty-four hours. But if two or more shifts of men are working in one day, the same men shall not be permitted to work on more than one shift, and such shift shall not be considered overtime. Overtime shall not be allowed under any pretence whatever, except when human life is in jeopardy or property in danger of destruction. In such case overtime will be allowed until the work is secure from danger, and no longer, except by a written order signed by the city engineer and the chairman of the board of works, and all such overtime shall be rated at time and a half, and in the event of the contractor employing or permitting any workman or employé to work on this contract for more than eight hours in any one of twenty-four hours, contrary to the provisions of this contract, he shall forfeit and pay to the Corporation the sum of $5 per hour or portion of an hour for each and every man over the said eight hours that he shall so employ or permit any workman or employé so to work, which sum or sums shall be liquidated and ascertained damages and may be recovered by action or deducted by the Corporation from any sum or sums due or to become due to the contractor under this contract or otherwise. And it is expressly hereby agreed to by the contractor as to the time of employment of workmen on the said works, and in the event of the contractor making any breach of the said conditions the Corporation may at any time after such breach, by notice terminate the said contract, and the contractor shall in such case have no claim against the Corporation for compensation or damages by reason of such termination.

"The contractor will pay or cause to be paid to any workmen, artisans, mechanics and labourers employed by . . . . . under or in connection with this contract a rate of wages not less than generally accepted as current in the City of Vancouver for competent workmen, artisans or mechanics when employed in similar work to that hereby contracted to be performed and carried out, and the contractor shall pay or cause to be paid to all workmen employed by him or by any sub-contractor under him in the execution of this contract the minimum wage of 28 cents per hour."

Provision is also made that the contractor shall not employ upon the work mentioned in the contract either directly or

indirectly any Asiatic or person of the Asiatic race; also that the contractor shall not, without the consent in writing of the Corporation, assign, transfer, or sub-let any portion of the works, but must construct and carry on the same with his own men and under his own supervision. All pay-rolls belonging to contractors engaged in work for the City have to be submitted and examined by the city accountant before payment for contract work is made. Inspectors are employed by the City to examine work carried on by contractors, and they are instructed to see that the hours provided for in the contracts are observed. The provisions for rates of wages and hours of labour used in connection with contract work are also applicable to works carried on by day labour.

New Westminster.

The current rates of wages are paid for all work, whether by contract or by day labour, under the authority of the City Council of New Westminster; the hours of labour are also limited to nine for each working day.

In the printed form of specifications and conditions of contract which is used in connection with all contracts entered into by the City, the following clauses in respect of rates of wages and hours of labour are inserted:—

"The contractor shall not employ upon the work, or in connection therewith, any workman or employé for more than nine hours per day of twenty-four hours.

"The working day shall commence at seven o'clock a.m. and shall end at five o'clock p.m. If two or more shifts of men are working in one day, the same men shall not be permitted to work on more than one shift, and such shifts shall not be considered overtime. Overtime shall not be allowed under any pretence whatever, except when human life is in jeopardy, or when property is in danger of destruction. In such cases, overtime will be allowed until the work is secured from danger, but no longer. This applies only when extra work has been ordered by the engineer.

"The contractor shall pay or cause to be paid to any workmen, artisans, mechanics or labourers employed by him on or in connection with this work a rate of wages not less than is generally accepted as current in the City of New Westminster for competent workmen, artisans, mechanics or labourers when employed on similar work."

It is also provided in the specifications and conditions of contract above mentioned that the contractor shall not be allowed to sub-let the works or any part thereof, without the consent in writing of the Corporation or the city engineer; that before final payment is made, the contractor shall produce to the engineer satisfactory evidence that all just claims and demands of its employés or of parties from whom materials used in the construction of the work may have been purchased or procured are fully satisfied; that the contractor shall keep a proper pay-roll and shall produce the same and all receipts for inspection by the city engineer or any person authorized by the Corporation, when called upon; also that the contractor shall not employ on the work, either directly or indirectly, any Asiatic or person of the Asiatic race; and that no Sunday labour shall be allowed.

Nanaimo.

Section 318 of the Municipal Clauses Act (Provincial) provides for the insertion in all contracts of a general clause by which the rate for day labour is fixed by resolution or direction of the municipal council. These regulations apply to labourers, rockmen, machinists, mechanics of all sorts, axemen, &c.

The general clause which is accordingly inserted in municipal contracts is in the following terms:—

"The contractors will pay or cause to be paid to any workmen, artisans, mechanics and labourers employed by them under or in connection with this contract a rate of wages not less than that generally accepted as current in the city of Nanaimo for competent workmen, artisans or mechanics when

employed in similar work to that hereby contracted to be performed and carried out."

Nelson.

On June 14, 1909, the Municipal Council of Nelson adopted a resolution providing for the payment of the union scale of wages for an eight-hour day. This resolution applies to work performed by day labour and by contract, and refers to work done on streets, sidewalks, cement sidewalks, &c. The general clause which is inserted in municipal contracts is in the following terms:—

"And said contractors further covenant and agree that in consideration of the payments being made as hereinafter set forth, they will pay each workman engaged by them upon the work not less than the daily wage of .....dollars, and that the engineer shall have the right to discharge any workman engaged at a lesser wage, upon twelve hours' notice."

Rossland.

In June, 1907, a resolution was adopted by the Corporation of Rossland providing that eight hours should constitute a working day, and that wages should be $3.50 per day. These provisions apply to work carried on by day labour, such as street cleaning and repairing, street improvements, sewer construction and repairs, water works construction and repairs, &c.

Provisions are also inserted in municipal contracts for the protection of workmen in respect of the rates of wages and hours of labour. The city engineer is empowered to enforce the observance of the above mentioned resolution.

IV.—SCHOOL BOARD FAIR WAGE REGULATIONS.

SO far as the Department was informed there are no specified regulations in respect of the rates of wages and hours of labour of workmen employed in connection with the execution of works under the authority of the School Boards of Prince Edward Island, Nova Scotia, New Brunswick, Quebec, Alberta and Saskatchewan.

Toronto.

The Board of Education of Toronto, Ont., adopted a regulation relating to wages in 1894, and a regulation relating to hours of labour in 1909, applicable to all classes of workmen engaged in the various building trades, cabinet makers and labourers. The general clause which is inserted in all contracts is in part as follows:—

"And guarantee to pay all workmen employed by..... or engaged on behalf..... in the said work, the union or prevailing rate of wages and that the said wages shall be paid for so many hours as constitue a union day or a day according to the prevailing practice of the trade."

Ottawa.

The Separate School Board of Ottawa, Ont., provides for a specified rate of wages to be paid for work under contract and by day labour. A general clause is inserted in all contracts requiring the payment of such rates of wages. All labour employed on the building of Separate Schools must be according to Fair Wages By-law No. 2,802 of the City of Ottawa, which specifies rates of wages for different trades and stipulates that workmen shall not be required to work longer hours than those fixed by the custom of the trades in the City of Ottawa.

Winnipeg.

Under the policy followed by the School Board of Winnipeg, all large school buildings and works are carried on under contract awarded by public tender. Minor works and alterations are carried on by day labour. Works

carried on by day labour are under the immediate supervision of the Commissioner of Buildings and the regular rates of wages are paid. On April 9, 1908, a general clause was adopted for insertion in all specifications and the specifications are approved before calling for tenders. The general clause is in the following terms:—

"The workmen employed in any capacity in connection with the work to be done under these specifications shall work only the number of hours each day as is prescribed by custom in Winnipeg for such trade, and no workman shall be paid less than the generally accepted rate of wages as same may be agreed upon from time to time between the contractors and representatives of the Labour Union of each trade. The contractor for this contract shall not lower the wages thus fixed upon until a new agreement has been made. Where no agreement has been arrived at, as before specified, with regard to the wages to the workmen of any particular trade, such wages shall be as high as are being generally paid to workmen of that trade by a majority of the seven building contractors doing business in the City, the amount of whose contracts at the time aggregate the largest, as shown by the records of the City Building Inspector. The Contractor shall arrange for an Accident Insurance Policy to be taken out in a responsible Company, covering all the workmen who are engaged upon the work from time to time until completion, and in case of an accident shall see that the workman injured is cared for and receives the amount due him under the policy mentioned."

Pay sheets are examined before payment of any progress estimate to see that workmen are receiving the rates of wages agreed upon between the workmen of any trade and the Builders' Exchange.

Vancouver.

In work performed for the School Board of Vancouver, either by contract or by day labour, provision is made for the payment to the workmen employed of the prevailing rates of wages, the same being governed by the rates adopted by the City Council and by Labour Unions.

New Westminster.

Work performed for the Public School Board of New Westminster is chiefly by contract. Current rates are expected to be paid to the workmen employed, nine hours being customary for a day's work. When any contracts are let, rules governing City contracts apply. These rules include provisions for a nine hour day and for the payment of a rate of wages not less than that generally accepted as current in the City of New Westminster.

THE COMBINES INVESTIGATION ACT—APPEAL AGAINST ESTABLISHMENT OF BOARD OF INVESTIGATION RE ALLEGED COMBINE IN SHOEMAKING MACHINERY.

IN the April number of the *Labour Gazette*, reference was made to an appeal which had been lodged in the Court of Appeals, in the Province of Quebec, by the United Shoe Machinery Company of Canada, against an order of Mr. Justice Bruneau, of the Superior Court, Quebec, on February 25 last, establishing a Board of Investigation under the Combines Investigation Act, to inquire into the existence of an alleged combine in the manufacture and sale of boot and shoe making machinery.[1]

The appeal in question was considered by the Court of Appeals during the first week of May. A motion was made on May 5, before the Court, for the dismissal of the appeal. This motion was

[1]See April, 1911, *Labour Gazette*, pages 1134–1136.

granted by the Court on May 16, the Court holding that the order in question, under the Combines Investigation Act, was not subject to appeal. The Department was informed that it was the intention of the United Shoe Machinery Company to apply to the Judicial Committee of the Privy Council for leave to appeal from the decision of the Court of Appeals of Quebec. In connection therewith, steps were taken by the Department of Justice to oppose the granting of the application in question. which it is expected, will be made in the month of July.

Terms of Judgement.

The reasons for the judgement of the Court of Appeals of May 16, above referred to, were given by the Honourable Mr. Justice Cross, as follows:—

"COURT OF KING'S BENCH

"(In Appeal)

"United Shoe Machinery Co.
Appellant.

and

"Drouin et al
Respondents.

"Cross.—Judge.

"This is a motion to quash the appeal. It is made on behalf of the persons who are named as respondents, and substantially on the grounds that the so-called judgement is not a judgement of court in any action or matter pending between the appellant and themselves, and in any event is not a judgement from which an appeal to this Court is competent.

"The order appealed from is an order of a judge of the Superior Court directing an investigation under the Combines Investigation Act (9–10 Ed. VII, chap. 9 Canada). An investigation such as that Act provides for is not entered upon without having been directed by an order of a judge. It has been so directed, and the present appellant, having been named in the statement accompanying the application for the order as being one of six persons or companies believed to be concerned in the alleged combine, has brought up this appeal from the order, as if it were a party defendant, against the respondents who made the application under section 5 of the Act, as if they were parties plaintiff.

"The order in question is one, the original of which is not required by section 8 of the Act to be transmitted to the Registrar of Boards of Investigation—an officer of the Department of Labour of the Government—thereafter to be acted upon by the Minister of Labour. The prothonotary of the Superior Court —who appears to have acted as a clerk to the judge—has nevertheless sent up to us upon this appeal a copy of the order, as if it were a record in that Court instead of in the Department of Labour. The order papers which the judge had before him have also been sent up to us, apparently by courtesy of the Minister of Labour.

"I consider that the order from which it is sought to appeal is not properly speaking a judgement of a court or judge. It does not decide any matter in issue between parties or make any adjudication against anybody, but merely has the effect of opening the door to the investigation provided for in the Act.

"It is of the nature of those judicial acts referred to in the treatise of Poncet 'Des jugements' at No. 6 where the writer says: 'Cela posé, le bon sens nous fait voir avec la même certitude que les actes 'inobligatoires' ou simples ne peuvent mériter la qualification propre de 'jugements', car qui dit 'jugement' dit la fixation des rapports qui ont existé ou doivent exister entre les parties et la déclaration des droits que ces rapports ont produits ou doivent produire entre elles; en d'autres termes, on ne peut donner à un acte judiciaire de magistrature le nom caractéristique de 'jugement', qu'autant qu'il en résulte une action à l'une des parties contre l'autre."

"To guard against ill-considered or meddlesome procedure, the Act has provided the requirement that an investigation shall be entered upon only after

a judge who has heard the applicants has become satisfied that there is reasonable ground for it and has ordered it.

"It has been pointed out for the appellant that there is no declaration in the Act, that such an order shall be final and without appeal, such as is sometimes introduced into Acts which treat of the Proceedings of Executive Government, and it is argued that as the order is that of a judge of the Superior Court, article 72 of the Code of Procedure applies and establishes the right of appeal. But from what has been said it is clear that the order here in question is not one of those decisions mentioned in article 72, but properly speaking is not a decision at all.

"It is to be remembered that the authority upon which the judge acted is that conferred by the Act which is a Dominion Statute. By section 3 the Minister of Labour is given the 'general administration' of the Act. The action which he can take is to be taken by virtue of there having been transmitted to his Department an order of a judge of the Superior Court—he need not act upon the order of any other Court.

"Where actions are about to be instituted or are pending there are numerous instances of judges' orders upon such incidents as permitting a married woman to plead, granting leave to sue '*in forma pauperis*', fixing security, ordering the breaking open of doors, &c., which are not treated as 'judgements' or 'decisions' either interlocutory or final.

"We recently held at Montreal, in Donaldson vs. Defoy, that a judge's leave to an applicant to proceed under the Employer's Liability Act was mere 'ordonnace préparatoire' and not a judgement from which an appeal lay '*de plano*'.

"In France, it has always been recognized, in determining the question of the existence or non-existence of the right of appeal, that a distinction was to be made between mere orders regulating procedure (jugements préparatoires) and interlocutory judgements (jugements interlocutoires).

"The former were not considered to be judgements properly so-called and there was no right of appeal from them, whereas from interlocutory judgements there was a right of appeal. The difficulty frequently experienced in deciding whether particular orders were to be considered of the one kind or of the other was what led to the enactment of the rules contained in article 452 of the Code of Procedure of France.

"This fact makes it manifest that there are orders of a judge which are not to be regarded as judgements or decisions of a nature to be subject to appeal. Reference may be made to what is said in the matter in Dalloz, Rep. Verbo 'judgement' at Nos. 706 to 722, and in the same work, Verbis 'jugements d'avoir dire droit' Nos. 24 and 58 where many illustrations are given; and to Fuzier-Hermann, Rep. Vo. 'judgement' Nos. 3173 and 3174.

"The cases cited in the treatises just referred to relate in general to incidents of pending suits. It is, however, to be remembered that here there is no pending suit.

"If action is to be taken upon the order, it will be taken before quite another person, to be selected by the Executive Government. The order in question is consequently more of the nature of a 'fiat' of the Attorney General, or of a justice's act in 'backing' a warrant or any of those cases in which a judge is called upon to do an act in virtue of some Act of Parliament and which does not relate to the judicial determination of some right.

"It would not be successfully contended that a warrant of arrest was bad because the magistrate did not hear the person against whom it was directed before deciding to issue it.

"From such acts of a judge, there is, generally speaking, no right of appeal to an appellate court or in fact to any court of law except as may be specially given by apt exactment.

"Under a different system of law, there would be ground for saying that, in mak-

ing the order here in question, the judge acted administratively, as the licensing justices in Lord Mayor and of Leeds vs. Ryder (1907) A.C. 420 were considered to have acted in granting renewal of certain liquor licenses.

"But, in applying our law of pleading and procedure to this matter, it is unnecessary to decide whether the judge in making this order acted judicially or administratively.

"The judge of the Superior Court is clearly designated as being the person who is to grant or refuse the order. Having made that designation, the Act straightway thereupon provides that the order itself and the related papers shall be transmitted to a department of the Executive Government there to be acted upon as the Act authorizes. That is a statutory scheme which is repugnant to the idea that another court can act in appeal from the order of the judge designated in the Act. His action is like that of a judge in making a recount of votes under the Election Act.

"The right of appeal is a substantive right and its existence, if it has any, should be clear.

"I not only cannot find that there is any clear right of appeal, but having regard to the special nature of the subject of this Act—as it was held appropriate to do in respect of the Election Act in Theberge & Landry and Moses & Parker—I consider that there is a clear legislative intent that there shall be no such right of appeal as is here sought to be exercised.

"The persons who are made to figure as respondents upon this appeal, appear to have done nothing else than to make the application provided for by the preliminary part of the Act. That did not have the effect of raising an issue beween themselves and this appellant. I conclude that there is no pending suit, no judgement, no parties in issue and no appeal. In fact it cannot be said with certitude that we have any proper evidence of the existence of this order, because the prothonotary who has certified the copy which has been sent up to us was not custodian of the original of it.

"In view of what has been said it is apparent that the appellant's motion for a certiorari to the prothonotary of the Superior Court to add a document to the record is unfounded. The custody of such documents is not in the Superior Court but is assigned to the registrar named in the Act. We cannot order the prothonotary to send up papers which are in Government custody. Besides, in view of the tender of the document made at the hearing of the motion before us the appellant's objection ceases to have any effect.

"A few words may be added in reference to the argument made on behalf of the appellant to the effect that, though section 6 of the Act provided for hearing the application only and not an adverse party or a party supposed to be adverse, it was nevertheless a fundamental common law right of any party, who might be affected by a decision, to be heard, and that the appellant had therefore a legal right to defend itself and to be heard even though the Act does not say so. With the proposition stated in these general terms no fault is to be found. In the quite recent case of Board of Education vs. Rice, 27 T.L.R. 378, it appeared that a statutory duty rested upon the Board of Education to decide 'questions' respecting administration of the Education Act and upon an action by way of 'mandamus' to enforce the decision of such a 'question', in the opinion expressed in the House of Lords it was said in relation to this duty of the Board: 'It will, I suppose, usually be of an administrative kind; but sometimes it will involve matter of law as well as matter of fact or even depend upon matter of law alone. In such cases the Board of Education will have to ascertain the law and also to ascertain the facts. I need not add that in doing either they must act in good faith and fairly listen to both sides, for that is a duty lying upon everyone who decides anything.'

"But the proceeding before us is not in the nature of a demand to have any judicial or public authority commanded to hear the appellant or to per-

form any other statutory duty. What the judge purports to have done in this matter can indeed be seen to come within the next following observation of the Lord Chancellor in the case just cited which is: 'But I do not think they are bound to treat such a question as though it were a trial.'

"However well founded it may be as a proposition of law, the argument does not help the appellant on the question now before us, and I refer to it now merely to show that it has not been overlooked.

"The existence of a duty to hear before deciding does not of itself impress upon the decision the character of a judgement, and it is scarcely necessary to add that if it were established that this order was bad in law that would not make the matter an appealable one.

"Upon the whole, I would quash the appeal at the instance of the persons named as respondents other than Brunet who withdrew from the proceedings at the hearing.

"It appears to me that the persons named as respondents might appropriately have ignored the appeal as being a matter to which they were not properly parties, but, as it constitutes a sort of menace of trouble to them, they have an interest sufficient to justify the motion.

"We are unanimous in the opinion that there is no right of appeal to this Court in this matter."

UNITED STATES SUPREME COURT DECISIONS IN STANDARD OIL AND AMERICAN TOBACCO CASES UNDER SHERMAN ANTI-TRUST ACT.

ON May 15 the Supreme Court of the United States, by a unanimous decision, declared the Standard Oil Company to be an unlawful combination in restraint of trade under the terms of the Sherman Anti-Trust Act, and ordered its dissolution within six months.

On May 29, a unanimous judgement was given by the same Court by which the American Tobacco Company and all elements composing it, both corporate and individual, were held to constitute an unlawful combination in restraint of trade, which must be dissolved.

The decisions above mentioned are of very wide-spread importance not only on account of the immense proportions of the business interests involved, but also on account of the definition which the Court has given of the scope of the Sherman Act by holding that whilst the language of this legislation forbade "every" contract or combination in restraint of trade the intention of Congress was that it should be interpreted in the "light of reason," and that every alleged illegal restraint of trade, every alleged unlawful monopoly, should be judged on the particular circumstances of the case.

Justice Harlan's Dissent.

Mr. Justice Harlan, one of the members of the Supreme Court, whilst concurring in the decrees against the Standard Oil Company and the American Tobacco Company, dissented from the principle which was laid down by the majority of the Court in the interpretation of the Sherman law. The reasoning of Mr. Justice Harlan is that so long as there has been a restraint of trade in any degree the law has been violated; the majority view of the Court is, on the contrary, that the statute applies only to such restraints as are adjudged to be unreasonable.

History of Standard Oil Case.

The Supreme Court decisions were called forth by appeal proceedings from the Courts below. The Supreme Court decree in the case of the Standard Oil Company is directed to the United States Circuit Court of the Eastern District of Missouri for enforcement; similarly, the enforcement of the decree against the American Tobacco Company will devolve upon the United States Circuit Court of New York. In the former case, six months are allowed for the re-organization of the various interests concerned in

conformity with the law. In the latter case, the Circuit Court is directed to hear the parties and to determine on a plan of dissolving the combination and re-organizing it in harmony with the Sherman law; six months, and if necessary sixty days additional thereafter, being allowed for this purpose. If at the end of this time the corporations fail to bring themselves within the law, either an injunction against further operations, or a receivership and dissolution by court decree, will follow.

Some idea of the magnitude of the case of the United States against the Standard Oil Company may perhaps be had from the following statements: The defendants in the original action were the Standard Oil Company of New Jersey, thirty-three other corporations, with John D. Rockefeller, William Rockefeller, and five other individuals. The record in the case is inordinately voluminous, consisting of twenty-three volumes of printed matter, aggregating about 12,000 pages, containing a vast amount of confusing and conflicting testimony relating to innumerable complex and varied business transactions extending over a period of nearly forty years. The original indictment was filed in the United States Circuit Court of the Eastern District of Missouri, in November, 1906. Judgement was rendered by the Circuit Court in November, 1909, forbidding the continued operation of the combination of the defendant companies and individuals. The payment of dividends was also forbidden previous to the liquidation of the combination, and the individuals and companies concerned were also prohibited from voting the stocks of the subsidiary companies which they held.

The case was at once carried to the Supreme Court of the United States in appeal and was argued before the latter in the early part of 1910. Two members of the Court having died before judgement was delivered, the argument was re-heard in January, of this year.

Summary of Indictment against Standard Oil Company

The bill against the defendant companies and individuals was divided into thirty numbered sections and sought relief upon the theory that the various defendants were engaged in conspiring to restrain the trade and commerce in petroleum, commonly called "crude oil," in refined oil, and in the other products of petroleum, among the several states and territories of the United States and the District of Columbia, and with foreign nations, and to monopolize the said commerce. The conspiracy to the above end was alleged to have been formed in or about the year 1870, by three of the individual defendants, namely, John D. Rockefeller, William Rockefeller, and Henry M. Flagler. The detailed averments concerning the alleged conspiracy were arranged with reference to three periods, the first from 1870 to 1882, the second from 1882 to 1889, and the third from 1889 to the time of the filing of the bill.

The spirit of the charges against the defendants' operations in the three periods may be gathered from the allegation that in the third and later period "the individual defendants operated through the Standard Oil Company of New Jersey as a holding corporation, which corporation obtained and acquired the majority of the stocks of the various corporations engaged in purchasing, transporting, refining, shipping and selling oil into and among the various states and territories of the United States and the District of Columbia, and with foreign nations, and thereby managed and controlled the same, in violation of the laws of the United States".

The Court in its judgement summarized as follows the means by which it was alleged that the defendants, in addition to the effect occasioned by the combination of previously independent concerns, had continued its alleged monopoly and restraint of the industries in question:—

"Rebates, preferences and other discriminating practices in favour of the combination by railway companies; restraint and monopolization by control of pipe lines, and unfair practices against competing pipe lines; contracts with competitors in restraint of trade; unfair methods of competition, such as local price-cutting at the points where neces-

sary to suppress competition; espionage of competitors, the operation of bogus independent companies, and the payment of rebates on oil, with the like intent; the division of the United States into districts and the limiting of the operations of the various subsidiary corporations to such districts, so that competition in the sale of petroleum products between such corporations had been entirely eliminated and destroyed; and finally reference was made to what was alleged to be the 'enormous and unreasonable profits' earned by the Standard Oil Trust and the Standard Oil Company as a result of the alleged monopoly, which presumably was averred as a means of reflexly inferring the scope and power acquired by the alleged combination."

The defence of the Standard Oil Company took the form of a fight all along the line. Testimony was introduced in great volume as to the Standard Oil Company's cost of production, selling prices and methods of marketing; its relations with other concerns, subsidiary, independent or doubtful; its dealings with railways and with consumers.

The contention was advanced that the profits of Standard Oil business were the result chiefly of its foresight and business ability; that they came from its establishment at an early date of a system of pipe lines and refineries which gave it unapproachable facilities for doing a legitimate business; that it had developed much of the business which was now its own; had perfected the oil industry and had kept down prices within certain limits.

Supreme Court's Interpretation of Sherman Law.

The decision of the Supreme Court in the Standard Oil case was announced by Chief Justice White, who, in opening, reviewed the preliminary proceedings in the lower court and re-stated the essential points in the Government bill. The Court dismissed the defendants' objection to its jurisdiction in a few words by holding that the same was not well founded. Then coming to the arguments as to the law and facts in the case, the Court observed that out of the "jungle" of law and facts both sides were agreed only in one thing and that was that the determination of the controversy rested upon the proper construction and application of the first and second clauses of the Sherman Anti-Trust Act. The sections in question are as follows:—

> "*Sec.* 1. Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy, shall be deemed guilty of a misdemeanour, and, on conviction thereof, shall be punished by fine not exceeding $5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court.
>
> "*Sec.* 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanour, and on conviction thereof, shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the Court."

The views of the two sides as to the law were, the Court continued, as far apart as the poles. The same was true as to the facts. The first section of the Sherman law dealt with "restraint of trade." The subject of the second section was "attempt to monopolize and monopolization". The Chief Justice said that in getting at the meaning of these words he would be guided by the principle that where words are employed in a statute which at the time had a well-known meaning in common law or in the law of the country they were presumed to have been used in this sense, unless the context compels to the contrary. The first section of this statute had been made broad so as to embrace all forms of restraint, the second section to make sure

that by no possible guise can the public policy embodied in the first section be evaded. The Court held, however, that "the rule of reason must be applied in applying a statute to any given set of facts." It had been contended by the Government that the language of the statute embraced every contract, combination, &c., in restraint of trade, and left no room for the exercise of judgement. The error of the Government on this point was in assuming that the Court had already upheld these contentions. "It is obvious," said the Court, "that judgement must in every case be called into play in order to determine whether a particular act is embraced in the statutory clauses, and whether, if the act is within such clauses, its nature or effect causes it to be a restraint of trade within the contention of the Act."

Application of Statute to Standard Oil Case.

The Chief Justice next took up the facts and the application of the statute to them. As a matter of fact the courts found that the results enlarging the capital stock of the Standard Oil Company of New Jersey and the acquisition by that Company of the shares of the stock of the other corporations, in exchange for its certificates, gave to the corporation an enlarged and more perfect sway and control over the trade and commerce in petroleum and its products. The effect of this, Chief Justice White said the lower Court held, was to destroy "the potentiality of competition," which otherwise would have existed to such an extent as to be a combination or conspiracy in restraint of trade in the first section of the Act, and also to be an attempt to monopolize and a monopolization bringing about a perennial violation of the second section.

"We see no cause to doubt the correctness of these conclusions," said the Chief Justice, "considering the subject from every aspect, that is, both in view of the facts established by the record and the necessary operation and effect of the law as we have construed it upon the inferences deducible from the facts.

"No disinterested mind, "said the Chief Justice," could resist the conclusion that the genius for development and organization manifested from the beginning soon begot the intent to exclude others. Considering the period from the trust agreements of 1879 and 1882 to the time of the expansion of the New Jersey corporation the Court recalled the gradual extension of power over the oil trade, the decision of the Supreme Court of Ohio, the tardiness to conform to that decision, as so many signs of the intent at exclusion. The acquisition of every means of development including transportation agencies, confirmed that view.

"The inference that no attempt to monopolize could have been intended and that no monopolization resulted from the acts complained of, since it is established that a very small percentage of the crude oil produced was controlled by the combination, is unwarranted," said the Court.

The Court then considered the arguments that the statute could not be applied under the facts in the case without impairing rights and property and destroying the freedom of contract of trade, which is essentially necessary to the well-being of society. "But the ultimate foundation of all these arguments," said the Chief Justice, "is the assumption that reason may not be resorted to in interpreting and applying the statute, and, therefore, the statute unreasonably restricts the right to contract and unreasonably operates upon the right to acquire and hold property. As the premise is demonstrated to be unsound by the construction we have given the statute, of course the propositions which rest on that premise need not be further noticed."

Supreme Court's Decree.

Finally, the Chief Justice came to apply the remedy. He said that ordinarily where violations of the Act were found it would suffice to enjoin further violations. In a case, however, where a monopolization or attempt to monopolize was established, or the existence of a combination is proven, which was a perennial violation of the statute, further relief was called for

The lower court, he pointed out, had first, enjoined the combination and in effect directed its dissolution; second, forbidden the New Jersey corporation from exercising any control by virtue of its stock ownership over the subsidiary corporations, and enjoined these corporations from recognizing in any manner the authority or power of the New Jersey corporation by virtue of such ownership; third, enjoined in the sixth section of the decree the subsidiary corporations, after the dissolution, from doing any act which could create a like illegal combination; fourth, enjoined the New Jersey corporation and all the subsidiary corporations from doing any business in interstate commerce, pending the dissolution of the combination by the accomplishment of the transfer of stocks which the decree in its essence required; and, fifth, gave thirty days to carry out the directions of the Court. The Court said this decree was right and should be affirmed, except as to what it termed "minor matters." One of these was the extension of the time the decree should be put into effect from one month to six months. The other modification was more important and had to do with the sixth section of the decree, which forbade the formation by the subsidiary corporations or their stockholders of like combinations.

"We construe the sixth paragraph of the decree," said the Chief Justice, "not as depriving the stockholder or corporations to live under the law of the land, but as compelling obedience to that law."

He said it did not follow because an illegal restraint of trade or an attempt to monopolize or a monopolization resulted from the combination of the corporation of the New Jersey corporation that a like restraint or attempt to monopolize or monopolization would necessarily arise from agreements between one or more of the subsidiary corporations after the transfer of the stock by the New Jersey corporation.

American Tobacco Case.

The suit of the United States Government against the American Tobacco Company for violation of the Sherman Anti-Trust Act was begun in the United States Circuit Court of New York in July, 1907, the defendants named in the bill being sixty-five corporations and twenty-nine individuals. Among the corporations named were the American Tobacco Company and its alleged British allies—the Imperial Tobacco Company and the British American Tobacco Company. Among the individuals named were Thomas F. Ryan and James B. Duke, and other chief directors and officers of the American Tobacco Company and affiliated concerns.

The Indictment.

The bill traced the progress of the alleged combination as far back as 1891, alleging that the defendants have had the "expanding purpose to dominate the tobacco industry,"and in pursuance of that purpose have progressively absorbed competitors and driven them out of business by attacking them and threatening to attack them with ferocious competition and unfair trade methods and then buying them in, or through offers of irresistible sums of money.

The plants secured, the complaint continued, were generally abandoned, but the names and brands of the old concerns were used in connection with the products of plants operated by the trust. It was further alleged that the defendants had entered into contracts, combinations and conspiracies to apportion among themselves the trade of the world, the American Tobacco Company to operate in this country, the Imperial Tobacco Company of London to cover the English field and the British American Tobacco Company to conduct business in the rest of the world.

Another allegation was that the defendants had concealed their ownership of controlled companies and procured and permitted such companies to be held out and advertised as wholly independent of the trust or any combination, "intending to mislead, deceive and defraud the public and more effectively cripple existing competitors and keep out new ones". It was also charged that the trust had in certain districts reduced prices of its products below the cost of production, with the object of destroying com-

petition, and in other districts had bid up the price of raw materials above the real value, with the same object.

The Judgement.

The decision was rendered by Chief Justice White, and called forth a dissent from Justice Harlan, who took the same ground as he did in the Standard Oil case when he objected to the use of the "rule of reason" in determining whether the combination was a monopoly in the eyes of the law or a "combination in restraint of trade" under the statute. His reasoning is that so long as there is restraint of trade in any degree the statute is violated, while the majority hold that only unreasonable restraint is meant by the statute.

The decision is thus summarized in a statement issued by Attorney General Wickersham, commending the judgment of the court, as follows:

"The decision in the tobacco case in the most comprehensive and sweeping manner sustains the position taken by the government with respect to the decree below. It reverses the action of the circuit court in dismissing from the bill the individual defendants, the British American Tobacco Company, Limited, the Imperial Tobacco Company, Limited, and the United Cigar Stores Company, holding that they are all parties to the unlawful combination which is condemned by the decree.

The Court gives an interpretation of its decision in the Standard Oil case, saying that it was there held, 'that in view of the general language of the statute and the public policy which it manifested, there was no possibility of frustrating that policy by resorting to any disguise or subterfuge of form, since resort to reason rendered it impossible to escape by any indirection the prohibition of the statute.'

"It then holds that the history of the tobacco combination is so replete with the doing of acts which it was the obvious purpose of the statute to forbid, so demonstrative of the existence from the beginning of a purpose to acquire dominion and control of the tobacco trade, not by the mere exertion of the ordinary right to contract and to trade, but by methods devised in order to monopolize the trade by driving competitors out of business which were ruthlessly carried out upon the assumption to work upon the fears or to play upon the creditors.

"Holding, therefore, that the combination as a whole and all its co-operating and associative parts, in whatever form clothed, constitutes a restraint of the trade within the first section of the Sherman Act and an attempt to monopolize and a monopolization within the second section, the court remands the cause to the circuit in New York for the purpose of working out some plan of disintegration of the combination which will recreate 'a new condition which shall be honestly in harmony with and not repugnant to the law.'

"It gives the defendants six months within which to work out that result, with the right in the circuit court to extend that time two months 'if it shall seem to it proper, and provides that during the period each and all of the defendants, individuals as well as corporations, shall be enjoined from doing any account which might further extend or enlarge the power of the combination by any means or device whatsoever, and that if, at the end of the time so allowed, such a condition of disintegration in harmony with law is not brought about, it shall be the duty of the circuit court, either by way of injunction restraining the movement in interstate or foreign commerce of the products of the combination or by the appointment of a receiver of the entire combination to give effect to the requirements of the statute.'"

BULLETINS ISSUED DURING THE MONTH OF MAY BY THE ANNUITIES BRANCH, DEPARTMENT OF TRADE AND COMMERCE, CANADA.

THERE is nothing more admirable than thrift, and there is nothing more pitiable than when the accumulations of thrift are pocketed by the rapacious harpies who prey upon the small investor," says the London (Eng.) Econ-

omist. Thrift is both a private and a public virtue, and as a private virtue it gives that feeling of independence and courage which springs from the sense of security, and which are not only virtues in themselves, but are an almost indispensable basis of character. As wages, salaries, and profits grow in all ranks of society, there is a natural tendency for the standard of living to rise, luxuries become comforts, and comforts become necessaries, and although different views may be held as to the lavish habits of wealthy individuals, there is a general agreement as to the need of thrift among persons of small incomes. It is not only desirable and absolutely necessary that the individual should take care to put aside a reasonable proportion of his income for investment, but that he should shun the maelstrom of improvidence that inevitably leads to the poorhouse, and no better plan of investment could be offered him than that which is provided by the Canadian Government Annuities' Act. It is not only absolutely safe, but the benefits to be derived from an investment in the purchase of an Annuity are far more bountiful than those which may be derived from any other safe investment, the Annuity representing a return to the investor of a portion of his capital as well as the interest thereon in periodical payments calculated upon the number of years he may live, and he gets full benefit of every dollar he invests, not one cent being charged him for any expense. If he lives the number of years from and after sixty which he may be expected to live, he will receive back all that he pays in with compound interest at four per cent. If he should survive his expectation, the income will not cease, but will be continued in regular payments every quarter should be live to be 100 or longer, and this fact will probably concern him more than the possibility that he might die before he had received back all that he had paid in. Starting at sixty to receive an Annuity, he would in fourteen or fifteen years get back all that he had paid in with the interest thereon. We do not know of any institution which could possibly afford to offer terms so advantageous, and if the people of Canada were able to realize the favourable conditions on which Annuities could be secured from the Government, there would be very few among the thrifty and thoughtful who would not take advantage thereof. If you will write to the Superintendent of Annuities, Ottawa, he will furnish you with all the information desired as to cost, &c. Give him your age last birthday, and state the age at which you desire the Annuity to begin, but do not forget that it cannot begin until you are fifty-five, though you may have it begin at any later age you desire. It will demonstrate to you the tremendous earning power of moneys at compound interest.

The Closing Days.

A Toronto daily last week contained a despatch from a neighbouring city that .....aged 101 years had gone to the County Industrial Home, there to end his days, and he is said to have gone at his own request. But how the report startles us, that a man after fighting the battle of life for over one hundred years has to end his days in a poorhouse! The despatch further stated that the old gentleman had a son of seventy-five and two grandsons of over fifty, living in the same County. Naturally, the reader would think it strange that so sad a course could have been necessary. But if the inner history were known, it would probably be revealed that the son and grandsons are in almost as bad a plight as the old man, and that he preferred to go to the poorhouse rather than to add to their burdens. The case is a pathetic one, but it is not unique—you hear of such every day—and the whole story emphasizes how terrible is an old age of penury, and how important it is that we should regard youth "as the springtime which soon departeth, and wherein we ought to plant and sow all provision for a long and happy life." If the old gentleman had been in receipt of a Canadian Government Annuity of only $200 his presence in the home of the son or grandson would have been a boon rather than a burden, and the cozy-corner would, no doubt, have been kept for him. He

may have been a sober and industrious youth, but he had no system of investment which was absolutely safe, and which would yield him a bountiful return for the amounts which he might from time to time save; and so his money was spent or lost as fast as it was earned. But there is no such excuse for the boys or girls, men or women, of Canada today, for by the Canadian Government Annuities Act they are provided with a system by which their savings will be taken care of and invested by the Government, and under which they will receive a return larger than it would be possible to secure from any other safe investment, because when the Annuity begins each payment absorbs a portion of the purchase money as well as of the interest thereon, and if the Annuitant lives the average number of years he may be expected to live he will get back all that he had paid in with accumulated interest at four per cent. If he lives beyond this period, the Annuity will not cease, but will be continued to him every three months so long as he may live. The plan is available at any Money Order Office in Canada. The Postmaster will give you a booklet which will explain the system, and if you wish for information as to the cost, all you need do is to write to the Superintendent of Annuities, Ottawa, postage free, giving him your age last birthday, and he will advise you by first mail what this will be. Remember that it is the only absolutely safe plan by which your old age may be made free from anxiety, and happy and comfortable, and that it is the only sure plan by which a wage-earner or person on small salary can provide for the rainy day.

FAIR WAGES SCHEDULES IN GOVERNMENT CONTRACTS AWARDED DURING THE MONTH OF MAY, 1911.

The following is a list of contracts awarded by the Department of Public Works, Department of Railways and Canals, and the Department of Marine and Fisheries which have received the signatures of both parties, together with the fair wages schedule inserted in each contract, setting forth the minimum rate of wages to be paid to the labourers engaged upon the works. A statement of orders for supplies given by the Post Office Department is added.

Department of Public Works.

THE general clause for the protection of labour was inserted by the Department in the following contracts awarded during May, 1911.

ERECTION OF COUNTER, ETC., CUSTOMS HOUSE, SYDNEY, C.B., N.S.

Erection of counter, &c., Customs house, Sydney, C.B., N.S.; name of contractor, Chappell Bros. & Company, Limited, Sydney, N.S., Date of contract, April 5, 1911. Amount of contract, $400.

INSTALLATION OF ELECTRIC LIGHT WIRING AND FITTINGS, POST OFFICE, ORANGEVILLE, ONT.

Installation of electric light wiring and fittings, post office, Orangeville, Ont. Name of contractor, Hall & Dollery, Toronto, Ont. Date of contract, May 13, 1911. Amount of contract, $438.

FAIR WAGES CLAUSE.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the person entitled to payment for the use or hire of horses or teams shall have the rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the Contractor.

PUBLIC BUILDING, DRESDEN, ONT.

Public building, Dresden, Ont. Name of contractor, W. E. Clark, Wallaceburg,

Ont. Date of contract, April 12, 1911. Amount of contract, $13,000.

Making and repairing rubber dating stamps and type, also other stamps	44.05
Supplying stamping material and wooden boxes, and repairing stamping pads	83.52
Supplying mail bags	5,518.76
Repairing mail bags	1,866.53
Making and repairing Post Office scales	181.00
Making and repairing mail locks, and supplying mail bag fittings	475.75
Supplying Railway Mail Clerks' tin travelling boxes and steel cases for Automatic Stamp Vending Machines, and repairing portable letter boxes, parcel receptacles, Railway Mail Clerks' tin travelling boxes and street letter boxes	865.55
Making and repairing miscellaneous articles of Postal Stores	39.25
Making and supplying articles of official uniform	7,157.81

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY, 1911.

Under this heading, account is taken of such accidents only as were sustained by workmen in the course of thier employment, and resulted in loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the Department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories' inspector of the Province of Ontario, the Ontario Railway and Municipal Board, and to the Department of Railways and Canals, for their kind assistance in furnishing the Department with the statement of returns of accidents reported to them.

INDUSTRIAL accidents occuring to 173 individual work people in Canada during the month of May, 1911, were reported to the Department of Labour. Of these fifty-two were fatal and 121 resulted in serious injuries. In addition, four fatal accidents were reported as having taken place prior to the beginning of the month, information not having been received by the Department before May, 1911.

In the preceding month there were seventy-six fatal and 106 non-fatal accidents reported, a total of 182, and in May, 1910, there were 133 fatal and 243 non-fatal accidents, a total of 376. The number of fatal accidents reported in May, 1911, was therefore twenty-four less than in the preceding month, and eighty-one less than in May, 1910. The number of non-fatal accidents reported in May, 1911, was fifteen more than in the preceding month, and 122 less than in May, 1910. Altogether there were nine fewer industrial accidents reported in May, 1911, than in the preceding month and 223 fewer than in the same month of the preceding year.

Of eighty returns received during the month, giving the ages of the victims of industrial accidents, five referred to persons under twenty-one years of age, nine to persons between twenty-one and forty-five, and three to persons over forty-five, Sixty-three persons were over twenty-one years of age, but their exact ages were not specified.

Unskilled labour	3	2	5
Total	52	121	173

Nature of Fatalities and Accidents.

The only great disaster of the month occurred on the construction of the Grand Trunk Pacific Railway Company.

Accident to Railway Construction Hands on Grand Trunk Pacific Railway.

On May 8, an accident occurred on the line of the Grand Trunk Pacific Railway in Northern Ontario which resulted in the death of five men and injury to two others. An official report of this disaster was made to the Chief Engineer of the National Transcontinental Railway Commission at Ottawa and is as follows:—

> "On the afternoon of May 8, the foreman and helper were engaged in loading a 16 foot hole in the face of the cut and had about five cases of dynamite in when a premature explosion took place killing the two men loading as well as three of the gang mucking in the cut, the muckers being buried under the rock. Two muckers were also injured but not seriously. The cause of the explosion

is unknown. The hole received its final spring in the morning of Saturday, May 6, precluding the theory that the hole might have been too hot."

Record by Industries and Trades.

Agriculture.—In this industry there were six fatal and eight non-fatal accidents in May, 1911, compared with six fatal and eight non-fatal accidents in April, and twenty-five fatal and twenty non-fatal accidents in May, 1910. Of the fatal accidents, two were caused by lightning, two were killed by train, one was thrown from a waggon, and one from a roller.

Fishing and hunting.—There were four deaths of fishermen during May, compared with six in April and two in May, 1910. Two fishermen were drowned by the upsetting of a boat in a squall, one from a collision with another vessel in a fog, and one fell from a boat and was drowned.

Lumbering.—During May there were eight fatal accidents and five non-fatal ones in the lumbering industry, compared with two fatal and seven non-fatal accidents in April, and fourteen fatal and fourteen non-fatal accidents in May, 1910. Of the fatal accidents, four men were drowned when log-driving, one was crushed by a falling log, a mill hand was struck and killed by a piece of wood, another one fell on a circular saw and was killed, and a third millhand was killed, by an elevator.

Mining.—There were six fatal accidents and fourteen non-fatal accidents reported in the mining industry, compared with nine men killed and seven injured in April, and fourteen killed and eleven injured in May, 1910. Of the fatal accidents, two men were drowned by a rush of water through the explosion of a shot, one man was killed by a falling rock, one by falling down a shaft, one by being struck by a cage and one was struck by a box and killed.

Building trades.—In the building trades there were reported, one fatal accident and five non-fatal ones, compared with six fatalities and seven accidents in April, and three fatal and ten non-fatal ones in May, 1910. The one fatal accident was caused by a man falling from a roof. All the non-fatal accidents were due to falling, one man falling from a roof, two from a scaffolding, one from a building, and one from a derrick.

Metal, engineering, and shipbuilding trades.—In the metal trades, four men were killed and twenty-eight seriously injured during the month, compared with fifteen killed and twenty injured in April, and nine killed and thirty-two injured in May, 1910. Of the fatal accidents, two men were killed by electric shocks, one was struck by an engine, one slipped under a car and was run over. Of the non-fatal accidents two were injured by molten metal, three by electricity, three by elevators, five by machinery, one by the bursting of an emery wheel, one by the explosion of a lamp, and five were struck by materials.

Woodworking trades.—In the woodworking trades there were no fatal accidents reported and four non-fatal accidents. Of these four, two were caused by machinery, one by a saw, and one by a splinter.

Clothing trades.—There was one fatality in the clothing trades, in which a man died from the effects of breathing sulphuric acid fumes. There was one non-fatal accident, caused by escaping steam.

Food and tobacco preparation.—In the trades relating to the preparation of food and tobacco, there were six persons injured during the month. One man fell down an elevator shaft, one slipped into a hot water vat, one was scalded by ammonia by the blowing out of a valve, one was struck by a falling barrel, one was injured by machinery, and one by live stock.

Railway service.—There were eleven men killed and twenty-four injured in the railway service, compared with eleven killed and fourteen injured in April, and twenty-five killed and thirty-nine injured in May, 1910. Of the fatal accidents, five men were killed by premature explosion, one was struck by a train, two were run over by cars, one was crushed between cars, and one by an automatic trucking machine; the nature of the remaining accident was

DEPARTMENT OF LABOUR, CANADA,

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MAY, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Agriculture—				
Farmer	Des Jardais, Alta	May 6	1	Struck by lightning.
"	Robertson, Que	" 30	1	Thrown from waggon.
Farm hand	Precious Corners, Ont	" 3	1	Thrown from roller and skull fractured.
Farmer and wife	Norwood, Ont	" 12	2	Struck by a train when driving across track.
Farm hand	Douro, Ont	" 19	1	Struck by lightning.
Fishing and hunting—				
Fisherman	La Have Banks, N.S	" 2	1	Drowned by collision in a fog.
"	Off Prospect, N.S	" 5	2	Drowned by upsetting of boat in a squall.
"	Off Port Colborne, Ont	" 25	1	Drowned by falling off a boat.
Lumbering—				
Mill hand	Ottawa, Ont	" 11	1	Killed by elevator.
"	Gainsford, Alta	" 22	1	Fell on a circular saw.
"	Winnipeg, Man	" 8	1	Struck by a piece of wood.
Logger	Jarvis Inlet, B.C	" 1	1	Crushed by a falling log.
"	Goulais River, Ont	" 25	1	Drowned by upsetting of boat.
"	Upper Ottawa River	"	1	Drowned when on a lumber drive.
"	Upper Ottawa River	" 20	1	Drowned when on a lumber drive.
Mining—				
Coal miners	Glace Bay, N.S	" 5	2	Drowned by in-rush of water through explosion of shot.
Silver miner	Helen Mine, Ont	" 24	1	Struck by falling rock.
Coal miner	Glace Bay, N.S	" 18	1	Struck by a cage.
Coal miner	North Sydney, N.S	" 23	1	Struck by a box.
Silver miner	Cobalt, Ont	" 23	1	Fell down shaft.
Building trades—				
Painter	Toronto, Ont	" 8	1	Fell from roof and fractured skull.
Metal trades—				
Electrical worker	Maisonneuve, Que	" 12	1	Electrocuted when adjusting a dynamo.
Employé of electric light works	Picton, Ont	" 16	1	Electrocuted when cleaning switch board.
Iron and steel worker	Algoma, Ont	" 14	1	Slipped under car and run over.
Employé in car shop	Montreal, Que	" 23	1	Struck by an engine.
Clothing trades—				
Employé of military equipment factory	Montreal, Que	" 12	1	Killed by sulphuric acid fumes.
Railway service—				
Brakeman	Ekfrid, Ont	" 11	1	Fell when stepping on moving engine and run over.
Bridge worker	London, Ont	" 10	1	Struck by a train.
Construction foreman	New Liskeard, Ont	" 21	1	Fell between engine and van and run over.
Construction men	Northern Ontario	" 8	5	Killed by premature explosion.
Railway labourer	Winnipeg, Man	" 10	1	Crushed in automatic trucking machine.
"	Vancouver, B.C	" 3	1	Crushed between cars.
"	Hope, B.C	" 3	1	Leg crushed.
General transport—				
Teamster	Galt, Ont	" 25	1	Kicked by a horse.
Expressman	Toronto, Ont	" 17	1	Killed when trying to operate elevator.
Steam-boat hand	Rockland, Ont	" 26	1	Drowned, when guiding tackle to hoist hay.
Deckhand	Nelson, B.C	" 22	1	Fell off barge and drowned.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLE, SERIES F., No. 92.

TABLE OF FATAL ACCIDENTS DURING THE MONTH OF MAY, 1911.

Trade or Industry.	Locality.	Date.	No.	Cause of Fatality.
Miscellaneous trades—				
Night watchman	Pointe aux Trembles, Que.	May 12	1	Electrocuted.
Caretaker of golf links	Peterborough, Ont.	" 1	1	Killed by a falling stone.
Well digger	Ayr, Ont.	" 24	1	Fell to bottom of well.
Well digger	Qu'Appelle, Sask.	" 22	1	Struck by a falling derrick.
Unskilled labour—				
Labourers	Cornwall, Ont.	" 2	2	Electrocuted when helping to raise crane.
"	Montreal, Que.	" 6	1	Head caught in the door of a car and neck fractured.

FATAL ACCIDENTS HAPPENING IN THE PREVIOUS MONTH, BUT ONLY REPORTED TO THE DEPARTMENT IN MAY, 1911.

Fishermen	Near Sable Island, N.S.	Apr. —	2	Strayed from vessel in a fog and drowned.
Carpenter	Thorold, Ont.	" 26	1	Fell from scaffold.
Blanket factory hand	Brantford, Ont.	" 26	1	Hand injured, died from lockjaw.

not reported. Of the other accidents in the service, five fell from trains and were run over, one was caught in a coupling, four were injured by stepping from engines and cars, two were run over, two were hurt in collisions, one was thrown from a car, four were struck by various materials, and one was crushed in a coal chute; in one case the cause of the accident was not definitely stated.

Navigation.—In navigation there were two killed and three injured, compared with seven killed and one injured in April, and eleven killed and thirteen injured in May, 1910. One man was drowned when guiding tackle to hoist hay, and another one fell from a barge and was drowned. Of the non-fatal accidents one man fell into a ship's hold and one was struck by the handle of a capstan.

General transport.—During May there were two men killed and thirteen injured, compared with four killed and five injured in April, and three killed and eighteen injured in May, 1910. One man was killed by a horse, and one by an elevator. Of the non-fatal accidents, three were hurt in collisions, seven fell from vehicles, one man was pierced by a waggon tongue, one fell into a ship's hold, and one was hurt under a moving gangway.

Public employés.—Four public employés were reported to be injured during the month, compared with one killed and two injured in April, and six killed and nineteen injured in May, 1910. Two civic firemen were injured at fires, a policeman was hurt in a collision, and a jail turnkey was struck by a prisoner.

Miscellaneous trades.—In the miscellaneous trades there were four fatal accidents and four non-fatal ones, compared with nine killed and eight injured in April, and ten killed and ten injured in May, 1910. A night watchman was killed by an electric shock; a well digger fell to the bottom of a well; another was struck by a falling derrick; and a caretaker was killed by a falling stone.

Unskilled labour.—Three unskilled labourers were killed and two injured during the month, compared with four killed and eight injured during April, and nine killed and nine injured in May, 1910. Two labourers were killed by electricity, and one was killed by being caught in the door of a car. Of those that were injured, one was caused by a premature blast, and in the other case the man fell under a car and was run over.

TRADE DISPUTES DURING THE MONTH OF MAY, 1911.

DURING the month of May, there was a great increase in the number of trade disputes, a large number having occurred in the building trades. Building operations were impeded in many parts of the country and more particularly in Hamilton and Kingston, Ont., and Vancouver and Victoria, B.C. The strike of coal miners in Alberta and eastern British Columbia continued throughout the month. The strike of coal miners at Springhill, N.S., however, which had been in continuance since August 11, 1909, was terminated towards the end of the month and normal conditions were gradually being resumed.

Analysis of Trade Disputes during the Month.

Number and magnitude.—The number of trade disputes reported to have been in existence in Canada during May was thirty-four, an increase of twenty compared with April, and thirteen, compared with May, 1910. About 212 firms and 13,007 employés were involved in these disputes, 189 firms and 4,038 employés having been involved in new disputes.

Loss of time in working days.—The loss of time to employés through trade disputes was approximately 299,400 working days, compared with a loss of 202,275 days in April and 71,830 days in May, 1910.

Trades affected by new disputes.—The following table shows the trades affected by new disputes and the number of employés in each group of trades:

Trades.	No. of disputes.	No. of employés.
Building	13	1,497
Metal	6	787
Clothing	1	60
Food and tobacco preparation	1	.....
Railway service	3	1,429
Transportation	2	265
Total	26	4,038

Localities affected by new disputes.—The new disputes of the month took place in the following provinces:

Province.	No. of disputes.
New Brunswick	2

Causes of disputes.—The following were the principal causes of the disputes of the month:

Cause.	No. of disputes.
For higher wages	17
For higher wages and shorter hours	1
For higher wages and recognition of union	1
Against reduction in wages	2
For shorter hours	1
Dispute between unions	1
Against piece-work system	1
Unclassified	2
Total	26

Methods of settlement.—Of thirty-four disputes in existence during the month the termination of twenty-one was reported to the Department, leaving thirteen still unsettled. Three disputes were settled of conciliation, ten by negotiations between the parties concerned; in four cases work was resumed without negotiations; in three the places of the strikers were filled, and in one the method of settlement was not reported.

Results of disputes.—Of the nineteen disputes of which the results were reported during the month, eight terminated in favour of the employers, seven in favour of the employés; and in four, compromises were effected. In two disputes that were terminated the results were not reported.

Disputes which Commenced Prior to the Beginning of the Month.

The trade disputes of previous months which were still in continuance during May were strikes of coal miners, at Springhill, N.S., in Alberta and Eastern British Columbia, and at Bankhead,

Alta., carpenters and joiners at Vancouver, B.C.; painters at Port Arthur and Fort William, Ont.; patternmakers at Peterborough, Ont.; pulp mill hands at St. George, N.B.; and lockout of carpet weavers at Toronto, Ont.

Settlement of Strike of Coal Miners at Springhill, N. S.

On May 27, the strike of coal miners at Springhill, N.S., which had been in existence since August 10, 1909, was declared off. The principal demands of the men were: the recognition of the United Mine Workers of America; the adoption of a schedule of prices involving an increase in wages, and a change in the "docking system." The dispute had been referred to a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, and the Board had been unable to effect a settlement. Until the end of the year 1909, the mines were completely closed down, but since the beginning of 1910 they have been operated to a limited extent. Late in 1910, the property concerned was bought by the Dominion Iron and Steel Company, but the change in ownership did not immediately terminate the dispute. During May, negotiations for a settlement were commenced through the medium of Honourable G. H. Murray, Premier of Nova Scotia, and at the instance of the employés, with the result that a settlement was effected as indicated in the following message received by the Minister of Labour on May 29 from Mr. J. H. Plummer, President of the Dominion Iron and Steel Company:

"I am glad to be able to advise you officially, strike at Springhill has been abandoned. The men are returning to work on statement from us to the Premier of Nova Scotia, as to our intentions in regard to work and wages and without recognition of their union. They have accepted a necessary reduction in miners' wages, of ten per cent., which gives us some hope of being able to operate the collieries at reasonable cost. While the Company's position has been fully maintained, we have taken every precaution not to make it hard for the men to return."

It was subsequently reported by the Company that the terms of settlement were as follows:

1. All men will be taken back to work as soon as places can be found for them. It is confidently believed that the majority of the men can be provided with work within forty-five days, and every reasonable effort will be made on the part of the Company to accomplish this sooner.

2. That the award of the Longley Board, in regard to the docking system will go into effect on June 1, but this can be mutually adjusted after trial, if considered desirable.

3. There will be no reduction in the wages of the day hands, in and around the mines, in the rate paid prior to August 10, 1909, and any advances given in the schedule dated January 26, 1911, shall remain in force.

4. That the reduction of fifteen per cent. announced by J. R. Cowans and authorized on January 20, 1911, by the Dominion Coal Company in the rate paid coal producers immediately prior to August 10, 1909, be reduced to ten per cent., and in any place of the mine where, owing to change of conditions in the coal, a cutter is unable to earn his average wage, fair consideration will be allowed, and such consideration may be altered, from time to time, to meet conditions as they arise.

5. Coal cutters shall not be required to carry timber or other material necessary to work with at the working face, such material to be supplied at the most convenient place near the working face of the board or pillar by the Company, except in special cases, or cases of emergency.

6. Every man will be accorded his right to present any just grievance to his immediate superior, with a right of appeal ultimately to the President, and at any stage for that purpose he may be accompanied by one or two of his fellow workmen, from the section in which the alleged grievance exists.

About 1,000 men were still out when the settlement was reached and the loss occasioned by this dispute was extremely heavy, the town of Springhill being burdened with a large debt.

Strike of Coal Miners in Alberta and Eastern British Columbia.

No settlement was reported in a strike of coal miners in Alberta and the Crow's Nest Pass District of British Columbia, which began on April 1, on account of failure to reach a new agreement, to replace one which had expired on that date. About 6,000 members of the United Mine Workers of America, and 1,000 non-unionists, employés of sixteen companies, were involved in this dispute.

Strike of Coal Miners at Bankhead, Alta.

No settlement was reported in the case of the strike of coal miners at Bankhead, Alta., who stopped work on April 21, on account of failure to reach a new agreement with their employers. One firm and about 550 men were directly affected by this dispute, and twenty, indirectly.

Lockout of Carpet Weavers at Toronto, Ont.

No settlement was reported in the case of a lockout of 114 carpet weavers which took place at Toronto, Ont., on March 26. In a report received from the Carpet Weavers' Association it was stated that the Toronto Carpet Manufacturing Company, which was involved in this dispute, was aware of the existence of a Carpet Weavers' Union, but had not shown disapproval of it prior to this dispute. It was claimed that on March 22, the firm sent for six weavers and told them they would be required to sign a document pledging themselves not to belong to any union. When the weavers heard of this from the six men, they sent a deputation on March 24, to ask if it applied to all of them. It was alleged that the firm had not taken any step to bring before them the document which the six men had been asked to sign. No settlement of this dispute took place during the month.

Strike of Pulpmill Hands at St. George, N.B.

No settlement was reported in the case of the strike of pulpmill hands which took place at St. George, N.B., on April 26, on account of the refusal of the employers to grant a demand for a reduction in working hours from thirteen and twelve hours per day, to an eight-hour day, and an increase in the minimum wages from fifteen cents to twenty-two cents per hour. It was stated by the employers that fifty men were involved in this dispute and two establishments were affected, one of them being in the United States.

Strike of Pattern Makers at Peterborough, Ont.

On April 18, a strike of pattern makers employed with the Canadian General Electric Company took place at Peterborough, Ont., on account of the refusal of the Company to grant the demand for wages of $3.25 for a ten-hour day. It was stated by the Company that twelve out of the twenty-four men stopped work. On May 5, the dispute was terminated, a compromise as to wages having been arrived at.

NEW DISPUTES

Strike of Maintenance-of-Way Employés, Michigan Central Railway.[1]

On May 3, the sectionmen employed on the Michigan Central Railway between Niagara Falls and Windsor ceased work on account of orders issued by the Michigan Central Railway Company announcing a reduction of ten cents per day in their wages. Application having been made to the Department of Labour by the men for the establishment of a Board of Conciliation and Investigation, an officer of the Department was sent to St. Thomas to investigate and confer with the two parties involved with, the result that the dispute was terminated on May 26, the Company agreeing to take back the employés at the rates in force previous to the strike. It was reported that between 1,200 and 1,400 employés were involved in this dispute.

Strike of Structural Ironworkers at Toronto, Ont.

On May 1, a strike of structural ironworkers took place at Toronto, Ont., on account of the refusal of the employers to grant an advance from thirty-five cents to forty cents per hour in wages. It was claimed by the men that the advance was requested on the grounds that they had only nine months work in the year, and that their wages averaged $13 a week. The hazardous nature of the work was given as another reason for the demand. It was stated that five firms and 200 men were directly affected, and three firms indirectly affected. Prior to the strike several conferences had been held between the two parties, but they could not arrive at an agreement. One firm employing fifteen men granted the increase demanded,

[1] A further account of this dispute is given in a special article on another page of this issue of the *Labour Gazette*.

On May 31, the strike was declared off, and work was resumed on the following day, on the terms prevailing before the strike.

Strike of Bridge and Structural Ironworkers at Hamilton, Ont.

On May 1, a strike of about fifty bridge and structural ironworkers took place at Hamilton, in which two firms and fifty men were involved. The cause of the dispute was the demand for an increase in wages from thirty-five cents to forty cents per hour. During the month conferences were held between the employers and their employés, but without result. On May 31, the strike was declared off, and work was resumed the following day on the terms prevailing before the strike.

Strike of Iron Moulders at Toronto, Ont.

On May 4, a strike of iron moulders and coremakers took place at Toronto, Ont., on account of the refusal of twelve firms to grant a demand for an advance in wages from $2.90 to $3.15 per day for moulders and from $2.65 to $3 per day for coremakers. It was reported that about 270 men were involved in the dispute. On May 12, a settlement was reached with eleven of the firms involved by which the moulders were granted $3.10 per day and coremakers $3.00 per day. The remaining firm would not grant the increase, and as a result thirteen men were still out at the end of the month.

Strike of Carpenters and Joiners at Hamilton, Ont.

On May 1, a strike of carpenters and joiners took place at Hamilton, Ont., in which it was reported that about 300 men were involved. The cause of the dispute was a demand for an increase in wages from thirty-five to forty cents per hour, and signed working rules. During the month between thirty-five and forty contractors signed the agreement presented by the men, but about forty strikers were still out at the close of the month. Members of the Contracting Builders' Association declined to sign the agreement, but offered an increase from thirty to thirty-seven and one-half cents per hour. While the dispute was in progress a number of the strikers left Hamilton and sought work elsewhere.

Strike of Carpenters at Welland, Ont.

On May 2, a strike of carpenters took place at Welland, Ont., on account of the refusal of the contractors to grant the demand for a minimum wage of thirty-five cents per hour, with a nine-hour day, the former rate having been thirty cents per hour. About fifteen firms were involved in this dispute. It was claimed by the men that during the month ten out of the fifteen employers agreed to a new scale of wages, and that nearly all the men were working at the increased rate, but on the other hand, it was claimed by the employers that no large contractor had accepted the terms of the union, and that many men were still idle.

Strike of Carpenters at Victoria, B.C.

On May 1, a strike of carpenters took place at Victoria, B.C., in which it was reported that about fifty firms, and 800 men were involved. The cause of the strike was the refusal of the firms to grant the demand for an increase in wages from $4.00 to $4.50 per day of eight hours. After negotiations between the parties concerned a settlement was effected on May 16, in which the men were granted an increase of twenty-five cents per day up to July 31, and after that date an additional twenty-five cents per day, making the wages $4.50 per day.

Strike of Builders' Labourers at Berlin, Ont.

On May 12, a strike of builders' labourers took place at Berlin, Ont., on account of the refusal of the employers to grant a demand which they had made on May 1, for an increase of five cents per hour. The employers offered an advance of two cents per hour, but this was

refused as the men claimed they only worked eight hours a day. The employers then offered to pay them at the old rate of twenty cents per hour with a nine-hour day. This was also refused. About sixty-five employés were directly involved in this dispute and the same number of masons were indirectly affected by it. No settlement of the dispute was reported during the month.

Strike of Plumbers, Tinsmiths, and Roofers at Quebec, Que.

On May 1, a strike of plumbers, tinsmiths, and roofers took place at Quebec, in which it was reported that six firms and fifty-eight men were directly, and three firms indirectly affected. It was stated that the cause of the dispute was the demand for an increase in wages of five cents per hour, notice of which had been given by the National Union of Plumbers and Roofers three months previously to take effect May 1. On May 15, settlement was effected through the Conciliation Committee of the National Trades and Labour Council, the men accepting an increase of ten cents per day.

Strike of Stonecutters and Masons at Kingston, Ont.

A strike of stonecutters and masons took place at Kingston, Ont., during May, in which two firms and from fifty to sixty men were reported to have been involved. It was stated by the Stone Masons' Union that the dispute was due to the claims made by the two unions of Stonecutters and Masons, for the right to do the same class of work, namely, corners, jambs, and ringstones. It was claimed by the stonecutters that they made a proposition that the matter be left in the hands of the contractors who might hire stonecutters or masons to suit themselves. The masons, however, would not agree to this proposal and no definite settlement of the dispute took place during the month.

Strike of Marbleworkers at Winnipeg, Man.

On May 1, a strike of marbleworkers took place at Winnipeg, Man. According to a report received from the Marbleworkers' Union, six firms and thirty-five men were involved in the dispute. According to them, the causes of the dispute were: the demands for recognition of the Union, an increase in wages; mechanics asked $4.50 per day of eight hours and helpers and polishers $2.80 per day of eight hours. It was alleged that the local union sent representatives to the employers asking for a meeting, and they were ignored. It was stated by one of the firms involved that the strike arose because the men wanted the employers to recognize their union. It was further stated that all the men returned to work on May 8, on the terms existing before the strike. In this report it was stated that there were approximately sixteen employés involved.

Strike of Freight Handlers at Hamilton, Ont.

On May 1, a strike of freight handlers employed on the Canadian Pacific Railway and the Toronto, Hamilton and Buffalo Railway took place on account of the refusal of the Company to grant the demand for an increase in wages from sixteen cents to twenty cents per hour. It was stated by the Company that about twenty-nine men were involved in this dispute. No definite settlement of this dispute was effected, but by May 5 the Company was reported to have filled the places of the strikers with new men at sixteen cents per hour, the strikers in the meantime having found other employment.

Strike of Longshoremen at Toronto, Ont.

A strike of about forty longshoremen took place at Toronto on May 10. It was stated by the Merchants' Mutual Line that the dispute arose because they were having work done by a Stevedore Company instead of employing the men direct

Structural iron workers	Hamilton, Ont.	For increase in wages from 35 to 40 cents per hour	2		50				"	1	"	31	Strike declared off, work resumed following day at old rate.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where after the declaration of a strike, some of the original strikers have returned to work or had their places filled with new hands, or where establishments affected have found that for either of these reasons, or both, or for the other causes, their business is no longer seriously affected. In such cases while, in one sense, it may be true a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interests of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table therefore, includes mention only of such disputes as during the month or at its termination affected, to an appreciable degree, the carrying on of the industrial or business operations of the firm or establishments concerned. Mention moreover, is not made of disputes involving less than six employés, or of less duration than 24 hours.

DISPUTES WHICH BEGAN DURING THE MONTH.

Occupation.	Locality.	Alleged Cause or Object.	No. of Firms or Establishments affected.		Approximate No. of Employés affected.				Date of commencement.		Date of termination.		Result.
					Directly.		Indirectly.						
			Directly.	Indirectly.	Males.	Females.	Males.	Females.					
Iron moulders	Guelph, Ont.	Men alleged cause was: Reduction in piece-work prices; Company said men objected to long hours	1	.....	32	.....	35	.....	"	1	.....		No definite settlement, but Company claimed to have filled the places of strikers.

Teamsters	Victoria, B.C.	For increase in wages and shorter hours	20	.....	225	.....	.....	.....	"	1	"	2	A compromise; increase in wages granted but no change in hours.

themselves. On the following day work was resumed, the men accepting employment with the Stevedore Company.

Strike of Labourers at Smith's Falls, Ont.

On May 2, about 200 labourers employed by the Smith's Falls Malleable Castings Company declared a strike on account of the refusal of the employers to grant a demand for an increase in wages from $1.45 to $1.60 per day. Work was resumed on May 6, the strikers accepting the rate of $1.50 per day.

Strike of Iron Moulders at Guelph, Ont.

On May 1, a strike of iron moulders employed with the firm of Taylor, Forbes and Company, of Guelph, Ont., took place in which, according to the Company, thirty-two men were directly, and thirty-five indirectly affected. It was stated by the Company that the men objected to working three nights after six o'clock and one night until 6.20 p.m., but it was claimed by the men that the cause of the dispute was the reduction in piece-work prices which they allege would average $3 per week. The Company claimed that the average earnings of the men were $3.13 per day for nine hours work and 300 days in the year. No definite settlement took place, but the Company claimed to have paid off the strikers and to have procured new men to take their places.

Strike of Garment Workers at Hamilton, Ont.

On May 30, a strike of forty male and sixty female garment workers took place at Hamilton, Ont., on account of their objection to the introduction of the piece-work system by the Coppley, Noyes, and Randall Company. Work was resumed the following day on the promise of the employers that the piece-work system would not be introduced.

Strike of Furnace Tenders at Niagara Falls, Ont.

On May 1, a strike of furnace tenders employed with the American Cyanamid Company took place at Niagara Falls, Ont. The strike arose from the action of the Company in reducing the number of furnace tenders from three to two men per furnace, and at the same time increasing their wages from twenty-five cents to twenty-seven and one-half cents per hour. The men demanded thirty cents per hour. No definite settlement of this dispute was reached, but it was reported that in a few days the places of the strikers had been filled on the Company's terms.

RETAIL PRICES OF STAPLE ARTICLES OF

The accompanying table sets forth the retail prices prevailing on, or about, the fifteenth day of the month pre-
living in the leading centres of industry throughout Canada.

The list of commodities includes twenty-eight varieties of food, with fuel and coal oil. In addition a statement
usually occupied by workingmen.

The exact quality for which the quotation is given is set forth in the case of each commodity, and every care
may be available for purposes of comparison.

The list of localities includes nearly every place having a population of 10,000 people, and is representative of
The quotations contained in the table have been furnished by the correspondents of the *Labour Gazette* in the
the Department.

milling elevators in Ontario, and 1,867 elevators at interior points in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia. There are also twenty-four known as eastern transfer elevators, their combined capacity being 20,535,000 bushels. The estimated grain production in Canada for 1910 was as follows:—Wheat, 145,991,418 bushels; Oats, 286,781,592 bushels; Barley, 42,899,672 bushels; Flax, 29,261,607 bushels Rye, 2,057,027 bushels; Pease, 6,821,507 bushels; Buckwheat, 8,536,507 bushels; making a total production of 522,459,421 bushels, compared with the grand total of 590,167,074 bushels in 1909. Comparing the last two years, there was a decline of nearly two million bushels in

the production of wheat; of over twenty million in oats; and nearly six million in barley; while there was an increase in the production of over five and one-half million bushels in flax; about 800,000 bushels of rye; and about 270,000 bushels in buckwheat. Compared with other countries in 1910, Canada ranked seventh place in the production of wheat; fifth in the production of oats, and ninth in the production of barley. The quantity of wheat exported from Canada in 1910 amounted to 49,741,350 bushels, which was the largest on record, being over 600,000 bushels more than in the previous year. Of this quantity, 46,589,228 bushels were exported to Great Britain. There was a large increase in the quantity of wheat flour exported from Canada, the figures being 1,738,038 barrels in 1909, and 3,064,028 barrels in 1910.

Insurance Statistics.

Abstract of Statements of Insurance Companies in Canada for the year ended December 31, 1910 (subject to correction). Ottawa: King's Printer, 1909, pages 103.

The statistics of fire insurance in Canada during 1910 show that the cash received for premiums by Canadian companies amounted to $4,316,163, compared with $3,764,341 in 1909. The premiums received by British companies amounted to $10,243,235 in 1910, compared with $9,720,997 in 1909; and premiums received by American Companies amounted to $4,148,489 in 1910, compared with $3,564,126 in 1909. The net amount of risk was $2,035,515,028.

The premiums for life insurance in 1910 amounted to $19,971,666, received by Canadian companies, an increase of $2,532,886 over 1909; received by British companies, $1,580,555, a decrease of $10,101, compared with 1909; and $8,239,486 received by American companies, an increase of $762,627 over 1909. The total life insurance in force in Canada during 1910 amounted to $29,791,707, an increase of $3,285,412 over 1909.

ONTARIO REPORTS.

Lands, Forests and Mines.

Report of the Minister of Lands, Forests and Mines of the Province of Ontario for the year ending October 31, 1910. Toronto: King's Printer, 1911. Pages 129.

In the report on Lands, Forests and Mines of Ontario, for 1910, it is stated that there are still considerable areas of land suitable for settlement in the Free Grant district. The number of locations during the year was 1,379 for 194,760 acres, and 946 locatees have earned and obtained their patents. The total number of Military Certificates for land grants issued to the end of October last was 13,993. Eighty-five location certificates were issued, and 300 new locations were made, bringing the total number of locations to 7,495. Ninety certificates were surrendered to the Crown for $50 each, and 650 certificates have been applied in payment for Crown Lands.

With regard to the mining industry, it is stated that it continues to expand. The total production of the silver and nickel mines of the Province since their opening in 1904 is estimated to have been from ninety-two to ninety-three million ounces. Last year, during the twelve months ending December 31, 1910, the nickel mines of the Sudbury region produced about 19,000 tons, valued in the matte at $3,860,000, in addition to about 9,400 tons of copper.

Vigorous development was undertaken at Porcupine and a branch of the Temiskaming & Northern Ontario Railway, it is stated, will be constructed into that district.

The total collections of the Department from all sources for the year were $2,951,428.58. Of this amount, $327,160.12 was derived from mining lands; $246,529.13 from royalties; $1,835,082 from woods and forests; $143,209.59 from supplementary revenue; $84,059.49 from mining licenses, and $109,662.99 from recording fees.

Serious forest fires were reported to have occurred in the territory west of Lake Superior during the year. The fire-burnt area was divided into small berths and the damaged timber was sold by the thousand feet, board measure. An important departure was made in respect to fire-ranging on licensed territory, by which licensees are made bear the entire cost of fire-ranging on licensed territory. During the season there were 427 fire-

rangers on licensed territory, and 288 rangers on forest reserves.

Women's Institutes of Ontario.

Report of the Women's Institutes of the Province of Ontario, 1911, Part II. List of Meetings and Speakers. King's Printer, Toronto, 1911.

The Superintendent of Women's Institutes in Ontario, in the report for 1911, states that there has been good progress in this movement. Evidence of the ever-widening field of work undertaken by the Institutes is shown by the greater variety of topics of general interest announced from year to year. There are at present organizations at 634 places, with a total membership of over 16,000. The attendance in 1909–1910 was 40,000. In addition to holding meetings at which papers on practical topics are read, libraries are being established, and school children are being encouraged to grow vegetables and flowers. Local councils are induced to spend money in beautifying streets, and child study was given more attention than formerly.

BRITISH REPORTS.

Conciliation in Trade Disputes.

Eighth report of the Board of Trade of proceedings under the Conciliation (Trade Disputes) Act, 1896; 1910, London, Wyman & Sons, 1911, price 5½d. Pages 104.

In the eighth report of the Board of Trade of proceedings under the Conciliation (Trade Disputes) Act of 1896, it is stated that during 1910 the number of cases in which action was taken by the Board of Trade under this Act was sixty-seven, the highest in any year since the passing of the Act. Of these sixty-seven cases, twenty-six were disputes involving a stoppage of work affecting in the aggregate about 190,000 workpeople. During the years 1896 to 1910, inclusive, 432 cases had been dealt with under the Act, of which 201 involved stoppage of work. The most important disputes in which action was taken by the Board of Trade during 1910 were those affecting coal miners in Northumberland and South Wales, cotton operatives in Lancashire and Cheshire, and shipbuilders in the employment of the members of the Shipbuilding Employers' Federation. An account of these disputes is given in the report. During the year, recourse was had in eight cases to the system of Courts of Arbitration established in 1908. In each of these cases the Court was composed of three members, viz., a chairman selected from the chairmen's panel, and two arbitrators; selected in five of the cases respectively from the employers' panel and the labour panel, drawn up by the Board of Trade. In the remaining three cases the arbitrators were selected from outside the panels by the parties themselves. Out of a total of 432 cases dealt with since 1896, joint applications were made in 278 cases. In ninety-five cases applications were made by the workpeople only, and in twenty-six cases by the employers only. In the remaining thirty-three cases the Board of Trade acted on their own initiative. During 1910, the number of joint applications was forty-four, or two-thirds of the total number of cases dealt with, while in thirteen cases applications were received from the workpeople only, and in two cases from the employers only. The total number of conciliation boards in existence at the end of 1910, so far as known to the Department, was 282. Of these, 265 boards deal with particular trades, and seventeen are district and general boards. In ninety-six agreements between employers and employés clauses are inserted providing that, in the event of failure to effect a settlement of a dispute locally, application shall be made to the Board of Trade for the appointment of an umpire, arbitrator, or conciliator.

Labour Statistics in the United Kingdom.

The Fourteenth Abstract of Labour Statistics of the United Kingdom, London, Wyman & Sons, 1911. Price, 1s., 4d. Pages 109.

The fourteenth abstract of Labour Statistics of the United Kingdom, issued by the Board of Trade, summarizes the statistical information contained in the fiscal publications of the Board of Trade and other Departments on principal matters affecting the working-classes. Comparative figures are given in the majority of tables and preliminary figures

for 1910 are given for the following subjects, among others: Employment, changes in wages and hours of labour, wholesale and retail prices, trade disputes, industrial diseases and accidents, and agriculture. New tables appearing in the abstract relate to Board of Trade Labour exchanges, census of production statistics, price of coal at the pit's mouth, and census of paupers in the United Kingdom.

The first section of the abstract deals with employment, production, exports and home consumption. Tables are given showing the index numbers of employment; and the percentage of unemployed in the principal trades; employment at coal and iron mines, iron and steel, tinplate and tin sheet works. This section also includes statistics of the work of Labour Bureaus in 1909, a summary of the preliminary results of the census of production, while other tables relate to the production of beer and spirits, the number and value of inhabited houses, receipts from railway goods traffic, the exports of coal, textiles and clothing, and the consumption of coal, pig iron, cotton, wool, wheat, meat, and certain dutiable articles.

The second section deals with wages and hours of labour, and shows the standard rates of wages and hours of labour at the beginning of 1911, in a number of the principal trades, together with the rates of pay of police constables and of seamen. Tables are given showing changes in wages and hours of labour for a series of years, wages and earnings of agricultural labourers in 1907, and the earnings in 1906 of workpeople engaged in the building, woodworking, textile and clothing trades, and in public utility services. Details are also given of profit-sharing schemes.

The third section relates to wholesale and retail prices, and includes the index numbers of wholesale prices for forty-five principal commodities since 1871, the prices of coal, iron and British corn.

The fourth section deals with trade disputes, and the work of permanent Boards of Conciliation and Arbitration. The tables show for the last ten years the number of disputes recorded; of workpeople involved, number of days lost; and statistics are also given of causes, results and methods of settlement.

The fifth section contains statistics of industrial diseases and accidents, the latter being classified according to occupations, sex, and nature of injury.

The sixth section deals with the principal associations of employers and workpeople. It includes statistics of the number of employers' associationss the number and membership of all trade unions, and the income, expenditure and funds of the 100 principal trades. Other tables in this section relate to workmen's clubs, friendly, building and loan societies.

The seventh section deals with the growth, housing, ages and occupations of the population. It includes tables relating to employment in factories, laundries and workshops.

The last section gives information as to workmen's compensation and savings banks.

Industrial Associations.

Directory of Industrial Associations in the United Kingdom for 1911, London: Wyman & Sons, Limited, 1911, pages 217. Price 11d.

The seventh issue of the Directory of Industrial Associations in the United Kingdom, for the year 1911, includes the following organizations: Employers' Associations, Trade Unions, Trade Councils, Free Labour Associations, Conciliation and Arbitration Boards and Joint Committees, Co-operative Associations and Friendly Societies. There are 1,119 employers' associations, comprising only those concerned with the employment of labour. The list of trade unions numbers 1,279 separate associations, of which 229 are national, 182 district, and 868 local. There are also 117 Federations of Trade Unions, 256 Trade Councils and four Federations of Trades Councils. Federations of Trade Unions are most numerous in the textile trades, in which there are forty-two out of 117, thirty-two being in the cotton trade alone. There are enumerated 281 conciliation and arbitration boards and joint committees, of which 164 are local, 105 district and twelve national. Co-operative societies number 2,997, of which 1,472 are of the retail stores type. Workmen's productive so-

cieties number 150. Agricultural societies and others connected with rural enterprise number 1,065, in addition to which there are 280 credit societies, many of which are wholly connected with agriculture. Among the agricultural societies, 387 are distributive, 354 productive, 174 small holding societies, sixty-two agricultural insurance societies, fifty-four egg and poultry societies, and four bee-keepers' societies. The list of friendly societies is restricted to the principal affiliated orders and the principal centralized and other societies. Of the former, seventy-three, and of the latter, 328 are enumerated.

UNITED STATES REPORTS.

Women and Children in the Silk Industry.

Report on Condition of Woman and Child Wage-earners in the Silk Industry; Volume IV, Washington Government Printing Office, 1911. Pages, 592.

The sixth volume of the Report on Condition of Woman and Child Wage-earners, in the Silk Industry in the United States, prepared by the Bureau of Labour, deals with the Silk Industry. For the purpose of this investigation, information was procured from 174 mills, of which 138 were located at Paterson, N.J., and thirty-six in Pennsylvania. The census of 1905 showed that Paterson had 190 out of the 624 silk manufacturing establishments, and Pennsylvania had 168. These two localities, therefore, cover half the total number in the country. Representative mills were chosen for the investigation, including some that showed the best conditions, others the worst, and others in which the average conditions prevailed. Each establishment was personally inspected by Agents of the Bureau, and enquiry as to the age of children employed showed beyond question that many young children under fourteen years of age, and some of fourteen and fifteen years of age, were reported one, two or three years older than the actual age. The total number of employés under sixteen years in the 174 establishments is given as 2,421, being eleven per cent. of the total number of employés. It is believed, however, that the number of children under the legal age was actually considerably in excess of these figures. Visits were made to the homes of 1,109 families for the purpose of investigation, and family schedules were drawn up representing from fifteen to twenty-five per cent. of the woman and child workers in the establishments investigated. These show that woman and child wage-earners of these mills were very largely from families with foreign-born heads, while those whose heads were native-born of foreign parentage also outnumbered the native-born families.

The report contains chapters dealing with Labour Force in the silk mills and the percentage of men, women and children, their occupations, and condition, and nationality, employment of children and their relative importance, their illegal employment, school attendance, and Child Labour Law of Pennsylvania, hours of labour; overtime, and night-work; earnings of employés; working conditions in the silk mills, processes and occupations, family conditions and amount and sources of family income; housing and living conditions in the localities where silk mills are situated. The report also contains statistical tables, showing the ages, conjugal conditions, nationality, earnings, working hours, family income, social and economic conditions of employés.

Wage-earning Women in Stores and Factories.

Report on condition of wage-earning women in stores and factories, Volume V., Washington, Government Printing Office, 1910. Pages, 384.

The fifth volume of the report on woman and child wage-earners in the United States deals with the wage-earning women in stores and factories. This volume is limited to women's employment in stores, mills, manufacturing establishments, as waitresses in hotels and restaurants and similar employment, but does not include stenographers, book-keepers, trained nurses, &c. It is also limited to the Cities of New York, Chicago, Philadelphia, St. Louis, Boston, Minneapolis, and St. Paul. There are discussed in the report such subjects as earnings and opportunities for ad-

vancement of wage-earning women; social environment and their living conditions. Moral influences surrounding departmental-store employment are also discussed and the relation of wages to moral condition of department-store women. Considering the social environment of these women they are classified as follows: women keeping house; women living in private families; women living in boarding and lodging houses; women living in organized boarding houses.

The following statistical tables are given in the report:

1. Occupation, age, experience and economic condition of wage-earning women.
2. Number and per cent. of female wage-earners in department and other retail stores, factories, &c., earning each classified amount per week, by age.
3. Number of female wage-earners in department and other retail stores, factories, &c., living at home and not living at home, and per cent. of each specified amounts.
4. Occupation, age, experience, and economic condition of wage-earning women employed in packing houses, Chicago, Ill.
5. Conditions of employment in hotels and restaurants employing women as waitresses.
6. Age, experience, and economic conditions of waitresses in hotels and restaurants.

Child Labour Legislation.

Report on condition of woman and child wage-earners in the United States, in 19 volumes. Volume VI:The beginnings of child labour legislation in certain States; a comparative study. Prepared under the direction of the Commissioner of Labour, Washington, Government Printing Office, 1910. Pages 225.

The sixth volume of the report on condition of woman and child wage-earners in the United States deals with the beginnings of Child Labour Legislation in certain states. The report is divided into six chapters, dealing with the following subjects: (1) employment of children in the Colonies; (2) public opinion and child labour in the nineteenth century; (3) children in the Cotton Industry; (4) Child Labour Legislation prior to 1860 in the States of Massachusetts, Rhode Island, Connecticut, Vermont, New Hampshire, Maine, New York, New Jersey, Pennsylvania, Delaware, Maryland and Ohio; (5) Child Labour in four Southern States: North Carolina, South Carolina, Georgia, and Alabama; and (6) Conclusion.

The final chapter contains a summary in tabular form of Child Labour Legislation in four Southern States discussed in the report. Extreme difficulty in enforcing Child Labour Laws in the various states is pointed out; the chief trouble comes from the parents of children whose affidavit as to the ages of the children is in many cases the only requirement. In the New England States school attendance was emphasized. In Maine and New Hampshire certificates for school attendance were required and in the former state the teacher had to swear to the certificate.

Industrial Conditions of North Carolina.

Twenty-fourth annual report of the Department of Labour and Printing of the State of North Carolina, 1910 Edwards & Broughton Printing Company, Raleigh, 1910. Pages, 328.

The report of the Department of Labour and Printing of North Carolina for 1910 contains chapters on Farms and Farm Labour; Trades, Cotton, Woollen, Silk and Knitting Mills; Newspapers; Railroads and Employés, and an appendix containing the Labour Laws of North Carolina.

The reports with regard to Farms and Farm Labour are, on the whole, favourable. The highest average wages paid men was $25.11 per month, an increase of $1.00 per month over the previous year; the lowest, $15.28, an increase of forty-nine cents per month. The highest average wages paid women were, $15.53; an increase of seventy-seven cents per month; the lowest, $10.11, an increase of sixty-two cents per month. The average wages to children amounted to $8.76, an increase of thirty-two cents per month over the previous year. Ninety-three counties showed an increase in the value of land, and ninety-five reported that the fertility of the land was maintained.

In the Trades, little change was shown over the previous year, and it was stated that the wage-earners had not yet realized the favourable conditions prevailing for some years prior to 1907. With regard to Labour Union, it was reported that there has not been much agitation for organization, attributive partly to the fact that in most cases the number of employés in each establishment is comparatively small and consequently there is more personal contact between employers and wage-earners. There are reported to be 110 Trade Unions in the State, of which forty-seven give the number of their members as 1,730; this is estimated to be nearly sixty-eight per cent. of the persons engaged in the various trades in localities covered by the Unions.

Industrial Conditions in California.

The fourteenth biennial report of the Bureau of Labour Statistics of the State of California, 1909–1910; Sacramento, Superintendent State Printing, 1910, pages, 439.

The report of the Bureau of Labour Statistics of California for the years 1909–1910, deals with Child Labour; Sociologic work of the Bureau; Employment Agencies; Organized Labour; Farm Labour; Oriental Immigration; the Mining Industry, Petroleum, Lumber, and Water Power.

Among the suggestions for legislation contained in the Report, are a number relating to Child Labour, one of which seeks to limit the number of persons authorized to issue age and school certificates; the strict enforcement of compulsory education is recommended; it is also recommended that a specified pay-day and a method of payment for all classes of labour should be established, and certain private hospitals, particularly those of construction companies engaged in temporary work, should be established.

OTHER REPORTS RECEIVED.

Ontario.—Thirty-sixth annual report of the Ontario Agricultural College and Experimental Farm, 1910.

Sixth annual report of the Ontario Vegetable Growers' Association, 1910.

Fourteenth annual report of the Provincial Municipal Auditor for 1910.

Great Britain.— Shops Bill. Deputations received at the Home Office, since the introduction of the 1910 Bill.

Australia.—Commonwealth Bureau of Census and Statistics, Melbourne; Transport and Communication, Bulletin No. 4. Summary of Statistics for the years 1901 to 1910.

Bulletin No. 48, Commonwealth Bureau of Census and Statistics on Trade, Shipping, Migration, and Finance of the Commonwealth of Australia, for the month of December, 1910.

Bulletin No. 49, Commonwealth Bureau of Census and Statistics on Trade, Shipping, Migration, and Finance of the Commonwealth of Australia for the month of January, 1911.

United States.—Seventh biennial report of the Indiana Labour Commission, 1909–1910.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different Provinces of Canada.

ONTARIO CASES.

Damages Under Workmen's Act.

An action under the Workmen's Compensation for Injuries Act, for damages for injury sustained by plaintiff when in defendant's employment. Plaintiff, a labourer, was employed by defendant company, who were erecting a concrete dam on the Otonabee River, and was working at a mixer machine for making concrete. On Sunday, November 13, 1909, defendant's foreman ordered plaintiff to assist in constructing a cribwork of square timber, and whilst so engaged he slipped and fell from the wet and icy timber, sustaining the injury sued for. In his judgement on May 22 last, Chief Justice Mulock, who tried the action,

said: I think the case comes within the Act. There is no evidence to show that the accident was caused by want of care on the part of plaintiff. The injury he sustained is of a serious character, and I award him $1,500 damages and $10.50 arrears of wages owing to him, with costs of the action.

(Quinto v. Bishop.)

Alderman Unseated for Supplying Materials to City Contractor.

Upon a motion made before the Master in Chambers at Toronto, for an order setting aside the election of respondent (Homan) as alderman of the city of Niagara Falls, the following judgement was given on May 22 last. On October 19, 1910, a contract was awarded to Mr. Ferris for the erection of a fire hall in the city of Niagara Falls, to cost $5,000. The work was begun shortly thereafter, but is not yet finished. The relator (Slater) charges that the respondent has, as well before as since the election in January last, furnished supplies and material to the contractor, and that he has thereby vacated his seat as alderman. In the face of all the evidence as to respondent furnishing doors, brick, etc., it is difficult to see why Homan, the respondent, who was present, was not called to give evidence in explanation, especially to such a suggestive fact as that of Homan's name being on the door-frames, taken in conjunction with the numerous bills of materials, all made out to him, and receipted as paid by him. I, therefore, feel bound to hold that the relator has given sufficient proof of his allegations, and that the motion to have the respondent unseated must be allowed with costs. This decision has since been appealed against.

(Rex, on the relation of Slater, v. Homan.)

Damages to Miner.

Plaintiff, a miner, engaged in running a drill at the bottom of a shaft or winze, was seriously injured by the falling of a large rock from the third level upon his left hand, smashing and breaking the bones in the hand and rendering it useless. Plaintiff sued for $3,000 damages. In his judgement on May 26, last, Chief Justice Falconbridge, who tried the action, said: The plaintiff proved and the jury found failure by defendants to comply with subsections 17 and 31, of section 164 of the Mining Act of Ontario. Judgement for plaintiff for $2,500 and costs. Thirty days' stay.

(Kallee Sicen v. Temiskaming Mining Co.)

Recent Decisions on the Sunday Law.

Mr. Justice Middleton has recently given the following important decisions on the Sunday law:—

A case stated by G. T. Denison, P.M., for Toronto, under provisions of section 761 of the Criminal Code. Two informations were laid against defendant, a restaurant-keeper, of Toronto, one for selling cigars and the other for selling lagerine on Sunday, November 13, 1910. The defendant was found not guilty in each case. The Attorney-General for Ontario questioned the decisions on the ground that such sales are a violation of section 1, C.S.U.C., chapter 104, and secured a stated case to argue the point. Judgement: The cigars were sold by the accused as a merchant or tradesman, and not in the course of his business as keeper of a victualling house or restaurant and there was an offence against the Act. The lagerine was, as I understand the evidence sold in bottles to be taken from the premises, and, if this be the fact, for the same reason there was an offence against the Act. If sold for consumption on the premises, then the sale was within the scope of the business of a restaurant keeper, and there was no offence. In the result there should have been a conviction No costs.

(Rex v. Wells, two cases.)

A stated case similar to the above against the defendant, a tobacconist, who has a news stand in the Imperial Hotel, Toronto, who was charged with exercising his ordinary calling by selling cigars on Sunday, November 13, 1910. Judgement: The accused sells cigars as part of his ordinary calling. He is a merchant or tradesmen, and the sale

of the cigars was part of his ordinary calling and is a violation of chapter 104, and he should have been convicted. No costs.

(Rex v. Waldock.)

A stated case similar to the two above mentioned, against defendant, a restaurant keeper, for selling candies on Sunday, November 13, 1910. Judgement: Defendant sold candies as a merchant or tradesman, and not in the course of his business as a restaurant keeper. There should have been a conviction. No costs.

(Rex v. Aldeen.)

A similar stated case, at the instance of the Crown, by way of appeal from the dismissal of charge against defendant. Judgement: Samuel G. Roe was a druggist and sold cigars to all comers on Sunday. He was acquitted upon the ground that a cigar is a drug. No doubt tobacco has some medicinal qualities and may occasionally be used as a drug or medicine, but its normal use is as a luxury, more particularly when taken in the form of cigars. What the statute permits is the sale of "drugs and medicines", that is the articles which are in fact sold as drugs or medicine, and it was never intended to permit the sale of ordinary food and luxuries by showing by an expert that the thing sold or its main ingredient has some medicinal virtues. Alcohol has some medicinal properties, but the proprietor of an ordinary bar does not regard his business as the sale of "drugs and medicine." There was no evidence upon which it could be found that these cigars were sold as a "drug or medicine." It is claimed that in some cases a cigar is a necessity. In each case it must be shown that what was done was, under the particular facts, a work of necessity or mercy, and even if it could be proved in any particular case that the sale of a cigar was either a work of necessity or mercy, it seems to me most improbable it ever could be either. It clearly cannot be asserted as a general proposition. I think there should have been a conviction. No costs.

(Rex v. Roe.)

Damages for Death of Husband.

In an action brought against the Grand Trunk Railway Company at the Spring Assizes at Brockville, on account of the death of an employé, by his widow, damages amounting to $1,500 were awarded, out of which $600 were awarded to the plaintiff, and $900 to her child. The husband of the plaintiff had been employed as a sectionman at Lyn Station and was struck by a train while at work in the above station yard on account of not being able to see approaching train owing to a dense fog. It had been contended by the Company that no case had been made out as the rules of the Company provided that the trains are allowed to run on opposite tracks and during fogs. When men are working on the track, it is left to their own prudence and safety to protect themselves. In delivering the charge, Mr. Justice Sutherland handed the jury the following questions, which were answered as follows:

1. *Q.* Was the death of the deceased the result of negligence on the part of the defendant Company?

A. Yes.

2. *Q.* If so, wherein did such negligence consist?

A. By the servants of the Company failing to do their duty by neglecting to switch back train onto right line at Lyn, and not carrying a headlight.

3. *Q.* Or was the death of the deceased the result of any negligence on his part?

A. No.

4. *Q.* If so, wherein did such negligence consist?

A. No answer.

5. *Q.* Could the deceased by reasonable care have avoided the accident?

A. No.

6. *Q.* If the fifth question is answered "yes", what could he have done to avoid it?

A. No answer.

(Graham vs. Grand Trunk Railway Company.)

An action for $5,000 damages was entered by the widow of an employé of the firm of J. Briggs & Son, of Brockville, for the death of her husband who

was killed while at work in the shop of the above firm. It was claimed by the plaintiff that the machinery was in an unsafe condition, the pulleys being untrue. The accident took place while the deceased was attempting to place a belt on a pulley with a stick.

The following questions were submitted to the jury who returned with the following answers:

1. *Q.* Were the injuries which occasioned the death of the deceased caused by any negligence of the defendants?

A. Yes.

2. *Q.* If so, wherein did such negligence consist?

A. In defect of pulley on main shaft; by defective way of adjusting belt, and by not having sufficient room for men while in the discharge of their duties, and for poor system of management.

3. *Q.* Or were the deceased's injuries caused by any negligence on his part?

A. No.

4. *Q.* If so, wherein did the negligence consist?

A. No answer.

5. *Q.* Could the deceased by reasonable care have avoided the accident?

A. We think not.

6. *Q.* If you answer the last question "yes", what could he have done to avoid it?

A. No answer.

(Kirkby vs. J. Briggs & Son.)

In an action against the Grand Trunk Railway Company brought by a widow for the death of her husband, damages were awarded for $2,500 to the plaintiff, each side to pay their own costs, this amount to include the insurance which the deceased was entitled to as a servant of the Company. The deceased who was engaged in the ash-pit was riding on the steps of the tender of a locomotive when he was caught by the corner of the fence enclosing cattle yard near the freight-shed at Brockville, resulting in his death a few hours after the accident.

(Sawyer vs. Grand Trunk Railway Company.)

Cases Under the Ontario Factory Act.

On June 2, informations were laid by the Ontario factory inspector before James Lagrois, of Rockland, and Peter Stewart, of South Indian, two of His Majesty's Justices of the Peace, charging the parents of six boys with permitting their boys, while yet under the age of fourteen years, to be employed in the mills at Rockland, contrary to the provisions of Section 38 of the Ontario Factory Act.

On the same date, informations were also laid against six persons designated as jobbers in these mills, for having employed these boys contrary to the provisions of Section 3 of the Ontario Factory Act.

Evidence was submitted by the inspector that he had from time to time, covering a period of four or five years, warned the parents of boys, and advised regarding the age when they might legally be employed, as well as the jobbers in these mills of their duty and obligations in regard to the employment of young persons whose ages might appear in any way doubtful, and had frequently dismissed children under age from these premises, with a very definite warning to the persons directly responsible for their employment.

Being convinced that the proprietors and management of the mills did not endorse or permit the illegal employment of children with their knowledge or consent, and satisfied that parents and jobbers had been instructed to observe the law, the inspector proceeded directly against the persons responsible for the violation.

The cases were called by Crown Attorney Maxwell, of L'Orignal. Each of the defendants pleaded guilty to the charge laid against them. It being the first time these persons were before the Court on a charge of this kind, the magistrates decided to impose a nominal fine of $1 and costs in each case, except in the case of one parent whose evidence was not very satisfactory, he having evidently prepared a false certificate in order to secure em-

ployment for his boy; in his case a fine of $2 was imposed.

Warning was given to all that any future violations of this kind would be severely dealt with.

On May 16, an information was laid by the Ontario factory inspector against a rag and junk dealer in the city of Ottawa, charging him with keeping his factory and premises in an unsanitary condition, and not keeping his closets properly separated, in accordance with the requirements of the Factory Act.

The case was heard on the above date by Magistrate O'Keefe, who found the defendant guilty according to the evidence submitted, but before imposing a penalty, adjourned the case for a week, instructing the inspector to re-visit the premises at the end of that time and report to him what progress had been made towards complying with the requirements of the inspector under the provisions of the Factory Act.

The defence took some objection to the form of information laid, and to the jurisdiction of the inspector. The magistrate held that the inspector had jurisdiction over the premises under the provisions of the Factory Act.

In accordance with the above, the case was resumed again on May 23. The inspector reported that some progress had been made towards complying with the regulations, in fact some of the definite instructions had been reasonably complied with, but that there were yet certain important conditions to be observed. The magistrate then imposed a penalty of $5, including costs, and advised the defendant that if he did not keep his premises properly in future they might be considered a public nuisance, and instructed the inspector that if the place was not kept in a satisfactory manner, it would be his right and duty to bring him before the Court until such conditions and requirements were fully observed.

MANITOBA CASE.

Master and Servant—Contract of Hiring—Wrongful Dismissal.

In an action for damages for wrongful dismissal tried before Chief Justice Mathers, it appeared that the general manager of the defendants, a company incorporated by letters patent under the Manitoba Joint Stock Companies Act, engaged the plaintiff as general foreman of their quarrying works. There was a written contract of hiring, but no period of hiring was mentioned therein. The writing was simply to the effect that the plaintiff agreed to work for the defendants as foreman "for the consideration of $1,800 per year, payable in instalments of $150 per month." This was signed by the plaintiff and by the general manager, using the name of the defendants and his own name, and by three directors of the defendants, but the defendants' corporate seal was not affixed. The plaintiff began work on March 15, and continued until July 2 following, when he was summarily dismissed by the general manager, and remained without employment until the time of the trial of this action, which was brought for wrongful dismissal.

The Chief Justice held that the contract was binding on the defendants, being made by an official who, on the uncontradicted evidence, had a general authority for that purpose, following the decision in *McEdwards v. Ogilvie*, 4 Man. L.R.I; that upon the construction of the contract, the hiring was for a year; and that, upon the evidence, the defendants' defence of justification, by reason of neglect of duty and intoxication, failed. The Chief Justice also held, that the plaintiff's damage was limited to the balance that he would have earned if he had been retained in the defendants' employment to the end of the year; but if, in the meantime, he obtained employment of a similar kind, or might, by the use of ordinary diligence, have procured such employment, his damage would be reduced accordingly; that the burden of proof was on the defendants to show that he might have obtained other employment, but the defend nts had not shown that the plaintiff could have obtained other employment in Manitoba, and the plaintiff was not bound to accept an offer of employment in another province. Damages should be assessed as compensation only; and $1,000 was a fair sum for that purpose.

(Armstrong v. Tyndall Quarry Company, 16 W. L. R. 111.)

SASKATCHEWAN CASE.

Mechanics' Lien Act —Failure to show ownership or possession of person ordering materials, &c.

An appeal to the Supreme Court of the Province by the defendants, the Massey-Harris Company, from the judgement of the District Court Judge of Saskatoon, adjudging that the plaintiffs had a lien, under the Mechanics' Lien Act, for materials alleged to have been supplied to the defendant McK., for the erection of a building on lot 9, in block 7, in the village of Landis.

The plaintiffs, by their statement of claim, alleged that they furnished materials to the defendant McK., for the purpose of erecting a building on land described; that McK. erected a building on the land; and that they registered a lien under the Mechanics' Lien Act against the land and building, and thereby acquired a valid lien against the estate and interest of McK. in the lot. The claim was to enforce the lien against the building. The evidence showed that McK. ordered materials from the plaintiffs, to be delivered on the land described, that they were delivered there and went into the erection of the building; but the evidence did not show that McK. ever had any interest or estate in the land, except such possessory interest as was to be presumed from the erection of the building on the land. On July 3, 1909, the plaintiffs registered their lien. On November 30, McK. executed a chattel mortgage on the building in favour of the defendant company. By the statement of claim it was alleged that, on December 7, 1909, the plaintiffs became owners of the land, and this was not denied by the defendants. On December 17, McK. gave the defendant company a bill of sale of the building, and, on December 30, the defendant company removed the building from the land and sold it.

The Court held that the plaintiffs were not entitled to enforce their alleged lien.

Chief Justice Wetmore was of opinion, that a person in actual possession of land has a title thereto as against all the world except the true owner; and a person so actually in possession has a sufficient interest in the land to come within the meaning of "owner", as defined by paragraph 3, of section 2 of the Mechanics' Liens Act, 1907; but, in order to amount to an interest which would support a lien under the Mechanics' Liens Act, the actual possession or interest must exist at the time the materials were ordered, because section 4 of the Act provides that the work has to be performed or the materials furnished for the owner (as in this case), or the contractor or sub-contractor; and, there was no evidence to establish that, prior to the time that McK. ordered these materials, he had ever been in actual possession of the lands, nor that he was so, at the time he ordered them; there was no evidence that McK. had any interest or estate when he ordered the materials, and he could not be held to have acquired such an estate or interest by the wrongful act of causing the materials to be placed upon the property.

Mr. Justice Lamont was of opinion that, assuming that the plaintiffs had a valid lien on the lot and building, the action was not maintainable, because on December 7, the plaintiffs (as must be taken to be admitted) became owners of the land on which the building was then standing, and whatever interest they could claim in the property under their lien merged in their title as owners, no contrary intention appearing. If the building was part of the freehold when the plaintiffs acquired title, their action should have been for trespass *quare clausum fregit*, as the acquisition of the freehold necessarily carried with it all buildings that were a part thereof.

Mr. Justice Johnstone was of opinion that the plaintiffs wholly failed to establish an interest in McK. sufficient to satisfy the statute during the time the materials were being placed on the land, or even that McK. had ever been in possession of the land, rightfully or otherwise.

(Galvin Walston Lumber Company v. McKinnon, 16 W. L. R., 310.)

ALBERTA CASE.

Master and Servant—Injury to Servant.

Upon an appeal by the plaintiff to the Supreme Court of the Province, from the

judgement of Chief Justice Harvey dismissing the action, on the ground that there was no evidence of negligence on the part of the defendant, it appeared that the plaintiff was employed in the defendant's planing mill from October 1, to December 18, 1908, and on the last named date, when operating machine known as a joiner, had three fingers of his right hand injured so as to necessitate amputation. The plaintiff, to the knowledge of the defendants, was inexperienced in operating such a machine. He received some instructions from the foreman, by whom he was put to work at this particular machine on the day of his injury, he having previously worked at other machines. This was a dangerous machine.

The Supreme Court held upon the evidence, Mr. Justice Beck dissenting, that the judgement of Chief Justice Harvey dismissing the action, on the ground that no negligence was shown, should be affirmed.

Mr. Justice Stuart was of opinion, that the danger was one of which the plaintiff could judge as well as the defendants; there was nothing latent or concealed, and no increased danger was shown which would require a warning, under the principle which lays that duty upon the master.

Mr. Justice Simmons was of opinion, that the action failed because the cause of the injury had not been brought home to the defendants as arising out of any other than the danger ordinarily incident to the operation of machines of this nature, and that there was no exposure of the servant to any risk of which he was ignorant and of which the master had knowledge.

Mr. Justice Beck, who dissented, was of opinion that the evidence showed a dangerous machine, known to the defendants to be so; an inexperienced workman; dangers obvious, even to an inexperienced man, so long as the tables were level; dangers much increased when the tables were so adjusted as to be out of level; the machine was so adjusted; that, though the method of adjustment was explained, the increased danger was not explained; and so it was an accident happening to the workman while the conditions increasing the dangers existed. Upon these facts, there was a *prima facie* case of negligence which should have been submitted to the jury, if there had been a jury; and there was a reasonable probability that the plaintiff would not have suffered the injury, but for the negligence, that is, the want of warning and instructions on the part of the defendants, and that the consequent inference should be drawn in the absence of evidence to rebut it. *Young v. Hoffman Manufacturing Company*, (1907) 2 K.B. 646, and *Dominion Natural Gas Company v. Collins*, (1909) A.C. 640, were specially referred to. Appeal by plaintiff dismissed.

(Williams v. Western Planing Mills Company, 16 W. L. R. 13.)
